**BUNGALOW**—1 story and base, frame, \$2,500. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, W. E. Brown. The dwelling has been designed for a five-room house and will be erected in Melrose Heights. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room and dining room. There will be an open fire place with tile or brick mantel. Tile will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

**SANITARIUM**—2 story and base, frame, \$10,000. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, W. N. Downey. The building will be erected at the corner of 5th avenue and East 5th street, and will contain a number of private rooms, operating room and ward. Interior will be finished in pine with some hardwood floors. Tile wainscot will be used extensively. A central heating system and hot water supply will be installed. Exterior of the building will be covered with ship-lap and cement plaster on metal lath. Plans are complete and segregated figures will be taken at once.

**RESIDENCE**—1½ story and base, frame, \$2,500. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, R. A. McWilliam. The dwelling will be erected in the Fourth Avenue Heights and has been designed to contain five rooms, bath and sleeping porch. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be a large open fire place in the living room. Mantel will be of tile. Tile wainscot will be used in the bath room. Exterior of the house will be covered with cement plaster. Plans are being prepared and when complete the work will be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$3,500. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, Mr. Small. The dwelling will be erected on Newton avenue and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and hardwood. Oak floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room. An automatic water

heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

## SAN JOSE AND THE SANTA CLARA VALLEY

**RESIDENCE**—2 story and base, frame, \$30,000. Redwood City, San Mateo Co., Cal. Architects, Bliss & Paville, Balboa Bldg., S. F. Owner, Jacob Stern. The dwelling will be erected on property adjoining the home of Louis Stern, and has been designed for a modern country residence. There will be in the neighborhood of fourteen rooms, several baths and sleeping porch. Stables and a garage and hot house will also be erected. Interior of the house will be finished in pine and hardwoods. Hardwood floors will be used in all principal rooms. There will be a central heating system and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are nearly complete and will go out for figures in a week or ten days.

**APARTMENT HOUSE**—5 story and LODGE HALL—2 story and base, reinforced concrete. Cost not stated. San Mateo, San Mateo Co., Cal. Architect Will D. Shea, 244 Kearny street, S. F. Owners, Knights of Columbus Hall Association. The building will contain a large motion picture theatre on the ground floor and lodge rooms and offices on the upper floor. Interior will be handsomely finished in pine and hardwoods. There will be steam heat. Modern electric work will be installed in the theatre. Exterior of the building will be faced with cement plaster. Plans are being revised and new figures will be called for shortly.

**SCHOOL GYMNASIUM**—1 story and base, brick. Cost not stated. Palo Alto, Santa Clara Co., Cal. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, Leland Stanford, Jr., University. Preliminary plans are being prepared for the new gymnasium to be erected for the women of the University. The building will be similar in construction to the new gymnasium recently constructed for the men. Exterior will be faced with pressed brick. Steam heat and modern plumbing will be installed. Special apparatus will be installed. Working drawings are being prepared.  
CON AWARD

**MEN'S GYMNASIUM**—1 story and base, brick, \$100,000. Palo Alto, Santa Clara Co., Cal. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, Leland Stanford, Jr., University. Contractors, Larsen & Sampson, Crocker Bldg., S. F. Contract price not stated.

**RETAINING WALL**—Reinforced concrete. Cost not stated. San Mateo, San Mateo Co., Cal. Architects, Havens & Toepke, 16 Kearny street, S. F.

Owners, City of San Mateo. Bids will be opened by the City Trustees on October 15th for constructing a retaining wall of reinforced concrete from the Library to a point on the school property. The wall will protect the earth along the creek. Plans can be secured from the architects.

BRIDGE—Steel pony truss. Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans and specifications have been completed and approved for constructing a bridge on the Bodfish road over Uvas Creek. Bids are now being taken for the work and figures will be opened on October 19th. Plans and specifications can be secured from the County Surveyor at San Jose.

HIGHWAY WORK AND LIGHTING—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. At the meeting of the Board of Supervisors on September 28th the following important matters were gone through: Plans and specifications for improving the highway known as the Alameda were presented by the County Surveyor and on motion the Clerk directed to advertise for bids for said work; bids to be opened Monday, October 19th, 1914, at 11 o'clock a. m. Plans and specifications for lighting Willow Glen Highway Lighting District were adopted by the Board and the Clerk directed to advertise for bids for said work; bids to be opened Monday, October 12th, 1914, at 11 o'clock a. m.

BUNGALOWS 2, 1 story and base, frame, \$2,500 each. San Jose, Santa Clara Co., Cal. Architect, none. Owners, G. S. Baggott, 150 Terranie street, and A. M. Whiteside, 71 South 19th street, San Jose. Each of these dwellings will contain six rooms and bath. Interior finish will be of pine and redwood. Some oak floors will be used. Tile wainscot will be used in the bath rooms and kitchens. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

Byron-Bethany Irrigation District. Bids for the excavation of three miles of the main canal in the Byron-Bethany irrigation system have been opened and the contract awarded to Steel Bros., of Ceres, Stanislaus County, on their bid of 13c per cubic yard. Murray Bros., of Hughson, Stanislaus County, were the next lowest bidders, their bid being 15c per cubic yard. Work is expected to start immediately. The main ditch will be 6 to 7 feet deep, 7 to 12 feet wide at the bottom and 20 to 30 feet wide at the top. Digging will commence at Bruns Hill, about a mile south of Byron Hot Springs, and will extend southward toward Bethany for a distance of three miles. Branches will later extend to the Mountain House road. North of Bruns Hill will extend laterals to the Byron-Brentwood line, a distance of several miles. Water will be taken from the Italian Slough. A channel will be dredged about a mile and a quarter to the Bruns Hill.

## FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA.

IRRIGATION PROJECT—\$150,000.  
Lenare District, Fresno Co., Cal. En-  
gineer's name not given. Owners,  
Summit Lake Investment Co., Fresno.  
A. C. Cranor, Griffith-McKenzie Bldg.,  
Fresno, is representing the Summit  
Lake Investment Co., which owns some  
125,000 acres of land located about 28  
miles out of Fresno in what is known  
as the Lenare District. This tract is  
irrigated by 14 artesian wells and the  
excess waters are to be carried off in  
new canals and ditches. Mr. Cranor is  
to have entire charge of the construction  
work, which has been estimated  
to cost in the neighborhood of \$150,000.

WATER DISTRIBUTION—Cost not  
stated. Grass Valley, Nevada Co., Cal.  
Engineer's name not given. Owners,  
Nevada County Water Consumers' As-  
sociation, Grass Valley. The Nevada  
County Water Consumers' Association  
will hold an important meeting at the  
headquarters of the Chamber of Com-  
merce in this city on October 10th. At  
this meeting it is expected that some  
definite action will be taken on the  
system of water distribution to re-  
claim thousands of acres in the south-  
ern part of the county. Although the  
Pacific Gas and Electric Co. has seem-  
ingly passed the matter up, the asso-  
ciation is endeavoring to adopt some  
co-operative plan for the building of  
the canals. It is possible that the Su-  
pervisors will be petitioned to call an  
election to allow the people to vote  
irrigation bonds.

CANAL REPAIRS AND HEAD-  
GATES—Cost not stated. Fresno.  
Fresno Co., Cal. Engineer, none. Own-  
ers, Fresno Canal and Irrigation Co.,  
Fresno. More than seventy-five men  
will be put to work in a few days  
cleaning and repairing the 450 miles  
of canals controlled by the Fresno  
Canal and Irrigation Company. New  
headgates on concrete foundations will  
be installed in many places. The work  
will last several months. A section of  
the Enterprise Canal north of Clovis  
may be cemented to prevent flood  
damage.

CHURCH ADDITION AND ALTERA-  
TION—Frame construction. Cost not  
stated. Fresno, Fresno Co., Cal. Ar-  
chitect, A. C. Martin, Higgins Bldg., L.  
A. Owners, Roman Catholic Church.  
The work will consist of new interior  
plastering and decoration, art glass  
windows and painting. The nave will  
be extended, this portion of the build-  
ing being of brick with a slate roof.  
Plans are being prepared.

SCHOOL—2 story and base. Class  
C construction, \$30,000. Fresno, Fresno  
Co., Cal. Architect, J. Carl Thayer,  
Fresno. Owners, Fresno School Dis-  
trict. The building will be known as  
the Jefferson School and will contain  
six class rooms and an assembly hall.  
First floor and all corridors and stair-  
ways will be of concrete. Interior will  
be finished in pine with maple floors  
in the class rooms. A central heating  
system with oil burning equipment

installed. State blackboards  
to be used. Exterior of the building  
to be covered with pressed brick. Plans  
are being completed and figures will  
soon be called.

## BUILDING CONTRACTS.

days. Forfeit, none. Plans and spec-  
ifications filed.

## SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.

RESIDENCE—1 story and base,  
frame, \$4,000. Woodland, Yolo Co.,  
Cal. Architect, C. H. Miller, Dalziel  
Bldg., Oakland. Owner, Ralph Schlier.  
The dwelling has been designed for a  
six-room house with bath. Interior  
will be finished in pine and redwood.  
Hardwood floors will be used in the  
living and dining rooms. There will be  
furnace heat and open fire place. Man-  
tel will be of tile or brick. Tile wain-  
scot will be used in the bath room.  
Exterior of the house will be covered  
with cement plaster on metal lath.  
Plans are being prepared.

BUNGALOWS—2 1/2 story and base,  
frame, \$2,000 each. Sacramento, Cal.  
Architect, none. Owners, J. I. Jennings,  
719 J street, and H. C. Muddox, 2930 K  
street, Sacramento. These two dwell-  
ings will each contain five rooms and  
bath. Interiors will be finished in pine  
and redwood. Some oak floors will be  
used. There will be open fire places  
and tile or brick mantels. Bath rooms  
will have tile wainscot. Exteriors will  
be covered with rustic and cement  
plaster on metal lath. Plans are com-  
plete and in the hands of the owners  
who will do the work by Day Labor.  
Materials are now being purchased.

COURT HOUSE GROUNDS, ETC.—  
Cost not stated. Sacramento, Cal. Ar-  
chitect, A. R. Herold, Forum Bldg., Sacra-  
mento. Owners, Sacramento County.  
Bids opened by the Board of Supervi-  
sors for the improving of the north  
half of the Court House block show  
the following bidders and figures: E.  
M. Bernier, \$18,500; G. W. Martin &  
Son, \$16,546; Teicher & Ambrose, \$16,  
771; J. Lawrence, \$17,895.

HOTEL AND STORES—3 story and  
base. Class C construction, \$1,000.  
Stockton, San Joaquin Co., Cal. Ar-  
chitect, Henry H. Meyers, Kof Bldg.,  
S. P. Owners, R. M. W. & Son.  
The building will be erected on a corner  
lot and has been designed to con-  
tain a number of stores on the ground  
floor besides the hotel lobby. Upper  
floors will contain in the neighbor-

hood of 10 ft. x 10 ft. besides the baths. Interior roof will be of pine throughout. There will be steam heat and a hot water supply. Bath rooms will be finished in tile. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**PAVING PLANT** — \$9,000. Sacramento, Cal. Engineer, none. Owner, A. Teichert, Oehner Bldg., Sacramento. A new asphalt plant will be constructed at the corner of Oakes and Railroad avenues. The work will be done by Day Labor. Materials are now being purchased.

**GRIDGE** Timber construction. Cost not stated. Woodland, Yolo Co., Cal. Engineer, County Surveyor, Woodland, owners, Yolo County. Plans for the construction of the wooden bridge to span the new Woodland-Knights Landing road over the Knights Landing ridge cut in Yolo County have been submitted to the Knights Landing Drainage Commission for its approval. Bids will be called for on approval.

**CHURCH** — 1 story and base, frame, \$10,000. Lockeford, San Joaquin Co., Cal. Architect, James W. Plachek, Acheson Bldg., Berkeley. Owners, Lockeford Congregational Church. The building will contain a main auditorium, social rooms and Sunday school rooms. Interior finish will be of pine throughout. There will be furnace heat. Exterior of the building will be covered with rustic. Plans are now being prepared.

**RESIDENCE** — 1 story and base, frame and stone, \$5,000. Sisson, Siskiyou Co., Cal. Architect, James W. Plachek, Acheson Bldg., Berkeley. Owner, Head Forester Schuller, Sissons. The dwelling has been designed for an eight-room house with two baths. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be furnace heat and open fire places. Mantels will be of stone and tile. The wainscot will be used in the bath rooms. Exterior of the house will be covered with stone veneer and cement plaster. Plans are being prepared.

**TRUNK SEWER WORK** — Concrete, \$52,000. Sacramento, Cal. Engineer, City Engineer, Sacramento, owners, City of Sacramento. Bids will be opened on October 8th for constructing a trunk line sewer between the southern part of the city and the new city sump. Plans and specifications can be secured from the City Engineer.

**GAS PLANT IMPROVEMENTS** — \$50,000 to \$60,000. Woodland, Yolo Co., Cal. Engineer, none. Owners, Pacific Gas and Electric Co. Rather indefinite plans are being prepared by the officials of the Pacific Gas and Electric Co. to improve gas service in this place. The project is either to construct a new plant altogether or to lay a pipe line from Sacramento and discontinue the making of gas here. Whichever plan is put into effect the cost will be between \$50,000 and \$60,000.

**HIGHWAY WORK** Cost not stated. Marysville, Yuba Co., Cal. Engineer, County Surveyor, Marysville, owners, Yuba County. A contract for the M. M. and E. road improvement was adopted favoring the construction of a lateral from the north end of the State Highway from Marysville to Downieville and Smartsville, Nevada

City and Camptoville. The proposed route from Camptoville to Downieville would follow the North Fork of the Yuba River. A committee is urging that this lateral be built. James K. O'Brien of Smartsville and Commissioner Miller of Nevada City will be asked to serve with the joint committee.

**SCHOOL** — story and base, hollow tile construction, \$25,000. Folsom, Sacramento Co., Cal. Architects, George C. Sellon and Alden W. Campbell, 1005 K street, Sacramento. Owners, Folsom School District. Plans for this building have been revised and new figures are being taken. The building will contain eight class rooms and an assembly hall. Interior will be finished in pine with some maple floors. There will be a central heating system and oil burning equipment. Modern school plumbing will be installed. Exterior of the building will be faced with cement plaster. Plans and specifications can be secured from the architects.

#### Contracts Awarded.

**STREET PAVING** — \$27,500. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. Contractors, Clark & Henery, Stockton. Contract price, \$27,500.

**SEWER WORK** — \$22,000. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractor, J. W. Torrell, Chico. Contract price, \$22,000.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

**BRIDGES**—Steel and reinforced concrete, \$40,000 and \$75,000. Santa Barbara Co., Cal. Engineer, County Surveyor F. F. Flournoy. Santa Barbara owners, Santa Barbara County. A \$40,000 bridge, 100 feet long and 77 feet high to carry the State Highway across the waterway at El Guamada, is now occupying the attention of County Surveyor F. F. Flournoy. The structure has been designed by the State Highway Commission to enable them to keep to the grade along their survey. Plans for another bridge have also been started. This bridge will be 225 feet long and 80 feet high across the Arroyo Honda. The structure will cost in the neighborhood of \$75,000.

**HIGHWAY WORK**—\$1,000,000. Santa Barbara, Santa Barbara Co., Cal. Engineer, County Surveyor F. F. Flournoy, Santa Barbara. Owners, Santa Barbara County. The survey of the proposed road over the Najoqui hill from the State Highway at the foot of the Najoqui over the Alisal grade to the Santa Ynez Mission, connecting the Santa Ynez country with the State Highway, has been commenced. Engineer J. H. Kincaid has been sent out by County Surveyor F. F. Flournoy to take charge of the work. The road to be surveyed is eight miles long, over hills, and is one of the proposed roads to be built under the expected bond issue of \$1,000,000. The order for this survey was given by the Board of Supervisors before the bond issue was proposed.

**APARTMENT HOUSE**—4 story and base, Class C construction. Cost not stated. Los Angeles, Cal. Architect, W. J. Saunders, International Bank Bldg., L. A. Owner, F. W. Braun. The building will be erected at the corner of Hope and Fifth streets, covering an area of 61 by 65 feet. There will be a total of 76 suites in the building, arranged in two and three room apartments. All apartments will have wall beds and private baths. Interior will be finished in pine and elm. Plans provide for steam heat, a hot water system and automatic elevator. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

**CHURCH**—1 story and base, frame, \$10,000. Riverside, Cal. Architect, Lester S. Moore, 536 Blaine street, Riverside. Owners, Providence Congregational Church. The main auditorium will seat in the neighborhood of 200 people. Besides the auditorium there will be Sunday school rooms and social rooms. The building will cover an area of 61 by 65 feet. Interior will be finished in pine. There will be modern plumbing and electric work. Exterior of the building will be covered with rustic. Plans are complete and the work will be done by Day Labor.

**CHURCH**—1 story and base, frame and plaster, \$10,000. Santa Monica, Los Angeles Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owner, First Baptist Congregation. The building will cover an area of 50 by 60 feet, and will contain an auditorium seating 300

people besides 10 class rooms and pastor's study. Interior will be finished in pine. There will be art glass windows and ornamental plaster work. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

**RESIDENCE**—2 story and base, frame. Cost not stated. Hollywood, Los Angeles Co., Cal. Architect, Harold E. Dunn, Van Nuys Bldg., L. A. Owner, E. R. Dunbar. The dwelling has been designed in the Swiss chalet style and will contain nine rooms, two baths and sleeping porch. Interior will be finished in pine and hardwoods. Hardwood floors will be used in the living room, dining room and reception hall. Open fire places and tile and brick mantels will be used. Bath rooms will be finished in tile. Exterior of the building will be covered with shakes and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**RESIDENCE**—1 and 2 story and base, brick, \$75,000. Beverly Hills, Los Angeles Co., Cal. Architect, W. J. Dodd, Marsh-Strong Bldg., L. A. Owner, Roland Bishop. The dwelling will contain sixteen rooms, six baths and sleeping porches. A two-story frame garage will also be erected on the property. Interior of the dwelling will be finished in mahogany and white enamel. Hardwood floors will be used throughout except in the baths which will have tile floors and wainscot. There will be steam heat, a hot water supply and vacuum cleaning. Art glass will also be used. Exterior of the house will be faced with pressed brick. A large retaining wall and formal gardens will be constructed. Plans are now nearly complete and figures will be called for in a short time.

**BRIDGE**—Reinforced concrete construction. Cost not stated. Riverside, Riverside Co., Cal. Engineer, County Surveyor, Riverside. Owners, Riverside County. Bids will be received by the Board of Supervisors of Riverside County up to October 10th for the construction of a concrete bridge over the San Jacinto River near the San Jacinto Hot Springs in accordance with plans and specifications, which may be obtained from County Surveyor Fulmer.

## PORTLAND AND OREGON.

**CHURCH**—2 story and base, reinforced concrete, \$40,000. Portland, Ore. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, First Methodist Church. The building will be erected at the corner of 14th and Taylor streets, covering an area of 100 by 60 feet and will be of fireproof construction. The ground floor will be arranged for general club rooms and social parlors, while the upper floor will contain an auditorium to seat 600 people and a number of class rooms. Interior finish will be of pine and ornamental plaster. Art glass windows will be installed. There will be a central heating system and modern plumbing. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

**ARKBURY**—1 story and base, reinforced concrete, \$60,000. Eugene, Ore. Architects, Hunzicker & Prouse, Eugene. Owners, State of Oregon. The

building will cover an area of 160 feet square and will be of semi-fireproof construction with reinforced concrete walls, floor and roof slabs. Interior has been arranged for a large assembly hall and drill room, completely equipped gymnasium with swimming pool and showers and a number of private rooms. Interior finish will be of pine. A maple floor will be used in the drill room. There will be steam heat and modern plumbing. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

**SCHOOL**—2 story and base, reinforced concrete and brick, \$160,000. Portland, Ore. Architect, E. A. Naramore, Court House, Portland. Owners, City of Portland. The building will be erected at the corner of 20th and Hoyt streets and will be of semi-fireproof construction. There will be twenty-four class rooms, an auditorium seating 700 people, domestic science and manual training departments and a large gymnasium with swimming pool and showers. Interior will be finished in pine throughout with maple floors in the class rooms. There will be a central heating system, probably steam heat with oil burning equipment. Modern school plumbing will be installed. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and figures are now being taken. Bids will close on October 19th. Plans and specifications can be secured from the architect.

**SCHOOL**—2 story and base, brick, \$35,000. Athena, Ore. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, Athena School District. The building will cover an area of 78 by 128 feet and will contain eight class rooms, assembly hall, auditorium and teachers' rooms. Interior will be finished in pine with maple floors in the class rooms. Plans provide for steam heat and modern school plumbing. Slate blackboards will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

## SEATTLE AND WASHINGTON.

**COLD STORAGE WAREHOUSE**—6 to 8 story and base, Class A construction. Seattle, Wash. Engineers, Port of Seattle Commission, Seattle. Owners, City of Seattle. Bids for the construction of the proposed cold storage warehouse to be built by the Port of Seattle Commission have been opened and show the Pearson Construction Co. of Seattle the lowest bidder on their bid of \$164,895 for the eight-story structure and \$111,997 for the smaller building. It is expected that the contract will be awarded to them.

## STREET PAVING HELD UP.

**VALLEJO**, Soano Co., Cal.—Because of an error in the specifications, the paving of Georgia street from Colusa to Contra Costa, has been held up and the City Street Improvement Co. has asked the Council to release them from their contract. It appears that no reference was made in the call for bids for the cement sidewalks, not usually included in street work advertisements. New bids will be called for.

MANY EUROPEAN NATIONS TO BE  
REPRESENTED AT SAN FRAN-  
CISCO.

War Will Not Halt The Panama-Pacific  
International Exposition.

JAPAN ASKS FOR MORE EXHIBIT  
SPACE.

Plans Unchanged France Announces;  
Holland Increases Its Appropria-  
tion; Germany and Great  
Britain Will Be Represent-  
ed by Individual Ex-  
hibitors.

ITALY HAS ORDERED WORK UPON  
HER PAVILION AND EXHIBITS  
RUSHED.

San Francisco Special Correspondence.

Early in August in response to inquiries from all parts of the globe, the management of the Panama-Pacific International Exposition announced that the exposition would not be postponed. The development of events since that time, in their relation to the exposition, all tends to confirm the wisdom of that original decision. When the decision was made no word has been received from any European nation as to what effect the European war would have upon its plans. In the last six weeks, however, it has become evident that many European nations will be represented at San Francisco.

So rapid has been the progress in the construction of the city of foreign government pavilions and palaces to the west and south of the Palace of Fine Arts during the first six weeks of the European war that each of them appears to be making an extra effort to surpass its neighbors. Of the 40 foreign governments which have committed themselves to participate, not one has withdrawn. On the contrary many have applied for more exhibit space and some have greatly increased their appropriations. Spain, France, Italy, Holland, Japan, China, Sweden, and other nations in the war zone have officially notified the exposition that they will proceed with their buildings or exhibits despite the war.

**Construction Progressing Rapidly.**

The beautiful pavilions of Sweden, Bolivia, the Philippine Islands and Cuba are from 80 to 90 per cent completed. Those of Honduras and Canada—the latter a huge structure to be filled wholly with displays from Canada, and moving picture halls—are finished. The German Kali Syndicate building, constructed in part by the German government, is more than half finished, as is the Holland pavilion, which is set in a large garden. The

huge Chinese building, as well as the two mosque-like buildings of the Ottoman Empire, are nearly half completed. The three government buildings of Japan, to be set in a four acre garden, are being built in Japan, to be sent "knocked down" and erected between the palaces of Cuba, Denmark and France, one of them being an ancient temple. Australia and New Zealand are rushing their buildings, which are over 25% completed. The Chilean and Peruvian buildings will flank that of New Zealand, while Italy, Brazil and Argentina surround Turkey on three sides.

**Large Funds For Participation**

Within ten days after the war broke out Holland has increased its appropriation from \$100,000 to \$400,000 and ordered that construction be rushed upon the great Netherlands pavilion, immediately adjoining the Palace of Fine Arts.

The Persian display has been assembled at Teheran and is ready for shipment. Spain, which had not decided to participate officially before the war has since voted an initial fund, \$100,000, for participation.

England, Germany and Austria will be represented by individual exhibitors or by associations of exhibitors. Norway is proceeding actively with her plans and Denmark broke ground for her pavilion the first week in September. The Argentine Republic, in view of the new trade alignments between the American continents, has increased its appropriation from \$1,250,000 to \$1,750,000; Italy has ordered construction rushed upon her great pavilion. Since the war broke out important publications in France have written the exposition for illustrations and data.

The grand duchy of Luxemburg despite the war has prepared and shipped a marvelous exhibit of unnamed roses to compete for the \$1,000 prize for the Panama-Pacific International Exposition Rose. The Netherlands for its great government horticultural exhibit has asked for and has been granted 52,000 square feet of space and the plants are being assembled in seven different cities. In Holland under the supervision of government experts, Japan has asked for 8,000 additional square feet of exhibit space for her horticultural exhibit, making altogether in the competitive horticultural exhibit a total of 12,000 square feet. This in addition to a four acre garden. Japan will be represented upon a vast scale in all the exhibit palaces. Cuba has asked for additional space and is making elaborate arrangements for her \$250,000 display.

# Wybro

Veneered Panels that  
ARE good—order  
today from

## White Brothers

5th and Brannan Streets

San Francisco

There is absolute  
satisfaction in using  
Wybro Panels.

When you use WYBRO Panels in your work you have the absolute satisfaction of knowing that you are using the best made Panels.

WYBRO Panels look better, last longer, and always retain their smooth and even finish.

France cabled that her plans are unchanged. Aside from the action of the French Exposition Commission the Athletic Department of the exposition has received word from France that there will be a representation in the athletic events. Undoubtedly some of the entries on the athletic sports program will not be made and some of the art treasures intended for the Palace of Fine Arts will not be shown at San Francisco because of the war, but not by any means the majority or the most important of them, and there are many factors in the situation which will more than compensate for these losses.

Since the war broke out there has been a very sharp increase in the demand for exhibit space from the manufacturers of the United States, South America and the European nations not at war.

While there is now no doubt that many European nations will be represented at the exposition, it is apparent that in addition, there will be an unprecedented representation from South America and the Orient, as well as from Central American.

The exposition has become very important in an extraordinary economic situation. Manufacturers and exhibitors from South America and the Orient are preparing for a liberal representation. Cochin China, Indo China and Siam, the Philippines and many of the states of India and South Africa are beginning their preparations.

In regard to attendance (traffic managers are of the opinion that the European war is likely to increase travel to California in 1915 rather than to reduce it.

## Safety First In Concrete Floors

E. A. Bullos & Co. Explain the Uses  
of "Carbite," a New Product That  
is Finding Rapid Favor.

Abreast with the "Safety First" movement, the Engineering Department of this city is trying out a new cement finish called Carbite. The ninety foot safety station on Market street opposite Montgomery has its surface treated with this composition, and it stands today a specimen of one of the best designed stations in San Francisco, if not in the world. Carbite was used in this place to reduce to a minimum the danger from slipping upon a smooth wet surface, and it may be of interest to our readers to know

of this product which may be used on all horizontal cement areas and whose corrective properties greatly broaden the field of cement floors.

Carbite is a composition having carboride of silicon as a base. These particles are as hard as diamond dust and retain their original character after the mortar is set. The other particles of the composition permanently fill up the pores and make the surface absorption and dustproof.

Carbite is used as a dust coat when the floors are being laid. Just after the topping mortar has been leveled off, a quantity of Carbite is dusted over the surface, and this is floated and troweled in becoming an integral part of the mortar. It will form a surface that has somewhat the texture and consistency of an emery wheel and as it is impervious to absorption, will dry off much quicker than ordinary sidewalks will.

The manufacturers of Carbite, E. A. Bullis & Co., of the Merchants National Bank Building, state that their material may also be used for darkening sidewalks in place of lamp black; and this firm will gladly furnish samples and any additional information to interested parties.

Carbite was successfully used in the new twelve-story City Hall in Oakland. Among other places where this material may be used are floors in public buildings, railway platforms, loft buildings, power plants and garages, or in any other horizontal area where in it is desired to do away with the absorption, dusting and smoothness of darkened mortar of ordinary cement.

## UP AND DOWN THE COAST.

### WILL BUILD HALL.

CONCORD, Contra Costa Co., Cal.—Articles of incorporation of the Druid Hall Association of Concord have been filed with the County Clerk. The corporation has been formed with the purpose of building a new lodge building. The capitalization of the incorporation is \$10,000. The directors are: G. Bartolomei, John Cereghino, Galindo Crenna, Antonio Vasconi of Concord and M. Bolmi of Pacheco.

### BIDS FOR TRUNK LINE SEWER.

SACRAMENTO, Sacramento Co., Cal.—Specifications have been adopted by the City Commission for the big trunk line sewer to connect the drainage canal in the southern part of the city with the new city pump. Bids will be taken until October 8th. The work will cost in the neighborhood of \$32,000.

### IRRIGATION CONTRACT AWARDED.

BYRON, Contra Costa Co., Cal.—Bids for the excavation of three miles of the main canal in the Byron-Bethany irrigation system have been opened and show Steel Bros. of Chico, Stanislaus County, low on their bid of 13 cents per cubic yard. Work will start immediately.

### WANT SEWER EXTENSION.

VALLEJO, Solano Co., Cal.—Property owners north of George Street and east of the railroad have petitioned the city council for an extension of the sewer line to the city. In response to the petition, the City Engineer has been instructed to make

a survey and submit a report to the council at their next meeting.

### BRIDGE PLANS COMPLETED.

WOODLAND, Yolo Co., Cal.—Plans for the construction of the wooden bridge to span the new Woodland-Knights Landing road over Knights Landing ridge cut in Yolo County have been completed and submitted to the Knight's Landing Drainage Commission for its approval. On approval of the plans bids will be called for.

### BIG PIPE LINE TO GO UNDER CONSTRUCTION IMMEDIATELY.

Pipe Line From Coalinga Oil Fields to Martinez Refinery to be Constructed.

RICHMOND, Contra Costa Co., Cal.—The State Railway Commission has given permission to the Valley Pipe Line Company, a subsidiary corporation of the American Gasoline Company, to issue over \$1,000,000 in bonds to build a pipe line from the Coalinga oil fields to Martinez where a refinery is located. The work is to start immediately as the bonds have already been sold.

### LOW BIDDER FOR PLUMBING.

RICHMOND, Contra Costa Co., Cal.—M. Morton of this city was the low bidder for the installation of sanitary equipment in the Lincoln School. The trustees have taken the bid under advisement. A contract will be awarded at the next meeting.

### BENICIA TO IMPROVE STREETS.

BENICIA, Solano Co., Cal.—Plans and specifications have been completed for improving E-Fifth street, between Center and C streets; E-Fifth and O streets. Plans and specifications with complete information may be had from the City Clerk at Benicia.

### BIDS FOR STREET WORK.

CORONA, Riverside Co., Cal.—Bids for improving Sixth street from East Boulevard to Yorba street on the west side of town were opened by the Board of Supervisors and show Johnson, Shea Co. low at \$37,633.15. There were three bids submitted. All bids were referred to the City Engineer and Street Superintendent, who will report at the next meeting when an award of contract will be made.

### BRIDGE CONTRACT AWARDED.

STOCKTON, San Joaquin Co., Cal.—Bids opened by the Board of Supervisors for the construction of a bridge approach over the river at Belletta, show only two bidders. Eckfeldt & Curry, who were awarded the contract, bid \$1,479.50 and Byron Beckwith bid \$2,558.30.

### TO EXTEND SEWER.

ORLAND, Glenn Co., Cal.—The Trustees of this city have ordered the City Engineer to make complete plans and specifications for the extension of the sewer and water systems. As soon as plans have been prepared bids will be taken for the construction of the same.

### ALAMEDA WANTS MUNICIPAL BATHS.

SAN RAFAEL, Marin Co., Cal.—A representative of the City of Alameda has been here looking over the baths with a view of erecting municipal

baths at Alameda. It is thought that the Alameda structure will be constructed on the same lines as the one located here.

### ROAD TO BE BUILT BY DAY LABOR.

ANAHEIM, Orange Co., Cal.—The Board of Supervisors have rejected all bids for the construction of the Carbon Canyon road and a decision has been reached to build the road under the day labor system. The work will be under the supervision of County Surveyor McBride.

### STREET WORK AWARDED.

SANTA BARBARA, Santa Barbara Co., Cal.—The F. R. Ritchey Company of San Francisco has been awarded the contract to improve Valerio street and Grand avenue in Santa Barbara on their bid of \$17,919.63. The street will be paved with an asphalt pavement and 1-inch concrete base and a pavement of vitrified brick ten feet wide.

### TILE PLANT IN FRESNO.

FRESNO, Fresno Co., Cal.—J. P. Phillips, Plant Manager of the Dennison Block Co., manufacturers of interlocking tiles in North Sacramento, is investigating the plant of the Fresno Brick and Tile Company with a view of opening negotiations for its purchase. The local plant is anxious to have a branch in Fresno to handle its trade in that section of the State.

### BIG SALE IN GOVERNMENT FOREST NEAR HOBART MILLS.

1,100,000 Feet of Timber to be Cut.

HOBART MILLS, Nevada Co., Cal.—A contract has just been issued to the Sierra Nevada Wood & Lumber Company of Hobart Mills, which provides for cutting of 1,100,000 feet, board measure, of yellow pine; 600,000 feet of white fir, and 10,000 feet of red fir, from lands within the Tahoe National Forest.

A. E. Engebretsen of Lyonsville has contracted to cut 110,000 feet of yellow pine, white fir, Douglas fir and incense cedar from an area within the Lassen Forest adjacent to his present operations.

### FIRE AT LINDSAY.

LINDSAY, Tulare Co., Cal.—Fire destroyed half a block of the business district in this city last Wednesday. An explosion in the paint room in the basement of the Moore Department store caused the fire. The estimated loss is \$75,000 with insurance covering half the amount.

### WILL REPAIR DEPOT.

VALLEJO, Solano Co., Cal.—The Monticello Steamship Company will soon start remodeling their station at the foot of Maine street. The company is also planning to make extensive improvements on their steamer General Frisbee.

The Venezuelan Government has decided to use 1 per cent of the import duties collected for a fund for sanitary purposes.

Slot machines which automatically give receipts for coins that are dropped into them have been installed in several public places in Budapest by a savings bank to attract depositors.

# VALUE AND SUPPLY OF MINERAL PRODUCTS.

The value of the mineral production of the United States now exceeds \$2,500,000,000 a year, according to the United States Geological Survey. Though this value falls far below that of the country's farm products, the magnitude and scope of our mineral industry may be best measured by comparing our own mineral production with that of other countries, no one of which can compete with us in abundance or variety of mineral resources. The United States mines nearly 40 per cent of the world's output of coal and produced 65 per cent of the petroleum in 1913. Of the more essential metals, 40 per cent of the world's output of iron ore is raised from American mines, and the smelters of the United States furnish the world with 55 per cent of its copper and at least 30 per cent of its lead and zinc. These are the raw materials on which has been founded a great metallurgical industry, but on which can be built much more extensive chemical and metal-working industries.

Mercurial ointment not only will prevent firearm barrels from rusting, but also will loosen any lead deposits.

A Kansas City man has invented a turntable for garages which requires no pit nor excavating, an automobile being run upon steel runways mounted upon eight casters fitted to a circular track.

A Philadelphia electric company has made a novel advertisement by turning a powerful searchlight upon the streamers of steam that pour from the tall stacks of its centrally located power plant.

**No. 13670. Cement, iron work, and steel tubes.**—A cable from an American consul in a South American country stated that a person in his district desires 10,000 to 15,000 barrels of cement, 150 tons of iron work, besides steel tubes for waterworks. Those interested should get in touch with the person named in the cable as soon as possible.

## MAGNESITE IN 1913.

There was a decrease in the output of magnsite in the United States from 10,512 short tons, valued at \$81,096, in 1912, to 9,632 tons, valued at \$77,956, in 1913. The only production in this country was in California, as heretofore.

With the cutting off of the foreign supplies, due to the European war, however, the demand for the domestic product ought to increase greatly, especially in view of the new and shorter water route by way of the Panama Canal to the eastern United States. It is to be hoped that the sudden stimulus thus given to the domestic mining industry will build up a trade that will withstand the competition that must undoubtedly ensue when normal trade conditions are again established.

The demand for the domestic product is restricted to the Pacific coast and Rocky Mountain region, as it has been impossible at the present railroad freight rates to ship to the points of largest consumption in the East. In answers to inquiries addressed to them by the Geological Survey, many owners

of idle magnesite properties in the far West express the belief that with the opening of the Panama Canal they would be able to ship magnesite by sea to the east at a profit.

Magnesite is used principally in the manufacture of refractory substances, such as brick, furnace hearths, crucibles, etc., as magnesium sulphate, for digesting and whitening wood-pulp paper; in the crude form for making carbon dioxide; calcined and ground for the manufacture of oxychloride cement; and for miscellaneous applications in crude form or as refined magnesium salts. In the toilet and bath rooms of the rest rooms of the Panama-Pacific Exposition at San Francisco, magnesite flooring has been laid, about 5,000 square feet having been put down in each of the main buildings. The domestic product is used in this work.

A copy of the advance chapter from "Mineral Resources for 1913" on the production of magnesite in 1913, just issued by the U. S. Geological Survey, may be obtained upon application to the Director of the Survey, at Washington, D. C.

## THE CURTAIN RAISERS.

Behind the great war were the wars in the Balkan peninsula of 1912-13. At least they furnished the excuse, if not the real reason, for the present conflict.

To understand them the condition of the peninsula must be understood. The opening of the last century saw virtually the whole Balkan territory and the kingdom of Greece, under Turkish rule. The peninsula was inhabited by a diversity of races. The most important were the Bulgarians and Servians, kindred Slavic peoples, closely united by language and religion to the Russians. Another important group was the Rumanian, a Latin people, with a language allied to the French and Italian. There were other minor groups, including the Turks themselves, the Spanish-speaking Jews and Italians.

In the course of the century, as a result of much fighting, four small independent states emerged—Bulgaria, Rumania, Servia and Greece. The small state of Montenegro, inhabited by Servians, always had maintained its independence. In addition, Turkey retained territory with perhaps 6 million inhabitants—Bulgarians, Servians, Greeks and others. Long ago these states should have been united into a Balkan federation, like the Swiss federation. But the powers preferred not to see a strong nation in Southeastern Europe, and fomented jealousies to keep the states apart.

Then, in 1908, the reform party in Turkey by a successful revolution overthrew the sultan's despotism and established constitutional government. Unhappily it was possessed by the same insane desire to crush out all diversities within the empire that has marked Russian treatment of Poles and Austrian treatment of Servians. Its attempts to destroy the Albanian language in the schools of that country, coupled with harshness in its treatment of other Christian subjects in its domains, for the first time welded the Balkan states into an alliance.

The four states of Bulgaria, Servia, Montenegro and Greece, normally distrustful of each other and bitterly hos-

tile, entered a treaty under which they became a successful war. Turkey, which had declined and virtually excluded from Europe, retaining only Constantinople, and a narrow fortified strip of coast on the European side of the city. The Balkan states were in advance on a diplomatic and military spoils. But the outcome was to be the rise of Austria, which had its eyes on extending its empire through the Balkan Sea, and which did not enjoy the prospect of a powerful Balkan confederacy. So Austria insisted on dividing part of the conquered territory into the little state of Albania, under its own princeling.

As Albania was to have been divided between Servia, Greece and Montenegro, these nations insisted on having other territory to compensate them for their loss of Albania. Bulgaria objected to their stipulations, and presumably encouraged by Austria, permitted itself to be drawn into war with its previous allies. Rumania took advantage of the situation to take a hand and capture Bulgarian territory which it long had coveted. Bulgaria had borne the brunt of the fighting of the first war and was exhausted. Assailed on all sides, and with Turkey taking the opportunity to advance, Bulgaria was forced to capitulate. It saved a little of the additional territory captured from Turkey, but the bulk of it was divided between Servia and Greece, thus forming the "Greater Servia" to which Austria took such offense.

If the statesmanship of the Balkan states had been high enough to avert the second war, which the peoples themselves opposed, there might have today existed a Balkan federation with an army sufficient to deter Austria from appealing to arms to settle its dispute with Servia.

## AN EXAMPLE IN CITY PLANNING.

From The Kansas City Star.  
New York City has a committee on city planning. This committee is composed of the five borough presidents and the president of the board of aldermen of the greater city. Its particular purpose, or hope, at this time is to make the city a capable dwelling place for 12 million persons before this generation is succeeded.

That is a stimulating lesson for little big cities. It proves that "it is never too late to mend." It proves, indeed, that the more a city grows the more it must amend and pay for the shortsightedness of its youth.

If New York with 6 million people already and all pretty well crowded together, with real estate values up beyond the dreams of avarice can take up the neglected work of widening streets, creating open air spots and, for the rest of it, what is there to daunt Kansas City? Should selfishness of property owners be permitted now to interfere with this city's making itself capable and efficient for all the needs of all the people that are soon to make it so much greater a city?

## IRON-ORE OUTPUT IN 1913 LARGEST EVER.

Increase of Six Million Tons.

According to Statistics of the United States, published by the U. S. Geological Survey, the production and shipment of iron ore

In the United States exceeded those of any previous year. The crude iron ore mined in the United States in 1912 amounted to 61,980,175 long tons, compared with 57,140,117 tons mined in 1911, an increase of 8,839,290 tons, or 15.48 per cent. The iron ore shipped from the mines in the United States in 1912 amounted to 59,615,098 long tons, valued at \$139,905,558, compared with 57,017,611 long tons, valued at \$106,050,153, marketed in 1911—an increase in quality of 7,525,181 long tons, or 1.60 per cent, and in value of \$23,855,105, or 22.28 per cent. The average price of ore per ton for the whole country in 1912 was 2.19, compared with \$1.88 in 1911. These quantities of ore, both mined and marketed, include the iron ore used for fluxing other metallic ores at smelters in the Middle and Western States, but do not include the iron ore sold for the manufacture of paint. The iron ore marketed for paint in 1912 amounted to 16,950 long tons, valued at \$14,851. The ore reported as sold for fluxing purposes other than in the manufacture of pig iron amounted to 62,842 long tons, valued at \$235,588, in 1912, compared with 88,419 long tons, valued at \$211,315, in 1911. The domestic iron ore actually marketed for the manufacture of pig iron amounted in 1912 to 59,580,256 long tons, valued at \$130,669,970, compared with 56,929,165 long tons, valued at \$106,805,838, in 1911.

Iron ore was mined in 28 States in 1912, one more than in 1911. Idaho, Montana, and Nevada produced ores for fluxing only; part of Colorado's output was used for fluxing and part for pig iron; a little magnetic ore mined in Utah was shipped to a Salt Lake iron foundry for testing a new method of reduction, and the remainder of the Utah ore was used for fluxing. The other States produced iron ore for blast-furnace use only, except small quantities for paint from Georgia, Michigan, New York, and Wisconsin, which are, however, excluded from the above figures for iron ore.

The rank of the five States producing the largest quantity of iron ore—Minnesota, Michigan, Alabama, New York, and Wisconsin—remained unchanged in 1912, but there were a few changes in the relative rank of certain of the smaller producers.

#### Minnesota Produced Five-Eighths of Total

The Minnesota iron ranges are yielding at present considerably more iron ore than is produced in all the rest of the States together, having furnished 62.57 per cent of the total for the United States in 1912. The Lake Superior district, comprising all the mines in Minnesota and Michigan and those in northern Wisconsin, mined 52,377,362 tons in 1912, or 84.51 per cent of the total.

#### Production in the Lake Superior District.

The Lake Superior district includes the Vermilion, Mesabi, Cuyuna, Penokee-Gogebic, Marquette, and Menominee ranges, in Minnesota, Michigan, and Wisconsin. The Menominee range includes the Crystal Lake, Metropoli-ron, Iron River, and Iron Range areas. The Marquette range includes the Republic and Swains areas. The Baraboo and Iron Ridge areas of southern Wisconsin and the Spring

Valley area of northwestern Wisconsin are frequently also included in the Lake Superior district.

In addition to these ranges there are several non-ore districts on the Canadian side of Lake Superior, the principal ones of which are the Michipicoten, Aninikie, Matawin, and Atikokan.

The ranges in the United States which produced ore in 1912 were the Vermilion, Mesabi, Penokee-Gogebic, Marquette, Menominee, and Cuyuna, besides the Iron Ridge area. Much development work was done on the Cuyuna range, which made its first shipment in 1911.

#### Mesabi Range Largest Producer.

An analysis of the reported quantity mined in 1912 in the Lake Superior district shows that the Mesabi range mined 36,378,671 tons of iron ore, compared with 32,604,756 tons in 1911, an increase of 11.57 per cent; the Menominee range 1,997,216 tons, compared with 4,165,166 tons in 1911, an increase of 11.91 per cent; the Gogebic range 1,713,515 tons, compared with 3,926,632 tons in 1911, an increase of 20.80 per cent; the Marquette range 3,977,808 tons, compared with 3,545,012 tons in 1911, an increase of 12.21 per cent; the Vermilion range 1,536,115 tons, compared with 1,455,273 tons in 1911, an increase of 5.41 per cent; and the Cuyuna range, which in 1912 entered upon its third year as a shipper of ore, 744,067 tons, compared with 269,729 tons in 1911, an increase of 101.22 per cent.

The Mesabi range produced 69.46 per cent of the entire Lake Superior output and nearly 59 per cent of the entire production of the United States. The Menominee, Penokee-Gogebic, and Marquette ranges are next in importance, the Menominee producing in 1912 about 200,000 tons less than the State of Alabama, which is the next State in rank as a producer after Minnesota and Michigan. The Vermilion range, the fifth in importance of the six producing Lake Superior ranges, produced more ore in 1912 than New York, which is fourth in rank as a producing State.

#### SPECIAL OPENINGS FOR AMERICAN MERCHANDISE.

Owing to restricted trading with European countries, American consuls in the following cablegrams have indicated the lines of goods which offer opportunities for expanding the foreign trade of the United States:

**Auckland, New Zealand.**—Mercantile needs include drugs, chemicals, glassware, pianos, fencing wire, locomotives, crockery, enameled ware, printing paper, hardware, automobiles, aluminum and chairs.

**Calgary, Alberta.**—Principal articles which America may supply for Alberta iron, steel and metals, and manufactures thereof and paint.

**Victoria, Canada.**—Vancouver Island needs clocks, drugs, cutlery, optical goods, liquors, novelties, toys, barbed wire and wire netting, structural iron and steel, table and window glass, hardware, enameled goods, tin plate, and other goods.

**Shanghai, China.**—Generally desirable to assist Chinese exports by loans and banking facilities in order to re-suscitate business. Principal articles which the United States may supply or increase its sales of are dye stuff,

chemicals, paper, machinery, railway supplies, steel products, needles, enameled ware, electrical material, etc. The consulate general at Canton wires that import trade depends on export business and there should be greater demand for American railway supplies, machinery, electrical appliances, foodstuffs, canned fruits, piece goods. Shanghai and Canton both urge American representation on spot to study requirements. War rates favorable to American shipping; otherwise shipping is somewhat normal."

J. Heyerdahl-Hansen, commissioner to Norway representing the Norwegian-American organizations of the United States, has returned from Norway and announces that Norway's plans for participation in the Panama-Pacific International Exposition are well advanced. Norway has appropriated \$26,800 for a pavilion and \$13,400 for a battleship to join the international fleet to pass through the Panama Canal to the exposition grounds.

The largest insurance organization in America, the National Association of Life Insurance Underwriters, has chosen San Francisco as the 1915 meeting place. The meeting just adjourned was held in Cincinnati.

Sigma Chi, a national college fraternity with a membership of 16,000, has chosen San Francisco as the meeting place of its grand council in 1915.

While other crowns are tottering over seas a crown of 3,500 jewels is being prepared at the Panama-Pacific International Exposition. This crown is being placed on top of the "Tower of Jewels," 435 feet high. The steel work is being covered with these jewels and when all are in place there will be a total of 125,000 "Novagems."

Spain has just given assurance to the officials of the Panama-Pacific International Exposition that her participation in the exposition will proceed according to original plans and that the war will have no effect on Spanish participation.

**STREET WORK ORDERED BY THE SUPERVISORS.**

The following street work has been ordered by the Board of Supervisors:

28th street between Castro and Diamond, grading and constructing sewers; Roanoke, between Laidley and Chenery, construction of curbs, a 14-foot strip of basalt blocks and asphalt; Tenth avenue, between Lawton and Moraga, construction of curbs, seven-foot strip of basalt blocks and asphalt on the remainder; Lundy's Lane, between Esmeralda and Fair avenues, construction of sewers; 19th from Douglass, westerly, construction of sewers; Moraga, between 9th and 10th avenues, construction of asphalt roadway; 18 avenue, between Balboa and Cabrillo, construction of asphalt roadway; 19th avenue, between California and Lake streets, construction of asphalt roadway.

**RECLAMATION WORK TO START.**

FRESNO, Fresno Co., Cal.—A. C. Cranor of Fresno is representing the Summit Lake Investment Company, which owns some 125,000 acres of land located about 28 miles from Fresno in what is known as the Lenore District. This tract is irrigated by 14 artesian wells and the excess waters are to be carried off in newly constructed ditches and canals. The work will cost approximately \$150,000. Mr. Cranor is located in the Griffith-McKenzie Bldg., Fresno.

**BIDS FOR STREET PAVING.**

SAUSALITO, Marin Co., Cal.—Bids will be received until October 12th, for the construction of approximately 30,000 cubic yards of street paving. Plans are on file at the City Clerk's office.

**BIG DREDGER DESTROYED.**

WOODLAND, Yolo Co., Cal.—The "Sierra" dredger, which was being operated by the McMillan Company of San Francisco, and owned by the Miners' Union of San Francisco was destroyed two miles northeast of Knights Landing last Sunday morning. The dredger was valued at \$75,000 and was insured for \$50,000. The origin of the fire is unknown.

**BRIDGE WORK CONTEMPLATED.**

SANTA BARBARA, Santa Barbara Co., Cal.—A \$40,000 bridge, 400 feet long and 77 feet high to carry the State highway across the water at El Guamada, is now being considered by County Surveyor F. F. Flournoy. The bridge has been demanded by the State Highway Commission to enable them to keep the grade along their survey. Plans are also being prepared for a bridge 625 feet in length and 80 feet high to cross the Arroyo Honda. This structure will cost in the neighborhood of \$75,000. The Chamber of Commerce of Santa Barbara is now circulating a petition for bonding of the county for \$1,000,000, the money to be used in the building of roads.

**POSTPONE BOND ISSUE.**

MARYSVILLE, Yuba Co., Cal.—Fearing that the placing of the question on the November ballot would be confusing to voters, the Supervisors have decided to postpone the submission of the proposition of a \$287,000 bond issue for

the proposed road between Riego and Yuba City by way of Nicolaus, until next Spring when a special election will probably be called.

**BIDS WANTED FOR ROAD WORK.**

SAN JOSE, Santa Clara Co., Cal.—Sealed bids will be received by the Clerk of the Board of Supervisors until October 19th for improving The Alameda from the city of San Jose to Santa Clara in Road District No. 4, Santa Clara County. Henry A. Pfister is Clerk of the Board.

**ROAD PLANS ADOPTED.**

PALO ALTO, Santa Clara Co., Cal.—Plans and specifications for the paving of University avenue from the State highway to the Circle have been presented by the County Surveyor to the Board of Supervisors. Bids for the work will be opened at San Jose on October 5th. Plans and specifications with complete information can be had from the County Surveyor.

**PAVING CONTRACT AWARDED.**

STOCKTON, San Joaquin Co., Cal.—Clark & Henry have been awarded the contract for paving of Weber Ave. in this city. The contract price is \$27,500.

**BRIDGE BIDS WANTED.**

UKIAH, Mendocino Co., Cal.—Bids will be received by the Clerk of the Board of Supervisors at Ukiah until October 6th for the construction of a wooden bridge across Cold Creek. Plans, specifications and full information may be obtained from the Clerk of the Board.

**ROAD BOND CAMPAIGN.**

SACRAMENTO, Sacramento Co., Cal.—Plans for the campaign for the proposed bond issue of \$2,425,000 for good roads in Sacramento county are now being made by the Chamber of Commerce.

**PAVING CONTRACT COMPLETED.**

BAKERSFIELD, Kern Co., Cal.—The paving of D street from the city limits to Brundage Lane has been completed by Thompson Bros. of Bakersfield and Fresno.

**BIDS WANTED FOR TRUSS BRIDGE.**

RIVERSIDE, Riverside Co., Cal.—The Board of Supervisors will receive bids until October 7th for the construction of a combination truss bridge across the San Jacinto River at a point about two and one-half miles northwest of the city of San Jacinto. Plans and specifications may be obtained from the Clerk of the Board.

**TANK NEARING COMPLETION.**

TAFT, Kern Co., Cal.—The 2,000,000 barrel tank farm which is being erected between Buena Vista and Elk Hills by the Standard Oil Company is fast nearing completion. Forty three of the forty-eight tanks are now up and the greater number are receiving oil.

**BRIDGE WORK TO START.**

MARYSVILLE, Yuba Co., Cal.—The Clinton Fireproofing Company of San Francisco will soon start work on the new bridge to be constructed across the Yuba river at D street, according to a local newspaper.

# Efficiency and Advertising

by Lloyd C. Comegys

## The Greatest of Business Problems.

The greatest of business problems is the obtaining of NET PROFITS. All other matters are details toward the attainment of this end.

It is the object of the business man, and he is succeeding or failing in accordance with the amount of his NET PROFITS. That's what he is in business for.

In seeking to obtain NET PROFITS, certain ways have been learned to be more successful than others, and it is these MORE SUCCESSFUL WAYS, SPECIAL METHODS and DEVICES for attaining NET PROFITS that have been given the designation of EFFICIENCY.

**Efficiency is the Scientific Method of Securing Increased NET PROFITS.**

Efficiency is new. Very little of it has been written down in books. As a general tendency it is everywhere, but as a system of thought, it exists only in the minds of a comparatively small number of men.

Those in business, as owners or employees, who understand Efficiency, are inclined to keep this valuable new knowledge to themselves, just as the gold miner, who has struck a rich vein of yellow treasure, is inclined to be secretive about his good luck.

And there are only a few men, as yet, who are practicing as a profession, the installing of Efficiency in offices, business houses, plants and factories.

### What Efficiency Is NOT.

Efficiency is not a new name for an old truth so far as it relates to industry and to individual success. It is an absolutely new point of view in the business world.

It is not Expert Accounting for the reason that accounting deals only with records and not with methods.

It is not Economy, for the reason that mere saving is often the most suicidal of all business policies.

It is not Energy, for the reason that misdirected energy is the most universal of all industrial wastes.

It is not Slave-driving, for the reason that one of its main benefits is to elevate and profit the wage workers, not to degrade or oppress them.

And it is not System, for the reason that the most useless and wasteful actions can be done in the most systematic way. There can be no too much system, but there can be too much Efficiency.

Efficiency will get a greater percentage of results for you, without adding to expense, and will reduce costs without lessening results.

Efficiency is needed in the one-man business, as in the concern employing thousands of men. It is as important to the one, as to the other, to increase NET PROFITS.

LOOK INTO THIS SUBJECT OF EFFICIENCY.

It means greater NET PROFITS for YOU!

## Efficiency Methods.

As applied to business, and considering individuals only as one of the parts of business used to produce the NET PROFITS desired, Efficiency approaches the particular firm it is called in to assist from every angle, large and small.

Almost the first matter to be considered is the question of OVERHEAD CHARGES. This subject, though almost the controlling feature as to whether or not the firm is to make NET PROFITS—is probably the most neglected and wrongly handled of all business subjects. The subject is a difficult one and in consequence many avoid looking it squarely in the face, as soon as they have made a semblance of settling upon a percentage for their firm.

Efficiency takes hold of this subject and in a scientific way lines the facts about it up in connection with the other features of the business.

Another difficult problem is Salesmanship and the other one advertising. These are constructive and productive forces and the most valuable.

Here it is that Efficiency gains greater results without increased costs, and lesser costs without reducing results.

And the modern Salesmanager and Advertising manager approaches his work from an Efficiency standpoint.

## The Small Firm.

The small firm having less margin in the way of expense for a large office force, needs to utilize the time of its employees to the very best advantage. This means that without the employee working harder or longer, the results he produces may be made much greater, simply by a change of his methods of Work or the Facilities to work with. The small firm therefore needs EFFICIENCY Methods as much, if not actually more than the larger ones.

## What Trade Name Advertising can do as Efficient Sales Co-operation.

It can give general publicity to your trade name and goods in the locality you desire to cover, through the use of newspaper, magazine, program, mail and bill-board advertising. The results would come to you through the sales made by your representatives or selling-houses in those localities. Such advertising so establishes the character and value of your offerings or products as to largely relieve your selling-houses, representatives and salesmen from so establishing or informing regarding who you are and the general lines that you offer.

This leaves the salesmen or selling-houses free to devote their entire time to actual sales making and eliminates a large amount of waste effort on their part in connection with your offerings.

Advertising may be very profitably used in obtaining inquiries regarding your offerings and getting in touch with live prospects or those whose minds have already been directed or centered upon taking your proposition. These inquiries or leads to prospects may then be turned over to your representatives or salesmen, who thus can produce many times the results that they otherwise could if left alone to scatter their efforts in a general way.

### GOOD WILL.

The good will of a firm that is established through advertising coming directly from the house is the most valuable kind, in that it cannot be materially affected by the presence or absence of any particular salesman.

### ADVERTISING.

In plain words means explaining to possible customers of whatever you have to offer, who you are, and what you have to offer. Notice, I say to possible customers and it is right here where so much money is lost in advertising, even when it is properly done and contains real pulling or selling power. Be sure you are advertising to possible customers of your particular offerings and not to the general public or to those who would under most circumstances not want them. A trade magazine is one of the very best mediums for reaching the exact people in your line.

## Editorial Comment.

What a strange array of arguments the reactionaries offer to the public with reference to the coming State election. One day the press speaks of the vindictiveness of Governor Johnson towards all legitimate capital invested in the state. The next day it is a tirade against freaks and freak legislation; and then they turn around and claim that the Republican party is responsible for all this beneficent legislation and that they are the Republican party. So there it is. It is up to the people to decide who they believe to be the people with a sincere desire to have the state give every man an equal chance and who is capable of doing what they promise to do.

Forty-eight propositions for proposed laws and amendments are to be submitted to the people this fall on the ballot. Some of them are initiative and some are referendum propositions. Among the former are the prohibition amendment and the universal eight-hour law. Among the latter are the Redlight Abatement and the Blue Sky laws.

The Initiative measures are necessarily not administration measures. The referendum measures are laws that have been passed and held up in their operation by having the referendum clause invoked by petition. It will be necessary for every voter to read these propositions and study out how he intends to vote on each separate one.

Of many striking things said of the Kaiser from time to time, and revived during the present war, perhaps none is more interesting than this from Prince Bismarck, spoken after the dismissal of that able "pilot."

I pity the young man—he is like a young fox-hound that barks at everything, that smells at everything, that touches everything and that ends by causing complete disorder in the room in which he is, no matter how large it may be.

William is no longer young, and has grown more sedate. But his faculty for creating disorder evidently has not been diminished with years. —Sacramento Bee.

Miss Jane Addams has just spoken of the setback to social service in this country that the "explosion" in Europe has given. Implying the psychology of this, Miss Addams said: "When a million men are suffering with cold and wounds in the trenches what are a few children suffering under hard conditions in factories?" What are old age pensions and the problem of infant mortality?"

This statement emphasizes the claim that socialists all the world over have

always made, that periods of social agitation have always been followed by wars for the reason that the ruling classes find this means of perpetuating their power.

When the spirit of patriotism is appealed to and the country is being invaded by a foreign foe, there is no time for agitation for social betterment. When a million men are suffering in the trenches there is no time to better housing conditions. And when posterity is saddled with a war debt of billions of dollars there is no money to be spent for old age pensions. In fact the world stops where it was so far as social betterment is concerned and the nation marks time in its progress toward humanitarian civilization.

### "SAFETY FIRST."

The incident in Los Angeles where, under the presidency of the State Industrial Accident commission representatives of employers and organized labor met together to consider the "Safety First" precautions necessary for the proper conduct of industries is a good omen for the solution of the irritations such as have given rise to the present industrial war in Stockton. In the consideration of common interests, both contributors to the public good, the workmen and the employers, may cease to spend their time in quarreling about which one has caused more trouble in the past, by joining together in correcting present and future problems. There is room enough for the activities of both in doing the work that is to be done. Industry cannot afford to have managers, workmen and capitalists at outs. They are all needed now, and they must all get justice and concede justice.

The Chronicle seems to be much concerned because the Secretary of the Treasury is censuring the National Banks for hoarding money and is taking measures to stop it. It fears that making a noise about it will suggest it to everybody and cause them to act accordingly. Apparently it is the banks that the Chronicle is apprehensive about and fears that they may lose some of their control of the finances of the country.

So far as any one can see there is no reason, under the existing monetary regulation, why the banking business should not go on at its usual form. There is no reason why banks should not lend money on good security just as usual. And this fact the Secretary is endeavoring to emphasize. If a property owner wants to put up a building and he has plenty of assets there is no reason why he should not be able to get the money to finance it at a reasonable rate of interest. This the Secretary is trying to bring about and his efforts are to be commended.

## The Bay Cities' Water Supply.

Statement by City Engineer M. M. O'Shaughnessy Made Before the Commonwealth Club, San Francisco, February, 1914.

At a dinner at Washington tendered by Mayor Phelan last June to various people from California and Government officials, Secretary Bryan asked what Hetch Hetchy meant, whether it was a new war dance or an Indian dance, and judging from the activities and the amount of oratory that has been expended on the project for the past twelve years, his inquiry is fairly justified.

My connection with the project commenced the first of September, a year ago, when I was appointed City Engineer, succeeding Mr. Manson. At that time there was under presentation by the city to Secretary of the Interior Fisher, reasons why San Francisco should get possession of the Hetch Hetchy Valley, and not be excluded from it, as suggested by Secretary Ballinger. At the same time there was an army board of three engineer officers appointed, Colonels Biddle, Cosby and Taylor, who had been working on this proposition and the various alternative projects for a year and a half. In their employ was Mr. Wadsworth, their assistant engineer, who traversed all the water propositions in California possible as alternative sources for a water supply for San Francisco. This board, last February, filed a report, a copy of which I have here, with the Secretary of the Interior, giving their conclusions and all their analysis of the situation and of the different propositions. They practically rejected all the different water schemes and selected Hetch Hetchy as being the most available. In summarizing for you their analysis and conclusions, which are very carefully thought out, and dispassionate, I possibly cannot do better than to recite to you some of the language in their report, especially as regards the all-important proposition of our relations with the irrigationists. Every other antagonist and visible opponent of the city's plans have been possibly eliminated except the irrigationists, and here are the conclusions of this board of pages 24, 35 and 36 of their report, filed February 19, 1913, on that subject:

"Legitimate and proper use of water in the reasonable development of irrigation districts tributary to or which can be made tributary to the Tuolumne River. The irrigable land between the Merced and Tuolumne rivers, and between the Tuolumne and the Stanislaus will be first considered, excepting Oakdale district, now irrigated from the Stanislaus river. The area of the existing Turlock-Modesto district is 402 square miles. The board estimates that 60 per cent additional could well be added thereto, making a total of 643 square miles. In a recent map issued by the United States Department of Agriculture, in cooperation with the Conservation Commission of California, the total area of irrigable land in this region is given as about 630 miles. Therefore, 643 square miles of land actually to be irrigated within probable districts would seem liberal. It is not claimed, however, that all

possible irrigable land is included in this map. There may be, especially in the foothills, additional land to which water might well be applied.

"Based on water being supplied to 8 per cent of the 643 square miles (or 111,520 acres) a duty of 2½ feet and losses of 25 per cent—the quantity of water needed is estimated by the board at 1,132,000 acre feet per year.

"The Turlock-Modesto district claims to need for its present district alone 1,012,043 acre feet. This is stated to be based on 90 per cent of 102 square miles, a duty of 2.75 feet with losses of 25 per cent. These figures are considered extreme, and those stated by the board would seem ample."

Now, instead of the 411,000 acres which the board of army engineers says there is water available for, as well as the supply of 400,000,000 gallons a day for San Francisco, the acreage limited in the Baker bill is exactly 300,000 acres, or 110,000 acres less than the army board says was enough water for.

Their final conclusions on this subject were:

"The determination of the amount of water flowing in the Tuolumne has been mainly deduced from records at the La Grange dam, the point of diversion for the Turlock-Modesto district. This was gaged from 1875 to 1884 by the State of California, and by the United States Geological Survey from 1895 to date. Rainfall records at La Grange date from 1878. There are few records for the upper watersheds. The upper Tuolumne has been gaged by the city for only three years. As this is such a short period, the results obtained from applying to other years the same proportion of run-off for upper and lower watersheds as is indicated by the three-year record cannot be considered conclusive. At the same time this is all the direct evidence available. In order to assist further in the estimation of this important result, the records of the upper and lower Stanislaus, from 1905 to date, have been used for comparison. These records are necessarily incomplete, and, therefore, to that extent unsatisfactory, but would seem sufficient to arrive at general conclusions. On the calculations made from these records, it is estimated that with a storage of 750,000 acre feet, the necessary 100 million gallons per day can be taken to San Francisco, while usually giving the full reasonable requirements of 640 square miles of the irrigation district. Of this 750,000 acre feet storage would be necessary for the city to obtain 100 million gallons per day and the remainder for irrigation. Some years the water supply for irrigation would have been short, as for example in 1898, 1 per cent, in 1908, 14 per cent, and in 1912, 11 per cent. With a storage capacity of 900,000 acre feet there would have been sufficient water for irrigation except in 1898. For the latter year a storage capacity of 1,000,000 acre feet would have been required and would be

practically impossible to obtain economically."

The time has come here in California, with the enhanced value of our lands, when all available water will have to be conserved in practicable reservoirs in the mountains and foot hills. Those districts have been rather slow in conservation of storage water. During their entire ten years of life they have only stored 168,000 acre feet. Realizing the importance of changing this policy, they are now spending considerable money in building additional storage reservoirs, and it is not very difficult for them to find very desirable additional ones, which will command their lands at a lower level. Immediately south of Turlock, between the Tuolumne and the Merced rivers on Dry creek, is one storage reservoir with a capacity of 350,000 acre feet, from which flood waters from both the Tuolumne and the Merced rivers may be led by relatively short canals.

One of the most pressing claims by the irrigation districts of Turlock and Modesto, presented at Washington, was their right to share in the use of the Hetch Hetchy reservoir site. During many preliminary discussions in past years of this question by the Board of Supervisors and city officers, the city officials felt disposed to be friendly with the irrigationists, and the present city administration desires to be exactly fair with them. On the other hand, the irrigationists have not been returning kindness for our efforts in that direction, as witness the statement from the Turlock Board of Trade of April 28, 1913: "San Francisco obtained the Garfield grant of reservoir privileges for forty million gallons of water daily. The districts relied on San Francisco's sincerity and had sufficient faith in her to believe that she would never ask for more water than forty million gallons per day. But apparently San Francisco considered this merely an entering wedge, for in 1909 the question of the Garfield grant was reopened and resubmitted. In the short space of four years San Francisco now asks and demands from the Government, instead of forty million gallons of water daily, four hundred million gallons daily, or ten times as much. What reason have the districts to believe that she will not ask a hundred times as much in another four years?"

During the discussion at the hearing at Washington before the House Committee, some of the irrigationists communicated there as follows:

"Hon. Scott Ferris, Chairman Public Land Committee,

"Ebbitt House, Washington, D. C.

"Care of L. L. Dennett,

"God gave San Francisco the Pacific Ocean, the rest of the world to the standard oil company; but the waters of the Tuolumne river belong to Stanislaus county." (Laughter.)

During the past eight or twelve months there has been a very insidious campaign conducted all through the San Joaquin valley propagated ostensibly for the needs of the farmers; but

the real nigger in the woodpile, some of the power companies, have not shown their heads except occasionally. Mr. Hutton, the attorney of the Yosemite Power Company—Mr. Hammond's company—presided at a meeting at Modesto of indignant farmers. So, beside the nature lovers and the real thinking farmers, we have also this hidden and insidious enemy that has been steadily fighting the wishes of the city.

Your representatives in Washington did the very best they could, from an equitable standpoint, in making arrangements with the Turlock and Modesto irrigation districts. After our hearing from the 25th to the 30th of last November, which lasted six days, before Secretary of the Interior Fisher, and in which about twelve hundred pages of testimony were taken, the members of our delegation, after returning to San Francisco and considering the demands of the irrigation district, made a proposition to them in a revised proposal to sell all surplus waters not needed by the city for about two dollars per acre-foot, which would be about the actual cost of storage. The irrigationists, on resuming the discussion of matters before the House Committee, rejected that proposal, and said that they did not know whether the water was worth two dollars a foot or one dollar an acre-foot; they would pay exactly what the water cost; and one of the conditions in this Raker bill is that they do not get any stored water free. What storage water they get they pay the total cost of impounding same, including the cost of the purchase of land, the cost of dam structures, the cost of engineering, and all the other incidental costs necessary to impound water. The Turlock and Modesto districts and their representatives feel that they have been fairly treated by the representatives of San Francisco. Some of their people and constituents do not feel so. They think that they have been injured by this agreement they have made with the city of San Francisco.

Now, besides the organized irrigation districts who have established rights on that river, not one drop of whose water in the flowing stream which they are using have we a right to take, there are a lot of mushroom districts. One of them is the Waterford district, the creation of my friend, Judge Dennett, whom I see here. They were recently organized to make further demands on the city of San Francisco; and your representatives in Washington had to decline to give consideration of any kind to the demands of those gentlemen.

Having built five water systems successfully from the first scratching of dirt to the completion of each project, I feel safe in saying that, with the construction of the Hetch Hetchy dam and the Eleanor dam, there will be enough water for San Francisco—four hundred million gallons per day—over seven times the size of Mr. Grunsky's original project, and also for the irrigationists down below when they complete economic reservoirs in and near their lands.

In reply to a criticism made by Mr. Grunsky as to the rates of payment to the Government, for the first five years the Government gets no payment, after that we pay them \$15,000 a year for ten years; after that \$20,000 a year for

ten years, and permanently thereafter we pay them \$30,000 a year. That is 5 per cent interest on \$600,000, and that is what we pay annually to the Government for the right to submerge those lands in those two reservoir basins, for various right of way and for the right to develop power along the route. Considering that the city's present investment in lands for a portion of those rights aggregates \$1,000,000, or \$70,000 a year, the Government charge, while onerous, is not so unreasonable, as proceeds from same go to improve the Yosemite national park, San Francisco and California's outing region.

Now, the present project, as outlined by Mr. Freeman, differs very materially from the original proposition outlined by Mr. Grunsky in 1902. His proposition called for sixty million gallons per day of water, with an ultimate capacity of one hundred and sixty million gallons per day; no power was generated along the route except enough to lift the water over the Altamont pass.

Mr. Manson, at a later date, in 1908, made a revised proposal, very similar to that of Mr. Grunsky's, with power a minor asset.

Mr. Freeman, after giving this project a year and a half of study, and as an engineer who has been identified with the largest water construction works in the United States and the world, after viewing the conditions of all those bay cities, broadened out this proposition and raised the capacity of the project to an ultimate of four hundred million gallons per day. On the route laid out by him are two falls, one of about twelve hundred feet and the other fourteen hundred feet; from which over 150,000 horse-power will be developed. This horse-power has been valued by various people all the way from twenty million dollars to forty million dollars as an asset in the project. True, instead of bringing his line on the surface by open ditch, as recommended by Mr. Grunsky, he bores through the mountains and brings his water in tunnels, which is a much safer way to bring water than through surface ditches, subject to slides, falling trees and falling rocks. Personally I have had experience with several projects owned by San Francisco people who have retained me to construct water projects in Hawaii, and they built all their conduits in tunnels and were not afraid of the cost of tunneling. The wisdom of this type of construction has been well demonstrated by immunity from accidents and damages and consequent interruption of service; and since those works have been built, some of them ten years ago, they have not been one day out of commission.

The city engineers have been so very busy in fighting all the antagonistic systems, that enough thought has not been given to all the phases of Mr. Freeman's project, and before the city embarks in construction it will be very well to have every feature of this scheme very carefully criticized by a dispassionate board of at least three experienced construction engineers with no prejudices on the subject.

The attitude of the departments in Washington has materially changed with the advent of Mr. Franklin K. Lane to the portfolio of the Secretary of the Interior (Appendix). During last November your representatives got

the cold shoulder from Mr. Frederick L. Fisher, who, after putting up with all the expense of spending nearly a quarter of a million dollars in preparing and presenting this project, ignored the recommendation of his own board of army engineers and put it into the waste basket the day before he left his office. Mr. Lane has assumed a different attitude, and if it were not for Mr. Lane this proposition would not have advanced where it is today in Washington.

There have been various criticisms by so-called experts as to the wisdom of the arrangement made by the city, saying that we have given away all the city's rights, and in order to get the absolute facts as to the amount of water in this watershed and the amount of it available for San Francisco, I have had the hydraulic engineer in my office, Mr. Bartell, who is a very conscientious and scrupulous man, make an unbiased examination of this proposition. Here is his analysis:

"San Francisco, California.

August 1, 1913.

"Mr. M. M. O'Shaughnessy,

"City Engineer,

"San Francisco, California.

"Dear Sir: There is herewith transmitted an analysis of the uses of the waters of the Tuolumne river, California, in accordance with the provisions of the Raker bill, a copy of which is herewith attached.

"In this analysis the following conditions have been assumed:

"San Francisco storage, 689,700 acre-feet.

"Irrigation storage: (a) Foothill, 168,000 acre-feet; (b) Storage above La Grange Dam but not in the San Francisco drainage area, 308,000 acre-feet, total irrigation storage, 476,000 acre-feet.

"Grand total storage, 1,165,700 acre-feet.

"Based on the above storage, the analysis has been made for the period during which stream flow measurements have been made at La Grange, viz., September, 1895, to date.

"A study of the tabulation sheets reveals the following:

"First: During the entire period, there is no time when the irrigation needs require more than their allowance of 2,350 second feet, that is, during the past seventeen seasons, in order to satisfy the full irrigation requirements, it was not necessary for the irrigationists at any time to take advantage of their right to draw up to 1,000 second feet, during the period April 15th to June 15th, inclusive.

"Second: At no time during the past seventeen seasons was it necessary to draw on San Francisco storage to satisfy irrigation requirements.

"Third: It will also be noted that during the high flow of every season, the irrigation storage is completely filled and that the San Francisco storage is completely refilled during every season except 1897-1898, when there was in storage at the end of May, 1898, 639,417 acre-feet, about a per cent of the total storage.

"The maximum capacity of the irrigation storage is 476,000 acre-feet, when there is 689,700 acre-feet in the San Francisco storage. At the end of the present period, or the end of 1913, there is left in San Francisco storage 689,700 acre-feet and in the 476,000 acre-feet available for irrigation, 476,000 acre-feet are completely filled.

"During the present season, 1912-1913, irrigation storage reached its lowest point in October, 1912, when there was left in storage 316,510 acre-feet and it was completely filled at the end of May, 1913. For the same season, San Francisco storage reached its lowest point in April, 1913, when there was left in storage 316,510 acre-feet and at the end of June, 1913, there is left in storage 321,210 acre-feet.

"The minimum amount left in San Francisco storage during the past seven seasons, as above noted, was 316,510 acre-feet at the end of April, 1913.

"Around the San Francisco bay, in reservoir sites already developed and proposed, there can be economically made available 114,000,000 gallons or 110,000 acre-feet. This, together with the 316,510 acre-feet left in storage at the end of the most critical period investigated, leaves San Francisco and the bay cities with enough storage on hand to supply its needs of over 500,000,000 gallons a day for about fifteen months, without the catchment of a single drop of water.

M. J. BARTELL."

Some of the peculiar attitudes developed by statesmen in Washington have been shown by one of our senators from California, Senator Works. On August 8, 1913, Senator Works wrote a letter here to San Francisco, and said the principal reason for opposition to the Hetch Hetchy bill was because San Francisco was not setting enough—the irrigationists were getting too much. The other day he said he had complaints from 99 per cent of the irrigationists that San Francisco was going to rob them. So much for the consistency of one of our senators from California. (Laughter.) But we are very glad that we did not have to rely upon this California Senator to carry this measure through in Washington. We have had very good friends in the East, many of whom came to our hearings prejudiced from reading the deceitful propaganda published against us; but after listening to our representations, and seeing the earnestness of our purpose to be fair to everybody, they came over to our side, and some of the best friends we have now for San Francisco are those who live east of the Mississippi river.

#### British Columbia Pulp and Paper Industry.

The increased demand for news print paper, on account of the war, has caused increased activity in the pulp industry of British Columbia, which has three pulp mills, with a combined daily capacity of 455 tons. The companies operating these plants have large timber holdings and are in position to furnish supplies up to their mill capacity. Prices have advanced materially during the past month and indications are that there will be a still further increase in the price of pulp and paper.

British Columbia has large tracts of pulp wood, which the provincial government is placing on the market. Nine pulp licenses for timber tracts on the coast, estimated to contain the following number of feet board measure, are to be sold on November 26 next: Hlambok, 87,500,000 feet; Hlambok No. 44, 444,000 feet; Spring, 1,110,000 feet; Cedar, 21,779,000 feet; Spring, 21,779,000 feet.

#### DEMAND FOR IMPORTED GOODS IN CHILE.

[Vice Consul Alden B. Esterling, Valparaiso.]

Supplementing my recent cable (see Daily Consular and Trade Reports for August 13), I wish to state that the increase in demand for articles of trade as enumerated therein is dependent upon the restoration of trade to somewhat normal conditions.

The war has closed Chile's European export market, and hence deprived the Government of one of its chief sources of income, which means that unless further credits are obtained from abroad, the contemplated public works and improvements must be curtailed. Many have been thrown out of employment by the closing of various industries, and this diminishes the buying and hence the consuming power of the people and the Government.

With the closing of the European markets, credit has also been discontinued. Business has been done only for cash payments either in gold or its equivalent in currency at rates very unfavorable to the purchaser.

If the country is to consume a normal amount of imports, employment must be found for its people, and the Government is planning to encourage many of them in irrigation and in railway construction work. If this is done the demand should remain normal, and if American interests are prepared to grant long credits there is no reason why they should not benefit from the situation. If American capital could aid the Government of Chile in carrying out its proposed public improvements, the situation would be relieved to some degree and American interests would doubtless profit in increased sales in Chile. To establish a bank and give credit to strong commercial houses would put American interests on a sound footing here, even though the bank itself did not pay well at first. If American interests are prepared to meet these conditions, the increase in demand as mentioned in my cable should be realized.

If public and private enterprises can be carried on, American cement should find a ready market.

France, Germany, and the United Kingdom were heavy exporters of furniture, and the United States should profit by the present conditions in both wooden and metal furniture. The demand for cooking utensils and other domestic articles of iron, steel, and aluminum from the United States should likewise increase.

Latter there should be an increase in the demand for building and structural material. The greater portion has been coming from the United States, but much European material is imported and this trade should largely be turned to the United States.

The railway supplies and material to be purchased by the Government may, in view of existing conditions, be ordered from the United States, as it is uncertain that European companies would be able to fill orders.

Implement and light machinery and parts will be needed if industry is allowed to continue and American interest should be ready to fill the demand.

Shipping and transportation facilities are very nearly normal between this port and the United States. All British lines are operating and the only regular boats being definitely discontinued are those of a German company. American interests should by all means send well-trained salesmen into the field and not depend on correspondence alone.

A wonderful floral wall 1,100 feet long, 20 feet high and six feet thick is almost completed in front of the Panama-Pacific International Exposition. This unique floral rampart is an exposition novelty and comes after many experiments with flowers and vines. The mossy, pink-flowered ice plant, known scientifically as *mesembryanthemum spectabilis* has been used. Irrigation is effected by means of perforated pipes placed on the top of the wall.

#### ELECTRICAL MATERIALS FOR GUATEMALA.

(Consul General Stuart K. Lupton, Guatemala City.)

It is probable that as a result of the war in Europe there will be an increased demand for certain electrical supplies in this consular district, chiefly in the line of incandescent bulbs, wire, fuses, and fittings, as these supplies have been imported almost wholly from Germany. Bulbs in use are 5, 16, 25, and 23 candlepower, ordinary screw socket, and the current is 120 volts, alternating. No electric fans are used with the possible exception of a few at San Jose. Cooking and heating utensils, such as are used in the United States to such an extent, are forbidden by the electric companies under severe penalties. There is no chance of estimating the possible consumption of these supplies, but I have reason to believe that nearly 100,000 incandescent bulbs are imported each year.

There seems to be a prejudice on the part of some people here against electrical appliances, which are regarded as some kind of infernal machines. Instances have been known of such goods being held at the customhouse for months, notably in the case of an X ray machine for a hospital at Puerto Barrios for over a year.

There is not much chance of any important quantities of the larger electrical machinery such as dynamos, generators, switchboards, etc., being imported for some time, as Guatemala seems to be entering one of the lean periods just at present. The names of importers of electrical goods in the district are forwarded (and may be had on application to the Bureau of Foreign and Domestic Commerce or its branches).

The oldest town in Alaska is Unalakleet. It was settled in 1778. Its population, according to the census, was 83.

Los Angeles had a rain June 26, the first instance of the kind on that date in thirty-five years.

A Siamese government savings bank has been established to encourage thrift among the people. Interest of 4 per cent is paid on call deposits and 6 per cent for six months' deposits.

The egg production of this country increased from 450,000,000 in 1880 to 9,000,000,000 in 1912.

# ADVANCE NEWS

Classified according to Character of Work

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 6 story and base, Class C construction, \$75,000. Architect, Charles O. Clausen, Hearst Bldg., S. F. Owner, George E. Bennett, 2000 16th street. The building will be erected on the south side of Eddy street east of Leavenworth, having a frontage of 50 feet and a depth of 123½ feet. There will be a total of 59 apartments of two and three rooms. Interior finish will be of pine, blue gum and circassian walnut. Plans provide for steam heat, elevator service, a hot water system, dumb waiters and a vacuum cleaning system. All apartments will have wall beds and private bath rooms. Tile wainscot and floors will be used in the baths. Entrance will be finished in marble and tile. Exterior of the building will be faced with cut stone, pressed brick and terra cotta. Plans are complete and work will be started at once by Day Labor.

**OAKLAND, CAL.**—Apartment house, 3 story and base, frame. Cost not stated. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Dr. Ayres. The building will be erected at the corner of 13th and Oak streets and has been designed to contain a number of two and three room suites. Interiors will be finished in pine and elm. Some hardwood floors will be used. Plans provide for steam heat and a hot water system. All apartments will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the bath rooms. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and segregated figures are being taken.

**BERKELEY, ALAMEDA CO., CAL.**—Apartment house, 3 story and base, frame, \$30,000. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owners name withheld. The building will be erected on Euclid avenue at the corner of Ridgeway and has been designed to contain twenty-one apartments of two and three rooms. Interior finish will be of pine and hardwood veneer with hardwood floors in the principal rooms. Plans provide for steam heat and a hot water supply. Wall beds and private baths are also specified. Entrance will be finished in marble. Tile wainscot and composition floors will be used in the bath rooms. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

**SAN FRANCISCO**—Apartment house, 6 story and base, brick and steel, \$50,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the east side of Mason street north of Sutter, having a frontage of 50 feet and a depth of 100 feet. There will be a number of two and three room apartments on the upper floors. The main floor will be arranged for office, lobby and ball room. Interior

finish will be of pine with hardwood veneer. Hardwood floor will be used in the living rooms and halls. Plans provide for steam heat, an automatic elevator, vacuum cleaning system and hot water supply. All suites will have wall beds and private baths. Tile wainscot and composition floors will be used in the bath rooms. Exterior of the building will be faced with pressed brick and terra cotta. Entrance will be finished in marble. Plans are complete and figures are now being taken by the architects.

**SAN FRANCISCO**—Apartment house, 3 story and base, brick and frame, \$20,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected at the southeast corner of Sacramento and Franklin streets and has been designed to contain twelve suites of two, three and four rooms. Interior will be finished in pine, blue gum and walnut. Hardwood floors will be used in the living and dining rooms. There will be steam heat and a hot water supply. All suites will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the baths. Entrance will be finished in marble and tile. Exterior of the building will be covered with pressed brick veneer and cement plaster on metal lath. Plans are now being prepared.

**SAN FRANCISCO**—Apartment house, 2 story and base, frame, \$10,000. Architect, none. Owner, Mrs. O'Leary, 221 Masonic avenue, S. F. The building will be erected on the north side of Grove street east of Cole, and has been designed to contain five apartments of two and three rooms. Interiors will be finished in pine with some hardwood floors. There will be a hot water supply. All apartments will have wall beds and private bath rooms. Tile wainscot will be used in the baths. Exterior of the building will be covered with shingles and brick veneer. Plans are complete and the work will be done by Day Labor.

## BATH HOUSES.

**SAN RAFAEL, MARIN CO., CAL.**—Bath house completion, frame construction. Cost not stated. Architect, Thomas O'Connor, San Rafael. Owners, City of San Rafael. The City Council has instructed the City Architect to prepare plans and specifications for the finishing of the second story of the San Rafael Baths.

## BONDS.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—A petition bearing seven hundred names has been presented to the Supervisors here asking that they call a bond election for the purpose of building good roads. No amount is named in the petition. The matter has been taken under advisement by the Supervisor to be discussed at the next meeting of the Board.

at the next meeting of the Board.

**ORLAND, GLENN CO., CAL.**—The State Board of Control has in its possession \$8,000,000 in bonds of various kinds from all sections of the State, and an additional block for the construction of a sewer and water system at Orland has been purchased by the Board for \$15,000.

**MARYSVILLE, YUBA CO., CAL.**—Fearing that the placing of the question on the November ballot would be confusing to the voters, the Supervisors of Sutter County have decided to postpone the submission of the proposition of a \$27,000 bond issue for the proposed road between Riego and Yuba City, by the way of Nicolaus, until next spring, when a special election will probably be held.

**OAKDALE, STANISLAUS CO., CAL.**—Oakdale has voted bonds of \$100,000, funds which will be used to complete the Oakdale Irrigation District's cement canals and furnish water to the new lands.

**PETALUMA, SONOMA CO., CAL.**—Two of the three propositions submitted to the voters of Petaluma at a special election were defeated. The proposition to put electroliners along Washington street and to eliminate Thompson Creek by means of a large storm sewer were the propositions which failed to carry. The proposition to improve Washington street received the necessary two-thirds vote. This improvement will cost \$20,000.

**YREKA, SISKIYOU CO., CAL.**—The voters of Siskiyou County at the November election will decide upon the proposition of bonding the county for \$720,000. The funds to be used in the construction of bridges and good roads. The bonds are to run forty years and bear interest at the rate of 5 per cent, with one-fortieth of the bonds payable every year.

**OROVILLE, BUTTE CO., CAL.**—The Rideout Bank of Gridley had submitted to the Board of Supervisors, the only bid made for the bond issue of \$12,000 recently voted by the Manzanita school district, has been accepted. These bonds will run for twenty years and bear interest at the rate of 5 per cent. The proceeds of the bonds will be used in the construction of a new school building.

**SALINAS, MONTEREY CO., CAL.**—At the coming general election the question of incurring a bonded indebtedness in the amount of \$750,000 for the purpose of building bridges, repairing the present ones and for the construction of new roads and improving the present ones will be voted on here.

**WATSONVILLE, SANTA CRUZ CO., CAL.**—A bond issue held here recently to vote bonds in the sum of \$12,000 carried. The bonds are to be used for the purchase of additional equipment and the construction of a bridge over the Pajaro river.

**PASADENA, LOS ANGELES CO., CAL.**—The Pasadena City School Dis-

trict Trustees have called a special bond election for October 14th to vote bonds in the sum of \$1,000,000 for refunding the valid indebtedness of the district. W. N. Smith, W. S. Grassie, John J. Hamilton and Frank May are the members of the Board of Education of Pasadena.

**SEATTLE, WASH.**—The Board of City School Directors has opened bids for the \$225,000 issue of bonds of independent school district No. 1, and has taken the award under advisement.

**IMPERIAL, IMPERIAL CO., CAL.**—The Board of Directors of the Imperial Irrigation District has set October 29th as the date on which the voters will ballot on the bond issue of \$3,500,000 for the purchase of the property of the California Development Company.

**POND SCHOOL DISTRICT, KERN CO., CAL.**—The Security Trust Company has purchased the \$6,000 bonds of this district. The funds will be used in the construction of a new school building.

**YUKIAH, MENDOCINO CO., CAL.**—No bids were received here for the purchase of the Two Rivers and Anderson school district bonds. The bonds will be readvertised.

**WOODLAND, YOLO CO., CAL.**—October 20th has been set as the date for the voting of \$100,000 in bonds for the erection of a school building in this city. From indications it is thought that the issue will carry.

**ROSEBURG, ORE.**—The \$500,000 bond issue to begin construction of a railroad to Coos Bay carried at the city election. This issue of bonds is unique, inasmuch as it provides that the road must be built from Roseburg to Coos Bay before the bonds are available. Any company wishing to take up a contract to build the road must provide approved securities of \$500,000 as good faith before the bonds are issued. The commissioners to construct the railroad are A. J. Lilburn, J. W. Perkins, A. C. Marsters, Carl D. Shoemaker, L. Wimberly, J. F. Barker, W. H. Fisher, F. H. Churchill, B. W. Strong and W. H. Richardson.

**SAN FRANCISCO, CAL.**—Sealed proposals will be received by the Board of Supervisors up to the hour of 3 o'clock p. m., on Monday, October 26, 1914, for the purchase of the following described bonds of the City and County:

City Hall bonds to the amount of \$660,000, comprising fifteen bonds of each year's maturity, 1917 to 1920, inclusive.

Municipal Street Railway bonds to the amount of \$877,500, comprising 2,625 bonds of \$100 denomination, maturing 75 bonds each year, 1918 to 1952, inclusive; 700 bonds of \$500 denomination maturing 20 bonds each year, 1918 to 1952, inclusive, and 245 bonds of \$1,000 denomination, maturing seven bonds each year, 1918 to 1952, inclusive.

Water bonds to the amount of \$255,000, comprising five bonds of each year's maturity, 1920 to 1924, inclusive.

## BRIDGES AND DAMS.

**SUSANVILLE, LASSEN CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer's name not given. Owners, Town of Susanville. The Board of Trustees of Susanville at a meeting to consider a proposed concrete bridge across the Susan River to

the Southern Pacific depot have ordered plans and specifications prepared. The plans will be rushed to completion, and on approval bids will be called for.

**SACRAMENTO, CAL.**—Retaining wall, sheet metal piles, \$100,000. Engineer, City Engineer Miller. Sacramento. Owners, City of Sacramento. New plans for the sheet metal pile retaining wall in the levee near the swimming baths, which was washed out last winter, may be adopted by the City Commission. The city may also agree to pay half of the expense of the work. The Southern Pacific put in the work, but before it was accepted the piles were washed out. The railroad company wanted the city to replace the piles and sand, while the city took the position that the work had not been accepted and therefore the railroad company had not completed the work. Now it has been decided that because of a turn in the river the piles must be driven deeper. For this reason City Engineer Miller has been directed to prepare new plans for the work.

**DIXON, SOLANO CO., CAL.**—Bridge, reinforced concrete, \$10,000. Engineer, County surveyor, Fairfield. Owners, Solano County. Bids will be opened on October 19th for the construction of the Clausen bridge across Putah creek, north of Kidwell ranch, thereby linking the state highways of Yolo and Solano counties. The bridge will have two arch spans, each 150 feet long and 21 feet above the water.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Bridges, 3, reinforced concrete and pile. Cost not stated. Engineer, County Surveyor Flourney, Santa Barbara. Owners, Santa Barbara County. County Surveyor Flourney is now preparing plans for nine of the most important bridges to be constructed along the State Highway north of this city. He has received from the Engineering Department of the Commission the final locations of the four bridges in de la Cuesta canyon, four in Zaca canyon, and one at Santa Ynez. The plans are well underway and it is thought that bids will be taken on their approval.

**SAN JOSE, SANTA CLARA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans and specifications for the construction of a reinforced concrete bridge to be constructed on the Monte Bello road over Stevens creek, have been approved and bids will be taken on November 2nd.

**SAN JOSE, SANTA CLARA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Bids opened by the Board of Supervisors for constructing a reinforced concrete bridge over Los Gatos creek at the Infirmary road show M. E. KILcourse of San Jose low at \$6,757 on propositions 1 and 2. Otto Schubert was second low at \$6,818 for proposition 1 and \$6,758 for proposition 2. Both bids were taken under advisement.

**SAN RAFAEL, MARIN CO., CAL.**—Bridges, timber and concrete. Cost not stated. Engineer, County Surveyor, San Rafael. Owners, Marin County. Bids were opened at Tuesday's meeting of the Board of Supervisors for constructing two sets of bridges. The Marin Rock Co. were low for bridges Nos. 1, 2 and 3 at \$1,760, 1, 1, 1. M. Price was low at \$1,760 for bridges Nos. 4 and 5. A complete list

of the bids as opened will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

**PORTLAND, ORE.**—Bridges, steel and reinforced concrete. Cost not given. Engineer, H. W. Holmes, Bureau of Bridges and Highways, Portland. Owners, City of Portland. Plans for the various bridges to be built across the railroad crossings of the Southern Pacific and Oregon-Washington Railroad and Navigation Co., together with approaches, are being prepared under the supervision of H. W. Holmes, who until recently was engineer for the Bureau of Bridges and Highways for the city, and who will continue in charge of this work. Besides the various structures which will be built, a regrade will be made by the railroad companies. This will extend along Sullivan's Gulch from 28th street to 82nd street, and when completed will be between 10 and 12 feet lower throughout the entire distance. This work will be completed by the railroads. The largest of the structures planned is that at East 37th street, which will be a 150-foot structure, consisting of three spans. These will be steel girders incased in concrete. There will also be four concrete approaches of various lengths, not to exceed 200 feet each. Other structures are planned at East 82nd street, East 47th street and East 52nd street, to be built at an estimated cost of \$10,000 each. Plans will be completed this fall, but in all probability bids will not be called for until in April.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Docks and sheds, steel and frame construction. Cost not stated. Engineer, none. Owners, Stockton and Sacramento River Steamship Co. The Stockton-Sacramento Steamship Company will soon begin the construction of new steel sheds in this city, according to latest reports. The sheds will probably be erected on the wharf space lying directly west of the present California Transportation Company's sheds. H. J. Corcoran is at the head of the company.

## Contracts Awarded.

**RED BLUFF, TEHAMA CO., CAL.**—Bridges, 6, timber and concrete. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners Tehama County. Contractors: Kauffman bridge, C. W. Chambers and W. H. Andrews, \$399.75; Mill Race and Salt Creek Slough bridges, McCartney & Haskell, \$4,650; South Fork bridge, McCartney & Haskell, \$2,759; Burrows Creek bridge, McCartney & Haskell, \$4,174; Flournoy bridge, Ross Construction Co., \$1,250.

**PORTLAND, ORE.**—Dock, 1 story, mill construction, \$30,600. Engineer, G. B. Hegardt, Public Dock Commission, Portland. Owners, City of Portland. Contractor, Anton Tellar, Builders' Exchange, Portland. Contract price, \$30,600.

**SAN FRANCISCO**—Wharf, creosoted pile construction, \$108,720. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Contractors, Healy-Tibbitts Construction Co., S. F. Contract price, \$108,720. This pier will be known as No. 16.

**SAN FRANCISCO**—Wharf, creosoted pile construction, \$11,800. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Contractors, San Francisco Bridge Co.,

S. F. Contract price, \$111,800. This plan will be known as No. 18.

### CHURCHES.

**SAN FRANCISCO**—Church, 1 story and base, frame and plaster, \$15,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owners, Emanuel Evangelical Association. The building will be erected at the corner of Capp and 19th streets, and has been designed in the classic style. There will be a large main auditorium and Sunday school rooms. Interior finish will be of pine and redwood. A central heating system will be installed. Art glass windows are specified. Exterior of the building will be covered with cement plaster. Plans are being revised and figures will be called for from the three low men who previously figured the work.

### FACTORIES AND WAREHOUSES.

**OAKLAND, CAL.**—Warehouse, 2 story and base, brick, \$15,000. Architect, Alvin J. Stern, 1542 Broadway, Oakland. Owner's name withheld. The building will be erected on 19th street between Telegraph and San Pablo, and will cover a considerable ground area. Construction will be of the mill type. No interior finish will be used. Exterior of the building will be faced with brick. Plans are complete and figures are now being taken by the architect.

**CLAREMONT, LOS ANGELES CO., CAL.**—Ice and cold storage plant, 1 and 2 story, reinforced concrete, \$100,000. Engineer's name not given. Owners, Union Ice Co., Claremont. This company has secured a site 150 by 600 feet on the north side of the town and adjacent to the railroad yards, and will build a large cold storage plant. The plant will have a capacity of 600 cars for the season of 1915 and this will be increased the following year. Joseph Dehnell is the Claremont representative of the company.

### FIRE HOUSES AND JAILS.

**CALEXICO, IMPERIAL CO., CAL.**—Jail, 1 and 2 story, reinforced concrete, \$20,000. Architect's name not given. Owners, City of Calexico. Provision has been made in the annual budget for \$17,240 for the purpose of constructing a new jail building. A site 60 by 140 feet has been secured and steps will be taken at once to have construction started. The present jail building is badly overcrowded. Definite plans have not been secured but the appointment of an architect will be made shortly. Further mention will be made of this work.

**WOODLAND, YOLO CO., CAL.**—Jail, 2 and 3 story and base, reinforced concrete, \$20,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Yolo County. The building will be a part two and part three story structure with offices of the tax collector in the three story section. Construction will be fire proof, with reinforced concrete floors and walls. Interior partitions will be of hollow tile and metal lath and plaster. Interior will be finished in pine. Plans provide for steam heat, a vacuum cleaning system and hot water supply. Special jail equipment will be installed under a separate contract and is not included

in the estimated cost of the building. Exterior will be faced with cement plaster. Plans are complete and figures are being taken. Bids will be opened the first week in November. Plans and specifications can be secured from the architect.

### Contracts Awarded.

**MARYSVILLE, YUBA CO., CAL.**—Jail cells, \$2,486. Architect, none. Owners, City of Marysville. Contractors, M. G. West Co., San Francisco. Contract price, \$2,486.

### FLATS.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$4,000. Architect, none. Owner, Karl Yingve, 123 Alpine street, S. F. The building will be erected on the west side of 17th avenue north of Clement, covering an area of 25 by 60 feet. There will be two modern flats of five and six rooms. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Flat alteration, 2 story and base, frame. Cost not stated. Architect, C. Cornelius Frye, 20 Montgomery street, S. F. Owner, Georgian Kenney. The present two-story frame dwelling located on 42nd avenue near Clement will be raised and altered into two modern flats. Interior will be finished in pine and redwood. There will be new hardwood floors, open fire places, tile mantels, plastering and plumbing. Exterior of the building will be covered with cement plaster on metal lath. The work will be done by Day Labor. Plans are complete.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$7,500. Architects, Falch & Knoll, Hearst Bldg., S. F. Owners, Emanuel Evangelical Association. The building will be erected on 19th street near Capp, adjoining the new church, and will be used as a parsonage. Each flat will contain seven rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places in the living rooms. Mantels will be of tile. Tile wainscot will be used in the bath rooms. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, John T. Quigley, 623 Masonic avenue, S. F. The building will be erected on Minna street north of 7th street, covering an area of 25 by 69 feet. There will be three flats of five and six rooms. Interior will be finished in pine and redwood. Some oak floors will be used. Open fire places and tile mantels are specified. Tile wainscot will be used in the bath rooms and kitchens. Exterior of the building will be covered with rustic, shiplap and metal lath and plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Flat alterations and addition, 2 and 3 story, frame, \$1,000 and \$1,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owners, Mrs. Ackerman and Mr. P. J. T. These buildings are now on property owned by the Twin Peaks Tunnel and will be removed. One will be placed at the corner of 19th and Diamond streets and the other on Eureka street. The building to be moved to 19th and Diamond will be raised and an additional story constructed. The work will require new plastering, plumbing, electric work, painting, interior finish and mantels. Some exterior work will also be required. Plans are complete and the work will be done by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,000. Architect, Edward Helms, 5th avenue and California. Owner, W. Briarl. The building will be erected on 5th avenue south of Cornwall, and has been designed to contain two modern flats of five and six rooms. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and tile mantels. Tile wainscot will be used in the bath rooms and kitchens. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the direction of the architect.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,000. Architect, Edward Helms, 5th avenue and California. Owner, James Gleeson. The building will be erected on Anza street near 5th avenue, and has been designed to contain two modern flats of five and six rooms. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. There will be large open fire places in the living rooms. Mantels will be of tile or brick. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster with a brick veneer base. Plans are complete and figures are being taken.

### GARAGES.

**SANTA ANA, ORANGE CO., CAL.**—Garage, 1 story and base, brick and steel. Cost not stated. Architect, none. Owner, F. E. Farnsworth, Santa Ana. Mr. Farnsworth has purchased the northwest corner of Second and Main streets and will construct a large garage. The building will be a one-story brick structure and will cover an area of 100 by 117½ feet. As yet no architect has been selected.

### GOVERNMENT WORK & SUPPLIES.

**San Francisco, Cal., Repairs, Etc.**  
The contract for repairs and painting in the U. S. quarantine station, San Francisco, Cal., has been awarded to I. R. Kissel, 1723 Polk street, San Francisco, Cal., at \$2,550.

### Steel Flumes.

The Secretary of the Interior has authorized the reclamation service to execute contract with the Himmam Hydraulic Manufacturing Co., of Denver, Colo., for furnishing steel flumes for

the No. 1 Platt irrigation project, Nebraska. The contract price is \$6,772,285. b. cars, Denver, Colo.

#### Allocations for Improvements.

Announcement has been made concerning the \$20,000,000 appropriated by Congress for river and harbor improvement. The largest single allotment was \$3,750,000 to the Mississippi River Commission. Allotments for the Pacific Coast states are: Los Angeles harbor, \$12,000; Oakland harbor, \$98,000; Humboldt harbor and bay, \$200,000; Sacramento and Feather rivers (work of the California Reclamation Commission), \$60,000; Coos Bay, \$70,000; Coquille river, \$20,000; Siuslaw river, \$5,000; Snake river, \$5,000; Columbia river and tributaries above Celilo falls to the mouth of Snake river, \$10,000; Columbia river between the foot of the Balles rapids and the head of Celilo falls, \$25,000; Willamette and Yam Hill rivers, above Portland, \$25,000; Grays harbor and Chehalis river, \$15,000; Grays harbor and bar, \$10,000; Columbia river between Bridgeport and Kettle falls, \$35,000; Cowitz and Lewis rivers, \$6,000.

MARE ISLAND, CAL.—Temporary pavilions, frame. Cost not stated. Engineer, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Plans have been completed and forwarded to the Commandant of the Mare Island Navy Yard for five temporary frame pavilions to be erected at the Naval Hospital Reservation at Mare Island. Each pavilion will be one story. Bids are now being taken and will be opened on October 31st. Plans and specifications together with complete particulars can be secured from the Commandant of the Mare Island Navy Yard. An official proposal appears in another column of this issue.

SAN FRANCISCO.—Whistling buoy. Cost not stated. Engineer, United States Light House Inspector, San Francisco. Owners, United States Government. Plans are complete and figures are now being taken for furnishing F. O. B., San Francisco, two iron mammoth whistling buoys. Plans and complete information can be secured from the Light House Inspector at San Francisco. An official proposal appears in another column of this issue.

SAN FRANCISCO.—Government work, frame and brick institutions. Cost not stated. Architect, U. S. Commissioner of Indian Affairs, Washington, D. C. Owners, United States Government. Plans and specifications are on file at the local Indian war-house, 608 Howard street, for the following buildings: Frame Sanatorium, acetylene gas, heat, etc., at Turtle Mountain Indian Agency, North Dakota. Frame Sanatorium near Blackfoot Indian School, Montana. Frame Sanatorium, Mesalero Indian Agency, New Mexico. Frame Sanatorium, Pima Agency, Arizona. Frame Sanatorium near Carson Indian School, Nevada. Frame Sanatorium near Tascara Day School, San Xavier Indian Agency, Arizona. Bids for this work will be opened by the Commissioner of Indian Affairs at Washington, D. C., on November 2nd.

#### Contracts Awarded.

SAN FRANCISCO.—Officers' quarters, 2 story and base, brick. Cost not stated.

ed. Architect, Contracting Quartermaster's office, Fort Mason. Owners, United States Government. Contractors, Frank M. Garden & Co., 251 Kearny street, general construction, \$21,178. Frank M. Garden & Co., S. F., heating, \$1,366. F. J. Klenk, 215 Sharon Bldg., lighting, \$985. Leach & De Camp, plumbing, \$2,132. American Heat and Power Co., 1862 5th street, Oakland, oil burning, \$186.

#### HALLS AND SOCIETY BUILDINGS.

OAKLAND, CAL.—Seating for Municipal Auditorium. Cost not stated. Architect, J. J. Donovan, Oakland. Owners, City of Oakland. Bids will be opened on October 15th for furnishing and installing the seats in the new Oakland Auditorium. Plans and specifications can be secured from J. J. Donovan, Supervising Architect.

#### HOSPITALS.

SAN FRANCISCO.—Hospital group, 4 and 6 story and base. Class A construction, \$600,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, University of California. Some time ago the Regents of the University announced that plans would be completed and figures called for on the construction of the new building early in October. Further information from the same source states that plans will be on the market within a week or ten days. Further mention will be made of the building at that time.

SACRAMENTO, CAL.—Hospital group, 2 and 4 story and base. Class A construction, \$70,000. Architect, R. A. Herold, Forum Bldg., Sacramento. Owners, County of Sacramento. Plans for the construction of a new County Hospital that would cost in the neighborhood of \$700,000, including furniture, were discussed by the Board of Supervisors, Architect R. A. Herold and Dr. June B. Harris, County Physician, at a conference held in this city lately. Herold estimated the cost at \$700,000, but some of the Supervisors were of the belief it could be done for less than this. According to Supervisor Mahoney nothing further will be done until the Supervisors have had an opportunity of visiting other hospitals. He believes a hospital can be built for \$250,000.

OAKLAND, CAL.—Old people's home, 3 story and base, brick and reinforced concrete, \$50,000. Architect, Oscar Haupt, Phelan Bldg., S. F. Owners, California German Althaus. This work has been mentioned here before when plans were first started. The building will be in the nature of an addition to the present group of buildings and will be of similar design and construction. The work will include a steam heating system, hot water supply and vacuum cleaning. Exterior of the building will be faced with pressed brick and cement plaster. Plans are complete and figures are being taken.

OAKLAND, CAL.—Sanatorium, 2 story and base, frame, \$7,000. Architects, Elbe Planners, 1814 5th avenue, Oakland. Owner W. N. Downey, 219 Sunnyside avenue. The building will be erected on East 5th avenue between 8th and 10th street. There will be a total of twenty-five private rooms, general office and large sun parlor.

Interior finish will be of pine and hardwood. There will be a central heating system and open fire places. Modern hospital plumbing will be installed. Bath rooms will be finished in tile. Exterior of the building will be covered with shiplap. Plans are complete and the work will be done by Day Labor.

#### HOTELS.

BANDON, ORE.—Hotel, 3 story and base, brick, \$30,000. Architect, J. E. Tourtellotte, Rotchild Bldg., Portland. Owners, Hotel Gallier Co., Bandon. The building will cover an area of 75 by 100 feet. The first floor will be arranged for the office, lobby, dining room, sample rooms, grill and kitchen. Upper floor will contain in the neighborhood of 40 guest rooms and several baths. Interior finish will be of pine throughout. Plans provide for steam heat and a hot water system. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 4 story and base, Class C construction. Cost not stated. Architect, August Wackerbarth, 202 North Main street, L. A. Owner, Philip Eichholz, 310 North Grand avenue, L. A. The building will be erected at the corner of Grand avenue and Temple street, covering an area of 40 by 73 feet. There will be two stores besides the hotel lobby on the ground floor. Upper floors will contain a total of 24 rooms and a number of baths. Interior will be finished in pine throughout. There will be steam heat and a hot water system. Bath rooms will be finished in tile. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

#### LIBRARIES.

COLUMBIA CITY, WASH.—Library, 1 story and base, brick and concrete, \$10,000. Architect, W. Marbury Somervell, White Bldg., Seattle. Owners, Columbia City. The main building will contain two reading rooms, office of the librarian, stack room and game room. A rear wing, 20 by 46 feet, will contain work room and children's reading room. Interior will be finished in pine with hardwood floor. There will be a central heating system. Metal book stacks are specified. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and figures will be called for shortly.

SOUTH SAN FRANCISCO, SAN MATEO CO., CAL.—Library, 1 story and base, brick, \$10,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, City of South San Francisco. The building will be of the classic style and will contain one reading room, office for the librarian and stack room. Interior finish will be of pine with a maple floor. There will be a central heating system. Metal book stacks will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on November 2nd. Plans and specifications can be secured from the architect.

**Contracts Awarded.**

WOODLAND, YOLO CO., CAL.—Library addition, 1 story and base, reinforced concrete, \$11,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, City of Woodland. Contractor, Harvey Klyce, Sheldon Bldg., S. F. Contract price, \$11,000.

**PANAMA-PACIFIC EXPOSITION WORK.**

SAN FRANCISCO — State exhibit building, 2 story, frame and plaster, \$40,000. Architect, H. W. Barresen, Service Bldg., S. F. Owners, State of Colorado. The building will be erected in that section of the Exposition grounds given over to the various state buildings. There will be a large auditorium in which pictures and lectures descriptive of the state will be held, reception hall and display booths. Interior finish will be of pine. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures will be taken at once.

SAN FRANCISCO — Display booth, frame construction. Cost not stated. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Plans for an exhibit booth to be erected in the Transportation Building at the Panama-Pacific Exposition by the Southern Pacific Co. have been completed by the Engineering Department and are now out for figures.

SAN FRANCISCO — Concession buildings, 1 and 2 story, frame and plaster. Costs as follow. Architect's name not given. Plans for several buildings to be erected throughout the Concession District of the Panama-Pacific Fair Grounds have been filed with the Bureau of Building Inspection of the Board of Public Works by the Panama-Pacific Company. The following is a list of the buildings and the estimated cost of each: Marine Gardens and Cafe, \$10,000; Japan Beautiful, \$23,000; Young's Restaurant, \$7,500; Orange Blossom No. 1, \$12,000; Tehautepec Village, \$9,500; Chinese Pagoda and Tea Garden, \$19,000; Alt. Nurnberg, \$30,000; M. A. Gunst, \$9,000; Pennsylvania Building, \$38,000; Nevada Building, \$24,000.

**POST OFFICES.**

PORTLAND, ORE.—Post office, 4 story and base. Class A construction, \$1,000,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, United States Government. Postmaster Myers of Portland has conferred with officials of the Post Office Department and the Supervising Architect regarding the plans for the new Portland Post Office. He suggested several changes in arrangements of floor space in that part of the building allotted to the Post Office, the changes being designed to facilitate the handling of the mails. The plans are to be returned to Architect Lewis P. Hobart for revision in accordance with Mr. Myers' suggestion.

THE DALLES, ORE.—Post office, 2 story and base, brick and stone. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. The building will be of semi-fireproof construction and will

cover an area of 5,000 square feet. Interior will be finished in pine and hardwood. Plans provide for steam heat and modern plumbing. Hardwood floors will be used. Exterior will be faced with cut stone and pressed brick. Plans are complete and have been forwarded to the west for figures. Bids will be opened in Washington on November 12th. Plans can be secured from either the office of the Supervising Architect or from the Custodian of the site at The Dalles. An official proposal appears in another column of this issue.

**RAILROAD CONSTRUCTION AND EQUIPMENT.**

HIGHLAND, SAN BERNARDINO CO., CAL.—Electric line. Cost not stated. Engineer, Chief Engineer Pillsbury, Los Angeles. Owners, Pacific Electric Co. With the visit of President Paul Shoup and Chief Engineer Pillsbury of the Pacific Electric Company there has been a rumor circulated that the company has been contemplating the construction of a branch electric line. No additional information can be had at this time.

SAN FRANCISCO — Track specials. Cost not stated. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete for furnishing the Municipal Railroads with track specials. Complete information can be secured from the City Engineer. Bids will be opened on October 21st. An official proposal appears in another column of this issue.

**RESIDENCES.**

SAN FRANCISCO — Residences, 2, 2 story and base, frame, \$2,500. Architect, none. Owners, Lindberg Bros., 259 street, S. F. Owner, John Little, 1371 5th avenue, S. F. These two houses will be erected on the west side of 11th avenue north of Balboa street. Each house will contain eight rooms and bath. Interiors will be finished in pine and blue gum. Hardwood floors will be used in the living rooms, dining rooms and reception halls. The upper floors will be finished in white enamel. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO — Residence, 1½ story and base, frame, \$2,500. Architect, none. Owners, Lindberg Bros., 259 Surrey street, S. F. The dwelling will be erected on 21st street west of Sanchez, and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood. Some oak floors will be used. There will be and open fire place and tile mantel. Bath room will have tile wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owners and the work will be done by Day Labor. Materials are now being purchased.

SAN FRANCISCO — Residence, 1 story and base, frame, \$4,000. Architect, Edward E. Young, 21 Kearny street, S. F.

Owner, Thomas Seidie, 14th avenue, S. F. The dwelling will be erected on the north line of 14th street east of 29th avenue, and has been designed for a seven room house with bath and sleeping porch. Interior will be finished in pine, redwood, walnut and blue gum. Hardwood floor will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantels will be of tile or brick. An automatic water heater will be installed. Tile wainscot will be used in the bath room. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO — Residence, 2 story, base and attic, frame, \$15,000. Architect, Charles J. Rousseau, 16 Kearny street, S. F. Owner, M. A. Little, 1371 4th avenue, S. F. The dwelling will be erected at the southwest corner of Divisadero and Green streets on a lot 25 by 67½ feet. There will be in the neighborhood of twelve rooms, three baths and sleeping porch. Interior will be finished in pine, redwood, eastern oak and walnut. Hardwood floors will be used in the principal rooms. Plans provide for steam heat, a hot water system and open fire places. Chambers will be finished in white enamel. Bath rooms will have tile floors and wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO — Residence, 2 story and base, frame, \$5,000. Architect, none. Owner, E. Nelson, 30 Presidio Terrace, S. F. The dwelling will be erected at the northeast corner of Parnassus avenue and Arguello, and has been designed for an eight-room house with two baths and sleeping porch. Interior will be finished in pine and hardwood with white enamel in the bed rooms. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO — Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, Alpheus Duffee, 685 Divisadero street, S. F. The dwelling has been designed for a seven room house and will be erected on the west side of 9th avenue north of Moraga. Interior finish will be of pine and hardwood. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

OAKLAND, CAL.—Theater, 4 story and base, frame, \$100,000. Architects, Oliver & Thomas. Pantazes Theatre

Bldg., Oakland. Owner's name withheld. The dwelling will be erected in Piedmont by the Lake, and has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine with some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

ALAMEDA, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$3,000. Architect, H. P. Smith, Blake Bldg., Oakland. Owner, J. F. Wilson. The dwelling will be erected on Taylor avenue, and has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile wainscot will be used in the bath room. Exterior of the house will be covered with rustic. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,500. Architect, James W. Elacheh, Acheson Bldg., Berkeley. Owner, H. E. Pinger, 1547 Shattuck avenue, Berkeley. The dwelling has been designed for a ten-room house and will be erected on the north side of Rose street east of Arch. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be open fire places and tile mantels. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$7,000. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Dr. F. R. Jordan. The dwelling will be erected on Lake Shore avenue near Walavista, and has been designed for an eight-room house with three baths and sleeping porch. Interior finish will be of pine and hardwood with white enamel will be used throughout. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile and equipped with showers. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$3,000. Architect, C. H. Miller, Dalziel Bldg., Oakland. Owner, Mr. Riqués. The dwelling has been designed for a six-room house and will be erected in Havenscourt Terrace. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room and dining room. There will be open fire places and tile mantels. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be cov-

ered with cement plaster on metal lath. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1½ story and base, frame, \$3,000. Architect, none. Owner, Louis O. Hanson, 3211 Ellsworth street, Berkeley. The dwelling will be erected on Fresno street south of Monterey and has been designed for a six-room house with bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the living room and dining room. There will be furnace heat and an open fire place. Mantel will be of tile or brick. Tile wainscot will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN JOSE, SANTA CLARA CO., CAL.—Bungalow, 1 story and base, frame, \$3,000. Architect, none. Owner, R. B. Jones, 11 Fuller avenue, San Jose. The dwelling will be erected on Hartford avenue and has been designed for a six-room house with bath and sleeping porch. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be an automatic water heater. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are complete and the work will be done by Day Labor.

SACRAMENTO, CAL.—Bungalows, 6, 1 story and base, frame, Cost not stated. Architect, none. Owner, W. H. McMorris, Sacramento. These houses will be erected on property on T street recently purchased by Mr. McMorris. Each house will contain six rooms and bath. Interiors will be finished in pine and redwood. There will be some oak floors. Open fire places are specified. Exteriors will be covered with cement plaster on metal lath. Plans are in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Thomas Scoble, 363 14th avenue, S. F. The dwelling will be erected on the north side of Lake street east of 20th avenue, and has been designed to contain eight rooms and bath. Interior will be finished in pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, reinforced concrete, \$15,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mrs. Clarence Musto. The dwelling will be erected at the corner of Vallejo and Divisadero streets, and has been designed to contain sixteen rooms, several baths and a private garage. Construction will be practically fireproof. Interior will be finished in pine and hardwood with white enamel in the bed room. There will be steam heat, a hot water system and vacuum cleaning. Hardwood floors will be used in the principal rooms. Bath rooms will be finished in marble and tile. Exterior of

the building will be faced with cement plaster. Plans are complete and figures are being taken.

### Contracts Awarded.

LOS ANGELES, CAL.—Residence, 2 story and base, frame and plaster, \$25,000. Architect, Frank M. Tyler, Black Bldg., L. A. Owner, Mrs. M. Wiley, 1214 Washington Bldg., L. A. Contractor, Thomas K. Miller, 3450 South Figueroa street, L. A. Contract price, \$25,000.

### SCHOOLS.

SAN FRANCISCO—School fire escapes. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The Webster Iron Works submitted the lowest figures on proposition 1 at \$2,692 and C. J. Hillard Co on proposition 2 at \$1,090 for furnishing fire escapes on the Burnett School. Contract has been then awarded.

RICHMOND, CONTRA COSTA CO., CAL.—School, 1 story, frame, \$2,000. Architect, none. Owners, City of Richmond. Bids will be opened on October 16th by the Board of School Trustees for constructing a kindergarten building. Plans can be secured from the Builders' Exchange at Richmond.

MT. DIABLO, CONTRA COSTA CO., CAL.—School, 1 story and base, frame, Cost not stated. Architect, George C. Meeker, First National Bank Bldg., Concord. Owners, Mt. Diablo School District. Plans and specifications have been completed for the new district school to be erected in the Mt. Diablo District. Plans and specifications can be secured from the architect. Bids will be opened on October 20th.

CURTIS CREEK SCHOOL DISTRICT, TOLUENE CO., CAL.—School, 1 story, frame, Cost not stated. Architect, none. Owners, Curtis Creek School District. Plans for a new district school have been completed and are now out for figures. Bids will be opened on October 17th. Plans and specifications can be secured from the office of The Banner, published at Sonora, or from the Clerk of the Board, Charles W. Harvey, Sonora.

COLTON, SAN BERNARDINO CO., CAL.—School, 2 story and base, brick, \$75,000. Architects, Allison & Allison, Hibernian Bldg., L. A. Owner, Colton School District. The building will be designed in the classic style and will contain sixteen class rooms, office, a large auditorium and domestic science and manual training departments. Interior will be finished in pine with maple floors in the class rooms. There will be a central heating system and modern school plumbing. Plans also provide for vacuum cleaning, program clocks and slate blackboards. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

BURLINGAME, SAN MATEO CO., CAL.—School, 2 story and base, frame, \$25,000. Architects, Thomas Edwards and Ernest Norberg, Bank Bldg., Burlingame. Contractor J. J. Leonard, Chelan Bldg., is taking subfigures on the Burlingame School Building, for which he has been officially awarded the contract. The building will cost in the neighborhood of \$25,000 and it of frame and plaster construction. Mr. Leonard wants subfigures on the following parts of the work: Electric

work, blackboards, stair work, glass and glazing, painting, plastering and galvanized iron work.

## SEWERS, STREET WORK & WATER SYSTEMS.

**STRAWBERRY VALLEY, UTAH**—Reclamation project. Cost not stated. Engineers, United States Reclamation Service, Provo, Utah. Owners, United States Government. The work to be undertaken is the construction of Divisions 1, 2 and 2 of the Highline canal, Strawberry Valley project, Utah, involving \$84,000 cubic yards of excavation, 2,300 cubic yards of excavating for structures, 3,300 cubic yards reinforced concrete, 167,000 square feet canal lining, 230 feet of tunnel, laying 1,700 feet vitrified pipe, 1,400 cubic yards of back filling, stone paving and placing of sluice gates. Bids are now being taken and figures will be opened on November 15th.

**BAKERSFIELD, KERN CO., CAL.**—Highway work. Cost not stated. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Bids for the grading of 5.6 miles of the Bakersfield-Glenville road will be received by the Board of Supervisors until 2 o'clock p. m. October 28th. The road to be improved under this contract begins at the south end of the Poso creek bridge and extends in a general northerly direction. Its construction will eliminate numerous crossings of the creek, and will necessitate the removal of 35,000 yards of material. Included in the contract are the construction of a pile bridge and the placing of corrugated iron culverts.

**DINUBA, TULARE CO., CAL.**—Highway construction. Cost not stated. Engineer, County Surveyor, Visalia. Owners, Tulare County. Lost Hills and Bitterwaters may soon be connected by a new road, a petition having just been circulated which will mean the building of a highway in the near future. The petition calls for the road to run from the northwest corner of section 1, southwesterly to township 27-19, to the mouth of Bitterwater creek, thence along the creek southwesterly to the west boundary of township 27-18.

**BENICIA, SOLANO CO., CAL.**—Street lighting. Cost not stated. Engineer, none. Owners, Town of Benicia. Because of a suggestion of Mayor W. L. Crooks, the Chamber of Commerce of this city has instructed its secretary to secure data on the lighting of other cities. It is the intention of the Chamber to place electroliters on First street and other residence streets in this city.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Highway work. Cost not stated. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Action in the construction of the Bay Point-Martinez road has been taken by the Board of Supervisors. The County Clerk has been directed to advertise for proposals for the construction of that highway. Bidders are at liberty to submit proposals for the dredging work and also to offer bids for piling. The date for the opening and consideration of the same is fixed for November 8th.

**SANTA ROSA, SONOMA CO., CAL.**—Sewer work. Cost not stated. Engineer, City Engineer, Santa Rosa. Owners, City of Santa Rosa. The City

Council here has taken steps to start the construction of a sewer which will cost \$10,000, and has also authorized the paving of Fifth street, from Washington street to the Northwestern Pacific tracks. Chairman Spooner has presented a plan prepared by the City Engineer for the proposed sewer for the south side of town, beginning at Bennett avenue and Temple street, running down Bennett avenue to Lloyd street, thence to Sebastopol, thence to Davidson Lane, thence to and through the Rohrer property to the creek. The estimate provides for 6,324 feet of 14-inch, 3,976 feet of 12-inch, 1,945 feet of 10-inch and 1,255 feet 8-inch sewer, a total of 11,400 feet.

**TUOLUMNE, TUOLUMNE CO., CAL.**—Irrigation reservoirs, concrete construction. Cost not stated. Engineer, none. Owners, Oakdale and South San Joaquin Irrigation Districts. Directors and engineers of the Oakdale and South San Joaquin Irrigation Districts have been in the mountains of Tuolumne County looking for sites for reservoirs for holding back Stanislaus River water for late irrigation. Many sites were favored but no definite information can be had until the reports are compared. It is proposed to build joint reservoirs if the scheme can be carried out.

**RED BLUFF, TEHAMA CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Red Bluff. Owners, City of Red Bluff. A movement is underway in this city to have Main street paved from the Imperial Hotel to the Catholic Church. The question will be taken up at the next meeting of the City Trustees.

**MARYSVILLE, YUBA CO., CAL.**—Highway construction. Cost not stated. Engineer, County Surveyor, Marysville. Owners, Yuba County. C. H. Dam of Wheatland has petitioned the Board of Supervisors here to consider the building of a county road from a point near the Virginia School to the State Highway near Wheatland, a distance of 1½ miles. The road is asked because of the long detour to get to Wheatland from this city. It is necessary, according to him, to encircle Beilby hill for a distance of fully four miles, whereas if the new road is constructed it would eliminate this distance. The matter is now being considered by the Supervisors.

**SAN JOSE, SANTA CLARA CO., CAL.**—Street work, paving, etc. Cost not stated. Engineer, City Engineer, San Jose. Owners, City of San Jose. The Mayor and Council at their regular meeting ordered the following street work done: The paving of the street at the corner of First and Almaden avenue, curbs and gutters, 11th street from William to Reed, River, Carlisle to St. Augustine, Pleasant, Martel to Carlisle, Pleasant, Carlisle to St. Augustine, Santa Teresa, Martel to Carlisle, Carlisle, Santa Teresa to Pleasant, Carlisle, Pleasant to River, Martel, Santa Teresa to Pleasant, Martel, Pleasant to River, St. Augustine, Teraine to Santa Teresa, Pleasant to River, and Santa Teresa to Pleasant north side Hobson street, First to Spring, Spencer avenue, Brown to Grant. The City Engineer was directed to prepare map and specifications for the improvement of St. James street, from Third to Seventh, and diagram prepared by him was approved.

**OKANOGAN, IDH.**—Steel pressure pipes. Cost not stated. Engineers, United States Reclamation Service, Federal Bldg., L. A. Owners, United States Government. Plans are complete and figures are now being taken for furnishing and erecting riveted steel pressure pipes in the Okanogan Reclamation District. Plans and specifications can be secured from the engineers at Los Angeles, Cal.

**BENTON CITY, WASH.**—Canal work, dunes and gates. Cost not stated. Engineers, United States Reclamation Service, North Yakima Owners, United States Government. The work will consist of constructing approximately 14½ miles of canal extensions with pipe lines, dunes and other appurtenant structures involving 67,000 cubic yards of earth, 17,550 cubic yards of rock, and the construction of six pipe lines of approximately 1,210 feet. Plans and specifications can be secured from the engineers. Bids will be opened on October 26th.

## Contracts Awarded.

**CALIFORNIA**—Highway work. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. For a complete list of the bids recently opened by the State Highway Commission see Sacramento and Northern California in this issue.

**COALINGA TO MARTINEZ, CAL.**—Pipe line stations, frame and concrete construction. Cost not stated. Engineers, Sanderson & Porter, Nevada Bank Bldg., S. F. Owners, Valley Pipe Line Co. (Dutch-Shell Co.) Contractors, Shaw & Hudson, L. A. Contract price not stated.

**SAN MATEO, SAN MATEO CO., CAL.**—Street work, \$12,800. Engineer, City Engineer, San Mateo. Owners, City of San Mateo. Contractor, A. G. Raich S. F. Contract price, \$12,800.

**RICHMOND, CONTRA COSTA CO., CAL.**—Street paving, \$11,316.79. Engineer, City Engineer, Richmond. Owners, City of Richmond. Contractor, L. L. Page, Richmond. Contract price, \$11,316.79.

**SACRAMENTO, CAL.**—Trunk line sewer, \$56,651. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractors, Matthews Construction Co., Forum Bldg., Sacramento. Contract price, \$56,651.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Street paving, \$31,859.15. Engineer, City Engineer, Riverside. Owners, City of Riverside. Contractors, Johnson-O'Shea Co., Riverside. Contract price, \$31,859.15.

## STORES AND OFFICES.

**SAN FRANCISCO**—Office building addition, 1 story. Class A construction, \$26,000. Architect, Albert Fassett (represented by Mr. Bruce, Flood Bldg., S. F. Owners, Mechanics' Institute). An addition of one story will be constructed. The new portion of the building has been leased to the California Society of Engineers. Construction and architectural design will be the same as the present building. Plans are now being prepared.

**SAN FRANCISCO**—Office, 1 story and base. Class B construction. Cost not stated. Architect, N. S. ... (represented by Mr. ...). At the present time the frame for the ... building is complete and an additional story

W. R. BRODE, Pres. LOUIS R. HOLM, Sec. R. J. BRODE, Vice-Pres.

## BRODE IRON WORKS

Established 1886—Incorporated 1913  
Tel. Kearny 2464.

Fabricators and Contractors of Structural Steel and Ornamental Iron Work

Office & Works: 31-37 Hawthorne St., bet. Howard & Folsom Sts., San Francisco, Cal.

of steel will be added. The building will be erected on the east side of Mason street north of Eddy, and has been designed as a combination office building for dentists with living apartments in connection. Interior will be finished in pine and hardwood. There will be steam heat, elevator service and a hot water supply. Walls and floors will be of concrete. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**SACRAMENTO, CAL.**—Stores and offices, 8 story and base. Class A construction, \$165,000. Architect not selected. Owners, Sacramento Chamber of Commerce. An offer to finance the Chamber of Commerce in this city has been received by the Board of Directors from J. H. McKibben, representing M. C. McCarthy of Chicago. McKibben is a San Francisco broker, while McCarthy is a Chicago contractor. Architect J. W. Woollett, Newhall Bldg., S. F., is responsible for the offer, having informed McCarthy of the opportunity. McKibben in his communication states that McCarthy is willing to put up \$150,000 for the building, but suggests that a \$165,000 building be built of at least ten stories. The Chamber of Commerce has already received plans and specifications for an eight-story building to cost \$120,000. The Chamber owns a site on Seventh street between I and J, and will build there if the plan goes through.

**SANTA MONICA, LOS ANGELES CO., CAL.**—Telephone exchange, 3 story and base, brick and concrete, \$50,000. Architect, Engineering Department Pacific Tel. and Tel. Co., 323 Grant avenue, S. F. Owners, Pacific Tel. and Tel. Co. The building will cover a considerable ground area and will have a light steel frame with concrete floors and brick exterior walls. The first floor will contain the office of the company and public space. Upper floors will be arranged for the exchange rooms and repair department. There will be steam heat and special electric work. Interior will be finished in pine and hardwood. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

### Contracts Awarded.

**LONG BEACH, LOS ANGELES CO., CAL.**—Bank and offices, 5 story and base. Class C construction, \$115,000. Architects, Kriempehl & Erkes, Henne Bldg., L. A. Owner, Mrs. Lucy Hauerway. Contractors, C. J. Kibach Co., Van Nuys Bldg., L. A. Contract price, \$115,000.

### PHILIPPINE TIMBER CONCESSION OFFERED

Sealed proposals in duplicate, will be received at the office of the Directory of Forestry in Manila, for the privilege of cutting and conveying timber and gathering other products, stone, and earth on 29,000 acres in the

Provinces of Tayabas and Ambos Camarines. While the date of opening bids in Manila is November 14, 1914, if a prospective bidder in the United States finds it impossible to get his bid there by that time he should communicate at once with the Bureau of Insular Affairs, Washington, D. C., stating the circumstances, and if the delay involved will not be too long that bureau may arrange to have the opening of bids postponed long enough for him to reach Manila.

As the terms of the concession require the establishment of sawmills and logging operations, American manufacturers of equipment therefore should follow up this matter in order to obtain orders for machinery.

### CALIFORNIA MUST DISPLACE AUSTRIA AND GERMANY.

Cutting Off of Magnesite Imports Should Stimulate Mining of American Deposits.

Up to the present the United States has been dependent largely upon foreign sources for its supply of magnesite or carbonate of magnesia, the imports in 1913 amounting to 172,591 short tons, as compared with only 2,632 tons produced in this country. It is interesting to note that the major portion of the imports (162,715 short tons) came from Austria-Hungary, and the most of the remainder came from Greece, and was landed for calcining at Hamburg and Rotterdam before being reshipped to this country. The question of the adequacy of the domestic supply to meet our needs therefore assumes much importance. Magnesite is valuable for a variety of purposes, such as various refractory uses, its brick, furnace hearths, crucibles, etc., as magnesium sulphate for the digestion and whitening of wood-pulp paper, in crude form for the manufacture of carbon dioxide, calcined and ground for oxychlorine or Sorel cement, miscellaneous applications in crude or calcined form, miscellaneous uses of refined magnesia salts. The magnesite from Austria-Hungary has been received chiefly at Philadelphia and is used in the manufacture of refractory brick. The Grecian magnesite enters chiefly at New York and is used for all purposes enumerated above.

The dependence of American users of magnesite on the foreign supplies is due for one thing to the location of the American deposits in California, at so great a distance from the eastern markets that the freight rates have been prohibitive. The establishment of water transportation through the Panama Canal may be expected to alleviate this difficulty. A second cause is the difference in composition between the magnesites of Austria-Hungary and those of California. The former generally contain 6 to 8 per cent of iron, which appears to be a hindrance in the manufacture of refractory brick.

With the cutting off of the Austro-

Hungarian and possibly of the Grecian supplies there would seem to be every reason why the California industry should be materially advanced. Fortunately the deposits in that State are numerous, and many of them are fairly large and of high grade. In the opening and development of these mines their nearness to railroad transportation seems to have been of more importance than the character or extent of the deposits. Certain deposits, notably in Santa Clara and San Benito counties, are known to be large in extent and of good character of material, but they lie idle owing to the distance the mineral must be hauled to a railroad, while smaller mines close to railroad stations are being worked. (Bulletin 593, U. S. Geological Survey.)

Architect C. H. Miller, Dalziel Bldg., Oakland, is preparing plans for a one-story and basement frame residence to be erected in Havenscourt for Mr. Rodges. The dwelling will contain six rooms and sleeping porch. The interior will be finished in Oregon pine. There will be hardwood floors, one open fire place, the mantel and composition floor in the bath room. The exterior will be covered with cement plaster. The estimated cost is \$3,000.

A potato shortage in England caused prices to advance June 1 in Manchester to \$30 per ton against \$12.90 a ton on the same time last year.

The number of cattle in this country has decreased in recent years, while the poultry flock has grown larger.

# PROPOSALS

## Bids Wanted

### PROPOSALS FOR CANAL WORK.

**CANAL WORK**—Department of the Interior, United States Reclamation Service, Sunnyside, Wash.—Sealed proposals will be received at the office of the United States Reclamation Service, Sunnyside, Wash., until 2 o'clock p. m. October 26, 1914, for the construction of about 13.25 miles of main canal extension of the Sunnyside Canal, near Benton City, Wash., with pipe lines, flumes and other appurtenant structures, involving the excavation of approximately 67,400 cubic yards of earth and 17,550 cubic yards of rock, the construction of 6 pipe lines, the total length of which is approximately 1,240 feet; 630 lineal feet of metal flume and the incidental irrigation structures. Particulars may be obtained at the offices of the United States Reclamation Service at Yuma, Yavapai and Sunnyside, Wash. CHARLES H. SWIGART, supervising engineer.

### PROPOSALS FOR CANAL WORK.

**CANAL WORK**—Department of the Interior, United States Reclamation Service, Washington, D. C.—Sealed bids will be received at the office of the United States Reclamation Service at Provo, Utah, until November 15, 1914, for the construction of divisions 1, 2 and 3 of the High Line Canal and structures, Strawberry Valley project, Utah, involving approximately 331,000 cubic yards of canal excavation, 2,300 cubic yards of excavation for structures, 3,300 cubic yards of reinforced concrete, 167,000 square feet of canal lining, 230 lineal feet of tunnel, complete, with concrete lining, laying approximately 1,700 feet of vitrified pipe of miscellaneous sizes; also 1,100 cubic yards of back-filling and small quantities of rock-filling and stone paving and the placing of sluice gates and miscellaneous structural steel. The canal will extend in a southwesterly direction from the power plant of the U. S. Reclamation Service, near the mouth of Spanish Fork Canyon, to Station 700 plus 60, near Payson City, Utah County, Utah. For particulars address the United States Reclamation Service at Provo, Utah, or Washington, D. C. WILL R. KING, chief counsel.

### PROPOSALS FOR BUOYS.

**WHISTLING BUOYS**—Sealed proposals will be received at the office of the light house inspector, San Francisco, Cal., until 2 o'clock p. m. October 28, 1914, and then opened, for furnishing two iron mammoth whistling buoys. Blank proposals and particulars may be obtained by addressing the light house inspector, San Francisco, Cal.

### PROPOSALS FOR BUILDING.

**BUILDING**—Sealed proposals indorsed "Proposals for Ward Pavilions" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. October 31, 1914, and then there publicly opened, for five temporary one-story wooden ward pavilions at the naval hospital reservation, Mare Island Cal. Plans and specifications may be obtained on application to the bureau or to the commandant of the navy yard, Mare Island, Cal. H. R. STANFORD, chief of bureau.

### PROPOSALS.

**OFFICE OF THE BOARD OF PUBLIC WORKS OF THE CITY AND COUNTY OF SAN FRANCISCO.**

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 21st day of October,

1914, for furnishing and delivering the following material:

A quantity of track gravel work for the Municipal Railway System. Said material must be in accordance with the specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made, and delivery must be completed within eighty-two calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance of the contract has been fixed at \$1,500.00.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisor of said City and County, for an amount not less than ten per centum of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL,

Secretary.

### PROPOSALS FOR TOWER AND TANK.

**TOWER AND TANK**—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received at this office until 3 p. m. October 27, 1914, and then opened, for the construction of a concrete water tower, concrete tank, etc., at the quarantine station, Honolulu, Hawaii, in accordance with the specification and drawing, copies of which may be obtained at this office, at office of superintendent of repairs, U. S. post office, San Francisco, Cal., or at the office of the custodian of the station at Honolulu, Hawaii, in the discretion of the supervising architect, O. WENDEROOTH, supervising architect.

### PROPOSALS FOR CANAL WORK.

**CANAL WORK**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Mont., until 2 o'clock p. m. October 28, 1914, for the reconstruction of Dodson South Canal at Dodson Bridge. The work involves about 71,000 cubic yards of excavation, 12,000 cubic yards of puddled filling, 5,200 cubic yards of riprap, 40 cubic yards of concrete and the moving of two steel bridge spans, abutments and pier. The structure is situated on the right of Milk River, about one and one-quarter miles south of Dodson, Mont., a station on the Great Northern Railway. For particulars address the United States Reclamation Service, Washington, D. C.; Great Falls, Mont., or Malta, Mont. F. H. NEWELL, director.

### PROPOSALS FOR DREDGING.

**DREDGING**—U. S. Engineer Office, 602 Burke Building, Seattle, Wash.—Sealed proposals for dredging and jetty construction in Port Townsend Bay and Oak Bay, Wash., will be received at this office until 12 m. October 16, 1914, and then publicly opened. Information on application, J. R. CAVANAUGH, major, engineers.

**SEALED BIDS** will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock noon, Monday, October 19th, 1914, said bids then and there to be publicly opened and read for furnishing all plant, materials and labor, and doing the work required for the construction and erect-

tion of a building to be known as Cottage for Epileptic Girls, Sonoma State Home, Eldridge, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Reclamation Service, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

### IMPROVEMENTS CONTEMPLATED.

**WOODLAND, Yolo Co., Cal.**—Rather indefinite plans are being prepared by the officials of the Pacific Gas & Electric Company to improve the gas service in this city. The project is either to construct a new plant altogether or to lay a pipe line from Sacramento and discontinue the making of gas here. Whichever plan is put into effect the cost will be between \$50,000 and \$75,000.

### BRIDGE BIDS WANTED.

**RIVERSIDE, Riverside Co., Cal.**—Bids will be received by the Board of Supervisors until October 10th, for the construction of a concrete bridge over the San Jacinto River near the San Jacinto Hot Springs in accordance with plans and specifications which may be obtained from the county surveyor.

### WILL REPAIR CANALS.

**FRESNO, Fresno Co., Cal.**—More than seventy-five men will be put to work on cleaning and repairing the 450 canals controlled by the Fresno Canal and Irrigation Company. New headgates on concrete foundations will be installed.

### LATERAL TO BE CONSTRUCTED.

**MARYSVILLE, Yuba Co., Cal.**—At a meeting of the M. M. and E. a resolution was adopted favoring the construction of a lateral from the main trunk of the State highway from Marysville to Downieville via Smartsville, Nevada City and Camptonville. Among those working on the committee to have the lateral built is James K. O'Brien of Smartsville and Commissioner Miller of Nevada City.

### ELECTRIC ROAD PLANNED.

**BENICIA, Solano Co., Cal.**—The City Trustees have been asked by President A. T. Bowen of the Benicia Land & Terminal Company for a franchise for an electric road through the city streets to the city limits on the Vallecito Road. Bowen proposes to build a road from Benicia to Vallejo and a line from Benicia to Winters. Officials of the company state that the road will be in operation within one year.

A portable spotlight supplied with 2's from a tank carried on a man's back has been invented to enable men to see the tops of poles at night without having to climb them.

## SAN FRANCISCO

**STATE EXHIBIT BUILDING**—2 story, frame and plaster, \$10,000. San Francisco. Architect, H. W. Baerresen, Service Bldg., S. F. Owners, State of Colorado. The building will be erected in that section of the Exposition Grounds given over to the various state buildings. There will be a large auditorium in which pictures and lectures descriptive of the state will be held, reception hall and display booths. Interior finish will be of pine. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures will be taken at once.

**DISPLAY BOOTH**—Frame construction. Cost not stated. San Francisco. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Plans for an exhibit booth to be erected in the Transportation Building at the Panama-Pacific Exposition by the Southern Pacific Co. have been completed by the Engineering Department and are now out for figures.

**CONCESSION BUILDINGS**—1 and 2 story, frame and plaster. Costs as follows. San Francisco. Architect's name not given. Plans for several buildings to be erected throughout the Concession District of the Panama-Pacific Fair Grounds have been filed with the Bureau of Building Inspection of the Board of Public Works by the Panama-Pacific Company. The following is a list of the buildings and the estimated cost of each: Marine Gardens and Cafe, \$10,000; Japan Beautiful, \$23,000; Young's Restaurant, \$7,500; Orange Blossom No. 1, \$12,000; Tehautepec Village, \$9,500; Chinese Pagoda and Tea Garden, \$49,000; Alt. Nurenberg, \$30,000; M. A. Gunst, \$9,000; Pennsylvania Building, \$38,000; Nevada Building, \$24,000.

**APARTMENT HOUSE**—6 story and base. Class C construction, \$75,000. San Francisco. Architect, Charles O. Clausen, Hearst Bldg., S. F. Owner, George E. Bennett, 2000 16th street. The building will be erected on the south side of Eddy street east of Leavenworth, having a frontage of 50 feet and a depth of 123½ feet. There will be a total of 59 apartments of two and three rooms. Interior finish will be of pine, blue gum and circassian walnut. Plans provide for steam heat, elevator service, a hot water system, dumb waiters and vacuum cleaning system. All apartments will have wall beds and private bath rooms. Tile wainscot and floors will be used in the baths. Entrance will be finished in marble and tile. Exterior of the building will be faced with cut stone, pressed brick and terra cotta. Plans are complete and work will be started at once by Day Labor.

**FLATS**—2 story and base, frame, \$14,000. San Francisco. Architect, none. Owner, Karl Yagve, 133 Alpine street, S. F. The building will be erected on the west side of 17th avenue north of

Clement, covering an area of 25 by 60 feet. There will be two modern flats of five and six rooms. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**FLAT ALTERATION**—2 story and base, frame. Cost not stated. San Francisco. Architect, C. Cornelius Frye, 20 Montgomery street, S. F. Owner, Georgian Kenney. The present two story frame dwelling located on 42nd avenue near Clement will be raised and altered into 2 modern flats. Interior will be finished in pine and redwood. There will be new hardwood floors, open fire places, tile mantels, plastering and plumbing. Exterior of the building will be covered with cement plaster on metal lath. The work will be done by Day Labor. Plans are complete.

**HOSPITAL GROUP**—4 and 6 story and base. Class A construction, \$600,000. San Francisco. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, University of California. Sometime ago the Regents of the University announced that plans would be completed and figures called for on the construction of the new building early in October. Further information from the same source states that plans will be on the market within a week or ten days. Further mention will be made of the building at that time.

**WHISTLING BUOYS**—Cost not stated. San Francisco. Engineer, United States Light House Inspector, San Francisco. Owners, United States Government. Plans are complete and figures are now being taken for furnishing P. O. R. San Francisco, two mammoth whistling buoys. Plans and complete information can be secured from the Light House Inspector at San Francisco. An official proposal appears in another column of this issue.

**RESIDENCES**—2, 2 story and base, frame, \$5,500 each. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, John Little, 1371 5th avenue, S. F. These two houses will be erected on the west side of 11th avenue north of Balboa street. Each house will contain eight rooms and bath. Interiors will be finished in pine and blue gum. Hardwood floors will be used in the living rooms, dining rooms and reception halls. The upper floors will be finished in white enamel. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—1½ story and base, frame, \$2,500. San Francisco. Architect, none. Owners, Lindberg Bros., 259 Surrey street, S. F. The dwelling will be erected on 21st street west of Sanchez, and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood. Some oak floors will be used. There will be an open fire place and tile mantel. Bath room will have tile wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owners and the work will be done by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$4,000. San Francisco. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Thomas Scoble, 363 14th avenue, S. F. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine, redwood, walnut and blue gum. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Tile wainscot will be used in the bath room. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story, base and attic, frame, \$15,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, M. A. Little, 1371 5th avenue, S. F. The dwelling will be erected at the southwest corner of Divisadero and Green streets on a lot 25 by 67½ feet. There will be in the neighborhood of twelve rooms, three baths and sleeping porch. Interior will be finished in pine, redwood, eastern oak and walnut. Hardwood floors will be used in the principal rooms. Plans provide for steam heat, a hot water system and open fire places. Chambers will be finished in white enamel. Bath rooms will have tile floors and wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**APARTMENT HOUSE**—6 story and base, brick and steel, \$50,000. San Francisco. Architects, Rousseau & Rousseau, Nordmoeck Bldg., S. F. Owner's name withheld. The building will be erected on the east side of Mason street north of Sutter, having a frontage of 50 feet and a depth of 100 feet. There will be a number of two and three room apartments on the upper floors. The main floor will be arranged for offices, lobby and ball room. Interior finish will be of pine with hardwood veneer. Hardwood floors will be used in the living rooms and halls. Plans provide for steam

heat, an automatic elevator, vacuum cleaning system and private baths. Tile wainscot and composition floors will be used in the bath rooms. Exterior of the building will be faced with pressed brick and terra cotta. Entrance will be finished in marble. Plans are complete and figures are now being taken by the architects.

**APARTMENT HOUSE**—3 story and base, brick and frame, \$20,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected at the southeast corner of Sacramento and Franklin streets, and has been designed to contain twelve suites of two, three and four rooms. Interior will be finished in pine, blue gum and walnut. Hardwood floors will be used in the living and dining rooms. There will be steam heat and a hot water supply. All suites will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the baths. Entrance will be finished in marble and tile. Exterior of the building will be covered with pressed brick veneer and cement plaster on metal lath. Plans are now being prepared.

**CHURCH**—1 story and base, frame and plaster, \$15,000. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owners, Emanuel Evangelical Association. The building will be erected at the corner of Capp and 19th streets and has been designed in the classic style. There will be a large main auditorium and Sunday school rooms. Interior finish will be of pine and redwood. A central heating system will be installed. Art glass windows are specified. Exterior of the building will be covered with cement plaster. Plans are being revised and figures will be called for from the three low men who previously figured the work.

**FLATS**—2 story and base, frame, \$7,500. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owners, Emanuel Evangelical Association. The building will be erected on 19th street near Capp, adjoining the new church, and will be used as a parsonage. Each flat will contain seven rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places in the living rooms. Mantels will be of tile. Tile wainscot will be used in the bath rooms. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

**FLATS**—3 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, John T. Quigley, 628 Masonic avenue, S. F. The building will be erected on Minna street north of 7th street, covering an area of 25 by 69 feet. There will be three flats of five and six rooms. Interiors will be finished in pine and redwood. Some oak floors will be used. Open fire places and tile mantels are specified. Tile wainscot will be used in the bath rooms and kitchens. Exterior of the building will be covered with rustic, shiplap and metal lath and plaster. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**FLATS ALTERATIONS AND ADDITION**—2 and 3 story, frame, \$4,500 and

\$3,000. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owners, Mr. Ackerman and Mr. Bush. These buildings are now on property affected by the Twin Peaks Tunnel and will be removed. One will be placed at the corner of 19th and Diamond street and the other on Eureka street. The building to be moved to 19th and Diamond will be raised and an additional story constructed. The work will require new plastering, plumbing, electric work, painting, interior finish and mantels. Some exterior work will also be required. Plans are complete and the work will be done by Day Labor.

**FLATS**—2 story and base, frame, \$5,000. San Francisco. Architect, Edward Helms, 5th avenue and California. Owner, W. Briarl. The building will be erected on 5th avenue south of Cornwall, and has been designed to contain two modern flats of five and six rooms. Interiors will be finished in pine with some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and tile mantels. Tile wainscot will be used in the bath rooms and kitchens. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the direction of the architect.

**FLATS**—2 story and base, frame, \$5,000. San Francisco. Architect, Edward Helms, 5th avenue and California. Owner, James Gleeson. The building will be erected on Anza street near 8th avenue, and has been designed to contain two modern flats of five and six rooms. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. There will be large open fire places in the living rooms. Mantels will be of tile or brick. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster with a brick veneer base. Plans are complete and figures are being taken.

**GOVERNMENT WORK**—Frame and brick institutions. Cost not stated. San Francisco. Architect, U. S. Commissioner of Indian Affairs, Washington, D. C. Owners, United States Government. Plans and specifications are on file at the local Indian Warehouse, 608 Howard street, for the following buildings: Frame Sanitarium, acetylene gas, heat, etc., at Turtle Mountain Indian Agency, North Dakota. Frame Sanitarium near Blackfeet Indian school, Montana. Frame Sanitarium, Mescalero Indian Agency, New Mexico. Frame Sanitarium, Pima Agency, Arizona. Frame Sanitarium near Carson Indian school, Nevada. Frame Sanitarium near Tuscan day school, San Xavier Indian Agency, Arizona. Bids for this work will be opened by the Commissioner of Indian Affairs at Washington, D. C., on November 3rd.

**LIBRARY**—1 story and base, brick, \$10,000. South San Francisco. San Mateo Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, City of South San Francisco. The building will be of the classic style and will contain one main reading room, office for the librarian and stack room. Interior finish will be of pine with a maple floor.

There will be a central heating system. Metal book stacks will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on November 2nd. Plans and specifications can be secured from the architect.

**RESIDENCE**—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, E. Nelson, 30 Presidio Terrace, S. F. The dwelling will be erected at the northeast corner of Parnassus avenue and Arguello, and has been designed for an eight-room house with two baths and sleeping porch. Interior will be finished in pine and hardwood with white enamel in the bed rooms. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Alpheus Duffee, 625 Dolores street, S. F. The dwelling has been designed for a seven-room house, and will be erected on the west side of 9th avenue north of Moraga. Interior finish will be of pine and hardwood. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. A brick veneer base will be used. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SCHOOL FIRE ESCAPES**—Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The Webster Iron Works submitted the lowest figures on Prop. 1 at \$2,493 and C. J. Hillard Co. on Prop. 2 at \$1,030 for furnishing fire escapes on the Burnett School. Contract has not been awarded.

**APARTMENT HOUSE**—3 story and base, frame, \$10,000. San Francisco. Architect, none. Owner, Mrs. O'Leary, 221 Masonic avenue, S. F. The building will be erected on the south side of Grove street east of Cole, and has been designed to contain five apartments of two and three rooms. Interiors will be finished in pine with some hardwood floors. There will be a hot water supply. All apartments will have wall beds and private bath rooms. Tile wainscot will be used in the baths. Exterior of the building will be covered with shingles and brick veneer. Plans are complete and the work will be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$5,000. San Francisco. Architect, Edward E. Young, 251 Kenning street, S. F. Owner, Thomas Seoble, 363 11th avenue, S. F. The dwelling will be erected on the north side of Lake street east of 20th avenue, and has been designed to contain eight rooms and bath. Interior will be finished in pine and hardwood with hardwood floors in the principal rooms.

There will be furnace heat and open tile places. Mantels will be of tile. The wainscot will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, reinforced concrete, \$15,000, San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mrs. Clarence Musto. The dwelling will be erected at the corner of Vallejo and Divisadero streets and has been designed to contain sixteen rooms, several baths and a private garage. Construction will be practically fire-proof. Interior will be finished in pine and hardwood with white enamel in the bed rooms. There will be steam heat, a hot water system and vacuum cleaning. Hardwood floors will be used in the principal rooms. Bath rooms will be finished in marble and tile. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

**OFFICE BUILDING ADDITION**—1 story, Class A construction, \$30,000, San Francisco. Architect, Albert Pissis, (represented by) Mr. Bruce Flood Bldg., S. F. Owners, Mechanics' Institute. An addition of one story will be constructed. The new portion of the building has been leased to the California Society of Engineers. Construction and architectural design will be the same as the present building. Plans are now being prepared.

**OFFICES**—9 story and base, Class B construction. Cost not stated, San Francisco. Architect, Norman Coulter, 46 Kearny street, S. F. Owner, Joseph Kowalsky. At the present time the steel frame for an eight-story building is complete and an additional story of steel will be added. The building will be erected on the east side of Mason street north of Eddy, and has been designed as a combination office building for dentists with living apartments in connection. Interior will be finished in pine and hardwood. There will be steam heat, elevator service and a hot water supply. Walls and floors will be of concrete. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

## OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE  
 10000 1st Ave., East no. 10000  
 and Cal. Architect: 10000  
 10000 Central Bank 10000

Owner, Dr. Ayres. The building will be erected at the corner of 11th and Oak streets and has been designed to contain a number of two and three room suites. Interiors will be finished in pine and elm. Some hardwood floors will be used. Plans provide for steam heat and a hot water system. All apartments will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the bath rooms. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and segregated figures are being taken.

**APARTMENT HOUSE**—3 story and base, frame, \$20,000, Berkeley, Alameda Co., Cal. Architect, Leonard H. Ford, 213 1/2 Center street, Berkeley. Owner's name withheld. The building will be erected on Euclid avenue at the corner of Ridgeway, and has been designed to contain twenty-one apartments of two and three rooms. Interior finish will be of pine and hardwood veneer with hardwood floors in the principal rooms. Plans provide for steam heat and a hot water supply. Wall beds and private baths are also specified. Entrance will be finished in marble. Tile wainscot and composition floors will be used in the bath rooms. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

**WAREHOUSE**—2 story and base, brick, \$15,000, Oakland, Cal. Architect, Alvin J. Stern, 1542 Broadway Oakland. Owner's name withheld. The building will be erected on 19th street between Telegraph and San Pablo, and will cover a considerable ground area. Construction will be of the mill type. No interior finish will be used. Exterior of the building will be faced with brick. Plans are complete and figures are now being taken by the architect.

**SEATING FOR MUNICIPAL AUDITORIUM**—Cost not stated, Oakland, Cal. Architect, J. J. Donovan, Oakland. Owners, City of Oakland. Bids will be opened on October 15th for furnishing and installing the seats in the new Oakland Auditorium. Plans and specifications can be secured from J. J. Donovan, Supervising Architect.

**OLD PEOPLE'S HOME**—3 story and base, brick and reinforced concrete, \$50,000, Oakland, Cal. Architect, Oscar Haupt, Phelan Bldg., S. F. Owners, California German Alt-heim. This work has been mentioned here before when plans were first started. The building will be in the nature of an addition to the present group of buildings and will be of similar design and construction. The work will include a steam heating system, hot water supply and vacuum cleaning. Exterior of the building will be faced with pressed brick and cement plaster. Plans are complete and figures are being taken.

**SANITARIUM**—2 story and base, frame, \$7,000, Oakland, Cal. Architects, Edie Planners, 1811 5th avenue, Oakland. Owner, W. N. Downey, 219 Sunnyside avenue. The building will be erected on East 5th avenue between 8th and 10th streets. There will be a total of twenty-five private rooms, general office and large parlors. Interior finish will be of pine and hardwood. There will be a central heating system and open fire places. Modern hospital plumbing will be installed. Bath rooms will be fitted in the ex-

terior of the building will be covered with shiplap. Plans are complete and the work will be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$5,000, Oakland, Cal. Architects, Oliver & Thomas, Pantagos Theatre Bldg., Oakland. Owner's name withheld. The dwelling will be erected in Piedmont by the Lake, and has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine with some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

**BUNGALOW**—1 story and base, frame, \$3,000, Alameda, Alameda Co., Cal. Architect, H. P. Smith, Blake Bldg., Oakland. Owner, J. F. Wilson. The dwelling will be erected on Taylor avenue, and has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile wainscot will be used in the bath room. Exterior of the house will be covered with rustic. Plans are being prepared.

**RESIDENCE**—2 story and base, frame, \$4,500, Architeca, James W. Plachek, Acheson Bldg., Berkeley. Owner, H. E. Pinger, 1547 Shattuck avenue, Berkeley. The dwelling has been designed for a ten-room house, and will be erected on the north side of Rose street east of Arch. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be open fire places and tile mantels. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$7,000, Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Dr. F. R. Jordan. The dwelling will be erected on Lake Shore avenue near Walavista, and has been designed for an eight-room house with three baths and sleeping porch. Interior finish will be of pine and hardwood with white enamel in the bed rooms. Hardwood floors will be used throughout. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile and equipped with showers. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**BUNGALOW**—1 story and base, frame, \$3,000, Oakland, Cal. Architect, C. H. Miller, Balzies Bldg., Oakland. Owner, Mr. Ridguez. The dwelling has been designed for a six-room house and will be erected in Ravenscourt Terrace. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room and dining room. There will be open fire places and tile mantels. Bath room will have tile wainscot. An automatic

water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

**BUNGALOW**—1 1/2 story and base, frame, \$3,000, Berkeley, Alameda Co., Cal. Architect, none. Owner, Louis O. Hanson, 3211 Ellsworth street, Berkeley. The dwelling will be erected on Fresno street south of Monterey, and has been designed for a six-room house with bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the living room and dining room. There will be furnace heat and open fire place. Mantel will be of tile or brick. Tile wainscot will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

### MARIN, CONTRA COSTA AND SONOMA COUNTIES.

**BRIDGES**—Timber and concrete. Cost not stated. San Rafael, Marin Co., Cal. Engineer, County Surveyor,

E. H. Williams      Chalmer Munday

**Munday & Williams**  
Attorneys-at-LawSpecial Attention Given to Building  
Law and Bankruptcy Cases

Telephone Kearny 2622

615 Phelan Building,      San Francisco

an Rafael. Owners, Marin County. Bids were opened at Tuesday's meeting of the Board of Supervisors for constructing two sets of bridges. The Marin Rock Co. were low for bridges Nos. 1, 2 and 3 at \$13,764. O. M. Price was low at \$7,652 for bridges Nos. 5 and 6. A complete list of the bids as opened will be found under the heading of Marin, Contra Costa and Sonoma counties in this issue.

**BRIDGE**—Reinforced concrete, \$40,000. Dixon, Solano Co., Cal. Engineer, County Surveyor, Fairfield. Owners, Solano County. Bids will be opened in October 19th for the construction of the Clausen bridge across Putah creek, north of Kidwell ranch, thereby linking the state highways of Yolo and Solano counties. The bridge will have two arch spans, each 156 feet long and 21 feet above the water.

**TEMPORARY PAVILIONS**—Frame. Cost not stated. Mare Island, Cal. Engineer, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Plans have been completed and forwarded to the Commandant of the Mare Island Navy Yard for five temporary pavilions to be erected at the Naval Hospital reservation at Mare Island. Each pavilion will be one story. Bids are now being taken and will be opened on October 31st. Plans and specifications together with complete particulars can be secured from the Commandant of the Mare Island Navy Yard. An official proposal appears in another column of this issue.

**SCHOOL**—1 story, frame, \$2,000. Richmond, Contra Costa Co., Cal. Architect, none. Owners, City of Richmond. Bids will be opened on October 16th by the Board of School Trustees for constructing a kindergarten building. Plans can be secured from the Builders' Exchange at Richmond.

**SCHOOL**—1 story and base, frame. Cost not stated. Mt. Diablo, Contra Costa Co., Cal. Architect, George C. Meeker, First National Bank Bldg., Concord. Owners, Mt. Diablo School District. Plans and specifications have been completed for the new district school to be erected in the Mt. Diablo District. Plans and specifications can be secured from the architect. Bids will be opened on October 20th.

**STREET LIGHTING**—Cost not stated. Benicia, Solano Co., Cal. Engineer, none. Owners, Town of Benicia. Because of a suggestion of Mayor W. L. Crooks, the Chamber of Commerce of this city has instructed their secretary to secure data on the lighting of other cities. It is the intention of the chamber to place electroliners on First street and other residence streets in this city.

**Wybro**Veneered Panels of  
unexcelled quality—  
Sold only at**White Brothers**

5th and Brannan Streets

San Francisco

**Wybro Panels**  
guarantee "service"

You take no chances of hearing complaints when you use WYBRO Panels in your work.

WYBRO Panels are service panels through and through—they never blister or lose their smooth finish and last longer than other panels.

168 varieties—all guaranteed.

**HIGHWAY WORK**—Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Action in the construction of the Bay Point-Martinez road has been taken by the Board of Supervisors. The County Clerk has been directed to advertise for proposals for the construction of that highway. Bidders are at liberty to submit proposals for the dredging work and also to offer bids for piling. The date for the opening and consideration of the same is fixed for November 9th.

**SEWER WORK**—Cost not stated. Santa Rosa, Sonoma Co., Cal. Engineer, City Engineer, Santa Rosa. Owners, City of Santa Rosa. The City Council here has taken steps to start the construction of a sewer which will cost \$10,000 and has also authorized the paving of Fifth street, from Washington street to the Northwestern Pacific tracks. Charles Spooner has presented a plan prepared by the City Engineer for the proposed sewer for the south side of town, beginning at Bennett avenue and Temple street, thence to Sebastopol, thence to Davidson Lane, thence to and through the Rohrer property to the creek. The estimate provides for 6,124 feet of 14-inch, 5,976 feet 12-inch, 1,045 feet 10-inch, and 1,255 feet 8-inch sewer, a total of 14,400 feet.

**BATH HOUSE COMPLETION**—Frame construction. Cost not stated. San Rafael, Marin Co., Cal. Architect, Thomas O'Connor, D street, San Rafael. Owners, City of San Rafael. The City Council has instructed the City Architect to prepare plans and specifications for the finishing of the second story of the San Rafael Baths.

**Contracts Awarded.**

**STREET PAVING**—\$11,346.79. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. Contractor, L. L. Page, Richmond. Contract price, \$11,346.79.

Oct. 2, 1914—TIBURON, Jenny N Gleissner to T M Herrington .....	Sept. 30, 1914

### FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA.

SCHOOL.—1 story, frame. Cost not stated. Curtis Creek School District, Tuolumne Co., Cal. Architect, none. Owners, Curtis Creek School District. Plans for a new district school have been completed and are now out for figures. Bids will be opened on October 17th. Plans and specifications can be secured from the office of The Banner, published at Sonora, or from the Clerk of the Board, Charles W. Harvey, Sonora.

HIGHWAY WORK.—Cost not stated. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Bids for the grading of 3.6 miles of the Bakersfield-Glenville road will be received by the Board of Supervisors until 2 o'clock p. m. October 28th. The road to be improved under this contract begins at the south end of the Poso creek bridge and extends in a general northerly direction. Its construction will eliminate numerous crossings of the creeks and will necessitate the removal of 35,000 yards of material. Included in the contract are the construction of a pile bridge and the placing of corrugated iron culverts.

HIGHWAY CONSTRUCTION.—Cost not stated. Dinuba, Tulare Co., Cal. Engineer, County Surveyor, Visalia. Owners, Tulare County. Lost Hills and Bitterwaters may soon be connected with a new road, a petition having just been circulated which will mean the building of a highway in the near future. The petition ends for the road to run from the northwest corner of section 1, southwesterly to township 27-19, to the mouth of Bitter water creek, thence along the creek southwesterly to the west boundary of township 27-18.

### SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.

BRIDGE.—Reinforced concrete. Cost not stated. Susanville, Lassen Co., Cal. Engineer's name not given. Owners, Town of Susanville. The Board of Trustees of Susanville at a meeting to consider a proposed concrete bridge across the Susan River to the Southern Pacific depot have ordered the plans and specifications prepared. The plans will be rushed to completion and on approval bids will be called for.

RETAINING WALL, SHEET METAL PILES.—\$10,500. Sacramento, Cal. Engineer, City Engineer Miller, Sacramento. Owners, City of Sacramento. New plans for the sheet pile retaining wall in the levee near the swimming baths, which was washed out last winter, may adopted by the City Commission. The city may also agree to pay half of the expense of the work. The Southern Pacific put in the work, but before it was accepted the piles were washed out. The railroad company wanted the city to replace the piles and sand, while the city took the position that the work had not been accepted and therefore the railroad company had not completed the work. Now it has been decided because of a turn in the river the piles must be driven deeper. For this reason City Engineer has been directed to prepare new plans for the work.

HOSPITAL GROUP.—2 and 4 story and base. Class A construction, \$700,000. Sacramento, Cal. Architect, R. A. Herold, Forum Bldg., Sacramento. Cal. Architect, R. A. Herold, Forum Bldg., Sacramento. Owners, County of Sacramento. Plans for the construction of a new County Hospital that would cost in the neighborhood of \$700,000, including furniture, were discussed by the Board of Supervisors, Architect R. A. Herold and Dr. June B. Harris, County Physician, at a conference held in this city lately. Herold estimated the cost at \$700,000, but some of the Supervisors were of the belief it could be done for less than this. According to Supervisor Mahoney nothing further will be done until the Supervisors have had an opportunity of a hospital can be built for \$250,000.

JAIL.—2 and 3 story and base, reinforced concrete, \$30,000. Woodland, Yolo Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Yolo County. The building will be a part two and part three story structure with offices of the tax collector in the three-story section. Construction will be fireproof, with reinforced concrete floors and walls. Interior partitions will be of hollow tile and metal lath and plaster. Interior will be finished in pine. Plans provide for steam heat, a vacuum cleaning system and hot water supply. Special jail equipment will be installed under separate contract and is not included in the estimated cost of the building. Exterior will be faced with cement plaster. Plans are complete and figures are being taken. Bids will be opened the first week in November. Plans and specifications can be secured from the architect.

ENGALOWS.—4, 1 story and 6 story frame. Cost not stated. Sacramento, Cal. Architect, none. Owner, W. H.

McMorry, Sacramento. These houses will be erected on property on T street recently purchased by Mr. McMorry. Each house will contain six rooms and bath. Interiors will be finished in pine and redwood. There will be some oak floors. Open fire places are specified. Exteriors will be covered with cement plaster on metal lath. Plans are in the hands of the owner who will do the work by Day Labor.

IRRIGATION RESERVOIRS.—Concrete construction. Cost not stated. Engineer, none. Owners, Oakdale and South San Joaquin Irrigation District. Directors and engineers of the Oakdale and South San Joaquin irrigation districts have been in the mountains of Tuolumne County looking for sites for reservoirs, for holding back Stanislaus River water for late irrigation. Many sites were favored, but no definite information can be had until the reports are compared. It is proposed to build joint reservoirs if the scheme can be carried out.

STREET PAVING.—Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, City Engineer, Red Bluff. Owner, City of Red Bluff. A movement underway in this city to have Main street paved from the Imperial Hotel to the Catholic Church. The question will be taken up at the next meeting of the City Trustees.

HIGHWAY CONSTRUCTION.—Cost not stated. Marysville, Yuba Co., Cal. Engineer, County Surveyor, Marysville. Owners, Yuba County. C. J. Dam of Wheatland has petitioned the Board of Supervisors here to consider the building of a county road from point near the Virginia School to the State Highway near Wheatland, a distance of 1½ miles. The road is asked because of the long detour to get to Wheatland from this city. It is necessary, according to Dam, to encircle Bethel hill for a distance of fully 10 miles, whereas if the new road is constructed it would eliminate this distance. The matter is now being considered by the Supervisors.

HIGHWAY WORK.—Cost not stated. California. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. For complete list of the bids recently opened by the State Highway Commission see Sacramento and Northern California in this issue.

DOCKS AND SHEDS.—Steel frame construction. Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, none. Owners, Stockton and Sacramento River Steamship Co. The company will soon begin the construction of new steel sheds in this city according to latest reports. The sheds will probably be erected on the wharf space lying directly west of the present California Transportation Company's sheds. H. J. Corcoran is at the head of the company.

STORES AND OFFICES.—8 story and base. Class A construction, \$163,000. Sacramento, Cal. Architect not selected. Owners, Sacramento Chamber of Commerce. An offer to finance the Chamber of Commerce in this city has been received by the Board of Directors from J. H. McKibben, representing M. C. McCarthy of Chicago. McKibben is a San Francisco broker, who McCarthy is a Chicago contractor. Architect J. W. Woollett, Newhall Bldg., San Francisco, is responsible for the offer, having informed McCarthy of the

opportunity. McKibben in his communication states that McCarthy is willing to put up \$130,000 for the building, but suggests that a \$165,000 building be built of at least ten stories. The Chamber of Commerce has already received plans and specifications for an eight-story building to cost \$120,000. The Chamber owns a site on Second street between I and J, and will build there if the plan goes through.

#### Contracts Awarded.

**JAIL CELLS**—\$2486. Marysville, Yuba Co., Cal. Architect, none. Owners, City of Marysville, Contractors, M. G. West Co., San Francisco. Contract price, \$2,486.

**LIBRARY ADDITION**—1 story and base, reinforced concrete, \$11,000. Woodland, Yolo Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, City of Woodland, Contractor, Harvey A. Klyce, Sheldon Bldg., S. F. Contract price, \$11,000.

**TRACK SPECIALS**—Cost not stated. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete for furnishing the Municipal Railroads with track specials. Complete information can be secured from the City Engineer. Bids will be opened on October 21st. An official proposal appears in another column of this issue.

**PIPE LINE STATIONS**—Frame and concrete construction. Cost not stated. Coalinga to Martinez, Cal. Engineers, Sanderson & Porter, Nevada Bank Bldg., S. F. Owners, Valley Pipe Line Co. (Dutch-Shell Co.) Contractors, Shaw & Hudson, L. A. Contract price not stated.

**TRUNK LINE SEWER**—\$56,851. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractor, Matthews Construction Co., Forum Bldg., Sacramento. Contract price, \$56,851.

## Highway Commission Work Is Awarded.

State Highway Commission Let Contracts for Several Pieces of Work And Open Figures for Others.

Bids have been opened by the State Highway Commission, Forum Bldg., Sacramento, for the construction of State highways in seven different counties of the State, involving eleven separate pieces of work. The following is a complete list of the bids received together with the Engineer's estimate and a list of the materials furnished by the State:

**Sacramento Co., Div. 3, Route 2, Sec. A.**  
A. W. Gorrell, S. F. .... \$29,141.10  
Engineer's estimate, \$43,171.25.

Materials furnished by the State:  
Pipe railing, reinforcing steel, corrugated iron pipe, Portland cement, sand and coarse aggregate. Total, \$24,749.58.

**San Luis Obispo Co., Div. 5, Route 2, Sec. D.**

Berry, Mackie & Co., S. F. .... \$50,787.00  
John Mulligan, Los Angeles. .... 47,826.85  
George W. Connors, Eureka. .... 49,749.90  
J. H. McMillen, Wasco. .... 63,328.70  
Richard Rothwell, L. A. .... 65,577.40  
Marsh Bros. & Gardener, Inc., San Francisco. .... 33,009.20

C. H. Hudson, Los Angeles. .... 47,111.00  
Sanderoock Transfer Co., San

Luis Obispo. .... 66,391.95  
Brashear, Burns Co., L. A. .... 61,190.50  
Enoch S. Hunt, Alameda. .... 66,665.65  
Mahoney Bros., S. F. .... 53,837.60  
Rice & Dutcher, Imperial. .... 66,111.80  
Engineer's estimate, \$53,779.17.

Materials furnished by State: Pipe railing, reinforcing steel, corrugated iron pipe and Portland cement. Total \$3,355.95.

**Humboldt Co., Div. 1, Route 1, Sec. G.**  
Berry, Mackie & Co., S. F. .... \$27,213.40

George W. Connors & Frank Frank L. Smith, Eureka. .... 28,524.60  
William Crowley & T. E. Cloney, Eureka. .... 25,992.68

Rush R. Smith, Fortuna. .... 32,153.32  
F. H. Green, Eureka. .... 28,497.10  
Elsomere & Jacobs, Eureka. .... 18,777.80  
Engineer's estimate, \$28,809.57.

Materials furnished by State: Pipe railings, reinforcing steel, corrugated iron pipe and Portland cement. Total, \$25,349.06.

**Humboldt Co., Div. 1, Route 1, Sec. D.**  
George W. Connors, Eureka. .... \$30,937.70  
William Crowley and T. E. Cloney, Eureka. .... 28,621.98

Rush R. Smith, Fortuna. .... 31,285.52  
F. H. Green, Eureka. .... 29,291.85  
Elsomere & Jacobs, Eureka. .... 33,905.90  
Engineer's estimate, \$36,294.50.

Materials furnished by State: Pipe railing, reinforcing steel, corrugated iron pipe and Portland cement. Total, \$9,422.00.

**Alameda Co., Div. 4, Route 5, Sec. A.**  
Peterson & Grier, S. F. .... \$16,748.50  
Palmer & McBryde, S. F. .... 38,032.00  
P. L. Burr, S. F. .... 16,891.00  
Engineer's estimate, \$45,879.25.

Materials furnished by State: Pipe railings, reinforcing steel, corrugated iron pipe, Portland cement, sand and coarse aggregate. Total, \$26,015.44.

**Santa Barbara Co., Div. 5, Route 2, Sec. A.**

F. Rolandi, S. F. .... \$18,751.50  
Roberts Bros. Co., L. A. .... 18,556.50  
Rice & Dutcher, Imperial. .... 21,264.40  
Engineer's estimate, \$20,333.67.

Materials furnished by State: Pipe railings, reinforcing steel, corrugated iron pipe, Portland cement, sand and coarse aggregate. Total, \$22,896.45.

**Santa Barbara Co., Div. 5, Route 2, Sec. C.**

F. Rolandi, S. F. .... \$74,126.65  
Tieslau Bros., S. F. .... 72,978.20  
Rogers Bros. Co., L. A. .... 62,679.50  
Rice & Dutcher, Imperial. .... 67,952.80  
Engineer's estimate, \$65,811.87.

Materials furnished by State: Pipe railings, reinforcing steel, corrugated iron pipe, Portland cement, sand and coarse aggregate. Total, \$61,536.56.

**Santa Barbara Co., Div. 5, Route 2, Sec. G and I.**

W. E. Callahan Const. Co. Arlington. .... \$7,432.40  
R. H. McGray Co., L. A. .... 82,284.90  
J. H. McMillen, Wasco. .... 82,897.20  
Brashear-Burns Co., L. A. .... 82,410.50  
C. H. Hudson, L. A. .... 79,191.40  
P. L. Burr, S. F. .... 102,009.87  
Engineer's estimate, \$93,487.06.

Materials furnished by the state: Pipe railing, reinforcing steel, corrugated iron pipe and Portland cement. Total, \$8,601.70.

**San Luis Obispo Co., Div. 5, Route 2, Sec. H.**

Tieslau Bros., S. F. .... \$86,331.50  
Dates, Portland & Ayer, Okla. .... 78,821.65  
F. Rolandi, S. F. .... 75,769.90  
C. H. Hudson, L. A. .... 76,349.65

Callback, San Diego. .... 76,349.65  
& Dutcher, Imperial. .... 76,349.65

Roberts Bros. Co., L. A. .... 76,349.65  
Engineer's estimate, \$76,349.65.

Materials furnished by State: Pipe railing, reinforcing steel, corrugated iron pipe, Portland cement, sand and coarse aggregate. Total, \$36,238.70.

**Imperial Co., Div. 7, Route 12, Sec. A.**  
Roberts Bros. Co., L. A. .... \$99,724.30

Rice & Dutcher, Imperial. .... 86,052.30  
Callahan & Hedrick, El Centro. .... 72,132.70  
Roberts & Stevens, L. A. .... 69,921.45  
J. W. Callback, San Diego. .... 68,115.30  
Engineer's estimate, \$79,136.

Materials furnished by the state: Pipe railing, reinforcing steel, corrugated iron pipe and Portland cement. Total, \$25,922.25.

**Sulmon Co., Div. 3, Route 7, Sec. D.**  
A. W. Gorrell, S. F. .... \$17,964.194

P. L. Burr, S. F. .... 11,679.90  
Dates, Portland & Ayer, Okla. .... 16,153.60  
Connary-Peterson, S. F. .... 63,943.00  
Engineer's estimate, \$18,295.50.

Materials furnished by the state: Pipe railing, reinforcing steel, corrugated iron pipe, Portland cement, sand and coarse aggregate. Total, \$34,669.28.

Contracts awarded at the same meeting of the Highway Commission for work in the state were as follows: C. H. Hudson, Los Angeles, 102 miles in Santa Barbara County, \$79,191.

A. C. McLean Construction Co., S. F., work in Kern County, \$68,001.

Elsomere & Jacobs, Eureka, 1.3 miles in Humboldt County, \$18,777.80.

William Crowley and T. E. Cloney, Eureka, 3.7 miles in Humboldt County, \$28,624.98.

J. W. Callback, San Diego, 6 miles in Imperial County, \$68,115.30.

Palmer & McBryde, San Francisco, 5.9 miles in Alameda County, \$38,032.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

**BRIDGES**—9, reinforced concrete and pile. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Engineer, County Surveyor Flournoy, Santa Barbara. Owners, Santa Barbara County. County Surveyor Flournoy is now preparing plans for nine of the most important bridges to be constructed along the State Highway north of this city. He has received from the Engineering Department of the Commission the final locations of the four bridges in de la Cuesta canyon, four in Zaca canyon and one at Santa Ynez. The plans are well under way and it is thought that bids will be taken on their approval.

**JAIL**—7 and 2 story, reinforced concrete, \$30,000. Calexico, Imperial Co., Cal. Architect's name not given. Owners, City of Calexico. Provision has been made in the annual budget for \$17,240 for the purpose of constructing a new jail building. A site of 1 1/2 acres has been secured and steps will be taken at once to have construction started. The present jail building is badly overcrowded. Definite plans have not been secured, but the appointment of an architect will be made shortly. Further mention will be made of this work.

**ELECTRIC LINE**—Cost not stated. Highland, San Bernardino Co., Cal. Engineer, Chief Engineer P. J. Lyons, Los Angeles. Owners, Pacific Electric Co. With the visit of President Paul Shoup and Chief Engineer Flournoy of the

Pacific Electric Company, there has been a rumor circulated that the company has been contemplating the construction of a branch electric line. No additional information can be had at this time.

**HOTEL**—1 story and base, Class C construction. Cost not stated. Los Angeles, Cal. Architect, August Wackerbarth, 202 North Main street. L. A. Owner, Philip Eichholz, 310 X. Grand street. L. A. The building will be erected at the corner of Grand avenue and Temple street, covering an area of 10 by 13 feet. There will be two stories besides the hotel lobby on the ground floor. Upper floors will contain a total of 24 rooms and a number of baths. Interior will be finished in pine throughout. There will be steam heat and a hot water system. Bath rooms will be finished in tile. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

**GARAGE**—1 story and base, brick and steel. Cost not stated. Santa Ana, Cal. Architect, none. Owner, F. E. Farnsworth, Santa Ana. The building will be erected at the northwest corner of Second and Main streets. The building will be a one-story brick structure, and will cover an area of 100 by 117½ feet. As yet no architect has been selected.

**SCHOOL**—2 story and base, brick. \$75,000. Colton, San Bernardino Co., Cal. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Colton School District. The building will be designed in the classic style and will contain sixteen class rooms, office, a large auditorium and domestic science and manual training departments. Interior will be finished in pine with maple floors in the class rooms. There will be a central heating system and modern school plumbing. Plans also provide for vacuum cleaning, program clocks and slate blackboards. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**TELEPHONE EXCHANGE**—3 story and base, brick and concrete, \$50,000. Santa Monica, Los Angeles Co., Cal. Architect, Engineering Department Pacific Tel. and Tel. Co., 333 Grant avenue, S. F. Owners, Pacific Tel. and Tel. Co. The building will cover a considerable ground area and will have a light steel frame with concrete floors and brick exterior walls. The first floor will contain the office of the company and public space. Upper floors will be arranged for exchange rooms and repair department. There will be steam heat and special electric work. Interior will be finished in pine and hardwood. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

#### Contracts Awarded.

**STREET PAVING**—\$31,559.15. Riverside, Riverside Co., Cal. Engineer, City Engineer, Riverside. Owners, City of Riverside. Contractors, Johnson-O'Shea Co., Riverside. Contract price, \$31,559.15.

**RESIDENCE**—2 story and base, frame and plaster, \$3,000. Los Angeles, Cal. Architect, Frank M. Tyler, Black Bldg., L. A. Owner, Mrs. M. Wiley, 1214 Washington street, L. A. Contractor, Thomas K. Miller, 3150

South Figueroa street, L. A. Contract price, \$25,000.

**BANK AND OFFICES**—3 story and base, Class C construction, \$115,000. Long Beach, Los Angeles Co., Cal. Architects, Kreppele & Etkes, Home Bldg., L. A. Owner, Mrs. Lucy Hauerway. Contractors, C. J. Kubach Co., Van Nuys Bldg., L. A. Contract price, \$115,000.

#### PORTLAND AND OREGON.

**HOTEL**—3 story and base, brick. \$30,000. Bandon, Ore. Architect, J. E. Tourtellotte, Rothenild Bldg., Portland. Owners, Hotel Gallier Co., Bandon. The building will cover an area of 75 by 100 feet. The first floor will be arranged for the office, lobby, dining room, sample rooms, grill and kitchen. Upper floors will contain in the neighborhood of 40 guest rooms and several baths. Interior finish will be of pine throughout. Plans provide for steam heat and a hot water system. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**POST OFFICE**—4 story and base, Class A construction, \$1,000,000. Portland, Ore. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, United States Government. Postmaster Myers of Portland has conferred with officials of the Post Office Department and the Supervising Architect regarding the plans for the new Portland Post Office. He suggested several changes in arrangements of floor space in that part of the building allotted to the Post office, the changes being designed to facilitate the handling of the mails. The plans are to be returned to Architect Lewis P. Hobart for revision in accordance with Mr. Myers suggestion.

**POST OFFICE**—2 story and base, brick and stone. Cost not stated. The Dalles, Ore. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. The building will be of semi-fireproof construction and will cover an area of 5,080 square feet. Interior will be finished in pine and hardwood. Plans provide for steam heat and modern plumbing. Hardwood floors will be used. Exterior will be faced with cut stone and pressed brick. Plans are complete and have been forwarded to the west for figures. Bids will be opened in Washington on November 12th. Plans can be secured from either the office of the Supervising Architect or from the Custodian of the site at The Dalles. An official proposal appears in another column of this issue.

**BRIDGES**—Steel and reinforced concrete. Cost not given. Portland, Ore. Engineer, H. W. Holmes, Bureau of Bridges and Highways, Portland, Ore. City of Portland. Plans for the various bridges to be built across the railroad crossings of the Southern Pacific and Oregon-Washington Railroad and Navigation Co., together with approaches, are being prepared under the supervision of H. W. Holmes, who until recently was engineer for the Bureau of Bridges and Highways for the city, and will continue in charge of this work. Besides the various structures which will be built, a trestle will be made by the railroad company. This will extend along Sixth avenue from 28th street to 8th street and when completed will be between 10 and 12 feet lower throughout the

entire distance. This work will be completed by the railroads. The largest of the structures planned is that at East 37th street, which will be a 150-foot structure, consisting of three spans. These will be steel girders encased in concrete. There will also be four concrete approaches of various lengths, not to exceed 200 feet each. Other structures are planned at East 82nd street, East 47th street and East 52nd street, to be built at an estimated cost of \$40,000 each. Plans will be completed this fall, but in all probability bids will not be called for until in April.

**STEEL, PRESSURE PIPES**—Cost not stated. Okanogan, Ore. Engineers, United States Reclamation Service, Federal Bldg., L. A. Owners, United States Government. Plans are complete and figures are now being taken for furnishing and erecting riveted steel pressure pipes in the Okanogan Reclamation District. Plans and specifications can be secured from the engineers at Los Angeles, Cal.

#### Contracts Awarded.

**DOCK**—1 story, mill construction \$30,060. Portland, Ore. Engineer, G. F. Hegardt, Public Dock Commission, Portland. Owners, City of Portland. Contractor, Anton Teller, Builders' Exchange, Portland. Contract price, \$30,600.

#### SEATTLE AND WASHINGTON.

**LIBRARY**—1 story and base, brick and concrete, \$40,000. Columbia City, Wash. Architect, W. Marbury Somervell, White Bldg., Seattle. Owner, Columbia City. The main building will contain two reading rooms, office of the librarian, stack room and game room. A rear wing, 20 by 46 feet, will contain work room and children's reading room. Interior will be finished in pine with hardwood floors. There will be a central heating system. Metal book stacks are specified. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and figures will be called for shortly.

**RECLAMATION PROJECT**—Cost not stated. Strawberry Valley, Utah. Engineers, United States Reclamation Service, Provo, Utah. Owners, United States Government. The work undertaken is the construction of Divisions 1, 2 and 3 of the Highline Canal, involving 384,000 cubic yards of excavation, 2,300 cubic yards of excavating for structures, 3,300 cubic yards of reinforced concrete, 167,000 square feet of canal lining, 230 feet of tunnel, laying 1,700 feet vitrified pipe, 1,400 cubic yards of back filling, stone paving and placing of sluice gate. Bids are now being taken and figures will be opened on November 15th.

**CANAL WORK, FLEMING ALLEGATES**—Cost not stated. Benton City, Wash. Engineers, United States Reclamation Service, North Yakima, Ore. Owners, United States Government. The work will consist of constructing approximately 12.25 miles of canal enclosures with pipe lines, dunes and other appurtenant structures involving 67,000 cubic yards of earth, 17,000 cubic yards of rock, constructing six pipe lines of approximately 4 feet. Plans and specifications can be secured from the engineers. Bids will be opened on October 26th.

**BRITISH COLUMBIA TIMBER AND LUMBER TRADE.**

[Consul General R. E. Mansfield, Vancouver, Canada, August 31.]

It is the policy of the British Columbia Government to maintain a tax on timber exports which is practically prohibitory. This has resulted in forcing millmen who wish to utilize the timber supply to manufacture the lumber in the Province, thereby providing employment for local labor and giving the community the benefit of the money spent in the lumber industry. Owing to the stringency of the money market, and the depressed condition of the industry during the past year, which has been rendered more acute by the war, the provincial government is endeavoring to improve the situation and stimulate the timber trade by removing some of the restrictions on the exportation of logs.

It is estimated that the amount of lumber at present in the coastal waters of the province in log form is 200,000,000 feet. Of this amount British Columbia mills own about 75,000,000 feet, the remaining 125,000,000 feet being in the hands of the loggers and at present practically a drug on the market. A large proportion of this 125,000,000 feet of logs now without an available market is cedar, the remainder being second and third class fir. The 75,000,000 feet held by the millmen is also cedar and fir of various grades.

There has been a demand recently on the part of the loggers and timbermen for the removal of the tax on logs exported, but instead of removing all restrictions on this class of exports the provincial government has authorized the exportation of logs on the payment of the following amount (per 1,000 feet), which includes the usual 50 cents royalty per 1,000 feet: No. 1 cedar, pruce, and pine, \$2; No. 2, cedar, pruce, and pine, \$1.50; No. 3 cedar, pruce, and pine, \$1; No. 1 and 2 fir, \$1; No. 3 fir, 50 cents; balsam and hemlock, all grades, 50 cents. This reduction is claimed by the loggers to be insufficient to create any general activity, or increase materially the exports, or provide a market for the timber on hand.

The purpose of the government in passing the order was to provide an immediate market for the large number of logs now on the coast, which would bring into the country more than a million dollars. The low price of logs, and the lack of demand from Puget Sound mills, which were depended upon for consuming British Columbia surplus timber, will probably result in little movement in that direction, and loggers claim that the government's action will not relieve the situation appreciably. The logs now in the coastal waters are deteriorating rapidly, and unless soon sold heavy loss will result.

**Seeking Export Trade.**

To widen the markets for British Columbia lumber, local dealers are making concerted effort to obtain information by sending practical lumbermen to trade centers where the outlook is good for increasing the export business. The fields to be covered are the east and west coasts of South America, United States Gulf and Atlantic coast

# Important!!

## Announcement of Improved Service of the "BUILDING and INDUSTRIAL NEWS"

With the desire to aid our advertisers and subscribers we announce the appointment of Lloyd C. Comegys, as our advertising manager.

Advertisers will receive his free advice and assistance regarding the advertisements carried in our weekly magazine, in order that they may produce greater results for them, both in advertising trade names and goods, and in getting direct sales and returns.

**Our Weekly has MANY ADVANTAGES for you.**

**Learn about them by sending for**

### Free Sample Copy

**Building and Industrial News**

**560 Mission St., S. F.**

ports, China, and Japan. It is believed that the Panama Canal affords new opportunities for British Columbia lumber and that the volume of export trade can be materially increased by systematic endeavor. An order was recently obtained for supplying several million feet of lumber for public works in Eastern Canada, most of which will be carried through the canal. Lumbermen are not depending upon the government trade commissioners, but will gather the desired information through their own representatives, believing that the results thus obtained will be of more practical value. The lumber business in the Province is suffering from depression, and this effort to increase export trade and to take advantage of war conditions by establishing new markets is meeting with the encouragement of the millmen generally.

Lumber shipments from Vancouver, for the first six months of 1914, to points outside of Canada aggregated 10,414,076 feet, all from the Hastings mill. Shipments for the corresponding period of 1913 amounted to 9,193,413 feet.

**Government Sale—New Sawmill—Timber Inventory.**

Thirty-two million feet of lumber in the Fort George district has been sold by the provincial government to the Riverside Lumber Co. of Calgary at \$37,000. The purchasing company contracts to complete cutting the timber within three years, in order that the land may be made ready for settlers.

The White Pine Lumber Co., of Spo-

kane, Wash., is preparing to establish a sawmill at Westbridge, British Columbia, which will have 200,000 feet daily capacity. The company owns a town site, and will soon begin erecting workmen's houses; about 300 men will be employed.

The Canadian Commission of Conservation is taking an inventory of the timber resources of the Dominion, beginning with British Columbia. It is estimated that it will require about two years. The provincial forestry department is co-operating with the Dominion branch of the service, and when the work is completed maps will be prepared showing the quantities and localities of the species of timber in the various Provinces.

**Utilization of Pine Cone Seeds.**

The utilization of pine cone seeds promises to develop into an industry of some importance in the Northwest. An enterprising timberman in Washington State has for two years been collecting pine and fir cones and extracting the seeds, which are said to find a ready market at profitable prices. Last year a carload of cones was shipped from British Columbia and the seeds exported to Germany. The cones were gathered by Indians in the northern part of the Province, and transported in sacks over long distances to the railway, where they were taken to their destination in the United States. The experiment proved profitable, and several carloads have been ordered this year, and a business promise to afford another outlet for a hitherto untutilized British Columbia product.

# Efficiency and Advertising

by Lloyd C. Comegys

## The Greatest of Business Problems.

The greatest of business problems is the obtaining of **NET PROFITS**. All other matters are details toward the attainment of this end.

It is the object of the business man, and he is succeeding or failing in accordance with the amount of his **NET PROFITS**. That's what he is in business for.

In seeking to obtain **NET PROFITS**, certain ways have been learned to be more successful than others, and it is these **MORE SUCCESSFUL WAYS, SPECIAL METHODS AND DEVICES** for attaining **NET PROFITS** that have been given the designation of **EFFICIENCY**.

**Efficiency is the Scientific Method of Securing Increased NET PROFITS.**

Efficiency is new. Very little of it has been written down in books. As a general tendency it is everywhere, but as a **system of thought**, it exists only in the minds of a comparatively small number of men.

Those in business, as owners or employees, who understand Efficiency, are inclined to keep this valuable new knowledge to themselves, just as the gold miner, who has struck a rich vein of yellow treasure, is inclined to be secretive about his good luck.

And there are only a few men, as yet, who are practicing as a profession, the installing of Efficiency in offices, business houses, plants and factories.

### What Efficiency is NOT.

Efficiency is not a new name for an old truth so far as it relates to industry and to individual success. It is an **absolutely new point of view in the business world**.

It is not Expert Accounting, for the reason that accounting deals only with records and not with methods.

It is not Economy, for the reason that mere saving is often the most suicidal of all business policies.

It is not Energy, for the reason that misdirected energy is the most universal of all industrial wastes.

It is not Slave-driving, for the reason that one of its main benefits is to elevate and profit the wage-workers, not to degrade or oppress them.

And it is not System, for the reason that the most useless and wasteful actions can be done in the most systematic way. There can easily be too much system, but there can never be too much Efficiency.

Efficiency will get a greater percentage of results for you, without adding to expense, and will reduce costs without lessening results.

Efficiency is needed in the one-man business, as in the concern employing thousands of men. It is as important to the one, as to the other, to **increase NET PROFITS**.

LOOK INTO THIS SUBJECT OF EFFICIENCY.

It means greater **NET PROFITS** for YOU!

## Efficiency Methods.

As applied to business, and considering individuals only as one of the parts of business used to produce the **NET PROFITS** desired, Efficiency approaches the particular firm it is called in to assist from every angle, large and small.

Almost the first matter to be considered is the question of **OVERHEAD CHARGES**. This subject, though almost the controlling feature as to whether or not the firm is to make **NET PROFITS**,—is probably the most neglected and wrongly handled of all business subjects. The subject is a difficult one and in consequence many avoid looking it squarely in the face, as soon as they have made a semblance of settling upon a percentage for their firm.

Efficiency takes hold of this subject and in a scientific way lines the facts about it up in connection with the other features of the business.

Another difficult problem is Salesmanship and the other one advertising. These are constructive and productive forces and the most valuable.

Here it is that Efficiency gains greater results without increased costs, and lesser costs without reducing results.

And the modern Salesmanager and Advertising manager approaches his work from an Efficiency standpoint.

## The Small Firm.

The small firm having less margin in the way of expense for a large office force, tends to utilize the time of its employees to the very best advantage. This means that without the employee working harder or longer, that the results he produces may be much greater, simply by a change of his methods of Work or the Facilities to work with. The small firm therefore needs **EFFICIENCY Methods** as much, if not actually more than the larger ones.

## What Trade Name Advertising can do as Efficient Sales Co-operation.

It can give general publicity to your trade name and goods in the locality you desire to cover, through the use of newspaper, magazine, program, mail and bill-board advertising. The results would come to you through the sales made by your representatives or selling-houses in those localities. Such advertising so establishes the character and value of your offerings or products as to largely relieve your selling-houses, representatives and salesmen from so establishing or informing regarding who you are and the general lines that you offer.

This leaves the salesmen or selling houses free to devote their entire time to actual sales making and eliminate a large amount of waste effort on their part in connection with your offerings.

Advertising may be very profitable used in obtaining inquiries regarding your offerings and getting in touch with live prospects or those whose minds have already been directed or centered upon taking your proposition. These inquiries or leads to prospective may then be turned over to your representatives or salesmen, who thus can produce many times the results that they otherwise could if left alone to scatter their efforts in a general way.

**GOOD WILL:**  
The good will of a firm that is established through advertising coming directly from the house is the most valuable kind, in that it cannot be materially affected by the presence or absence of any particular salesman.

### ADVERTISING:

In plain words means explaining possible customers of whatever you have to offer, who you are, and why you have to offer. Notice, I say **possible customers** and it is right here where so much money is lost in advertising, even when it is properly done and contains real pulling or selling power. Be sure you are advertising to possible customers of your particular offerings and not to the general public or to those who would under most circumstances not want them. A trade magazine is one of the very best mediums for reaching the exact people in your line.

## Editorial Comment.

Building operations, reflecting general business conditions and the uncertain future due to the European war, registered a big deficit for September as compared with the same month last year. Reports from about 60 different cities made to the American Contractor, Chicago, show a loss for the period of about 32 per cent. This loss, however, was not evenly distributed. New York, for instance, shows a slight gain. So does Cleveland. Other cities, however, show an almost uniform decrease and this general depression is shared by Pacific Coast cities.

It is impossible to prophesy concerning the future as the European war is an uncertain thing. However, if any one is to profit by the war it ought to be this country and in time the money market should loosen up and building revive along with other business. The figures present the following table:

	Sept.	Sept.

## WAITING FOR AN INTERNATIONAL POLICE.

Let the United States make more adequate preparations for self-defense, but let it also use its influence toward the reduction of armaments, looking toward eventual dependence on an international police force to end war, just as local police forces have rid civilization of the duel. This in brief is the argument of Colonel Roosevelt in his article yesterday on "What American Should Learn From the War."

The chief criticism that has been made of his reasoning is that it emphasizes too strongly the need of more efficient armament for the United States. How, it is asked, can this country take the lead in calling for disarmament if it is increasing its fleet?

The obvious reply is that the United States always is willing to limit its armaments provided other countries will scale theirs down. Meanwhile, so long as warlike nations are maintaining great offensive forces, and so long as there is no international police force to keep the peace, for America to be defenseless would not increase its influence. Such a condition would only be an invitation to an attack.

In the old frontier days the substantial citizen was forced to carry a gun and be ready to use it on occasions unless he wanted to be the victim of desperate men who always were armed. For him to have thrown away his gun while they kept theirs would have put him at their mercy. They would have laughed at his appeal. Good citizens kept their arms until the police force was organized.—Kansas City Star.

## The Investment Companies Act.

Argument for the Act Before the Commonwealth Club of California, San Francisco, October, 1914.

Prepared by W. F. Chandler.

To the Board of Governors of the Commonwealth Club of California:

The main provisions of the Investment Companies Act (Blue-Sky Law) are to create a State corporation department to require all investment companies to file with the corporation department a statement of their financial condition, their manner of transacting business, and their articles of incorporation. Also to report to the corporation commissioner twice each year until their securities are sold, as to the amount of securities sold, proceeds derived therefrom, and the disposition of such proceeds.

The object of this act is to safeguard and protect the public against the operations of companies organized in such a manner as to permit their officers to use the proceeds of the sale of their securities for purposes other than for the benefit of the stockholders. To be more explicit, it is to get rid of the unscrupulous promoter.

In the past it has been too easy to incorporate stock companies, and the result is that many companies have been organized, whose mode of doing business has been unfair and unjust to say the least. Some of these companies have been formed for the sole purpose of defrauding the public, and as the investor often has not the opportunity, nor the ability to investigate such matters for himself, this bill was conceived and passed by the last Legislature, with the idea of protecting such people against unfair and fraudulent organized companies. As an example of the manner in which such companies have imposed upon the purchasers of stock in the past, I will cite a few cases of the many that have come under my observation. I will refer particularly to oil companies, as we, of California, are more familiar with the operations of this class of companies.

During the oil excitement of the past few years, hundreds of fraudulent companies have been organized, evidently with no other purpose than to secure money from the sale of stock without giving value received. One company bought a section of desert land that was worth practically nothing per acre. It also bought ten acres of cheap land on which an oil well had been drilled and abandoned. It incorporated with two and one-half million shares of stock with a par value of one dollar each. It issued a circular stating that it owned 650 acres of land with an oil well on it, and desired to sell stock to the purpose of drilling more wells. It sold a great deal of this stock, mostly to small investors. The receipts from the sale of the stock were appropriated by the officers of the company, and no more wells were drilled. Their statement was in a way true, for in the whole it was a fraud of the worst kind.

Another company incorporated for a million shares, of the value of one dollar a share, selling common stock, it was prosecuted by officers of the Federal Government for the fraud.

ulent use of the mails. In this suit it was proven that the company owned neither oil land nor oil leases. It fact it had no material assets whatever.

Between the years of 1902 and 1908 there were localities in this state where the earnings of small farmers, teachers, clerks, stenographers and other salaried persons were invested in these low priced oil stocks to such an extent that local banks were injuriously affected by the withdrawal of their deposits. In only a few instances did this class of investors receive any returns whatever from their investments.

Recently my attention was particularly called to an insurance company that was being organized in this state. Connected with this company two other companies were being formed. One was a holding company, the other a subsidiary company formed for the purpose of taking over a forty-nine year agents' contract which the promoter had secured from the insurance company. In presenting his plan of business to the public the promoter was asked what he was getting out of it. He replied forty per cent. He afterward stated that this per cent had been reduced to twenty-five. In handling the subsidiary company, the promoter asked several different men to act as president of the company. All, however, declined. To one of these men he offered \$25,000 if he would serve for only six months, stating that he would have no duties to perform. One of the agents of this company stated that he and one other person were receiving twenty-five per cent of the proceeds of the sale of stock as a commission. Thus you will note these people were willing to pay \$25,000 for the use of the name of one person for only six months also they were paying twenty-five per cent of the proceeds of the sale of their stock to agents, and that the promoter retained twenty-five per cent. These transactions took place prior to the time when this company was required by law to come under the jurisdiction of the Insurance Commissioner.

It is not necessary to say that purchasers of stock of this kind, and under these conditions, do not get a fair deal. Such cases as I have just cited are not uncommon, and I have no doubt that each of you have come in contact with many such. All of which should be prevented by law.

Perhaps the best argument for the passage of this bill can be made by answering some of the objections raised against it. The following are some of those objections:

c. That it will hurt legitimate enterprises by deterring them from incorporating. This I think is not true. The standing of a corporation that incorporates under the provisions of this act, will be only that of the certificate of the county clerk, and no certificate of the county clerk is necessary to make an incorporation valid. It then offends the public interest in complying with the law, by keeping some competent person who has been

power." It is urged that he could, with a word, stifle legitimate enterprises, or that he might be corruptly tempted to allow unworthy enterprises to be promoted. My reply to this is, that the commissioner will occupy a similar position as do the judges of our courts. He will have the same aspirations to do good, and the same temptations to do wrong. He will be threatened and bullied just as some of them have been threatened. He will no doubt make mistakes just as some of our judges have erred, but in the main he will be as honorable and upright as they. At the present time there is a case pending in one of the courts of this state, in which property valued at hundreds of millions of dollars is involved, yet no one fears that a dishonest decision will be rendered, and none of us would for a moment entertain the idea of doing away with our courts because of the power they possess.

(4) Some have objected to the provisions whereby all papers filed with the corporation commissioner shall be open to the public, arguing that "this is contrary to good business principles."

Only corporations and stock companies that desire to offer their securities to the public are affected by this act. If they expect to offer their securities to the public, there can be no reason why any portion of their plan of business should be kept secret from the public.

(5) It has been urged that "at times it is necessary to act promptly in forming a corporation, and that the time required for the corporation commissioner to examine the applicant's papers, (as required in this act) would prevent the carrying out of the transaction for which the corporation was desired to be formed."

To that I would say that section five of the act safeguards the incorporator in such instances, as it provides that "a corporation may, without applying for a certificate under the provisions of this act, issue to each of its directors one share of stock for the purpose of qualifying as directors." And under such conditions "the commissioner may, forthwith, issue to said investment company a temporary permit to issue its securities pending the examination of its statement and other papers."

Section 12 of the act provides for an appeal from any decision of the commissioner, to the Superior Court of the State of California in and for the city and county of San Francisco.

It was deemed wise to designate the court to which appeal could be taken, else the court of some remote county might be selected, thus causing much inconvenience to all parties concerned, and also, that appeals in cases of this kind should be heard by the same court, as near as it is practicable.

This act does not apply to what are known as close corporations, that do not desire to offer their securities to the public, such as are frequently formed by families and mercantile and other establishments for the greater convenience of conducting their business, nor to those subject to the Railroad Commission, nor to those that have secured from the State Banking Department, the Insurance Commissioner or Bureau of Building and Loan, certificates of authority to do business;

nor to corporations subject to Federal regulation, nor to mutual water and irrigation associations. Nor does it attempt to follow the stock or other securities after they have left the ownership of the company that originally issued them. To be able to incorporate, the company must show a reasonably safe plan of doing business, and such plan would not be just, fair or equitable if it proposed to sell its stock for one cent a share so that the purchaser could still impose upon the public with it. A company would not, and should not be allowed to sell its securities with receiving a reasonable value for them.

The laws are for the protection of the people. When the law permits itself to be used for the purpose of incorporating, it brings into life a legal thing, known as a corporation. This thing is given powers by the law that an individual does not possess. That is, to issue and sell stock. Without the aid of the law that thing could not have come into existence. It was begotten by the law and the law should be responsible for its manner of doing business. The law cannot consistently legalize a thing without an effort on its part to protect the public from the acts of that thing. The present corporation laws are committing a crime against the public by allowing dishonest men to incorporate their business without knowing something of the manner in which they expect to conduct that business, and should be so amended or new legislation enacted, as to prevent the legal creation of a thing that may, and in thousands of instances has, become a menace to the public.

The foundation of our commonwealth is the man of small means, the small merchant, the clerical man with small income, the small farmer, the man who labors with his hands, either for himself or for his employer and has saved a few hundred dollars. He it is who needs, and is entitled to have all the law can give.

It goes without saying that we do not wish to injure legitimate business, the safeguards placed around him that

THREE OCT 15 HOYT

nor to place obstacles in the paths of honest men, and I am thoroughly convinced that this law will do neither. It may not be perfect and will probably need to be amended, but the principle on which it is based, of protecting those that need protection, is correct, and after recalling the many instances of gross fraud that have been practiced by unscrupulous companies, I wonder that such a law has not been placed on our statute books long ago.

W. F. CHANDLER,

Fresno, California.

#### APPOINTMENT OF COMMERCIAL ATTACHES.

The Department of Commerce announces the appointment of seven commercial attaches to undertake the new service of American trade promotion abroad, recently authorized by Congress. They will be accredited by the State Department to the embassies and legations of the United States in the Foreign capitals named.

The following may be of interest to our readers.

Mr. Julian H. Arnold, of California, commercial attaché at Peking, has

been in the consular service since 1902, being now transferred from the position of consul general at Hankow. Mr. Arnold speaks Chinese in its various dialects and has traveled in all parts of China on commercial studies.

Dr. Albert Hale, of Indiana, commercial attaché at Buenos Aires, has made several tours of South America for the Pan American Union, and is an authority on the trade and progress of the countries south of the United States.

Mr. Lincoln Hutchinson, commercial attaché at Rio de Janeiro, now associate professor of commerce in the University of California, has had experience in banking and has made special studies of trade conditions in Latin America for the Department of Commerce. He has traveled in nearly every part of the world.

Mr. A. L. Harrington, of Ohio, commercial attaché at Lima, has had practical experience in railroad work, was an officer of the Philippine Constabulary; and for the last four years has been engaged in commercial work in the East Indies.

American manufacturers and exporters desiring to communicate with any of the commercial attaches should address their letters to the Bureau of Foreign and Domestic Commerce, Washington, D. C.

#### BRITISH COLUMBIA INDUSTRIAL NOTES.

[Consul General R. E. Mansfield, Vancouver, Canada.]

##### West Vancouver Water System.

West Vancouver, one of the many suburbs of this city, is planning to install a new water system. A concrete dam 100 feet long and 26 feet high, capable of holding 1,100,000 gallons of water, will be constructed at a cost of \$155,000. The system will include 18 miles of lap-weld steel pipe, 2,000 of which will be 12-inch and an equal length 10 and 8 inch. The lateral pipes will be of 4 and 6 inch steel, and provision has been made for the erection of 65 hydrants for fire protection purposes. The estimated cost of the system is \$120,000.

##### New Box Factory for British Columbia

A company composed of Boston capitalists, with \$250,000 capital, plans a box factory on the Fraser River, adjacent to Vancouver, which will employ 200 persons. The location of the factory in British Columbia is due to the fact that a plentiful supply of the kinds of wood to be used in the construction of the boxes, including cottonwood, spruce, hemlock, fir, and alder, is to be obtained in the Province at prices below those prevailing for the same class of material in the United States. That the plant will begin operations under favorable auspices is shown by the fact that orders have already been secured from Ceylon and India for a large number of tea boxes.

##### PAINTING THE EIFFEL TOWER.

For the fifth time since its erection the Eiffel tower is receiving a new dress of orange yellow. Sixty tons and pounds of paint are needed to adorn the great tower, and 50 painters will be employed during the three months. The new job costs \$2,000,000.

# ADVANCE NEWS

Classified according to Character of Work

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$15,000. Architect, none. Owners, J. and M. Dempniak, 728 1/2 Ave. street, S. F. The building will be erected on the east side of Hyde street north of Vallejo, covering an area of 25 by 72 feet. Interior has been arranged for six modern suites of three and four rooms. Interior finish will be of pine and hardwood veneer with hardwood floors in the principal rooms. Plans provide for steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. All apartments will be equipped with wall beds. Marble and tile will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath with a brick veneer base. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**SAN FRANCISCO**—Apartment house, 3 story and base, brick and frame, \$30,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Max Kolander. The building will be erected at the southeast corner of Franklin and Sacramento streets, and has been designed to contain twelve suites arranged in apartments of two, three and four rooms. Interiors will be finished in pine, walnut and other hardwoods. Hardwood floors will be used in the principal rooms. There will be steam heat and a hot water system. All apartments will have wall beds and private bath rooms. Bath rooms will be finished in tile with composition floors. Exterior of the building will be covered with pressed brick veneer. Plans are complete and figures are being taken.

## BONDS.

**HOLTVILLE, IMPERIAL CO., CAL.**—Bonds in the sum of \$33,000 for the construction of sewers and \$2,000 for the erection of a bridge over Alamo River have been voted at Holtville. The Wilson-Crammer Co. of Denver have signed to take over the bonds as soon as they are ready for delivery. Bids on the sewer and bridge work will be called for as soon as possible.

**IMPERIAL, IMPERIAL CO., CAL.**—An election will be held here on October 22th in the Imperial Irrigation District at which time the voters will determine the issuing of bonds in the sum of \$3,500,000 for the purpose of acquiring all canals, system and water works by which water is now furnished to lands in the district by the California Development Company. C. Berry is the secretary of the Imperial Irrigation District.

**SAN FERNANDO, LOS ANGELES CO., CAL.**—The proposed bond issue in the sum of \$150,000 for the erection of Fernando carried by a large majority. Fernando carried by a large majority. John C. Austin is the architect of the new school.

**COLTON, SAN BERNARDINO CO., CAL.**—Allison & Allison have been selected as the architects for a new school building to be built here and for which a bond election will be held to raise funds for the erection of same.

**VENICE, LOS ANGELES CO., CAL.**—An ordinance has been adopted by the City Council here for a special bond election to be held on November 9th for the purpose of voting bonds in the sum of \$30,000, the funds to be used in the construction of an outfall sewer pipe from the septic tank to the bed of the Pacific Ocean. At the same time the question of issuing bonds of \$30,000 for the construction of a fire house and the purchase of the necessary apparatus will be voted on. C. S. Thatcher is the City Clerk from whom further information may be had.

**HAVRE, MONT.**—The County Commissioners have decided to hold a special election to vote bonds in the sum of \$125,000 for the construction of a court house and jail building. J. H. Devine is County Clerk.

**SEATTLE, WASH.**—The promoters of the proposed terminals for the International Terminal & Transportation Co. in the vicinity of Pike street, state that bonds for the construction of the \$50,000 terminals proposed at that locality are now being issued and that half of the initial issue of \$20,000,000 has been subscribed to by local material dealers and that work will proceed as soon as sufficient funds have been added to the bonds already subscribed to.

**AZUSA, LOS ANGELES CO., CAL.**—An ordinance has been adopted by the Board of Trustees, calling for a special bond election to be held on October 24th. Should the issue carry, bonds in the sum of \$35,000 will be sold for the purpose of purchasing and constructing water works and system with water development. At the same time the voters will decide the question of issuing \$20,000 in bonds for the acquisition and construction of an electric distributing system. G. A. Thompson is the City Clerk.

**PACOMA SCHOOL DISTRICT, LOS ANGELES CO., CAL.**—An election has been held for the issuing of bonds in the sum of \$15,000 for the purpose of raising money for the purchase of a new school building, insuring and furnishing the same. H. P. Canby is one of the Trustees.

**SAN FERNANDO, LOS ANGELES CO., CAL.**—Another election will be held in the Morningside School District for the voting of bonds of \$50,000 to erect a new school building. The issue, which was voted some time ago and carried, has been declared illegal.

**INGLEWOOD, LOS ANGELES CO., CAL.**—October 20th is the date set for the voting of bonds of \$15,000 to be used in the erection of a school building and equipping same with the necessary furniture.

**ALBANY, ORE.**—A. C. Schmitt, president of the School Board has called a

meeting of the School Directors regarding the new Junior High School building. Mr. Schmitt stated that owing to the condition of the bond market the bonds for the new building have not yet been sold.

**SAN FRANCISCO**—City Treasurer John E. McDougall reports that \$30,953.53 of the Municipal Railway bonds and \$261,736.10 City Hall bonds have been sold to Bond & Goodwin, bond brokers.

## BRIDGES AND DAMS.

**REDLANDS, SAN BERNARDINO CO., CAL.**—Dam, concrete and earth. Cost not stated. Engineer's name not given. Owners, Tri-Counties Reforestation District. The Tri-Counties Reforestation committee has under discussion a project for the construction of a great 4,000 foot dam 12 feet in height across the mouth of Santa Ana canyon, it being argued that silt will form which will spread the water over a vast area later to be conducted by channels into an artesian basin. This is the latest idea for the conservation of water which is now being wasted.

**RED BLUFF, TEHAMA CO., CAL.**—Bridge, timber construction. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Plans and specifications for a wooden bridge to be erected over the Salt Creek slough in Road District No. 4 have been adopted by the Board of Supervisors, and bids will be received for construction of same until November 1st at 10 a. m.

**ARCADE CREEK, SACRAMENTO CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Sacramento. Owners, Sacramento County. Plans and specifications have been completed and have received the approval of the Board of Supervisors for a reinforced concrete road bridge to be constructed over the Arcade Creek on the Auburn road. Bids are now being taken and will be opened by the Board of Supervisors on October 29th. Plans and specifications can be secured from the County Surveyor.

**SALINAS, MONTEREY CO., CAL.**—Bridge, concrete and steel, \$5,000. Engineer, County Surveyor, Salinas. Owners, Monterey County. Two bids were received by the Supervisors for the construction of the tri-county bridge at Aromas. H. E. Rowe bid \$5,600 and Messner & Rice, \$5,900. Both bids were rejected and the Clerk was ordered to advertise for new bids to be opened on November 10th.

**SAN LAUS OBISPO, SAN LAUS OBISPO CO., CAL.**—Bridge, reinforced concrete, \$3,000. Engineer, County Surveyor, A. P. Parsons, San Luis Obispo. Owners, San Luis Obispo County. Bids opened by the Board of Supervisors for the construction of the Paloma Creek bridge have been rejected. After

considerable discussion it was decided to build the structure by Day labor. The structure will be of reinforced concrete construction, and will be constructed under the supervision of County Surveyor A. F. Parsons and Supervisor E. W. Black.

**FAIRFAX, MARIN CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Rafael. Owners, Marin County. Plans are complete and figures are now being taken for a reinforced concrete bridge to be erected on the Fairfax-Eolinas road just south of the town of Fairfax. Alternate bids will be received for timber construction in case the reinforced concrete structure runs above the estimate. Bids will be opened by the Board of Supervisors on November 10th. Plans and specifications can be secured from the County Surveyor.

**FRESNO, FRESNO CO., CAL.**—Bridge and grading. Cost not stated. Engineer, County Surveyor, Fresno. Owners, Fresno County. Bids will be received up to November 6th for improving the Dunlap Cut-off road and for constructing a reinforced concrete bridge 75 feet long. The work is estimated to cost \$6,500. Plans and specifications can be secured from the County Surveyor.

**HOLLISTER, SAN BENITO CO., CAL.**—Bridge and road work. Cost not stated. Engineer, County Surveyor, Hollister. Owners, San Benito County. At a regular meeting of the Board of Supervisors the following matters were discussed: Bids for the tri-county bridge at Aromas were rejected. All bids were too high. New bids will be called for immediately. Revised plans and specifications for the Jetties and piling on the Hollister-San Juan bridge were adopted and bids were ordered called, to be opened November 2nd at 2 p. m. The Board accepted plans and specifications for the Hollister-Cienega road, and ordered bids called, to be opened November 2nd at 2 p. m. No bids were received for constructing the Collins bridge, which is estimated to cost \$2,850, and the County Surveyor was ordered to have it built under the Day Labor system.

**MARYSVILLE, YUBA CO., CAL.**—Bridge, reinforced concrete, \$124,000. Engineer, County Surveyor, Marysville. Owners, Yuba County. A statement published in the Marysville Appeal on October 16th states that the Clinton Fireproofing Co., Mutual Bank Bldg., S. F., had abandoned their contract for the construction of the D street bridge in that city, a job amounting to \$134,000. R. E. Parker, manager of the Clinton Fireproofing Co. has stated to a representative of the Building and Industrial News that his company has no such intention, and that already three cars of equipment and materials are on the job. Work will be started on the big bridge by the Clinton Co. at once.

**WESTPORT, ORE.**—Trestle, timber construction. Cost not stated. Engineer, Engineering Dept. of Columbia & Nehalem Railroad, Westport. Owners, Columbia & Nehalem Railroad Co. This contract will be divided into two parts—the trestle work and furnishing and placing lumber in the bent trestle. The trestle will be 1,352 feet long and from 15 to 70 feet high. In the lumber contract there will be required in the

neighborhood of 100,000 feet of lumber. The company will furnish the contractor with an engine and two pile drivers. Plans are complete and figures are now being taken.

#### Contracts Awarded.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Bridges, 2, reinforced concrete and steel. Cost not stated. Engineer, City Engineer, Santa Barbara. Owners, City of Santa Barbara. Contractors, Boardman Construction Co., Santa Barbara, Aliso Creek Bridge, \$11,291; Munoz & Munoz, Santa Barbara, Salinas bridge, \$11,321.

#### CHURCHES.

**LOS ANGELES, CAL.**—Church, 2 story and base, reinforced concrete, \$260,000. Architects, J. T. Comes and T. F. Imes, Washington Bldg., Pittsburgh, Pa. Owners, St. Vincent's Parish. The building will be erected at the corner of Adams and Figueroa streets, covering an area of 100 by 225 feet. The design will be in the Italian style. Construction will be fireproof. The main portion of the church will be 55 feet high. Interior will be finished in pine and hardwood with ornamental plaster in the main auditorium. There will be steam heat. Marble and tile will be used extensively. Exterior of the building will be faced with pressed brick. A general contract will be let. Working drawings are nearly complete and figures will be taken in about a month.

#### COURT HOUSES.

**SAN FRANCISCO**—City Hall work, metal work, skylights, etc. Cost not stated. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Plans for furnishing and installing all metal work, skylight work and metal roofing in the new City Hall are complete and figures are now being taken. Bids will be opened by the Board of Public Works on October 28th.

#### Contracts Awarded.

**NEW WESTMINSTER, B. C.**—Court House addition, 2 story and base, Class A construction, \$56,000. Architects, Gardiner & Mercier, New Westminster, B. C. Owners, Provincial Government. Contractors, Dominion Construction Co., Northwest Trust Bldg., Vancouver. Contract price, \$56,000. Note: Sub-figures are now being taken. The contract does not include interior hardwood fixtures, elevator work or lighting fixtures. Bids will shortly be called for on these parts of the work.

#### FACTORIES AND WAREHOUSES.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Gas plant and main extensions. Cost not stated. Engineer, none. Owner, Contra Costa Gas Co., Martinez. The laying of gas mains will be commenced in this city by the Contra Costa Gas Company within one month, according to statements made by officials of the company. The plant for furnishing the gas will be located in Pittsburg, where a site has recently been purchased. S. Waldo Coleman is president of the company.

**RIO VISTA, SOLANO CO., CAL.**—Supply depot, frame and corrugated iron. Cost not stated. Engineer, Engineering Department, Standard Oil

Co. S. F. Owners, Standard Oil Co. The Standard Oil Company has leased considerable ground here and will soon start the construction of a supply depot. Three tanks with a capacity of 15,000 gallons are being installed. A storage supply house and other structures will be erected by the company.

**KLAMATH FALLS, ORE.**—Saw mill construction, \$90,000. Engineer, F. Hill Hunter, Spokane. Owners, Pelican Bay Lumber Co. Work has been started on the rebuilding of the plant of the Pelican Bay Lumber Company, which was destroyed by fire recently, causing a loss of \$30,000. A larger mill than before is now being constructed. New machinery of various makes will be installed. F. Hill Hunter of Spokane has full charge of the construction. The work is estimated to cost between \$90,000 and \$100,000.

#### Contracts Awarded.

**SEATTLE, WASH.**—Fruit storage warehouse, 6 story and base, reinforced concrete, \$129,300. Engineer, Port of Seattle Commission, Seattle. Owners, City of Seattle. Contractors, Butler Contracting Co., Central Bldg., Seattle. Contract price, \$129,300. Note: This contract does not include the machinery and other equipment, which has been estimated to cost \$150,000, and which will be let under separate contract.

**PORTLAND, ORE.**—Stables, 2 story and base, reinforced concrete, \$38,973. Architect, C. C. Rich, care of Building Inspector, Portland. Owners, City of Portland. Contractors, Parker & Banfield, 463 East Stark street, Portland. Contract price, \$38,973.

#### FLATS.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$3,600. Architect, none. Owners, Segurson Bros., 308 Guerrero street, S. F. The building will be erected on the south side of Filbert west of Laguna, having a frontage of 25 feet and a depth of 60 feet. There will be two flats of five and six rooms. Interiors will be finished in pine and redwood. Some hardwood floors will be used. Open fire places will be used in the living rooms. Mantels will be of tile or brick. Tile wainscot is specified for the baths and kitchens. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**OAKLAND, CAL.**—Flat alteration, 2 story and base, frame, \$1,000. Architect, J. Henry Boehr, Delger Bldg., Oakland. Owner, P. H. Hanson. The present two-story frame dwelling located at 3125 Grove street will undergo alteration, and be made into a modern flat building containing four flats of three and four rooms. Interior finish, plastering, painting, plumbing and electric work will be required. Exterior of the building will also be altered. Plans are complete and the work will be done by Day Labor under the direction of Alfred Legault, Delger Bldg., Oakland.

#### GOVERNMENT WORK & SUPPLIES.

##### Fuel Oil for Panama Canal.

The purchasing officer of the Panama Canal will soon issue a call for bids for furnishing 600,000 barrels, ap-

proximately of fuel oil. This amount is the estimated quantity needed for the year ending December 31, 1915. The Panama Canal will require the delivery of from 20,000 to 30,000 barrels per month and will reserve the option of changing this quantity as needed. There is on each side of the canal two tanks with a storage capacity each of 12,000 barrels. The Panama Canal will be equipped with suitable oil pumps for assisting tank steamers in the unloading of cargoes whenever necessary, and tank steamers must be capable of delivering to the suction end of the Panama Canal pumps at the minimum rate of 1,000 barrels per hour.

#### Hilo, H. T. Building.

In connection with the construction of the U. S. public building at Hilo, Hawaii, contract for which has been awarded, as previously reported, to the Campbell Building Co., of Salt Lake City, Utah, the following material will be used: Plumbing fixtures, Crane Co.; cabinet and tablet, Crouse-Hines Co.; conduit, National Metal Molding Co.; rubber-covered wire, Safety Insulated Wire and Cable Co.; flush switches, Arrow Electric Co.

#### Mare Island Quay Wall.

The Thompson Bridge Co., of San Francisco, Cal., will construct a quay wall at Mare Island, Cal., for the sum of \$20,534. The bids were opened at the bureau of yards and docks.

#### San Diego, Coal Tower.

The McMyler Interstate Co. of Bedford, Ohio, presented the successful bid for furnishing a coal-hoisting tower for the naval station, San Diego, Cal. The contract amounts to \$35,400.

#### San Francisco, Cal., Vault Equipment.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for vault equipment in the U. S. subtreasury at San Francisco, Cal.:  
York Safe and Lock Co., York, Pa., \$5,135.

The Heilmann Safe Co., San Francisco, Cal., \$5,391.

#### Cheyenne, Wyo., Repairs.

The following bids were received by the custodian, U. S. post office, Cheyenne, Wyo., recently for repairs to stonework at the U. S. post office Cheyenne, Wyo.:

T. J. Spraul, Cheyenne, Wyo., \$2,955; 60 days.

W. J. Wilseck, Cheyenne, Wyo., \$4,500; 90 days.

R. M. Bradley Co., Cheyenne, Wyo., \$1,500, 60 days.

#### Valves and Retainers.

Abstract of proposals received by U. S. Reclamation Service in connection with advertisement No. 329, for sand-trap valves and bronze retainers for the Salt River project, Ariz., bids opened at Los Angeles, Cal.:  
Llewellyn Iron Works, Los Angeles, Cal., \$72.

Los Angeles Engine Works, Los Angeles, Cal., \$88.10.

Fulton Engine Works, Los Angeles, Cal., \$92.

Baker Iron Works, Los Angeles, Cal., \$100.

#### San Francisco, Cal., Lumber.

The contract for furnishing lumber for remodeling building No. 31, etc., at

the U. S. quarantine station, San Francisco, Cal., has been awarded to Hart-Wood Lumber Co. at \$84.16.

#### Honolulu Lumber.

Charles Nelson & Co., of San Francisco, Cal., has the contract for furnishing 560,396 feet of lumber at Honolulu at \$9.80 per M, plus \$5.50 for transportation.

#### Las Animas, Colo., Water Heater.

The following bid was received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for installing a feed-water heater in the Naval Hospital, Las Animas, Colo.:

The Industrial Heating & Engineering Co., Milwaukee, Wis., \$1,516.

#### Point Reyes, Cal., Fog Signal Apparatus.

The following bid was received by the light house inspector, 15th District, San Francisco, Cal., for one fog signal apparatus for Point Reyes Light Station, Cal.:

Diaphone Signal Co., Toronto, Canada, \$1,365; accepted.

#### San Francisco, Cal., Repairs.

The contract for repairing the floor in bath room, etc., at the U. S. Marine Hospital, San Francisco, Cal., has been awarded to J. J. Murray at \$519.

SEATTLE, WASH.—Power house, 2 story and base, reinforced concrete, \$60,000. Architects, Carl F. Gould and Charles Behb, associated with Cavanaugh & Young, United States Engineers, Burke Bldg., Seattle. Owners, United States Government. The building will be erected at the Narrows on the Lake Washington Canal, and will cover an area of 47 by 67 feet. Construction will be fireproof. Interior will be finished in marble and cement plaster with cork floors. Plans provide for a heating and ventilating system. Exterior of the building will be faced with cement plaster on metal lath. Plans are now being prepared.

#### PACIFIC COAST HARBORS AND RIVERS GET APPROPRIATIONS.

Allotments of the \$20,000,000 appropriated by Congress for river and harbor improvements are announced by the Board of Army Engineers. Pacific Coast allotments are:

Sacramento and Feather rivers, \$60,000.

Los Angeles harbor, \$42,000.

Oakland harbor, \$38,000.

Humboldt Bay, \$200,000.

Coos Bay, Oregon, \$70,000.

Coquille River, Oregon, \$20,000.

Sinlaw River, Oregon, \$5,000.

Snake River, \$5,000.

Columbia River, at mouth, \$1,000,000, below Portland, \$200,000; upper river, \$757,000.

Willamette and Yauhill rivers, above Portland, \$25,000.

Grays Harbor and Chehalis River, \$15,000; Gray's Harbor and bar, \$110,000.

Collitz and Lewis rivers, \$6,000.

The largest single item is for \$2,750,000 to the Mississippi River Commission.

#### HALLS AND SOCIETY BUILDINGS.

TACOMA, WASH.—Lodge hall and stores, 4 story and base, reinforced

concrete, \$10,000. Architect, C. Fere Champney, Henry Bldg., Seattle. Owners, Tacoma Elks' Hall Association. The building will be erected at the corner of 7th and C streets, and will be of fireproof construction throughout, with reinforced concrete walls, floors and hollow tile interior partitions. The entire building will be devoted to the use of the owners. Plans provide for a large assembly hall, banquet room, gymnasium with a large swimming tank, and social rooms. Upper floors will be arranged for living apartments. Interior will be finished in pine and hardwood. There will be steam heat, an automatic elevator, hot water system and vacuum cleaning. Large open fire places will be a feature of a number of the rooms. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be taken shortly.

#### HOSPITALS.

SAN FRANCISCO—Pathological ward, 2 story and base. Class A construction, \$70,000. Architects, Righetti & Headman, Phelan Bldg., S. F. Owners, City and County of San Francisco. Plans for this building, which is to be erected on 22nd street, adjoining other buildings of the new San Francisco Hospital group, have been completed and turned over to the Public Buildings Committee for approval. The building will cover an area of 97 by 155 feet and will have a complete steel frame, brick and concrete walls, hollow tile interior partitions and concrete floors. Interior will be finished in pine, hardwoods and tile. Special equipment and special hospital plumbing will be installed. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Bids will be called for shortly.

SAN FRANCISCO—Hospital, 5 story and base. Class A construction, \$150,000. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, Cooper Medical College. This building will be erected on Webster street between Sacramento and Clay, and will be arranged for wards and private rooms, laboratories and nurses' quarters. There will be a complete steel frame, brick walls, concrete floors and hollow tile interior partitions. Interior finish will be of pine and hardwoods. There will be steam heat, oil burning equipment, elevator service, a hot water system and vacuum cleaning. Exterior of the building will be faced with pressed brick. Working drawings are complete and figures will be called for shortly.

#### HOTELS.

FRESNO, FRESNO CO., CAL.—Hotel and stores, 4 story and base brick and steel, \$75,000. Architect, R. F. Felchin, Fresno. Owners, Berry Estate. The building will be erected on the site of the former Fulton Hotel destroyed by fire. The building will have stores on the first floor beside the hotel office and lobby. Upper floor will contain a total of 63 guest room, and 35 baths. Interior finish will be of pine and hardwood. The floors will be used in the baths. Plans provide for steam heat and a hot water system. Patent store fronts will be used. Exterior of the building will be faced

with oressed brick. Plans are nearly complete and figures will be called for in about two weeks.

### PANAMA-PACIFIC EXPOSITION WORK.

**SAN FRANCISCO**—State Exhibit building, 1 and 2 story and base, frame and plaster, \$20,000. Architect, Meuse, Service Bldg., S. F. Owners, State of Alabama. The building will be a part one and part two story structure, and will contain a large reception hall, motion picture hall and lecture rooms. Interior will be finished in redwood and pine. Reception rooms for the state officials will also be provided. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the contractors for figures.

### POST OFFICES.

**SAN FRANCISCO**—Sub-post office, 2 story and base, reinforced concrete and steel. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Healy-Tibbitts Construction has been awarded a contract by the State Board of Harbor Commissioners for the foundation work on the new post office to be constructed south of the main Ferry Building. The contract price is \$27,699. The State Department of Engineering is now engaged on the working drawings for the building proper and plans will be out for figures some time next month.

### RAILROAD CONSTRUCTION AND EQUIPMENT.

**RICHMOND, CONTRA COSTA CO., CAL.**—Railroad station, 1 story, frame and plaster, \$5,000. Architect, Engineering Dept. Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. The Southern Pacific Company states that actual construction will be started within a few days on the new passenger station to be erected at Richmond. The building will be of frame and plaster and cost in the neighborhood of \$6,000. Work will also be started shortly on the new freight sheds and track work at Richmond, which has been estimated to cost \$18,000.

### RESIDENCES.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, Oscar Lind, 125 1/2 25th street, S. F. The dwelling will be erected on the west side of 10th avenue south of Balboa street, and has been designed for a six room house with bath. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be an open fire place in the living room. Mantel will be of tile or brick. Tile wainscot will be used in the bath room. Exterior of the dwelling will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owners, Costello and Peckrick, 93 College avenue, S. F. The dwelling will be erected on the east side of 19th

avenue north of Balboa, and has been designed to contain six room, and bath. Interior finish will be of pine and redwood with some chin panels. Hardwood floors will be used in the living room and dining room. There will be an open fire place and tile mantel. An automatic water heater will be installed. Tile wainscot will be used in the bath room. Exterior of the house will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are being purchased.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, Ralph J. Button, 1212 4th avenue, S. F. The dwelling, designed for a seven-room house with bath and sleeping porch, will be erected on the east side of 26th avenue north of Irving. Interior will be finished in pine and hardwood with some white enamel. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the house will be covered with rustic, shingles and clinker brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residence alterations, 5, 2 story frame, \$14,000. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owners, Pacific Realty Co. Seven old fashioned residences located on Pacific avenue near Buchanan will undergo extensive repairs. The work will include new interior finish, mill work, hardwood floors, plumbing, painting, plastering, electric work and mantels. Furnaces will be installed in some of the houses. Exteriors will also be altered. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Residences, 2, 2 story and base, frame, \$4,000 each. Architect, none. Owner, Thomas Seoble, 263 14th avenue, S. F. These two houses will be erected on the west side of 12nd avenue north of Fulton, and each has been designed for an eight-room dwelling with bath and sleeping porch. Interiors will be finished in pine with some hardwood veneer and white enamel. Hardwood floors will be used in the living room, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters will be installed. Bath rooms will be finished in tile and tile wainscot will be used in the kitchens. Exteriors will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, cost not stated. Architect, W. H. Rathell, Jr., First National Bank Bldg., Berkeley. Owner, Miss Margaret Latimer. The dwelling will be erected in Northridge, and has been designed to contain seven rooms, bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will

be of white wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$2,800. Architect, J. J. Lurido II, Albany Bldg., Oakland. Owner, Mr. Murphy. The dwelling will be erected in East Oakland, and has been designed to contain six rooms, bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$5,000. Architects, Thomas & Oliver, Pantages Theatre Bldg., Oakland. Owner, Mrs. George Fredericks. The dwelling will be erected in Piedmont by the Lake, and has been designed for an eight-room house with two baths and sleeping porch. Interior finish will be of pine and hardwood with white enamel in the chambers. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$3,000. Architect, none. Owner, James McGuinness, 5615 East 16th street, Oakland. The dwelling has been designed for a six-room house with bath and will be erected on the west side of Beaumont avenue near East 24th street. Interior will be finished in pine and redwood with some hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SACRAMENTO, CAL.**—Residence, 1 story and base, frame, \$2,500. Architect, none. Owner, John Jennings, 4127 I street, Sacramento. The dwelling will be erected on G street between 1st and 12nd, and has been designed for a five-room house with bath. Interior finish will be of pine throughout. Some oak floors will be used. There will be an open fire place in the living room. Mantel will be of tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, Theodore M. C. 1215 25th avenue, S. F. The dwelling will be erected on the east side of 12nd avenue south of Anza, and has been designed to contain six rooms with bath. Interior finish will be of pine

and redwood. Hardwood floors will be used in the principal rooms. There will be an open fire place in the living room. Mantel will be of tile or brick. The wainscot will be used in the bath room. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by day labor. Materials are now being purchased.

**SAN FRANCISCO.**—Residence, 2 story and base, frame, \$7,500. Architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owner, Mrs. Rose Buckingham. The dwelling will be erected on the north side of Jackson street west of Divisadero, and has been designed to contain nine rooms, two baths and a garage. Interior will be finished in pine and hardwood with white enamel in the bed rooms. Hardwood floors will be used throughout, except in the bath rooms which will have tile floors. There will be furnace heat and open fire places. An automatic water heater will be installed. Mantels will be of tile or brick. Exterior of the house will be covered with shingles and brick veneer. Plans are complete and figures are being taken.

**OKLAND, CAL.**—Residence, 2 story and base, frame, \$4,500. Architect, Leo L. Nichols, First Trust Bldg., Oakland. Owner, A. Kleppinger. The dwelling will be erected at the corner of Broadway and Ridgeway, and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**MOUNTAIN VIEW, SANTA CLARA CO., CAL.**—Residence, 1½ story and base, frame, \$6,000. Architect, F. D. Wolfe, San Jose. Owner, H. A. Krenstroff, First National Bank Bldg., San Jose. The dwelling has been designed for a nine-room house with two baths and sleeping porch. Interior finish will be of pine and hardwood with some white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SAN JOSE, SANTA CLARA CO., CAL.**—Residence, 1½ story and base, frame, \$10,000. Architect, F. D. Wolfe, San Jose. Owner, Victor Scheller, First National Bank Bldg., San Jose. The dwelling will be erected near Evergreen, and has been designed for a ten-room house with two baths and sleeping porches. Interior will be finished in pine and hardwood with white enamel in the bed rooms. There will be hardwood and tile floors. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

### Contracts Awarded.

**SAUSALITO, MARIN CO., CAL.**—Residence, 2 story and base, frame, \$6,700. Architect, none. Owner, P. B. Lawrence. Contractor, E. E. Etherington, Monadnock Bldg., S. F. Contract price, \$6,700.

**BURLINGAME, SAN MATEO CO., CAL.**—Residence, 2 story and base, frame, \$7,500. Architect, Fay Spangler, Monadnock Bldg., S. F. Owner, Mr. Silbey. Contractors, Ruegg Bros., Pacific Bldg., S. F. Contract price, \$7,500.

### SCHOOLS.

**PENDLETON, ORE.**—Parochial school, 2½ story and base, brick, \$35,000. Architects, Houghtaling & Dugan, Henry Bldg., Portland. Owners, Roman Catholic Church of Pendleton. The building will be in the nature of an addition to the present school, which is of frame construction. The new portion will contain a large auditorium and offices in addition to the class rooms. Interior finish will be of pine and redwood. Maple floors will be used in the class rooms. There will be steam heat. All interior trim in the old portion of the building will be replaced with new and partitions of metal lath and plaster will be installed. Exterior of the new building will be faced with pressed brick. Plans are being prepared.

**LA GRANDE, ORE.**—School, 2 story and base, brick and mill construction, \$75,000. Architects, Houghtaling & Dugan, Henry Bldg., Portland. Owners, Roman Catholic Church. The building will cover a large area and will be of the mill construction type with brick exterior walls and frame interior. There will be a large chapel, class rooms, recitation rooms, a dormitory for the boarding students and quarters for the sisters. Interior will be finished in pine throughout with maple floors in the class rooms. There will be steam heat and hot water supply. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are being prepared and figures will be called for shortly.

**PORTLAND, ORE.**—School, 2½ story and base, reinforced concrete, \$55,000. Architect, T. J. Jones, 334 East Third street, Portland. Owners, Richmond School District. The building will cover an area of 47 by 170 feet. There will be nineteen class rooms, an auditorium, offices and recitation rooms. Basement will be arranged for a gymnasium and toilets. Interior will be finished in pine throughout with maple floors in the class rooms. Steam heat will be installed, the main plant being housed in an adjoining building. Exterior will be faced with cement plaster. Modern school plumbing will be used. Plans are complete and figures will be called for shortly.

**FOLSOM, SACRAMENTO CO., CAL.**—School, 1 and 2 story and base, hollow construction, \$25,000. Architects, George C. Sellon and Alden W. Campbell, 1005 K street, Sacramento. Owners, Granite School District. This work has been out for figures before, but plans were revised and new figures are now being called. Bids will be opened on October 21th. Plans and specifications can be secured from the architects.

**SAN FRANCISCO.**—School plumbing work. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for furnishing and completing the plumbing in the Academic Building of the Polytechnic group, show James H. Pinkerton low at \$14,395. A contract has not been awarded. A complete list of the figures received will be found under the heading of San Francisco in this issue.

**DIXON, SOLANO CO., CAL.**—School, 2 story and base, frame and plaster, \$35,000. Architect, Irwin Schaefer, Plaza Bldg., Oakland. Owners, Dixon School District. The building will contain eight class rooms and an assembly hall. Interior finish will be of pine throughout with some maple floors. Plans provide for steam heat and modern school plumbing. There will be composition blackboards. Exterior of the building will be faced with cement plaster on metal lath. Plans are now being prepared. Further mention will be made of the work when figures are called.

**SEATTLE, WASH.**—School, 3 story and base. Class A construction, \$350,000. Architect, Edgar Blair, 1426 Jackson street, Seattle. Owners, Ballard School District. The building will be erected at the northwest corner of 14th avenue and West 65th street, and will cover a large ground area. Construction will be fireproof throughout with a complete steel frame, reinforced concrete walls and floors, hollow tile interior partitions and pressed brick facing. The building will contain a large number of class rooms, lecture halls, teachers' rooms, general office, an assembly hall and an auditorium and department for domestic science and manual training. Interior finish will be of pine and hardwood. Maple floors will be used in the class room and auditorium. Plans provide for steam heat and an oil burning system, vacuum cleaning, program clocks and slate blackboards. Bids will be taken on a general contract, including all work, and also for the general construction with one alternate and separately for the plumbing, heating and ventilating, electric work and program clocks. Plans are complete and figures are being taken. Bids will be opened on October 28th.

### Contracts Awarded.

**ALHAMBRA, LOS ANGELES CO., CAL.**—Schools, 3, 1 and 2 story. Class C construction, \$66,435. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Alhambra High School District. Contractors, John Simpson Co., Baker-Detwiler Bldg., L. A. General construction, \$66,435; Alhambra Wall Paper and Paint Co., Alhambra, painting, \$3,245; J. M. Mullins Electric Co., Baker-Detwiler Bldg., L. A. heating and ventilating, \$8,822.50, and C. E. McPeak, Glendale, plumbing, \$5,527.

**LOS ANGELES, CAL.**—School, 2 story and base, brick, \$23,511. Architect, Architectural Dept. Board of Education, L. A. Owners, City of Los Angeles. Contractors, Hetzel-Winget Co., Grant Bldg., L. A. Contract price, \$23,511.

**LOS ANGELES, CAL.**—School, 2 story and base, concrete and brick, \$66,700. Architect, Architectural Dept. of Board of Education, L. A. Owners, City of

Los Angeles. Contractor, Alex. Grant, 1201 West 37th street, L. A. Contract price, \$66,700.

## SEWERS, STREET WORK & WATER SYSTEMS.

MONTAVILLE, ORE.—Sewer system, \$182,000. Engineer, City Engineer, Montaville. Owners, City of Montaville. Plans are nearly complete for the construction of a new sewer system known as the Willow and East 82nd street branch. This work includes practically the entire system for the city. The contractor will be allowed 320 days to complete the work. Plans and specifications can be secured from the City Clerk. Bids will be called for in a few days.

ORLAND, GLENN CO., CAL.—Sewer work. Cost not stated. Engineer, City Engineer, Orland. Owners, City of Orland. The Trustees of this city have ordered the city engineer to make complete plans and specifications for the extension of the sewer and water systems. As soon as this is done, bids for the construction of same will be advertised for.

RED BLUFF, TEHAMA CO., CAL.—City water system, \$35,000. Engineer not selected. Owners, City of Red Bluff. Fred McDowell, who has charge of the circulation of a petition which asks that the City Trustees set a date when the people of the city will be called upon to vote bonds in the sum of \$55,000 to establish a municipal water system, states that over 300 signatures have been attached to the proposition. Only 220 names are needed to assure the placing of the question before the voters.

SACRAMENTO, CAL.—Trunk line sewer, \$55,000. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. The bid of the Matthews Construction Co. for the new trunk line sewer has been rejected by the City Commission on the ground that it was not according to the requirements of the advertisement. This action follows a protest made by Teichert & Ambrose and Carnahan & Mulford. Matthews bid on the work as a whole instead of bidding for units as the specifications required. He agreed to do the work for \$56,800, whereas his bids for materials totals only \$30,000. New bids will be opened next week.

REDWOOD CITY, SAN MATEO CO., CAL.—Retaining wall and culvert, concrete construction. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. At the last meeting of the Board of Supervisors it was ordered that plans and specifications for a culvert and retaining wall on the Sawyer Camp road be adopted and the Clerk publish a notice calling for bids for construction of same. It was also ordered that the Surveyor prepare plans and specifications for a road and bridge near Salada creek.

SAN JOSE, SANTA CLARA CO., CAL.—Street work, grading and asphalt paving. Cost not stated. Engineer, City Engineer, San Jose. Owners, City of San Jose. Plans and specifications for improving University avenue from the city limits to Palo Alto westerly to the State Highway have been adopted by the Board of Supervisors here and bids will be received for same on November 2nd at 11 p. m.

RIO VISTA, SOLANO CO., CAL.—Street work, asphalt paving and concrete curbs. Cost not stated. Engineer, City Engineer, Rio Vista. Owners, Town of Rio Vista. Plans and specifications have been completed and received the approval of the City Trustees for paving Main street with asphalt and constructing concrete curbs. Bids are now being taken and will be opened on October 29th. Plans and specifications can be secured at the office of the City Clerk.

FRESNO, FRESNO CO., CAL.—Water pressure system, \$3,000. Engineer, City Engineer, Fresno. Owners, City of Fresno. A request for an appropriation of \$2,000 to \$3,000 to start a water pressure system at Harding Park has been put before the Park Commission. The matter will be considered at the next meeting of the Commission.

SAN BERNARDINO, SAN BERNARDINO CO., CAL.—Highway construction. Cost not stated. Engineer, County Surveyor, San Bernardino. Owners, San Bernardino County. On condition that the Board of Supervisors of this county will construct a road from Daggett to Francis Springs, the people of Clarke County, Nevada, have agreed to construct a road as far as the springs in this county. The road will be a main thoroughfare for automobiles from Santa Lake City to Daggett. The Nevada people declare Silver Lake people are passing a petition to be presented to the Supervisors for an appropriation to build the road.

SIEVER'S CANYON ROAD, ORANGE CO., CAL.—Road work, surfacing and grading. Cost not stated. Engineer, County Surveyor, Santa Ana. Owners, Orange County. Plans are complete and figures are now being taken for grading and surfacing the Siever's Canyon road from Rancho Mission Viejo to the easterly county line. Bids will be opened for this work on November 14th. Plans and specifications can be secured from the County Surveyor.

PRINEVILLE, ORE.—Storage dam, reinforced concrete. Cost not stated. Engineers, United States Reclamation Service, Portland. Owners, United States Government. A crew of men under State Engineer John H. Lewis have completed prospect work on the U. S. Reclamation Service site for a storage dam at Stewart's Gate, on Crooked River, about 30 miles south of Prineville. The project is being considered for the purpose of storing water for the farming section north of Prineville, covering several thousand acres. The plan is for a dam 150 feet in height, which would back water up for a distance of more than 15 miles.

BAKERSFIELD, KERN CO., CAL.—Transmission line. Cost not stated. Engineer, County Surveyor, Bakersfield. Owners, Kern County. The Power Equipment Co., Kialto Bldg., S. F., submitted the lowest figure at \$11,000 for constructing 9.5 miles of transmission line in Kern County. John R. Cahill, 160 Montgomery street, S. F., submitted the only other figure at \$16,400. Both bids were taken under advisement by the County Highway Commission.

## Contracts Awarded.

POCATELLO, IDAHO Sewer work, \$54,297.55. Engineer, City Engineer, Pocatello. Owners, City of Pocatello.

Contractor, R. M. Barnden, 1500 E. Main. Contract price, \$40,000.

## STORES AND OFFICES

SAN FRANCISCO—Store, 1 story and base, Class C construction, \$17,000. Architects, O'Brien Bros., Clinic Bldg., S. F. Owners, L. Gondotti Estate Co. The building will be erected at the northeast corner of Hayes and Octavia streets and will cover an area of 38 by 120 feet. A complete basement will be constructed. There will be a number of retail stores, all finished in pine with hardwood in the display windows. Patent store fronts will be used. There will be the vestibules and marble bases. Exterior of the building will be faced with pressed brick. Plans are complete and segregated figures are being taken. A contract for the excavating has already been awarded.

SAN FRANCISCO—Store, 1 story, frame, \$5,000. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Herman Hogrefe, 1011 Hyde street, S. F. The building will be erected at the southwest corner of Clay and Leavenworth streets, covering an area of 67½ by 13 feet. There will be two small stores. Interiors will be finished in pine and redwood with a cement floor. Patent store fronts and plate glass windows will be installed. Exterior of the building will be covered with rustic and brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Store, 1 story and base, brick, \$3,000. Architect, none. Owner, Hannah Kerstogli, 1505 Haight street. The building will be erected at the southwest corner of Haight and Schrader streets, and will contain two small stores. Interiors will be finished in pine throughout. There will be patent store fronts and plate glass windows. Marble bases and the vestibules will be used. A cement floor will be used. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Store and lofts alteration, 2 story and base, Class C construction, \$3,000. Architect, John W. Ettler, 604 Mission street, S. F. Owners, Bothin Estate. The building at 525 Mission street will be altered. An additional story will be added, the floors strengthened and a passageway to the rear built. The work will require some brick work, plastering and interior finish. Exterior will be faced with pressed brick. Plans are complete and segregated figures are being taken.

OAKLAND, CAL.—Store, 1 story and base, brick and steel. Cost not stated. Architect, W. H. Crum, Jr., 125 Kearny street, S. F. Owners, Realty Syndicate, Oakland. The building will be erected on the west side of Franklin street north of 11th, and has been designed to contain five modern stores. Interiors will be finished in pine throughout. There will be patent stone fronts and plate glass windows. Marble bases and the vestibules will be used. Exterior of the building will be faced with pressed brick. Plans are complete and segregated figures are being taken.

## THEATRES.

**SOUTH SAN FRANCISCO, SAN MATEO CO., CAL.**—Theatre and store, 3 story and base, reinforced concrete, cost not stated. Architects, Hayens & Toepke, 16 Kearny street, S. F. Owner's name withheld. The building has been designed to contain a motion picture theatre and one store on the ground floor. Upper floor will be arranged for offices and rooms. Interior finish will be of pine throughout. Some ornamental plaster will be used in the theatre. There will be patent store fronts. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

## INCORPORATIONS.

## EXPOSITION NEWS NOTES.

That the citizens of Great Britain are not letting the war interfere with their plans for great industrial exhibits is shown by the arrival on the grounds of the Panama-Pacific International Exposition of several large shipments of British exhibits. These first ones to be received were shipped in September and consist of varnishes and many mining appliances. They are being installed in the exposition exhibit palaces.

Thirty-three tons of agricultural exhibits, shipped from Seattle by the Washington State Exposition committee, have arrived at the Panama-Pacific International Exposition and are being installed in the Palace of Agriculture. Five car loads of social economy exhibits prepared by the United States Steel corporation also have arrived and the first of Spain's exhibits are expected this week.

More than 700 transportation men, representing every railroad in the United States and Canada, arrived in San Francisco on October 11 and studied the Panama-Pacific International Exposition.

Nevada broke ground for the Nevada state building on the grounds of the Panama-Pacific International Exposition on October 3. Lieutenant Governor Gilbert C. Ross wielded the silver spade and the Nevada flag was raised by Miss Dita Belknap, whose father was on the supreme bench in Nevada for twenty-six years. Imported sage brush surrounded the speakers' stand and appropriate songs and speeches were made by exposition and city officials.

The Panama-Pacific International Exposition is 95 per cent completed, more than ten months ahead of the opening day. There are 11 buildings that are completed or in course of construction. In "The Zone" 700 artisans are at work finishing this part of the exposition to early completion, on its state and foreign areas 200 men are at work. The Idaho, Wisconsin, North Dakota, New Jersey and Oregon buildings are completed. The others of the forty-three participating states and territories make a good showing. Among the forty participating nations the Canadian and British

pavilions are completed and those farthest along of the others are Turkey, Bolivia, Sweden, Cuba, China, the Netherlands, Argentina and Australia.

## SWITCHBOARD CONTRACT OPPOSED.

Representatives of the labor unions and the electrical workers appeared before the Board of Supervisors last Tuesday to protest on an appropriation of \$7,897 to validate an award of a contract already let by the Board of Public Works to the Butte Engineering Company to install switchboards in the Fire Alarm Central Station.

It was claimed that at a conference held some time ago an agreement had been reached that in the construction and installation of the Fire Alarm System all the work possible should be undertaken by the Department of Electricity. The matter has been continued for one week pending an investigation.

## MERCHANDISE FOR THE KOOTENAY DISTRICT.

[Consul Frank C. Denison, Fernie, British Columbia, Canada, Sept. 21.]

From interviews with the principal mercantile and industrial interests of this district the following information has been gathered regarding the outlook for increased American hardware trade in connection with the European war conditions.

The principal items in the hardware trade in which there will be a shortage are cutlery and small tools that can be sold at such prices as were formerly obtained for German goods. There are no jobbers in the district.

## SUPPLIES NEEDED IN THE YUKON.

[Consul G. C. Cole, Dawson, Yukon Territory, Canada, September 18.]

In view of war conditions, it may be stated that the imports into this district are groceries, feed, foodstuffs, dry goods, clothing, hardware, machinery, furniture, vehicles, etc. All supplies are imported into this part of the district by navigation on the Yukon River. The ice forms on this river about October 1 and remains until the middle of June, and all supplies for the closed season are received during the period of open navigation.

This district produces none of its supplies except a portion of the vegetables. Eastern Canada furnishes most of the supplies and the remaining portion is practically all imported from the United States.

The exports from this district are principally gold bullion and raw furs. The larger portion of gold produced here is exported to the United States and the remaining portion goes to the Canadian mint at Ottawa. The larger portion of raw furs produced here is exported to England and a small portion is exported to the United States. The value of gold bullion exported to the United States since January 1, 1914, is \$2,124,717 and the value of raw furs is \$6,550.

It is said that the first sawmill in the United States was at Jamestown, from which sawed boards were exported in June, 1607. A water-powered sawmill was in use in 1625 near the present site of Richmond.

W. R. BRODE, Pres. LOUIS R. HOLM, Sec. R. J. BRODE, Vice-Pres.

## BRODE IRON WORKS

Established 1886—Incorporated 1913  
Tel. Kearny 2464.

Fabricators and Contractors of Structural Steel and Ornamental Iron Work

Office & Works: 31-37 Hawthorne St., bet. Howard & Folsom Sts., San Francisco, Cal.

### PROPOSALS FOR BUILDING.

**BUILDING**—Sealed proposals in-dorsed "Proposals for Ward Pavilions" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. October 31, 1914, and then and there publicly opened, for five temporary on-story wooden ward pavilions at the naval hospital reservation, Mare Island Cal. Plans and specifications may be obtained on application to the bureau or to the commanding officer of the navy yard, Mare Island, Cal. H. R. STANFORD, chief of bureau.

### PROPOSALS.

#### PROPOSALS FOR TOWER AND TANK.

**TOWER AND TANK**—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received at this office until 3 p. m. October 27, 1914, and then opened, for the construction of a concrete water tower, concrete tank, etc., at the quarantine station, Honolulu, Hawaii, in accordance with the specification and drawings, copies of which may be obtained at this office, at office of superintendent of repairs, U. S. post office, San Francisco, Cal., or at the office of the custodian of the station at Honolulu, Hawaii, in the discretion of the supervising architect, O. WENDERTH, supervising architect.

#### PROPOSALS FOR CANAL WORK.

**CANAL WORK**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Mont., until 2 o'clock p. m. October 28, 1914, for the reconstruction of Dodson South Canal at Dodson Bridge. The work involves about 71,000 cubic yards of excavation, 12,000 cubic yards of puddle filling, 5,200 cubic yards of riprap, 10 cubic yards of concrete and the moving of two steel bridge spans, abutments and pier. The work is situated on the south side of Milk River, about one and one-quarter miles south of Dodson, Mont., a station on the Great Northern Railway. For particulars address the United States Reclamation Service, Washington, D. C.; Great Falls, Mont.; or Malta, Mont. F. H. NEWELL, director.

#### NOTICE TO CONTRACTORS.

**OFFICE CONSTRUCTING QUARTERMASTER**, Fort Mason, Oct. 15th, 1914.—SEALD PROPOSALS, in triplicate, for making repairs to wharf at Fort Barry, will be received here until 4 A. M. October 23, 1914, and then opened. Plans and specifications, etc., can be obtained here. Deposit of \$1000 required to insure return of plans, etc. Proposals to be enclosed in sealed envelopes and addressed to GEO. McK. WILLIAMSON, Lt. Col. Q. M. C.

Women act as factory inspectors in British Columbia.

There are almost 50,000 unorganized coal miners in this country.

Women employed in the metal trades at Millan, Ind., are paid 4 cents an hour.

Of the nearly 1,200 women employed in the silk industry in New Jersey over 2,000 receive an average of from \$12 to \$15 per week in wages.

### TO ATTACK THE LIEN LAW.

Los Angeles Times Voices Intent Surety Underwriters.

The Los Angeles Times of September 22nd last prints what it calls an answer to Johnson's challenge that his critics point to one law that they would repeal by naming the present Mechanics' Lien Law. The article is printed herewith in full:

"Gov. Johnson's challenge to his critics to point out one law they would have repealed is answered by the Surety Underwriters' Association of Los Angeles, which names one as a particularly objectionable and offensive statute.

The organization is composed of local representatives of various surety companies doing business in Los Angeles, with Cafesby C. Thom of the National Surety Company as president, and C. B. Davis of the New Amsterdam Company, as secretary.

The Surety Underwriters are objecting, and have been, to the revised mechanics lien law, passed during the Johnson administration. Their criticism is directed, not alone at the law, but at the Johnson administration, for the 'Sacramento H-rarch' himself ordered the revision forced through the Legislature.

The new rating just received shows that the surety companies are enraging just double the rate of charged under the law, prior to the Johnson administration. Ordinarily a surety company would not complain of the doubling of the rate, but in this instance the complaint is general, for the surety bond is now the target for every Tom, Dick and Harry who cares to attack it through the courts.

The labor and material bond required upon all buildings now costs 1 per cent of the contract price where as it formerly cost one-half of 1 per cent. The doubling of the cost of contract bonds hits at developing capital, but its chief peril lies in the fact that the bond is in the main an extension of credit to irresponsible contractors, and benefits material men only.

The usual play to the galleries by the Johnson administration was that here was a chance to help the laboring man, to secure for him certain rights and place a protective arm over his labor. As a matter of fact, his rights already were secure, and the law never annoyed him that he didn't enjoy before.

The truth of the matter is that the law gives to every man having a claim under the contract a right to go to the bonding company individually. The separate right of action, making the law merely extended a line of credit to contractor, among the material men and then made the contractor bond the material for the material men. The bonding company did third party work, transacting without having a part in the transaction, and the material men.

And the law the way it is now.

Chester W. Kelley

to pay the contractor certain sums at certain times may voluntarily break his contract with the contractor by paying the full price agreed upon, and without in any way relieving the liability of the bonding company—party of the third part.

'Anyone may sue on the bond who has worked on the job,' said one of the surety men yesterday. 'Only recently we had a case where there were twenty-five plaintiffs suing on one bond. Two cases are now up on appeal because we believe the law unconstitutional, discriminatory, and class legislation. It places a burden upon the legitimate contractor and helps neither capital nor labor. The law really makes us hold up a certified check for everyone to take a shot at.'

The new association will attempt to have the law revised back to its old status, at the coming session of the Legislature. The members are bitterly opposed to it, as are contractors who were satisfied to deal simply and singly with the owner of building property."

The Surety Underwriters want the law back to the old standard. Then nobody knew anything about anything in the matter and when a fly-up-the-creek contractor failed the only thing was to pro rate the money that was supposed to be in the hands of the owner. And all this talk about the defects of the law are simply moonshine. Whenever it has come up the consideration of a competent court the law has always been held valid. It is the old guard of people who profited by the crooks and turns and technicalities of the old law that want it restored and the Times by using its usual bulldozing methods of unrepresenting the facts,

Let the County Official Know Where You Saw the Official Proposal.

Classified according to Location

## SAN FRANCISCO.

**APARTMENT HOUSE**—3 story and base, frame, \$15,000. San Francisco, Architect, none. Owners, J. and M. Empinak, 728 Page street, S. F. The building will be erected on the east side of Hyde street north of Vallejo, covering an area of 25 by 72 feet. Interior has been arranged for six modern suites of three and four rooms. Interior finish will be of pine and hardwood veneer with hardwood floors in the principal rooms. Plans provide for steam heat and hot water supply. Bath rooms will have tile wainscot and composition floors. All apartments will be equipped with wall beds. Marble and tile will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath with a brick veneer base. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**CITY HALL WORK, METAL WORK, SKYLIGHTS, ETC.**—Cost not stated. San Francisco, Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Plans for furnishing and installing all metal work, skylight work and metal roofing in the new City Hall are complete and figures are now being taken. Bids will be opened by the Board of Public Works on October 28th.

**STATE EXHIBIT BUILDING**—1 and 2 story and base, frame and plaster, 20,000. San Francisco, Architect, Deuse, Service Bldg., S. F. Owners, State of Alabama. The building will be a part one and part two story structure and will contain a large reception hall, motion picture hall and lecture rooms. Interior will be finished in redwood and pine. Reception rooms or the state officials will also be provided. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of contractors for figures.

**FLATS**—2 story and base, frame, \$3,600. San Francisco, Architect, none. Owners, Segurson Bros., 308 Guerrero street, S. F. The building will be erected on the south side of Filbert west of Laguna, having a frontage of 25 feet and a depth of 60 feet. There will be two flats of five and six rooms. Interiors will be finished in pine and redwood. Some hardwood floors will be used. Open fire places will be used in the living rooms. Mantels will be of tile or brick. Tile wainscot is specified for the baths and kitchens. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**PATHOLOGICAL WARD**—2 story and base. Class A construction, \$9,000. San Francisco, Architects, Elghetti & Headman, Phelan Bldg., S. F. Owners, City and County of San Francisco. Plans for this building, which is to be erected on 22nd street, adjoining

other buildings of the new San Francisco Hospital group, have been completed and turned over to the Public Building Committee for approval. The building will cover an area of 97 by 155 feet, and will have a complete steel frame, brick and concrete walls, hollow tile interior partitions and concrete floors. Interior will be finished in pine, hardwoods and tile. Special equipment and special hospital plumbing will be installed. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Bids will be called for shortly.

**HOSPITAL**—5 story and base. Class A construction, \$150,000. San Francisco, Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, Cooper Medical College. This building will be erected on Webster street between Sacramento and Clay, and will be arranged for wards and private rooms, laboratories and nurses' quarters. There will be a complete steel frame, brick walls, concrete floors and hollow tile interior partitions. Interior finish will be of pine and hardwoods. There will be steam heat, oil burning equipment, elevator service, a hot water system and vacuum cleaning. Exterior of the building will be faced with pressed brick. Working drawings are complete and figures will be called for shortly.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco, Architect, none. Owner, Oscar Lind, 4385 25th street, S. F. The dwelling will be erected on the west side of 19th avenue south of Balboa street, and has been designed for a six-room house with bath. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be an open fire place in the living room. Mantel will be of tile or brick. Tile wainscot will be used in the bath room. Exterior of the dwelling will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco, Architect, none. Owners, Costello and Feerick, 33 College avenue, S. F. The dwelling will be erected on the east side of 19th avenue north of Balboa, and has been designed to contain six rooms and bath. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living room and dining room. There will be an open fire place and the mantel. An automatic water heater will be installed. Tile wainscot will be used in the bath room. Exterior of the house will be covered with rustic. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are being purchased.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco, Architect, none. Owner, Ralph L. Linton, 1212 14th avenue, S. F. The dwelling, designed for a seven-room house with bath and sleeping porch, will be erected

on the east side of 15th avenue north of Irving. Interior will be finished in pine and hardwood with some white enamel. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the house will be covered with rustic, shingles and clinker brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE ALTERATIONS**—7, 3 story, frame, \$14,000. San Francisco, Architect, Charles C. Frye, 29 Montgomery street, S. F. Owners, Pacific Realty Co. Seven old fashioned residences located on Pacific avenue near Buchanan will undergo extensive repairs. The work will include new interior finish, mill work, hardwood floors, plumbing, painting, plastering, electric work and mantels. Furnaces will be installed in some of the houses. Exteriors will also be altered. Plans are complete and figures are being taken.

**RESIDENCES**—2, 2 story and base, frame, \$4,000 each. San Francisco, Architect, none. Owner, Thomas Scoble, 362 14th avenue, S. F. These two houses will be erected on the west side of 13rd avenue north of Fulton, and each has been designed to an eight-room dwelling with bath and sleeping porch. Interiors will be finished in pine with some hardwood veneer and white enamel. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters will be installed. Bath rooms will be finished in tile and tile wainscot will be used in the kitchens. Exteriors will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SCHOOL PLUMBING WORK**—Cost not stated. San Francisco, Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for furnishing and completing the plumbing in the Academic building of the Polytechnic group show James H. Pinkerton low at \$14,375. A contract has not been awarded. A complete list of the figures received will be found under the heading of San Francisco in this issue.

**STORES**—1 story and base. Class C construction, \$11,000. San Francisco, Architects, O'Brien Bros., Chime Bldg., S. F. Owners, L. Goddard Estate Co. The building will be erected at the northeast corner of Hayes and Octavia streets and will cover an area of 18 by 120 feet. A complete basement will be constructed. There will be a number of retail stores, all finished in pine

with hardwood in the display windows. Patent store fronts will be used. There will be tile vestibules and marble bases. Exterior of the building will be faced with pressed brick. Plans are complete and segregated figures are being taken. A contract for the excavating has already been awarded.

**STORE—1** story, frame, \$5,000. San Francisco. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Herman Hogrefe, 1011 Hyde street, S. F. The building will be erected at the southwest corner of Clay and Leavenworth streets, covering an area of 67½ by 13 feet. There will be two small stores. Interiors will be finished in pine and redwood with a cement floor. Patent store fronts and plate glass windows will be installed. Exterior of the building will be covered with rustic and brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**STORES—1** story and base, brick, \$5,000. San Francisco. Architect, none. Owner, Hannah Kerstegli, 1803 Haight street. The building will be erected at the southwest corner of Haight and Schrader streets and will contain two small stores. Interiors will be finished in pine throughout. There will be patent store fronts and plate glass windows. Marble bases and tile vestibules will be used. A cement floor will be used. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

**STORE AND LOFT ALTERATION—2** story and base, Class C construction, \$5,000. San Francisco. Architect, John W. Eitler, 604 Mission street, S. F. Owners, Bothin Estate. The building at 527 Mission street will be altered. An additional story will be added, the floors strengthened and a passageway to the rear built. The work will require some brick work, plastering and interior finish. Exterior will be faced with pressed brick. Plans are complete and segregated figures are being taken.

**THEATRE AND STORE—3** story and base, reinforced concrete. Cost not stated. South San Francisco, San Mateo Co., Cal. Architects, Havens & Toepke, 46 Kearny street, S. F. Owner's name withheld. The building has been designed to contain a motion picture theatre and one store on the ground floor. Upper floor will be arranged for offices and rooms. Interior finish will be of pine throughout. Some ornamental plaster will be used in the theatre. There will be patent store fronts. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

**APARTMENT HOUSE—3** story and base, brick and frame, \$30,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Max Kolnader. The building will be erected at the southeast corner of Franklin and Sacramento streets and has been designed to contain twelve suites arranged in apartments of two, three and four rooms. Interiors will be finished in pine, walnut and other hardwoods. Hardwood floors will be used in the principal rooms. There will be steam heat and a hot water system. All apartments will have wall beds and private bath

rooms. Bath rooms will be finished in tile with composition floors. Exterior of the building will be covered with pressed brick veneer. Plans are complete and figures are being taken.

**SUB-POST OFFICE—2** story and base, reinforced concrete and steel. Cost not stated. San Francisco. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California Italy-Tibbitts Construction Co. has been awarded a contract by the State Board of Harbor Commissioners for the foundation work on the new post office to be constructed south of the main Ferry Building. The contract price is \$27,690. The State Department of Engineering is now engaged on the working drawings for the building proper, and plans will be out for figures some time next month.

**RESIDENCE—2** story and base, frame, \$2,000. San Francisco. Architect, none. Owner, Thomas Hamill, 268 25th avenue, S. F. The dwelling will be erected on the east side of 22nd avenue south of Anza, and has been designed for a six-room house with bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be an open fire place in the living room. Mantel will be of tile or brick. Tile wainscot will be used in the bath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE—2** story and base, frame, \$7,500. San Francisco. Architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owner, Mrs. Rose Buckingham. The dwelling will be erected on the north side of Jackson street west of Divisadero, and has been designed to contain nine rooms, two baths and a garage. Interior will be finished in pine and hardwood with white enamel in the bed rooms. Hardwood floors will be used throughout, except in the bath rooms which will have tile floors. There will be furnace heat and open fire places. An automatic water heater will be installed. Mantels will be of tile or brick. Exterior of the house will be covered with shingles and brick veneer. Plans are complete and figures are being taken.

#### Contracts Awarded.

**SEWER WORK—\$84,297.55.** Pocatello, Idaho. Engineer, City Engineer, Pocatello. Owners, City of Pocatello. Contractor, R. M. Barsden, Butte, Montana. Contract price, \$84,297.55.

Alex Coleman .....	14,975
A. Lettich .....	15,390
Wittman, Lyman Co. ....	15,649
Kiernan & O'Brien Co. ....	15,200

## Tunnel Contract To Be Held Up.

Authoritative Information States That Board of Works Will Not Take Action Announced by Dalles.

Saturday evening dailies contained the news that on Monday the Board of Public Works would officially award the contract for the construction of the big Twin Peaks Tunnel to Hans Pederson of Seattle on his bid of \$3,475,300. The Daily Pacific Builder has information from a most reliable source that this action will not be taken and further that the work is not apt to be undertaken this year.

Mr. Pederson submitted the only bid for the work on September 30th and a contract was to have been awarded within twenty days. The exact nature of further steps to be taken by the Board of Public Works in this matter has not been fully decided but it is stated that in event that a contract is not awarded at today's meeting of the Board of Works that new bids will be called for shortly.

### OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base, frame. Cost not stated. Berkeley, Alameda Co, Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, Miss Margaret Little. The dwelling will be erected in Northbrae and has been designed to contain seven rooms, bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 1 story and base, frame, \$8,500. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg.,

Bldg., Oakland. Owner, Mr. Durphy. The dwelling will be erected in East Oakland, and has been designed to contain six rooms, bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$5,000. Oakland, Cal. Architects, Thomas & Oliver, Pantages Theatre Bldg., Oakland. Owner, Mrs. George Fredericks. The dwelling will be erected in Piedmont by the Lake, and has been designed for an eight-room house with two baths and sleeping porch. Interior finish will be of pine and hardwood with white enamel in the chambers. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 1 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, James McGuinness, 5615 East 16th street, Oakland. The dwelling has been designed for a six-room house with bath and will be erected on the west side of Beaumont avenue near East 38th street. Interior will be finished in pine and redwood with some hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

FLAT ALTERATION—2 story and base, frame, \$1,000. Oakland, Cal. Architect, J. Henry Roehrer, Delger Bldg., Oakland. Owner, P. H. Hanson. The present two-story frame dwelling located at 3125 Grove street will undergo alteration and be made into a modern flat building, containing four flats of three and four rooms. Interior finish, plastering, painting, plumbing and electric work will be required. Exterior of the building will also be altered. Plans are complete and the work will be done by Day Labor under the direction of Alfred Legault, Delger Bldg., Oakland.

STORES—1 story and base, brick and steel. Cost not stated. Oakland, Cal. Architect, W. H. Crim, Jr., 425 Kenny street, S. P. Owners, Realty Syndicate, Oakland. The building will be erected on the west side of Franklin street north of 14th, and has been designed to contain five modern stores. Interiors will be finished in pine throughout. There will be patent store fronts and plate glass windows. Marble bases and tile vestibules will be used. Exterior of the building will be faced with pressed brick. Plans are

complete and figures are being taken.  
**RESIDENCE** — 2 story and base, frame, \$1,500. Oakland, Cal. Architect, Leo L. Nichols, First Trust Bldg., Oakland. Owner, A. Kleppinger. The dwelling will be erected at the corner of Broadway and Ridgeway, and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provided for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

## SAN JOSE AND THE SANTA CLARA VALLEY.

BRIDGE—Concrete and steel. San Joaquin, Monterey Co. City Engineer, County Surveyor, San Joaquin, Monterey County. Two bidders.

ceived by the Supervisors for the construction of the tri-county bridge at Aromas. H. E. Rowe bid \$5,600 and Messmer & Rice, \$5,000. Both bids were rejected and the Clerk was ordered to advertise for new bids to be opened on November 10th.

RETAINING WALL AND CULVERT—Concrete construction. Cost not stated. Redwood City, San Mateo Co., Cal. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. At the last meeting of the Board of Supervisors it was ordered that plans and specifications for a culvert and retaining wall on the Sawyer Camp road be adopted, and the Clerk publish a notice calling for bids for construction of same. It was also ordered that the Surveyor prepare plans and specifications for a road and bridge near Salada creek.

STREET WORK, GRADING AND ASPHALT PAVING—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, City Engineer, San Jose. Owners, City of San Jose. Plans and specifications for improving University avenue from the city limits to Palo Alto, westward to the State Highway have

been adopted by the Board of Supervisors here and bids will be received for same on November 2nd at 11 a. m.

STREET WORK, ASPHALT PAVING BRIDGE AND ROAD WORK—Cost not stated. Hollister, San Benito Co., Cal. Engineer, County Surveyor, Hollister. Owners, San Benito County. At a regular meeting of the Board of Supervisors the following matters were discussed: Bids for the tri-county bridge at Aromas were rejected. All bids were too high. New bids will be called for immediately. Revised plans and specifications for the jetties and piling on the Hollister-San Juan bridge were adopted and bids were ordered called, to be opened November 2nd at 2 p. m. The Board accepted plans and specifications for the Hollister-Cienega road and ordered bids called to be opened November 2nd at 2 p. m. No bids were received for constructing the Collins bridge, which is estimated to cost \$3,850, and the County Surveyor was ordered to have it built under the Day Labor system.

RESIDENCE—1½ story and base, frame, \$5,000. Mountain View, Santa Clara Co., Cal. Architect, F. D. Wolfe, San Jose. Owner, H. A. Krennstroff, First National Bank Bldg., San Jose. The dwelling has been designed for a nine-room house with two baths and sleeping porch. Interior finish will be of pine and hardwood with some white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—1½ story and base, frame, \$10,000. San Jose, Santa Clara Co., Cal. Architect, F. D. Wolfe, San Jose. Owner, Victor Scheller, First National Bank Bldg., San Jose. The dwelling will be erected near Evergreen, and has been designed for a ten-room house with two baths and sleeping porches. Interior will be finished in pine and hardwood with white enamel in the bed rooms. There will be hardwood and tile floors. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

## Contracts Awarded.

RESIDENCE—2 story and base, frame, \$7,500. Burlingame, San Mateo Co., Cal. Architect, Fay Spangler, Monadnock Bldg., S. F. Owner, Mr. Silbey, Contractors, Ruegg Bros., Pacific Bldg., S. F. Contract price, \$7,500.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

**SCHOOL.** 2 story and base, frame and plaster, \$35,000. Dixon, Solano Co., Cal. Architect, Irwin Schacter, Plaza Bldg., Oakland. Owners, Dixon School District. The building will contain eight class rooms and an assembly hall. Interior finish will be of pine throughout with some maple floors. Plans provide for steam heat and modern school plumbing. There will be composition blackboards. Exterior of the building will be faced with cement plaster on metal lath. Plans are now being prepared. Further mention will be made of the work when called.

**RECEIVED.** Reinforced concrete, cost not stated. Fairfax Marin Co., Cal.

**RECEIVED.** County Surveyor. Fairfax Marin Co., Cal. Plans for reinforced concrete bridge to be located on the Fairfax Business road south of the town of Fairfax. All the bids will be received for this construction to be considered in the reinforced concrete structure runs above the estimate. Bids will be opened by the Board of Supervisors on November 10th. Plans and specifications can be secured from the County Surveyor.

**AND CONCRETE CITIES** Cost not stated. Rio Vista, Solano Co., Cal. Engineer, City Engineer, Rio Vista. Owners, Town of Rio Vista. Plans and specifications have been completed and received the approval of the City Trustees for paving Main street with asphalt and constructing concrete curbs. Bids are now being taken and will be opened on October 29th. Plans and specifications can be secured at the office of the City Clerk.

**GAS PLANT AND MAIN EXTENSIONS.** Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, none. Owner, Contra Costa Gas Co., Martinez. The laying of gas mains will be commenced in this city by the Contra Costa Gas Company within one month, according to statements made by officials of the company. The plant for the furnishing of gas will be located in Pittsburg where a site has recently been purchased. S. Waldo Coleman is president of the company.

**SUPPLY DEPOT.** Frame and corrugated iron. Cost not stated. Rio Vista, Solano Co., Cal. Engineer, Engineering Department, Standard Oil Co., S. F. Owners, Standard Oil Co. The Standard Oil Company has leased considerable ground here and will soon start the construction of a supply depot. Three tanks with a capacity of 45,000 gallons are being installed. A garage, supply house and other structures will be erected by the company.

**RAILROAD STATION.** 1 story, frame and plaster, \$6,000. Richmond, Contra Costa Co., Cal. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. The Southern Pacific Company states that actual construction will be started within a few days on the new passenger station to be erected at Richmond. The building will be of frame and plaster and cost in the neighborhood of \$6,000. Work will also be started shortly on the new freight sheds and track work at Richmond, which has been estimated to cost \$18,000.

Contracts Awarded.

**RESIDENCE.** 2 story and base, frame, \$6,500. Sausalito, Marin Co., Cal. Architect, none. Owner, P. B. Lawrence. Contractor, E. E. Etherton, Menadnock Bldg., S. F. Contract price, \$6,100.

## COMPLETION NOTICES.

## MARIN COUNTY.

RECORDED — ACCEPTED  
Oct. 10, 1914 — NEAR IGNACIO, Marin  
Co., California Fruit Canners' As-  
sociation (repute G. W. Price Pump  
& Engine Co.) — Sept. 23, 1914

FRESNO, MODESTO, SACRAMENTO  
AND CENTRAL CALIFORNIA.

WATER PRESSURE SYSTEM — \$3,000. Fresno, Fresno Co., Cal. Engineer, City Engineer, Fresno. Owners, City of Fresno. A request for an appropriation of \$2,000 or \$3,000 to start a water pressure system at flooding Park has been put before the Park Commission. The matter will be considered at the next meeting of the City Commission.

TRANSMISSION LINE — Cost not stated. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. The Power Equipment Co., Bialto Bldg., S. F., submitted the lowest figure at \$11,000 for constructing 9.5 miles of transmission line in Kern County. John R. Cahill, 160 Montgomery street, S. F., submitted the only other figure at \$16,400. Both bids were taken under advisement by the County Highway Commission.

BRIDGE AND GRADING — Cost not stated. Fresno, Fresno Co., Cal. Engineer, County Surveyor, Fresno. Owners, Fresno County. Bids will be received up to November 6th for improving the Dunlop Cut-off road and for constructing a reinforced concrete bridge 75 feet long. The work is estimated to cost \$56,000. Plans and specifications can be secured from the County Surveyor.

HOTEL AND STORES — 4 story and base, brick and steel, \$75,000. Fresno, Fresno Co., Cal. Architect, R. F. Felchin, Fresno. Owners, Berry Estate. The building will be erected on the site of the former Fulton Hotel, destroyed by fire. The building will have stores on the first floor besides the hotel office and lobby. Upper floors will contain a total of 63 guest rooms and 25 baths. Interior finish will be of pine and hardwood. Tile floors will be used in the baths. Plans provide for steam heat and a hot water system. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for in about two weeks.

BRIDGE — Reinforced concrete, \$3,000. San Luis Obispo, San Luis Obispo Co., Cal. Engineer, County Surveyor A. F. Parsons, San Luis Obispo. Owners, San Luis Obispo County. Bids opened by the Board of Supervisors for the construction of the Paloma Creek bridge have been rejected. After considerable discussion it was decided to build the structure by Day Labor. The structure will be of reinforced concrete construction, and will be constructed under the supervision of County Surveyor A. F. Parsons and Supervisor E. W. Black.

SACRAMENTO, STOCKTON AND  
NORTHERN CALIFORNIA.

BRIDGE, Timber construction. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff.

Owners, Tehama County. Plans and specifications for a wooden bridge to be erected over the Salt Creek slough in Road District No. 4 have been adopted by the Board of Supervisors, and bids will be received for construction of same until November 5th, at 10 a. m.

BRIDGE — Reinforced concrete. Cost not stated. Arcade Creek, Sacramento Co., Cal. Engineer, County Surveyor, Sacramento. Owners, Sacramento County. Plans and specifications have been completed and have received the approval of the Board of Supervisors for a reinforced concrete road bridge to be constructed over the Arcade Creek on the Auburn road. Bids are now being taken and will be opened by the Board of Supervisors on October 29th. Plans and specifications can be secured from the County Surveyor.

BRIDGE — Timber construction. Cost not stated. Colusa, Colusa Co., Cal. Engineer, County Surveyor, Colusa. Owners, Colusa County. The County Surveyor's plans for a wooden trestle across Meulton break have been accepted by the Supervisors and bids will be received until November 4th at 2 p. m.

SEWER WORK — Cost not stated. Orland, Glenn Co., Cal. Engineer, City Engineer, Orland. Owners, City of Orland. The Trustees of this city have ordered the City Engineer to make complete plans and specifications for the extension of the sewer and water systems. As soon as this is done, bids for the construction of same will be advertised for.

CITY WATER SYSTEM — \$85,000. Red Bluff, Tehama Co., Cal. Engineer not selected. Owners, City of Red Bluff. Fred McDowell, who has charge of the circulation of a petition which asks that the City Trustees set a date when the people of the city will be called upon to vote bonds in the sum of \$85,000 to establish a municipal water system, states that over 500 signatures have been attached to the proposition. Only 220 names are needed to assure the placing of the question before the voters.

TRUNK LINE SEWER — \$55,000. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. The bid of the Matthews Construction Co. for the new trunk sewer has been rejected by the City Commission on the ground that it was not according to the requirements of the advertisement. This action follows a protest made by Telchert & Ambrose and Canahan & Mulford. Matthews bid on the work as a whole instead of bidding for units as the specifications required. He agreed to do the work for \$56,800, whereas his bids for materials totals on \$30,000. New bids will be opened next week.

RESIDENCE — 1 story and base, frame, \$2,500. Sacramento, Cal. Owner, John Jennings, 4127 I street, Sacramento. The dwelling will be erected on G street between 41st and 42nd, and has been designed for a five-room house with bath. Interior finish will be of pine throughout. Some oak floors will be used. There will be an open fire place in the living room. Mantel will be of tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

BRIDGE — Reinforced concrete \$134,000. Marysville, Yuba Co., Cal. Engineer, County Surveyor, Marysville. Owners, Yuba County. A statement published in the Marysville Appeal on October 16th, states that the Clinton Fireproofing Co., Mutual Bank Bldg., S. F., had abandoned their contract for the construction of the D street bridge in that city, a job amounting to \$134,000. P. E. Parker, manager of the Clinton Fireproofing Co., has stated to a representative of the News that his company has no such intention and that already three cars of equipment and materials are on the job. Work will be started on the big bridge by the Clinton Co. at once.

SCHOOL — 1 and 2 story and base hollow tile construction, \$25,000. Folsom, Sacramento Co., Cal. Architect, George C. Sellon and Alden W. Campbell, 1005 K street, Sacramento. Owners, Granite School District. This work has been out for figures before, but plans were revised and new figures are now being called. Bids will be opened on October 24th. Plans and specifications can be secured from the architect.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

**DAM**—Concrete and earth. Cost not stated. Reilands, San Bernardino Co., Cal. Engineer's name not given. Owners, Tri-Counties Reforestation District. The Tri-Counties Reforestation committee has under discussion a project for the construction of a great 4,000-foot dam 12 feet in height across the mouth of the Santa Ana canyon, it being argued that silt will form which will spread the waters over a vast area later to be conducted by channels into an artesian basin. This is the latest idea for the conservation of water which is now being wasted.

**HIGHWAY CONSTRUCTION**—Cost not stated. San Bernardino, San Bernardino Co., Cal. Engineer, County Surveyor San Bernardino. Owners, San Bernardino County. On condition that the Board of Supervisors of this county will construct a road from Daggett to Planets Springs, the people of Clark County, Nevada, have agreed to construct a road as far as the spring in this county. The road will be a main thoroughfare for automobiles from Sant Lake City to Daggett. The

Nevada people declare Silver Lake people are passing a petition to be presented to the Supervisors for an appropriation to build the road.

**ROAD WORK, SURFACING AND GRADING**—Cost not stated. Siever's Canyon Road, Orange Co., Cal. Engineer, County Surveyor, Santa Ana. Owners, Orange County. Plans are complete and figures are now being taken for grading and surfacing the Siever's Canyon road from the Ranch Mission Viejo to the easterly county line. Bids will be opened for this work on November 4th. Plans and specifications can be secured from the County Surveyor.

**CHURCH**—2 story and base, reinforced concrete, \$200,000. Los Angeles, Cal. Architects, J. T. Jones and T. F. Imes, Washington Bldg., Pittsburgh, Pa. Owners, St. Vincent's Parish. The building will be erected at the corner of Adams and Figueroa streets, covering an area of 100 by 225. The design will be in the Italian style. Construction will be fireproof. The main portion of the church will be 85 feet high. Interior will be finished in pine and hardwood with ornamental plaster in the main auditorium. There will be steam heat. Marble and tile will be used extensively. Exterior of the building will be faced with pressed brick. A general contract will be let. Working drawings are nearly complete and figures will be taken in about a month.

## Contracts Awarded.

**SCHOOLS**—3, 1 and 2 story. Class C construction, \$66,435. Alhambra, Los Angeles Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Alhambra High School District. Contractors, John Simpson Co., Baker-Dewiler Bldg., L. A., general construction, \$66,435; Alhambra Wall Paper and Paint Co., Alhambra, painting, \$2,245; J. M. Mullins Electric Co., Baker-Dewiler Bldg., L. A., \$2,829.95; Machinery and Electric Co., L. A., heating and ventilating, \$8,822.50 and C. E. McPeak, Glendale, plumbing, \$5,527.

**SCHOOL**—2 story and base, brick, \$23,511. Los Angeles, Cal. Architect, Architectural Dept. of Board of Education, L. A. Owners, City of Los Angeles. Contractors, Hetzel-Winget Co., Grant Bldg., L. A. Contract price, \$23,511.

**SCHOOL**—2 story and base, concrete and brick, \$66,700. Los Angeles, Cal. Architect, Architectural Dept. of Board of Education, L. A. Owners, City of Los Angeles. Contractor, Alex. Grant, 1201 West 37th street, L. A. Contract price, \$66,700.

**Bridges**, 2, reinforced concrete and steel. Cost not stated. Santa Barbara Santa Barbara Co., Cal. Engineer, City Engineer, Santa Barbara. Owners, City of Santa Barbara. Contractors, Boardman Construction Co., Santa Barbara, Also Creek bridge, \$11,290; Munoz & Munoz, Santa Barbara, Salina bridge, \$11,324.

## PORTLAND AND OREGON.

**STORAGE DAM**—Reinforced concrete. Cost not stated. Princelivore, Engineers, United States Reclamation Service, Portland. Owners, United States Government. A crew of men under the State Engineer, John H. Lewis, have completed prospect work on the U. S. Reclamation Service site

for a storage dam at Stewart's Gate, on Crooked River, about 30 miles south of Prineville. The project is being considered for the purpose of storing water for the farming section north of Prineville, covering several thousand acres. The plan is for a dam 150 feet in height, which would back water up for a distance of more than 15 miles.

**SAW MILL CONSTRUCTION** \$90,000. Klamath Falls, Ore. Engineer, F. Hill Hunter, Spokane. Owners, Pelican Bay Lumber Co. Work has been started on the rebuilding of the plant of the Pelican Bay Lumber Company, which was destroyed by fire recently, causing a loss of \$90,000. A larger mill than before is now being constructed. New machinery of various makes will be installed. F. Hill Hunter of Spokane has full charge of the construction. The work is estimated to cost between \$90,000 and \$100,000.

**PAROCHIAL SCHOOL**—2½ story and base, brick, \$35,000. Pendleton, Ore. Architects, Houghtaling & Dugan, Henry Bldg., Portland. Owners, Roman Catholic Church of Pendleton. The building will be in the nature of an addition to the present school which is of frame construction. The new portion will contain a large auditorium and offices in addition to the class rooms. Interior finish will be of pine and redwood. Maple floors will be used in the class rooms. There will be steam heat. All interior trim in the old portion of the building will be replaced with new and partitions of metal lath and plaster will be installed. Exterior of the new building will be faced with pressed brick. Plans are being prepared.

**SCHOOL**—2 story and base, brick and mill construction, \$75,000. La Grande, Ore. Architects, Houghtaling & Dugan, Henry Bldg., Portland. Owners, Roman Catholic Church. The building will cover a large area and will be of the mill construction type with brick exterior walls and frame interior. There will be a chapel, class rooms, recitation rooms, a dormitory for the boarding students and quarters for the sisters. Interior will be finished in pine throughout with maple floors in the class rooms. There will be steam heat and a hot water supply. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are being prepared and figures will be called for shortly.

**SCHOOL**—2½ story and base, reinforced concrete, \$55,000. Portland, Ore. Architect, T. J. Jones, 334 East Third street, Portland. Owners, Richmond School District. The building will cover an area of 47 by 170 feet. There will be nineteen class rooms, an auditorium, offices and recitation rooms. Basement will be arranged for a gymnasium and toilets. Interior will be finished in pine throughout with maple floors in the class rooms. Steam heat will be installed, the main plant being housed in an adjoining building. Exterior will be faced with cement plaster. Modern school plumbing will be used. Plans are complete and figures will be called for shortly.

**TRESTLE**—Timber construction. Cost not stated. Westport, Ore. Engineer, Engineering Dept. of Columbia & Nehalem Railroad, Westport. Owners, Columbia & Nehalem Railroad Co. This contract will be divided into two parts—the trestle work, and fur-

nishing and placing lumber in the bent trestle. The trestle will be 1,362 feet long and from 15 to 70 feet high. In the lumber contract there will be required in the neighborhood of 100,000 feet of lumber. The company will furnish the contractor with an engine and two pile drivers. Plans are complete and figures are now being taken.

**SEWER SYSTEM**—\$185,000. Montaville, Ore. Engineer, City Engineer, Montaville. Owners, City of Montaville. Plans are nearly complete for the construction of a new sewer system known as the Willow and East 82nd street branch. This work includes practically the entire system for the city. The contractor will be allowed 330 days to complete the work. Plans and specifications can be secured from the City Clerk. Bids will be called for in a few days.

#### Contracts Awarded.

**STABLES**—2 story and base, reinforced concrete, \$38,975. Portland, Ore. Architect, C. C. Rich, care of Building Inspector, Portland. Owners, City of Portland. Contractors, Parker & Bannfield, 463 East Stark street, Portland. Contract price, \$38,975.

#### SEATTLE AND WASHINGTON.

**SCHOOL**—3 story and base. Class A construction, \$350,000. Seattle, Wash. Architect, Edgar Blair, 1426 Jackson street, Seattle. Owners, Ballard School District. The building will be erected at the northwest corner of 14th avenue and West 65th street, and will cover a large ground area. Construction will be fireproof throughout with a complete steel frame, reinforced concrete walls and floors, hollow tile interior partitions and pressed brick facing. The building will contain a large number of class rooms, lecture halls, teachers' rooms, general office, an assembly hall and auditorium and department for domestic science and manual training. Interior finish will be of pine and hardwood. Maple floors will be used in the class rooms and auditorium. Plans provide for steam heat, an oil burning system, vacuum cleaning, program clocks and slate blackboards. Bids will be taken on a general contract, including all work, and also for the general construction with one alternate and separately for the plumbing, heating and ventilating, electric work and program clocks. Plans are complete and figures are being taken. Bids will be opened on October 28th.

**LODGE HALL AND STORES**—4 story and base, reinforced concrete, \$100,000. Tacoma, Wash. Architect, C. Fere Champney, Henry Bldg., Seattle. Owners, Tacoma Elks' Hall Association. The building will be erected at the corner of 7th and C streets, and will be of fire-proof construction throughout, with reinforced concrete walls, floors and hollow tile interior partitions. The entire building will be devoted to the use of the owners. Plans provide for a large assembly hall, banquet room, gymnasium with a large swimming tank and social rooms. Upper floors will be arranged for living apartments. Interior will be finished in pine and hardwood. There will be steam heat, an automatic elevator, hot water system and vacuum cleaning. Large open fire places will be a feature of a number of the rooms. Exterior of the building will be faced with cement plaster. Plans

are nearly complete and figures will be taken shortly.

**POWER HOUSE**—2 story and base, reinforced concrete, \$60,000. Seattle, Wash. Architects, Carl F. Gould and Charles Behl, associated with Cayman, Hugh & Young, United States Engineers, Larke Bldg., Seattle. Owners, United States Government. The building will be erected at the Narrows on the Lake Washington canal, and will cover an area of 15 by 60 feet. Construction will be fireproof. Interior will be finished in marble and cement plaster with cork floors. Plans provide for a heating and ventilating system. Exterior of the building will be faced with cement plaster on metal lath. Plans are now being prepared.

#### Contracts Awarded.

**FRUIT STORAGE WAREHOUSE**—2 story and base, reinforced concrete, \$129,300. Seattle, Wash. Engineer, Port of Seattle Commission, Seattle. Owners, City of Seattle. Contractors, Butler Contracting Co., Central Bldg., Seattle. Contract price, \$129,300. Note: This contract price does not include the machinery and other equipment, which has been estimated to cost \$150,000, and which will be let under separate contract.

**COURT HOUSE ADDITION**—2 story and base. Class A construction, \$56,000. New Westminster, B. C. Architects, Gardiner & Mercer, New Westminster, B. C. Owners, Provincial Government. Contractors, Dominion Construction Co., Northwest Trust Bldg., Vancouver. Contract price, \$56,000. Note: Subfigures are now being taken. The contract does not include interior hardwood fixtures, elevator work or lighting fixtures. Bids will shortly be called for on these parts of the work.

#### CONDITIONS ON VANCOUVER ISLAND

[Consul Abraham E. Smith, Victoria, Canada.]

At the outbreak of the present European war Vancouver Island was passing through a business depression due to the collapse of a real estate boom. The declaration of war, therefore, came at a time when this community was poorly prepared to meet this added reverse.

During 1913, on account of the number of unemployed, the Dominion Government passed an act forbidding all laborers and artisans of all nationalities entrance into Canada. This order went into effect December last. The act was therefore instrumental in keeping the number of unemployed to smaller proportions.

#### Effect of War on Industrial Conditions.

The declaration of war, however, has caused practically all the industries employing large numbers of men either to close down completely or reduce expenses by dismissing employees. Large numbers of men on municipal work have been laid off, and these conditions are true concerning the coal mines, logging camps, sawmills, building trades, etc.

The conditions described have brought about an exodus of people of all classes, but mostly industrial workers, to the United States. It is estimated that about 2,000 persons have left Vancouver Island for the American side since the war broke out.

The government has promised leniency in the payment of taxes,

royalties and revenues which the inability to meet obligations was bona fide.

There is no occasion for policy considerations. The banks are helping out to the extent of their ability, but there is a tendency to safeguard their funds. In some instances work is divided by the employers so that part-time work may be given the employees.

#### Demand for American Articles.

Some Articles which originate in Europe and the export of which is now prevented by the war follow: From Germany and Austria, machinery, structural iron and steel, electrical supplies, tools and other hardware, cutlery, barbed wire, wire netting, color prints, earthenware, from Switzerland and from Belgium, window and table glass and enameled ware.

Germany is a large importer of copper and this district produces large quantities of this ore, much of which is used in Germany. The export of copper is now prevented to the war zone in Europe.

#### Building Operations—Railroad Construction.

There was a large decrease in the amount of building and construction work during the fiscal year ended March 31, 1914, compared with the preceding year. A fair amount of new work is at present under construction, among which are the Ogden Point Breakwater to be completed at the end of 1915, at a cost of \$1,000,000; ocean docks, time limit bridge at Johnson street, Victoria, to cost \$200,000; dry dock at Esquimalt to cost \$1,000,000, Jubilee Hospital, Victoria, to cost \$150,000; Hudson Bay Department Store, Victoria, to cost \$100,000; and drill hall, Victoria, to cost \$250,000.

A large amount of money was expended by the Esquimalt & Nanaimo Railroad during 1913 in improvements. There is much work to be done by this road during the present year in replacing wooden bridges with steel and concrete structures, renewal of steel rails, hallasting of line extension of sidings, roundhouses, machine shops, and the establishing of an up-to-date terminal in Victoria. The Parksville and Court-may branch of the Esquimalt & Nanaimo Railway was expected to be finished by the end of July, 1914, giving rail connection with Victoria.

Work is progressing satisfactorily on the construction of the Canadian Northern Pacific Railway, which will practically double the railroad mileage on Vancouver Island when it is completed.

Service is given to Victoria by the Great Northern and Northern Pacific Railroads over the Victoria and Sidney Railroad, a subsidiary line of the Great Northern. A three-daily passenger service is given with a gasoline motor-driven coach and freight service by steam.

The British Columbia Electric Railway has been operating the new Saanich Interurban branch since June, 1913. The mileage is 24.1% and standard cars are used. The company operates 49.28 miles in the city of Victoria. It has in course of construction at Jordan River a power plant of 2 units, which is expected to be available to the extent of 25,000 horsepower in October of this year. The company has an auxiliary

steam plant of 1,000 horsepower at Brentwood Bay and an additional water power plant of 2,000 horsepower at Goldstream.

#### PACIFIC COAST MOTOR HIGHWAY.

[Consul General R. E. Mansfield, Vancouver, British Columbia, Canada.]

In addition to the great Canadian automobile highway now in course of construction from the Atlantic to the Pacific, of which was reported in Daily Consular and Trade Reports for June 2, 1914, Vancouver is the western terminus, the Pacific-coast highway extending from San Diego to Alaska via Vancouver is being linked up, and by the end of 1915 motorists will be able to make the trip from southern California to British Columbia over a hard-surfaced road. The route will include the principal cities on the coast and will afford one of the most attractive motor trips on the continent.

There has been great activity in road building in California, Oregon, and Washington, and several thousand miles of fine roads have been added to the highways in those States in recent years. This activity has been encouraged and is largely due to the increasing interest in motoring and the great number of automobiles in use on the coast. Various sections of the Pacific-coast highway have been linked up in the State mentioned, and it is now possible to make the trip by motor for most of the distance from San Diego to Seattle.

#### British Columbia Section.

Approximately \$7,000,000 was spent on road building in British Columbia in 1912, and every settled section of the Province is being provided with good roads. As practically all the original transportation routes in this district were from east to west, special attention is now being given to the building of north and south lines of both highways and railroads. The purpose is to open up lines of coastwise communication connecting the main arteries of traffic extending from the eastern and central Provinces to the Pacific Coast. This is especially true of motor roads and is the present rate of progress in construction British Columbia will soon be provided with highways suitable for motor traffic from the border of the United States to Yukon Territory.

That portion of the British Columbia section of the Pacific highway from Vancouver to Blaine, Wash., was recently definitely marked, and other divisions in the Province are being connected. A great many British Columbia residents go to California each year, a considerable number of them sending their motors by boat or train. For several years various sections of good motor roads along the coast have been in use, but only within the last few years has there been a concerted effort to connect the completed divisions into one continuous highway through the Pacific Coast States and British Columbia.

#### Yukon Highways.

It is now the intention of the highway commission to build a road from the coast to the interior of the Province, and it is expected that this road will be completed by the end of 1915. A section of the road from the coast to the interior has been under construction for some time, and the

among the most important stretches of which is the overland road between Dawson and Whitehorse, on which grades are being reduced, sharp curves eliminated, and fills and surfacing added. One of the most important improvements on the road near Dawson is the straightening of the highway on the east side of the Ogilvie River, where the road was destroyed by dredges last year. The old roadway followed a tortuous course which made travel dangerous, especially automobile traffic, because of the steep grades and curves. The plan of the Yukon Territorial government is to improve the existing highways and construct new roads, establishing a system connecting with routes through British Columbia and the new roads being built in Alaska, extending the automobile route from the semi-tropical regions of the coast to the land of the midnight sun.

#### Alaskan Division.

The engineers detailed by the Alaskan Road Commission to survey the proposed Government highway from Skagway to the summit of the White Pass have completed the work and are now preparing maps and data for the route. The road is to connect at the international boundary line at the summit of the pass with the Canadian system of roads reaching to the Atlin section, and to Yukon as far north as Dawson. The road from Skagway to the summit will have a grade averaging less than 5 per cent and at no place will it exceed 5 per cent.

According to the new survey the route follows for the greater part of the distance the old '97 trail, leaving out that section of the road leading to Black Lake, but continuing on the west side of the Skagway River to Rocky Point, avoiding the long, steep grade to Black Lake. The route passes through historic Liarsville, a former lively station on the '97 trail, from where it approaches a sheer wall of granite, which will require trestle work or extensive cribbing for a long distance. At Mile No. 7, of the White Pass & Yukon Railway, the great scenic beauty of the road becomes apparent, and the route continues to increase in attractiveness as it winds up through the rocky canyon of the Skagway to White Pass City, once an animated municipality living off of the adventurous gold seekers passing to and from the mining regions farther in the interior, but now reduced to a deserted village consisting of a few uninhabited cabins. The scenic aspect of the road continues to grow in interest until the summit of the pass is reached, and the route when completed will present attractions that will make it one of the great popular thoroughfares of the Northwest for summer tourists and motorists.

With the completion of this route motorists living in any section of the coast country will be able to make the journey from southern California to Alaska with such side trips as they may desire to include. The popularity of the Pacific coast highway is assured as it passes through a country possessing special scenic attractions, and in which, most of the year, during the better portion of the year, good weather and favorable conditions are secured.

The great continental and coast highways will make Vancouver the attractive point for motorists from the

East and South and will increase the interest in motoring in British Columbia. It will also greatly increase the demand for touring cars and furnish a market for American-made automobiles.

There are registered in British Columbia 7,350 cars, which is a greater number in proportion to the population than in any Province in the Dominion.

### CONSTRUCTION WORK ABROAD.

#### CANADA.

(Consul Samuel C. Reat, Calgary, Alberta, Sept. 17.)

**New Cordage Factory.**

Construction work will be commenced this fall on a factory and office building in Manchester, a suburb of Calgary, for the Western Canada Cordage Co., (Ltd.). The building will cost about \$150,000, and will be 400 feet long by 120 feet wide. The contract has not yet been let, but tenders are requested.

#### City borrows Sinking Fund for Improvements

Improvements in the city of Lethbridge will not be discontinued because of the financial depression. Borrowing its own sinking fund of \$100,000, the construction work will be carried forward as contemplated in the by-laws passed last spring. The work includes the completion of high-pressure water system, new intake, and the laying of storm sewers. The city of Lethbridge has no payments on debentures to meet until 1917, and bonds will be sold, when the financial stringency is over, to replace the sinking fund.

#### CHINA.

(Consul Julian H. Arnold, Chefoo, July 17.)

#### The Chefoo Breakwater.

The Chefoo consular body has submitted the plans and specifications for the proposed breakwater for Chefoo Harbor to the diplomatic body, Peking, for its approval, with a request that the present constituted Chefoo Harbor Improvement Commission be authorized to let contracts for construction. No reply has as yet been received from Peking.

For financing the work the local Chinese Superintendent of Customs, who is ex officio chairman of the harbor commission, has recently been authorized by the Ministry of Finance, Peking, to negotiate for a loan of 2,500,000 taels (\$1,500,000 U. S. currency) to cover the cost of the work, under a guarantee of the Ministry of Finance. The Russo-Asiatic Bank, the Deutsch-Asiatische Bank, and the Hongkong-Shanghai Bank, the two

last mentioned working together, are at present bidding for the loan.

[The consul forwarded a set of plans and specifications for the breakwater, which may be seen on application to the Bureau of Foreign and Domestic Commerce, Washington. Detailed information concerning the enterprise was presented in Daily Consular and Trade Reports for November 12, 1913, and February 29, and April 5, 1914.]

#### Railway Construction in Shantung.

[Editorial Note:—In view of war conditions the building of this railway will naturally be delayed. However, the advantages of such a line are apparent, and it is probable that some arrangement will be made for its construction after peace shall have been declared.]

An agreement between the Chinese Government and Germany has been signed whereby the latter will furnish money, materials, and engineers for constructing a railway to connect with the German-owned Shantung Railway at Kaomi (50 miles west of the port of Tsingtau) and running south and west join the Tientsin-Pukow Railway at Hsuehchow on the border between Shantung and Kiangsu Provinces, a total distance of approximately 220 miles.

The same agreement provides for another railway connecting Tsinanfu, the present terminal of the Shantung Railway, with some point on the Peking-Hankow Railroad, to be determined after a thorough survey by the German engineers, but probably Changtehfu, nearly due west of Tsinanfu. This second line will be about 160 miles long and will connect Tsingtau, the German port, with the heart of north central China and eventually with northwest China. According to the terms of the agreement, if China should desire to extend the line farther inland by using foreign capital and foreign engineers, Germany must first be consulted.

In both of the lines mentioned, the German students making the loan will furnish chief engineers, chief accountants, and traffic managers, in other respect, however, they are to remain under the control of the Chinese Government. The agreement is reported also to provide that Germany shall establish at Tsingtau an engineering school to which China promises to send to students each year. In other particulars the agreement is reported to be quite similar to that under which the northern section of the Tientsin-Pukow Railway was constructed.

#### A Fertile Region.

A glance at the map would reveal the fact that with these two railways now about to be completed Germany

succeeds in securing for the port of Tsingtau a position of commercial importance which will well justify the enormous expenditures which she has made at that port in harbor and other public improvements. The line from Tsingtau to Hsuehchow, via Kaomi, will tap a section of the country rich in coal, iron, lead, and antimony, as well as a very fertile agricultural region. It will be the cause of joining Tsingtau with the Grand Canal and insure for her much trade from this source. The line from Tsinanfu, capital of Shantung Province, a city with a population of nearly 400,000, to the Peking-Hankow Railroad, about 160 miles west, will pass through a densely populated agricultural section and eventually lead to the rich coal mines of Shansi Province.

#### Vast Development Plans.

When it is considered that Shantung Province, with an area equivalent to that of Wisconsin, claims a population of 30,000,000, one can readily appreciate the importance of these railway projects to this section of the nation. Naturally German manufacturers and exporters will be in a position to reap the greatest rewards from these developments. But this should not be interpreted to mean that American manufacturers need not expect to profit thereby, for there are certain products which American manufacturers will be able to supply.

In the construction of the two railways above outlined, work upon which will begin in the near future, certain American appliances will find a market.

#### SIAM.

[Vice Consul General Carl H. Hanson, Bangkok, August 5.]

#### General Construction Work.

The Siamese budget for the fiscal year 1914-15 provides for the following construction work: A grant of \$18,500 for an office for the Fine Arts Department, and \$44,000 for the construction of a mausoleum for the statues of the Kings of the present dynasty. For the completion of the new audience hall, the construction of which was begun several years ago, \$117,500 has been provided this year and \$114,500 will be allotted in the budget for 1915-16. These allotments are to be met out of ordinary revenue of the Kingdom.

#### Railway Construction.

In the Budget of Siam for 1914-15, nearly of the sum of \$1,000,000 is allotted for the construction of railways. The amounts have been allocated for the completion of the Siam-Burma Railway, which is now nearly completed, \$400,000; for the extension of the Bangkok-Bangkok Railway, \$1,000,000; for the extension of the Bangkok-Bangkok Railway, \$1,000,000; for the extension of the Bangkok-Bangkok Railway, \$1,000,000.

Northern Railways \$1,413,000 has been appropriated. These estimates are to be met from loan funds chargeable to the national debt.

Requests for all papers can not be granted without satisfactory reason. Publications should be ordered by number and title. Applications should be addressed to the Director of the Bureau of Mines, Washington, D. C.

#### CONCRETE MIXING BY HAND.

In the actual mixing of concrete the man in charge will be governed by local conditions, says a writer in the "Building Age." It is not possible to consider all phases of this part of the work, so a typical case is taken. With the mixing board set up level in its proper place, and arrangement made for the water supply, either through a hose connected direct or in a barrel large enough to hold more than sufficient for one batch, we are ready for work.

Wherever possible one man should be told off to handle the cement and water and tamp the concrete in forms. It is his business to keep track of how many barrows of gravel have been dumped and to open and distribute the correct amount of cement over them. Opening and emptying cement is the meanest part of the concrete work, and if you can find a man who will always shake out of the sack all the cement, and who thinks because he does not have to do any mixing that he has something of a "soft job," so much the better.

First dump on the board three barrows of gravel. Upon this cement man who has his sacks all opened to prevent delay dumps one sack of cement, and with a shovel rakes it evenly over the gravel. Next come three more barrows of gravel and another sack of cement in the same way, and this operation is continued until there is enough for a batch. As the board be-

comes full of material the cement man keeps his eye on it and indicates where the gravel is to be dumped. When the material is placed in this manner it is already as well mixed as in the old way after the first turning.

Four men with shovels now take their places, one at each corner of the board, and turn the material out to the sides, leaving it in two piles instead of one.

In turning the material the men do not shovel in the ordinary way. Instead of running the shovel directly into the heap and taking a shovelful from one point, they run the shovel along the edge of the heap in such a manner that the shovel is full by the time it reaches the center or the point where it would meet the opposite workman's shovel if both were keeping the same time. The shovel is then turned over and drawn backward, leaving the material scattered along the side of the board. Perhaps the best description of this method of shoveling would be to say that it acts in the same manner as a farmer's plough, which instead of turning the furrow as it goes along, it picks it up going forward and turns it over as it comes back.

For the first few shovelfuls the shovel is barely raised from the board. As the heap gets larger it is raised just enough to keep the material back out of the way, and the two piles separate. The less the shovel is lifted and the less the distance between the piles the less amount of energy required to turn the material and the less chance for the wind to blow all the cement out of it. As soon as all the material is turned out into two piles at the sides of the board it is turned back to the center in the same way, leaving it in a heap as it was at first, but with the sand, gravel and cement now thoroughly mixed.

This is all the dry mixing the batch receives. It should now be so thoroughly mixed that it is all one color, and although we are aware that some authorities require the material to be turned three or more times dry, any further mixing than that already described is either a waste of time or the men doing the mixing are not getting proper supervision.

To wet the mixture two men should stand on each side of the heap as before and level a portion of it on the board to a depth of 3 inches or 4 inches. This is now thoroughly wetted with a hose for preference, though a bucket does almost as well. As soon as soon as the amount leveled down on one side is wet, the men on that side shovel it out of the way to the side of the board, using some judgment in mixing the wet with the dry, but being careful to prevent any of the water running away, as it now contains a large percentage of the cement. To prevent this where the board is not quite level, the men on the lower side keeps a line of dry material as a dam just in front of his feet.

While the two men are turning over the wet material and raking down, another layer from the heap the water is turned to the other side, and so alternates from one side to the other until the batch has all been wet and all four shovels meet in the center of the board. The material is now turned back to the center again the

man with the water watching and wetting any portions that need it—and it is then ready for the forms.

This is our usual method, but circumstances alter cases, and variations of the method are sometimes used. Quite often, instead of four men turning the last time, only two turn, depositing the material near one end of the board, from whence the other two shovel it directly into the form. It all depends upon conditions which are hard to describe, but readily discernible to the man on the job.

The number of men that can be economically handled also depends upon conditions. As many as eight can be kept busy with one mixing board in certain cases, but with more men than this, if there is much to be mixed, it is often better to set up another board.

Use long-handled, round-pointed shovels for mixing. Other kinds have been tried, and many new men have started work with the statement that they prefer the square point short handle, yet, whenever the short shovel has been provided, it has always been discarded for the long-handled tool after a few hours' work.

Long-handled, square-pointed shovels have also been tried, but the round point will pick up all the ordinary man can handle if he is going to work all day, though it is advisable to keep a square point handy for cleaning the last of the batch off the board.

Some little care is required in putting the mixture into the forms to ensure a compact wall and smooth finish. One man watches this part of the work, and if necessary directs where the material is to be placed. He has a spade or a worn shovel, the blade of which has been flattened. With it he rams the mixture and keeps the larger stones from collecting on the face of the wall and forming what is known as "honeycomb."

Where the mixture is coarse and the thin, it is often difficult to make a smooth finish. In these cases the men placing the concrete should be directed to so turn their shovels that the backs of them come next to the face of the wall, because in a shovelful of mixed concrete most of the "fine stuff" is next the shovel blade.

Another case of honeycomb comes filling the form too high at one point and allowing the mixture to roll down the form. This does no harm if watched, but often the man doing the tamping overlooks this matter because he has already spaded the portion affected by the movement of the concrete.

The phase of concrete work that has often received attention is the matter of having new work stick to old. It has even gone so far as patented preparations for applying to the surface of the old work to make the adhesion of the new work positive. The writer has never had any difficulty in joining new work to old, and has never had to use anything out the material at hand.

First, the surface of the old work should be roughened, and, if possible, made irregular in outline. Much of the trouble is caused by the joint between the old and the new surfaces being in a straight line. This forms a weak spot in the wall, not because the concrete does not stick there as well as anywhere else, but because it provides for a continuous line

of cleavage in one direction. Every stonemason and quarryman knows that solid rock will split easily, with the grain than in any other direction, and these straight lines of cleavage form what one may term "strain" in the concrete.

After the surface has been roughened it should be swept clean of all loose particles. Water from a hose can be used for this cleaning process, but the very best thing of all, if it can be obtained, is air under pressure. The water sometimes washes mud into the crevices of the work, and nothing is worse for a joint between two concrete surfaces than a thin film of mud.

After wall is cleaned off, wet it carefully and thoroughly and then mix a small batch of sand and cement mortar in the proportion of two of sand to one of cement. Trowel this mortar over the surface of the old concrete to a depth of  $\frac{3}{4}$  inch, and while soft deposit the new concrete on top of it.

The argument for this is that one can take two bricks, two pieces of rock or two cement blocks, and stick them so thoroughly together with a sand and cement mortar that they may be broken to pieces before the joint will give way. In practice this statement applies to old and new concrete, and this method of joining has been found to be satisfactory and reliable under all conditions.

One of the principal arguments used by the Chronicle and the reactionaries against Governor Johnson is that he was out of the State in his campaign for Vice-President when he ought to have been at home earning his ten thousand a year. To read their argument one would think that the State was hiring a clerk and expected to get personal service for the money paid. And that is just about what the former governors amounted to. Only the Southern Pacific and the political bosses gave them the job and the governor was supposed to attend to it.

The Reactionaries have one positive position that they stand for—that is prosperity. That is a grand old term and includes everything. As it is they are against everything that has been done in the last four years and at the same time they claim all the credit for everything good that has happened. It is a strange situation and is so full of contradictions that the whole thing settles down to "anything to beat Johnson."

#### THE PICTURES.

Numerous pictures of war scenes have been enormously appealing. One printed in this week's Collier's is ineffaceable from memory. It is the picture of watchers of the bulletins in a Hungarian city. The two elderly peasant women of the foreground present an unforgettable realism of grief-stricken motherhood and wifehood. In the name of God that sorrow is indicted. In the name of God, one echoes, can such things long continue?

Lately it has been stated that moving picture films of battle scenes must not be thrown on the screen. They are too horrible. But, oh, let them be thrown on the screen. Are we always to have the false glamour of glory over war? Are we always to see only its vain trappings of times of peace?

The false veil must be torn away before the terrible face of war can be

seen, and, being seen, can be meted by the strong fist of humanity.

While the building record for September shows an average decrease of about one-third as compared to the normal the chances are that October will show an even more marked decrease on account of the war. While it is impossible to prophesy what may happen in the near future the chances are that the building industry will set its second wind before long. Things will tend to adjust themselves to the unstable condition and the start of the new currency system will no doubt make money somewhat easier to get. In any event so long as this country remains neutral there will in time be a demand for our products even though the main business of Europe at the present time is the destruction of life and property.

Judging from reports General Von Klueck's left wing must be about as tough as that of a boarding house chicken.

#### STREET WORK ORDERED BY THE SUPERVISORS.

Bids to be Soon Called For on More Street Improvements.

Bills have been passed by the Supervisors ordering the performance of the following street work to be done in the city and county, approving and adopting specifications therefor and authorizing the Board of Public Works to enter into contracts for doing the same. The street work ordered is as follows:

Improvement of 15th avenue, between Balboa and Cabrillo; improvement of 10th avenue, between Balboa and Cabrillo; improvement of Fremont street from Brannan to the Embarcadero; improvement of 35th avenue, between Anza and Balboa, and improvement of 35th avenue, between Anza and Balboa.

#### INVENTS POCKET WIRELESS.

A dispatch to the London Times from Rome says that it is reported from Aquila that a priest named Domenico Argentieri has invented a system for receiving wireless messages whereby communications may be received even in closed rooms. No poles or batteries are needed. The apparatus is of the simplest description and can be carried in one's pocket.

#### EXPORT OF CANADIAN LOGS TO UNITED STATES.

[Consul General R. A. Mansfield, Vancouver, British Columbia, Sept. 22.]

Since the tax on timber cut from Crown lands in British Columbia was reduced by the provincial government recently [see Daily Consular and Trade Reports for October 1, 1914] there has been considerable movement of logs to the United States. It is estimated that the exports during the first week after the embargo was partially raised amounted to 7,000,000 feet per day. Most of the logs exported are cedar, but the shipments include some fir. Royalties and export duties imposed upon timber cut on Crown lands are at the rate of 8 cents per foot for No. 1 cedar, \$2.75 per foot for No. 2 cedar

and \$2.00 for No. 3. For No. 1 and No. 2, 10 cents per foot for No. 3.

#### CARELESSNESS CAUSE OF FIRE.

More than 50 per cent of all fires caused by simple carelessness which unnecessary and criminal. Repair of dilapidated buildings, the removal of fire-breeding material, care in clearing weeds and rubbish, the placing of kerosene at a safe distance from buildings, the removal of oily waste, proper ventilation, in brief, plain common sense, will minimize the danger from this class of fires.

#### MORE FIRE PROTECTION WANTED.

San Miguel City, Lake View Tract and Columbia Heights Need Better Protection to Guard Fire Hazard.

The Chief Engineer of the Fire Department, in a report submitted to the Board of Fire Commissioners, states that the section of the city known as San Miguel City, Lake View Tract and Columbia Heights, which is rapidly building up as a residential district, is lacking owing to the insufficiency of the water supply. The Board of Fire Commissioners has recommended that six cisterns be constructed in these districts.

California yew which grows on the national forests of that state is finding some use in present-day archery practice. Its qualities closely resemble those of the old-world yew which made the English long-bow famous in medieval times.

Outside of the construction of the State Highway a considerable amount of money is being spent by the State in the construction of State buildings. Work now under supervision of the State Engineering Department amounts close to a half million dollars.

Of the money now being spent, the largest amount is being used for the Agnew State Hospital.

A cottage to house female working patients will cost, when completed, \$50,000, and will accommodate sixty-two persons, while the Nurses' Home for Women will cost \$50,000. Both of these buildings are expected to be completed the early part of next year.

Other buildings are being erected as follows:

At the Stockton State Hospital, a new ward building, \$58,000, dairy buildings and milking barn, \$29,000.

At the State Hospital at Napa, a recreation hall, \$15,000; dairy buildings, \$30,000, laundry building, \$25,000, additional cottages for dormitory purposes, between \$25,000 and \$50,000.

At the Southern California State Hospital at Patton, laundry building, \$29,000.

At the Sonoma State Home, nursery building for boys, \$4,000.

At the State School for Boys at Whittier, receiving and hospital building, \$25,000, assembly hall and gymnasium, including net on swimming pool, also bowling alley, \$85,000, and a trades building, \$25,000.

At the California School for Deaf and Blind, Berkeley, building to contain a gymnasium, swimming pool, canteen.

At the State School for Adult

blind, Oakland, dormitory building, \$50,000.

In addition to the structures being erected, others are contemplated, the most important of which is the California School for Girls at Ventura, which will cost in the neighborhood of \$150,000.

With all the hue and cry about the extravagant commissions and the conditions of unemployment in the State, the State itself is being run on a business basis, contracts are being let in the open and the State is getting value received.

The cartoonist in the Bulletin depicts a poor man in depths of despair on the verge of suicide because of unemployment when a newsboy comes along with an extra which has big headlines that the war is costing \$5 millions a day and nobody knows what it is all about. And so far as the unemployment is concerned it is true even in this country. And when one thinks what it will be in other countries as the war now is only two months old the horrors of war can only be imagined.

A military nation seems to be essentially barbarous. A standard of morals always exists that is little above the cave man for a war of conquest is nothing less than murder and highway robbery. When the rule of the soldier is political liberty can not be or if it is to only a limited aristocracy. And the militarism that now has the world in its grip is turning back the dial of progress and unless those peoples who have established political freedom through a long succession of years succeed in wresting the weapon from its hand God only knows where the struggle will end or whether it will have to be begun all over again.

At any event posterity will be saddled with an inconceivable debt. The wealth of the world will be decimated. The best blood and brains of the world is being daily poured out on the altar of war and all for the reason of this military spirit that has been fostered and developed for generations.

#### TRADE EXTENSION IN NEW ZEALAND.

[Consul General J. I. Brittain, Auckland, September 8.]

The present is an opportune time for American manufacturers and exporters to make a determined effort to obtain trade in New Zealand. The general impression here is that the United States has excellent prospects for export trade in Australasia.

The Union Steamship Co. has a monthly service between San Francisco and Wellington, New Zealand, about 450 miles south of Auckland. Although Wellington is the capital of New Zealand, Auckland with almost double its population is and will remain the great commercial and shipping center. It has one of the finest harbors on the Pacific, and is completing a system of concrete docks, with the most modern system of cranes for loading and discharging cargoes. Alongside these docks there is at all times 10 feet of water, thus enabling boats of any draft to dock.

The people of Auckland are very friendly toward Americans and are enterprising and wide-awake to com-

mercial opportunities. With better steamship facilities between New Zealand ports and the United States and a corresponding effort by American salesmen, this country's purchase of American goods would increase at least 50 per cent.

The leading articles that have been coming from other sources, now cut off from New Zealand, are bicycles, motor vehicles, and materials for motor vehicles, draperies, drugs and chemicals, bottles and other glassware, hardware, musical instruments, machinery, clover seed, fancy goods, toys and dolls, wire fencing, stationery, wines, and porcelain.

#### LOCAL FIRM GETS GOVERNMENT CONTRACT.

**Petaluma Foundry of Petaluma Will Be Awarded Contract For Making Shells.**

PETALUMA, Sonoma Co., Cal.—According to latest reports received here the Petaluma Foundry has been awarded the contract to furnish shells for the war ships at Mare Island on their bid of \$12,000. H. T. Edwards is manager of the company.

#### CALIFORNIA FIRST IN PRODUCTION OF GOLD.

WASHINGTON, October 15, 1914—Gold production in the United States in 1913 amounted to 4,295,784 fine ounces valued at \$88,884,100, according to statistics compiled by the Geological Survey and the Mint Bureau. The silver production amounted to 66,801,500 fine ounces, valued at \$10,348,100. The gold production was \$1,500,000 less than in 1912, and silver nearly 3,500,000 ounces less for the same period.

California was first in gold production, with 979,171 ounces; Colorado, second, with 876,057 ounces, and Alaska third, with 735,361 ounces. Nevada led in silver production, with 15,657,400 ounces; Montana was second, with 12,540,000 ounces, and Utah third, with 11,282,300.

It requires some 17,000 clerks to man the 3,100 railroad post offices in the United States.

#### NEVADA TO BUILD HOME FOR INDIANS.

RENO, Nevada, Oct. 19.—Advertisements are being published for bids for a frame hospital for Indians at Carson City. The plans are to be submitted to Superintendent J. B. Mortisoff of the school. Special Agent Ashbury says that the Carson City hospital was recommended by Mr. Murphy of the health department of Riverside, Cal. It is provided for by a \$100,000 fund from which hospitals for tuberculosis among Indians are to be built. The site of the hospital has not been chosen, but it will probably be on the west side of the school.

#### TELESCOPES AND FOREST FIRES.

Forest officers have found that high power telescopes are not always satisfactory in fire lookout work. In some localities heat vibrations in the atmosphere are so magnified by the glasses that clearer vision can be had with the unaided eyes.

## FAST ELECTRIC TRAINS TO Sacramento

LEAVE KEY ROUTE FERRY.

Leave	Daily except as noted.
7:00 A	Sacramento, Pittsburg, Bay Point.

**OAKLAND, ANTIOCH & EASTERN RAILWAY**  
Key Route Ferry, Phone Sufter 2373  
Red Line Trans. Co., S. F. People's Expd. Co., Okd.

There are forty-eight propositions on the ballot to be voted on this fall. The Prohibition Amendment, the referendum on the Blue Sky Law and the Red Light Abatement Act, and the Initiative proposition for the universal eight hour law are four out of the number.

This long array of propositions will necessitate a study of the ballot by every voter. And unless the voter has unusual opportunities of investigation the chances are that he will vote against those that he knows nothing about.

The opportunity for direct legislation always gives an opportunity for reformers to get busy and the result is usually a great lot of proposed reforms. These may be overdone on the outset, but at least the people begin to think and that is the first requisite of free government.

The average rate of State Insurance of employers under the Workmen's Compensation Act in California does not exceed one per cent. While it is higher in the building trades than in some other occupations it is not such a burden that its benefits do not far outweigh its costs. The long litigation of damage cases is at an end. The costly expense of court procedure is disposed with and the merits of cases are decided by a commission sitting as a court that is trained in the class of cases that it adjusts and is untrammelled by the technicalities of the law.

The meanest thing about all the fabrications daily circulated against Hiram W. Johnson is that when they are shown to be lies and known to be lies by the newspaper manufacturers thereof, not one of them ever has had the manhood or the decency to retract. Not one of them has had the manhood or the decency even to permit the side tied about to have a statement printed in its columns refuting any such falsehoods.—Sacramento Bee.

An attachment by which any camera can be used to enlarge negatives has been patented.

**AUSTRALIAN TRADE NOTES.**

[Press excerpts from Consul General John P. Bray, Sydney.]

**Dock Extension.**

A contract has been let for the extension of Woolwick Dock, Sydney, in order that two vessels of 7,000 tons may be docked at one time.

**Pumping Engines—Bucket Dredge.**

Pumping engines at the Parramatta sewerage works are being successfully run by sewer-gas power. The new power is more effective than coal gas, and is considerably less expensive.

A steel bucket dredge, to be used by the Commonwealth Naval Branch of the Defence Department in the work of developing naval bases, was launched from Pools & Steel's yards at Balmain. The dredge, which has a dredging capacity of 900 tons per hour, is fitted with 31 steel buckets, and measures 151 feet over all. It is 32½ feet in breadth, 12 feet in depth, and when in working order will have a displacement of 750 tons.

**NEW LIBRARY OF CATALOGUES FOR CANAL ZONE.**

[Consul General Alban G. Snyder, Panama City.]

The Panama Canal Government is to establish a reference library in the new administration building at Balboa, Canal Zone, containing books and catalogues of use to employees in their work.

In addition to books of general engineering interest and American and foreign technical magazines, a collection is to be made of catalogues from manufacturers and distributors of goods used in the canal work. Manufacturers and distributors who think there may be use for their goods, are requested to send catalogues in duplicate to the Panama Canal Library, Balboa Heights, Canal Zone.

**PILEMEN NEEDED ON STATE HARBOR COMMISSION.**

The California State Civil Service Commission announces that applications for employment as Pilemen in connection with the State Board of Harbor Commissioners in San Francisco will be received at the office of the Commission, State Capitol, Sacramento. Harbin consulate reports market there for electrical, dental, medical, ramento, on or before October 31, 1914. The salary is \$5.00 per day. There are now several vacancies to be filled.

Further information and application blanks may be secured from the State Civil Service Commission, State Capitol, Sacramento. Applications must be properly executed and filed with the Commission on or before October 31, in order to be considered for this examination.

**SPECIAL OPENINGS FOR COMMERCE**

[Cablegrams from Consuls.]

**Shanghai, China.**—The consulate at Antung reports trade controlled through Japan and Shanghai; there is possible increase for sale of piece goods, flour; market desired for wild and photographic supplies, paper, shoes, drugs, bags, tin, galvanized iron. Newchwang consulate reports possible markets are practically same

as Shanghai, adding goat and horse hair and dog mats to exports.

**MERCHANDISE NEEDED IN PANAMA**

[Consul Wm. H. Gale, Colon, Sept. 11.]

The Canal Record, issued by the Panama Canal authorities, makes a statement concerning the effects of the European war on the prices of commodities.

The statement in part reads:

The supply of glassware and china from Europe will be shut off, and there will be some difficulty in obtaining shipments from England. The commissary has on hand a large supply of glassware, and a fair supply of ordinary kitchen and tableware. Arrangements are being made to replace the aluminum cooking utensils, formerly purchased abroad, with stock from the United States.

The conditions in the commissary, as described in the Canal Record, reflect to a large extent the conditions in the general market in this district. Hence the articles mentioned above will also be in larger demand in the Republic of Panama. In this connection a list of the principal dealers in these articles is forwarded (and may be had from the Bureau of Foreign and Domestic Commerce and its branches.) San Francisco branch, 310 United States Customhouse; Seattle, 1207 Alaska Building.

**CHILE WILL PURCHASE VESSELS.**

[Telegram from American Minister Henry P. Fletcher, Santiago.]

The Chilean Government intends to purchase several vessels on the west coast, now sailing under other flags, in order that they may be used to move nitrate to the United States and bring back coal and other merchandise. This presents an unusual opportunity for the extension of American trade.

**FLUORSPAR DEPOSITS AMPLE.****Cutting Off of European Supply Would Benefit Rather than Hurt American Industries.**

There can be no question of the adequacy of the American supply of fluorspar to meet all demands in case the English supply is cut off.

The fluorspar industry of the United States has shown a steady growth from a production of 4,000 short tons in 1884 to 115,580 tons, valued at \$736,286, in 1913. This notable gain has been conditioned largely by the growth of the open-hearth process of steel manufacture, which absorbs about 80 per cent of the fluorspar produced. Fluorspar is used also as a flux in blast furnaces, iron foundries, and silver, copper, and lead smelters; in the manufacture of fluorides of iron and manganese for steel fluxing; in the manufacture of glass, enamel, and sanitary ware and of hydrofluoric acid; in the production of aluminum; in the electrolytic refining of antimony and lead; and for many other purposes.

The increase in the home production and the imposition of a tariff on fluorspar in 1909 have resulted in a marked decrease in the amount brought in from foreign countries, and in 1913 only 22,682 short tons was imported, compared with the 115,580 tons produced at home. The imports came almost entirely from Great Britain and

amount to over 75 per cent of the total English production of this mineral. The English product entering at New York is able to compete with domestic "spar" as far west as Pittsburgh.

In 1913 the American output came from Illinois, Kentucky, New Mexico, Colorado, New Hampshire, and Arizona, named in the order of yield. Furthermore, the foreign spar is of lower grade than the mechanically treated spar from Illinois and Kentucky, and as fluorspar is of value chiefly according to its purity, purchasers find that the purer American spar is more efficient and consequently cheaper in the end.

**BUCKE ON UNCONTROLLED POWER**

Few arguments for popular control of all branches of government are stronger than those contained in Edmund Burke's "The Present Discontents," written in 1770. Burke's arguments, directed then against crown ministers who were not dependent upon public approval and against a House of Commons that dangled likewise from the crown, read today as if they had been written by Theodore Roosevelt, warning against a lawmaking judiciary independent of public approval.

"The whole of their usurpation," wrote Burke, "is established upon this method of arguing: We do not make laws. No: we do not contend for this power. We only declare law; and as we are a tribunal both competent and supreme, what we declare to be law becomes law, although it should not have been so before. Thus the circumstance of having no appeal from their jurisdiction is made to imply that they have no rule in the exercise of it—the judgment does not derive its validity from its conformity to the law; but preposterously the law is made to attend on the judgment."

That was written of the House of Commons, the judges of England neither then nor now pretending to the power of controlling legislation. With us that stricture of Burke applies to the judicial department of government, which does assume that power, and which, although it does proclaim a rule for its judgments, finds that rule in its own interpretations, and frequently its changing interpretations, of the constitution. Burke's insistence was that there should be no person in the government who do not depend on the affection or opinion of the people for their political being.

Against an argument equivalent to the one that irresponsible courts are better qualified to pass on the constitution and on public policies than are the people themselves, Burke said, "Until I find something in this argument differing from that on which every mode of despotism has been defended, I shall not be inclined to pay it any great compliment." Kansas City Star.

Ostriches and alligators are raised in incubators in South Africa.

One factory in Ohio uses 10,000,000 feet of poplar and oak lumber annually, producing 700,000 bungs a year.

## CONSTRUCTION WORK ABROAD.

## CANADA.

[Consul General R. E. Mansfield, Vancouver, British Columbia.]

## Survey of Peace River &amp; Athabasca Line.

Survey work along the proposed Peace River & Athabasca Railway will be completed this autumn. The route, which includes various waterways, rivers, and lakes, electric and steam roads, aggregating many hundreds of miles, will open up resourceful sections of country, especially in British Columbia.

## Electrification of Lengthy Tunnel.

The 5½-mile double-track Canadian Pacific tunnel through the Selkirk Mountains, which will be the longest in the Western Hemisphere, is to be electrified. This tunnel will shorten the main line by 6 miles, will eliminate 5½ miles of snowsheds, reduce the peak of grade 5½ feet, and do away with all but 6 miles of 2.2 per cent grade. On its entire system of more than 12,000 miles in Canada it will have but a dozen miles of 2.2 gradient. The latest systems of electrification are to be used in operating the trains through this tunnel.

## Grand Trunk Pacific Branch Lines.

When the Canadian Government entered into an agreement with the Grand Trunk Pacific Railway for its construction across the continent, the necessity of branch feeder lines was considered, and in 1906 the subsidiary Grand Trunk Pacific Branch Lines, capital \$50,000,000, was organized to build a total of 7,500 miles of such lines through fertile adjacent country. About 1,200 miles of the subsidiary lines west of Winnipeg have been completed, and arrangements have been made between the various provincial governments and the railways for early construction of many hundreds of miles of additional branch lines, including a north and south road in British Columbia, which will have its terminus at Vancouver, connecting with the main line farther north. The Grand Trunk Pacific has erected along its route several hundred elevators. It also has a chain of hotels and terminals at various points nearing completion.

## Pacific Great Eastern.

The Pacific Great Eastern Railway has been completed from Dundarave to Horseshoe, British Columbia, and is running a regular schedule of electric trains from North Vancouver to Horseshoe Bay on Howe Sound. Sufficient steel has been delivered along the route for the completion of 500 miles of road on the Pacific Great Eastern. Active construction work is in progress on the line south of Fort George and north of Clinton, and a considerable portion of the road connecting Vancouver with the main line of the Grand Trunk Pacific at Fort George will be completed.

## CHINA.

[Consul Albert W. Pontius, Newchwang, Aug. 31.]

## Conservancy of the Liao River.

Although it is likely that little will be done at present in carrying out the Liao River conservancy scheme (described in Daily Consular and Trade Report for April 23, 1914), owing to

the general outbreak of war in Europe, this consulate will report on developments as they occur. The local consuls of foreign countries are now informed that the Foreign, Japanese, and Chinese Chambers of Commerce have elected their representatives, who, in accordance with the agreement, automatically become members of the Conservancy Board. The completion of the executive committee rests with the consular body.

[Vice Consul Crawford M. Bishop, Harbin, July 31.]

## Municipal Construction Work at Harbin

The Town Council of Harbin proposes to make a long-term loan of \$1,720,500 for carrying out the following undertakings: Construction of waterworks and canals, an electric street car system, electric lighting system for the municipality, construction of a telephone line, construction of a municipal administration building, school building, hospital, veterinary hospital, a fire department, a refrigerating plant, stock yard, public park, and the reconstruction of the summer theatre.

The following are the estimated amounts required: Electric tramway system and electric lighting plant, \$668,750; city telephone, \$125,000; market in the new town, \$95,000; town schools, \$167,000; municipal administration buildings, \$85,500; repairing the river bank, \$15,000; sanitation yard, \$5,000; municipal hospital, \$91,500; veterinary hospital, \$20,000; fire department, premises for, \$48,000; establishment of a new fire department, \$20,000; fire alarms, \$7,500. To this amount must be added: Municipal debts, \$150,000; loss of interest during construction, \$150,000; other constructions, \$50,000.

Taking into consideration the loss by exchange, about \$252,000, or 13 per cent, the amount of the loan required will be \$1,970,000. The town council has received an offer from Gardin, Weg & Co., a banking house, whose proposal is to furnish \$1,520,000 for 50 years, at 5 per cent interest, the issue being at 87½; the entire amount of the loan to be paid at one time, or 87 per cent to be paid in installments covering a period not longer than 18 months. The security for the loan is the guaranty of the Chinese Eastern Railway, to be approved by the Russian Minister of Finance.

## ECTADOR.

[Consul General Frederic W. Goding, Guayaquil, Aug. 13.]

## Railway and Wharf Construction.

Details are now available of the contract signed between the Ecuadorian Government and Mr. Pablo Gonzalez which was mentioned in Daily Consular and Trade Reports for July 17, 1914 for constructing a mole at Manta and for the extension of the Manta-Santa Ana railway to Puyo or beyond, via Jipijapa.

The railway is to be 2½ foot gauge, the rails not less than 36 pounds, to be 3½ ft. the sleepers to be of hard wood, hewn on two sides, and not less than 26 to the rail of 62 feet. The bridges, viaducts, and drains are to be constructed of iron, steel, or concrete. The rolling stock to be approved by the government and provided with Westinghouse air brakes. Telegraph and telephone lines are to be erected, and

repair shops and water tanks to be provided.

The mole at Manta is to be 1,175 feet in length, constructed of reinforced concrete, covered with 3-inch plar hardwood. A double railway track, steam crane of 3 tons capacity, a malleable building, cables, chains, etc., are to be provided.

The railway extension and mole must be begun within six months and finished within three years from date of contract. The Government guarantees at 6 per cent per annum, with per cent amortization, during 33 years on the principal of £220,000 (\$1,070,520).

(A complete translated copy of the contract may be seen on application to the Bureau of Foreign and Domestic Commerce, Washington.)

## PHILIPPINES.

[J. F. Boomer, correspondent, Manila.]

## Cinematograph Theatre—Railway Extension.

A new modern cinematograph building will shortly be erected in Manila on the site of the old Majestic Theatre which burned some years ago. A construction permit has been granted.

The Manila Railroad Co. has just opened a new branch line between the municipalities of Santa Ana and Arayat, in the Province of Pampanga. The railway runs through a rich agricultural district devoted largely to sugarcane. Heretofore the crops of this region have been transported to market with great difficulty and expense. The new line should greatly enhance the wealth of the Province, as increased production always follows better facilities for marketing in such regions of the Philippines.

## Waterworks and Electric Light Plant.

Construction has been started in the municipality of Vigan, in Ilocos Sur, on a new water system and a new electric lighting plant. The waterworks plant is to be the property of the municipality, which is constructing it, while the electric lighting plant is to be privately owned and represents principally Filipino investments. It is expected that both plants will be opened by December.

## INCORPORATIONS.

Film Exchange Board of Trade of San Francisco. To advance, and improve the motion picture business. Capital Stock, none. 5 directors. Place of business, San Francisco.

"Vancouver Milling and Grain Co. Limited." Cert. Copy. Business of millers, manufacturers and warehousemen. Capital Stock, \$100,000; 100 shares at \$100 each; amount subscribed, \$500. Place of business, Vancouver, B. C. 5 directors.

The General Fireproofing Company. Cert. Copy. Amending articles and increasing. Capital Stock, \$1,000,000; 10,000 shares at \$100 each; amount subscribed, \$500,000. Place of business, Youngstown, Ohio. 5 directors.

Paradise Grove Steamship and Amusement Company. To deal in real estate, boats, vessels and steamers. Capital Stock, \$250,000; 250,000 shares at \$1 each. Amount subscribed, \$5. Place of business, San Francisco. 5 directors.

Max Bakar Realty Co. To deal in real estate. Capital Stock, \$25,000; 500 shares at \$100 each; amount subscribed, \$500. Place of business, San Francisco. Directors—Max Bakar, 1 share; Edward Seaby and R. Bakar, 1 share each.

## Editorial Comment.

The Fresno Republican dissenes the big howl of the Chronicle about the expense bill of the present administration. And concerning the itemized bill and the objections thereto as published prints the following editorial:

Board of Control.....	\$182,760
Industrial Accident .....	373,070
Mother's Pension .....	3,600
Industrial Welfare .....	30,000
Immigration and Housing.....	50,000
Rural Credits .....	3,000
Viticultural .....	15,000
Weights and Measures.....	12,000
Civil Service .....	50,000
Water Board .....	50,000
Commissioner of Corporations.....	10,000
San Jose Harbor.....	2,500
Legislative Reference Bureau.....	20,000
Smelter Commission .....	5,600

Total .....

It will be noticed that nearly all of these commissions are unsalaried and have only minor appropriations for incidental expenses, and that very much the largest of these appropriations is the \$375,000 for the industrial accident commission, most of which is a revolving fund for the state insurance department under the workmen's compensation act, which will not have to be appropriated again, since that department, once established, is more than self-sustaining.

The Chronicle also calls attention to the fact that there is an increase in the appropriations for the support of the following commissions already in existence: State board of education, state board of health, railroad commission, board of equalization, board of forestry, state dairy bureau, bureau of labor statistics, commission of horticulture, state mining bureau, and the state agriculture society.

Most of these increases have been merely proportionate to the growth of the state. The only very large increase are in the railroad commission, which cost \$50,000 in 1909, and \$268,600 in 1913, and the state board of education which cost \$16,000, or mere traveling expenses for its then ex-officio members in 1909, and will cost \$61,000 for the new revolutionized educational department of 1913-1914.

The Chronicle merely presents these figures and shrieks. For some time Candidate Fredericks presented the same figures with the same shriek. But up and down the state Governor Johnson challenged Captain Fredericks to say which of these commissions he would, if governor, abolish, or which of them he would restrict in its activities by curtailing its cost. Fredericks wriggled and caved, and finally surrendered by acknowledging that he would not abolish or curtail any of them. The Republican platform, on

which Captain Fredericks is running, made the same surrender.

Now let the same challenge be addressed to the San Francisco Chronicle. Which of these commissions would the Chronicle abolish or curtail? Would it abolish the board of control, which has saved the state of California at least \$20 for every \$1 it has spent? Would it abolish the industrial accident commission and the workmen's compensation act? Would it in fact abolish any commission on its list of new commissions? And would it rather have the railroad commission of the present time, with its 1913 appropriation of over \$300,000 or the railroad commission of 1909, with its petty \$50,000? For the \$50,000 of the railroad commission of 1909 the state of California received in return a great deal less than nothing; for the railroad commission of 1913, the state of California received a new courage, a new freedom, a new self-respect, and \$6,500,000 a year cash savings. The railroad commission of 1913, then, shows a profit of \$6,320,000 with the spiritual benefit of self-respect and civic freedom thrown in for good measure. The railroad commission of 1909 shows a loss of \$56,000, being the complete appropriation for its support.

Once more, let the Chronicle say to which of these commissions it objects.

It will not. Actually it does object to the most useful and the most important of them, but it does not dare say so. It simply shrieks, assuming that the people are stupid enough to be deceived by the noise.

On October 21st, 1879, Thomas A. Edison produced the first electric light. That was the revolution of artificial lighting. And it brings attention to his marvelous career. Here is a man that has given more to the world than all the kings of Europe combined. A man that has wrested the secrets from nature, harnessed her forces and made them do the work of man, ameliorated human conditions and added to the sum total of human happiness. And for his reward he has the sublime satisfaction that comes from work well done, a grasp of the sublime laws of nature which compared to the strutting pomp of the crowned heads is as the contemplations of a philosopher are to the dance of a cannibal chief in the African jungle.

Edison has had a remarkable career. Not having attended schools he has yet been a student all his life. Being a practical inventor he nevertheless knows his subjects in theory as well as the academician and more is no hold of human knowledge with which he is not acquainted. Personally considered he has probably contributed more to human progress than any other living man.

## The Generation Of Power.

The Available Sources of Energy in Nature.

By Professor R. P. Clarkson.

Force is that which will do work. It is a push or a pull producing either strain or motion in material or ethereal media. We are most familiar with it in the form of muscular force, yet readily we realize that other forces exist. The force of gravitation which acts between all bodies, magnetic force which draws a nail to the magnet; chemical force, so-called, which attracts and holds atoms of different substances together; the force of the wind; the force of the tides; all these and many others are familiar to us. Back of all force there must be energy. There must be a capacity to do work, an ability to exert force through a distance. It is the vital thing in nature. All the universe is either matter or energy.

In nature energy takes many forms, just as the forces exerted are of multitudinous variety. Usually we recognize it by what it accomplishes, and that which is most readily observed is energy which may be employed directly in doing mechanical work, that is, in exerting a force through a distance. All energy in nature is not thus available. Some is diffuse or useless for the direct purpose of work. Thus we have the principle of the dissipation of energy formulated by Lord Kelvin in 1852, which states that in a system removed from communication with anything outside of itself, the whole amount of energy possessed will of its own accord tend to undergo such transformations as will diminish its availability. The total amount of energy in such a system will remain constant in accordance with the principle of the conservation of energy. By no means yet discovered can we evade that law, yet the extent to which we are affected by the law of dissipation depends entirely upon the crudity of our apparatus or machinery. If we throw a string over a peg projecting from a wall, a weight attached to one end falling through a distance of  $n$  feet will raise a nearly equal weight attached to the other end through the same distance  $n$  feet. The smoother the peg and string are made, the nearer equal will the two weights be, and the less will the amount of energy dissipated by friction into the form of heat energy. By proper modification of this apparatus the whole of the energy released by the falling weight may be converted into heat energy. In fact that is nearly the case with any freely falling body. The energy possessed by the body before falling is due to its position. It is potential energy. This, as the body falls, becomes changed gradually into kinetic energy or energy of motion so that at the instant before the body strikes the ground the total potential energy it possessed when at rest at a height is now possessed by it as kinetic energy, excepting such small portion as has been dissipated by friction with the surrounding air. Let the body now strike the ground. By reason of the slight energy dissipated, and the total kinetic energy possessed will be

degraded to the form of heat energy, i. e., kinetic energy of the molecules.

We say that this last change of energy is a degradation from a higher form into a lower. Thus the entire mechanical energy of any system may be degraded into heat energy, but we cannot utilize the entire amount of heat energy in doing mechanical work except by a compensating degradation of energy elsewhere. Heat energy is perhaps the lowest form of energy, and it is into this that the other forms are gradually being dissipated.

The availability of the forms of energy in nature depends upon how observable and controllable the individual units possessing the energy may be. In the case of mechanical energy the energy exerting unit may be a weight of large dimensions easily directed. In the case of heat energy we deal with only a tiny seed of energy, the individual molecule about whose position or motion we know practically nothing as yet and over which we have and can exert no direct control. We cannot, therefore, obtain from the energy of the molecule the greatest possible result. We can merely make conditions as favorable as our sphere of observation and intelligence will allow, being happy with such results as we may be able to obtain. The classification of energy is thus rather the classification of the fitness of our faculties with regard to the form of energy in question.

Energy must be either potential or kinetic in whatever form it may be found. If potential, it is due to the position or configuration of the system in which it is observed. Perhaps it is the potential energy possessed by a boulder balanced on the edge of a cliff ready to fall to the valley below and do work in crushing down a hut, a tree or perchance digging for itself a grave in the earth. Perhaps the potential energy is that of dynamite or gunpowder needing but a jar or a spark to release it, it lies dormant until conditions are adjusted and it may exert itself.

Kinetic energy is of another kind. It is energy of motion, energy which a body possesses solely by virtue of that motion. Such is the energy of the wind which turns the sails of the farmer's mill, the ceaseless energy of the waves which may be made to operate the small water motor, the energy of the steam expanding against the piston, the energy of the swiftly running stream or the water in which operates an hydraulic engine.

Changes from potential to kinetic energy and vice versa occur continually even in the same form. For example, the energy of a falling body as described above is first potential due to its position with relation to the earth and then changes to kinetic as the body gains its velocity. A portion of the potential energy possessed by a steam chimney is first in the form of heat energy and then, by conduction and convection, the energy becomes degraded to the elements are oxygen and

hydrogen in the proportion of eight pounds of the former to one pound of the latter, nine pounds of water are formed and the energy released at the moment of combination is greater than that dissipated when a weight of a thousand tons falls from a height of twenty feet against the earth. The energy locked up in this manner throughout the earth is enormous. The energy of the fuel that we burn is of this nature, combustion being but a rapid chemical union between oxygen and certain carbon constituents of the fuel.

Our question is, whence comes this energy? The answer is that practically all the energy of the earth, so far as we can ascertain, is due directly or indirectly to one of two great sources: (1) the energy of the solar rays, (2) the energy of the motions of the earth, moon and sun together with the energy of gravitation which exists between them.

The carbon fuel which we consume beneath the boiler owes its energy to the sun's rays. Coal is but the decayed vegetation of many ages past and the carbon of that vegetation was obtained in the same way as plants now obtain it. Plants do not create energy. They direct the energy of the solar rays in such a manner as to separate the carbon and the oxygen which exist together in the atmosphere as carbonic acid gas, the gas given off during all processes of respiration, combustion and putrefaction. The plant then takes up the carbon and ages afterwards we may be burning it as fuel. The oxygen is largely returned to the air. In like manner the animals which toil for us owe their energy to the sun's rays, for their food is entirely vegetation. The winds of the air are due to the warmth communicated to the air by the rays of the sun at certain places, this warmth being heat energy or kinetic energy of the vibrating molecules. The warm air rises and colder air rushes in to take its place, thus forming surface breezes. Falling water owes its energy to the sun, having been evaporated from the ocean, condensed in clouds and having fallen on the hill-sides and on the mountain tops whence it rushes down again to the sea.

Every reason leads us to believe that our own energy, the energy of the human being, is derived from the energy of the chemical combustions which occur in respiration, particularly the combination of the carbon furnished to the blood by our food with the oxygen of the air. This again we may trace to the energy of the solar rays, for all our food is either vegetable or meat from animals which live on plant life and practically the equivalent of the oxygen used by animal life is given off by plants when they absorb their carbon.

The enormous energy of the tides is largely derived from the rotation of the earth coupled with the gravitational action of the sun and the moon on

the earth. That it can be harnessed and utilized has been proved, but the area required and the initial expense involved restrict such tidal water-power plants to those where only small amounts of power are required.

We have now spoken of two great sub-classes of energy storage both of which are readily available and constantly in use for the promotion of man's happiness. They are included under the heading of (1) combustibles such as fuel and foodstuffs and (2) great natural bodies as wind, running and falling water, and the tides. There are perhaps four more such sub-classes, (3) the energy of the earth's motion, (4) the internal heat of the earth, (5) the sun's rays themselves and (6) atomic energy of radioactive substances. These four classes include, to a great extent, energy storage of latent possibilities that has not been tapped to any extent for man's service.

It is of interest to us to observe the enormousness of the energy of motion of the earth, although realizing the impossibility of benefiting by it. It is to be compared to an immense flywheel whirling through space about its own axis and about the sun also. Its rotational energy is in the neighborhood of a hundred thousand million billion horsepower hours, while its orbital energy is about ten thousand times as much. Fleming has calculated that if some method were devised to slow down the speed of rotation so as to increase the length of a day by only five minutes, the energy released due to this slight decrease in speed would give us, if it were captured and stored, something over a billion horsepower continually for seventy thousand years.

The quantity of heat energy which is contained by the inner portions of the earth cannot be estimated with great accuracy. Whether or not it will ever be utilized at points where access to it may be gained as, for example, at volcanoes and boiling springs which reach to the earth's surface, is a question for the future. There seems to be a possibility of harnessing this source however remote the probability. As an available source of energy it must be recognized.

Utilization directly of the radiant heat from the sun has always been the dream of man. The heat delivered by the rays varies greatly with the locality depending upon the height above sea level, the latitude, the season and the condition of the atmosphere as regards cloudiness, fog and smoke or dust. On the average, however, the solar rays give up continually the equivalent of from 4,000 horsepower per acre at 20 degrees latitude and sea level to about 2,500 horsepower per acre at 45 degrees latitude and sea level. These figures are based on actual experimental observations. In some sections as high as 7,000 horsepower per acre has been observed under most favorable conditions. Even then the earth receives but one two thousand millionth part of all the energy sent out by the sun, that having been estimated at a value of more than five hundred million billion horsepower, equivalent to about 10,000 horsepower per square foot of the sun's surface. To equal this enormous output of heat energy would require the consumption of an amount

of coal every three minutes equal to the total coal supply of the United States lying within 3,000 feet of the surface.

Various devices have been tried and are still being investigated in the hope that this energy may be in part utilized. Small generating stations using low pressure steam evolved from water heated by means of focussed rays have been reasonably successful in many ways, yet it is a question whether, in most latitudes, the cultivation of combustible-producing crops would not furnish the most desirable utilization in spite of the fact that perhaps only one and one-half to two per cent of the sun's heat striking the land would thus be available. The most favorable calculations based on the steam plant operated by the sun's heat would indicate that not more than about five per cent of the sun's heat is utilized at the driving pulley.

The energy locked up in the atomic structures of merely the radioactive material we already know is certainly comparable with the total coal supply of the United States. The energy given out spontaneously by one pound of radium during its entire existence is equivalent to that produced by the combustion of about 136 tons of coal. If this energy could be controlled and utilized at will, the store would be truly valuable. There would be, in fact, enough energy from the visible supply of radioactive material to provide heat and power for all the countries of the globe for a period of about three centuries at the present rate of consuming coal and oil. While this is not enormous, it would suffice to allow a tremendous forest growth during that period. This supply of energy has not been touched. It has been suggested that it might be harnessed by the application of certain electric waves of the proper period to set the radioactive material into vibration so that the breaking down of the atom will take place rapidly, the energy released probably being immensely greater than that necessary to set the atomic structures into vibration of the desired sort. Intense study of this problem will be undertaken as necessity urges it and undoubtedly atomic energy may be counted as among those store heaps of the sun's energy set aside for the future.

Brief mention should be made of two more forms of energy, electricity and light, in order to make this discussion complete. Electricity can hardly be called even a secondary source of energy. In all large plants it is produced by the transformation of the mechanical energy of some prime mover as a steam or gas engine or a water wheel of some kind. In small amounts it is generated by means of batteries, either chemical or thermoelectric. If chemical, some chemical "fuel" such as zinc must be consumed. Of course, coal must have been used previously in the reduction of zinc from its ores before the metal can be used over again to give up energy by recombining with the electrolyte of the battery. Thus coal is largely, if not entirely, the source of energy of the electric battery of this type. If a thermoelectric battery is employed some fuel must be used to create the necessary heat for the operation of the battery. Hence, in either case, we may look ultimately to

the sun as the primary source of electric energy.

Light as a source of energy can probably be of service only in one way, that is by means of the pressure it exerts. The possibility of being able to make use of that mechanically is extremely slight because it is but a tiny amount at best. Crooks found experimentally (December 13, 1875) that this pressure under atmospheric conditions of thin clouds and haze in the latitude of England amounted to 2.5 tons per square mile. He estimated that for a mid-summer sun in a cloudless sky fifty-seven tons per square mile was a reasonably accurate figure. Maxwell in his "Electricity and Magnetism" (1873) had previously stated that the mean pressure per square foot exerted by sunlight is  $6,000,000,000,000,000,000$  of a pound weight. This gives the average pressure equal to about 2.17 pounds per square mile. More recent investigations, however, show that the earth carries a light load of about 75,000 tons, equivalent to only 1.6 pounds per square mile, an amount absolutely negligible for power purposes.

With these stores of energy at hand, if not all at our immediate command at present, who will venture to predict the future of power generation? That a post-fuel age may come is entirely possible, but that a post-energy era will ever find birth is as far beyond the realm of the imagination as anything can possibly be. In accessible and seemingly inaccessible forms energy surrounds us everywhere. Activity in plant, animal and human life alike is merely the transformation of energy. Even the movements of inanimate things, the flow of water, the falling of the rain, the whirl of the winds, the swish of meteors and the calm onward rolling of the planets are all but changes of energy from one form into another and ever remind us of that almost inexhaustible supply pouring out upon us from the sun.

#### PROCEDURE OF FEDERAL BUILDING CONSTRUCTION.

Relation of Site and Building Authorizations and Present Status of the Office.

G. Wenderoth, Supervising Architect, Washington.

Many requests are received for the immediate preparation of plans, etc., for particular Federal buildings which have been authorized by existing legislation, irrespective of the date of such authorization. The following statement of the present status of public building work is issued for the information of all concerned.

Beginning with 1902 it has been the policy of Congress to authorize public buildings by what are known as "omnibus" acts, each act including a great many separate projects. In addition, special acts are passed from time to time, providing for individual projects, increases in the limits of cost of projects previously authorized, etc. The "omnibus" act of 1906 was followed by similar acts in 1907, 1909, 1910 and 1913.

It is the present policy to place under contract for construction all buildings, or extensions to buildings, authorized in one "omnibus" act before beginning plans for projects author-

ized by a subsequent act. It is also the present practice to prepare the plans for all buildings, or projects, authorized in any given act in the order of the dates upon which the titles to the sites therefor were vested in the United States.

To determine the precise order in which the plans for the various buildings shall receive attention the following procedure is followed: The buildings authorized in any one act are first divided into groups according to the priority of the acts in which their sites were authorized. All buildings in each such act-group are further arranged in the order of the dates of the acquisition of their sites, the earliest date first. For instance, the 1913 act authorizes buildings upon sites which had been authorized in the act of 1908, in the act of 1910, and in the act of 1911. It is intended that the buildings so authorized in 1913 to be erected upon sites authorized in 1908 shall first be placed under contract. These will be followed by buildings authorized in 1913 to be constructed upon sites authorized in 1910. Then the buildings authorized in 1913 to be built upon sites also authorized in 1913 will take their respective turns for attention.

Extensions are usually authorized to be erected upon land already owned by the United States. While extension projects are included with the buildings authorized in a particular act, discretion is exercised in determining the order in which extensions shall be placed under contract for construction, depending upon the urgency of the need for the improvement.

The output of plans by the supervising architect's office is governed by the extent of the technical force (designers, draftsmen, computers, superintendents, etc.) which the appropriations given by Congress permit the department to employ.

At this date the office of the supervising architect has on its books, waiting to be placed under contract, approximately \$38,500,000 worth of authorizations for new buildings and extensions, exclusive of the value of the land. This includes the new buildings and extensions in the act of 1913. This office is placing buildings and extensions under contract at the rate of about seven million dollars annually, so that at the present rate of progress the last of the buildings authorized in the act of 1913 will not have been placed under contract until about the beginning of the calendar year 1920. It will not be until after the latter date that it will be possible for the supervising architect to place under contract any buildings contained in any acts, or acts, which may be passed in the near future.

The current program, made up of the remaining projects which were authorized prior to the 1913 act, includes about one year's work from this date. Work upon the plans for buildings authorized in the act of 1913 will therefore not commence until about July 1, 1915. The 1913 act contains the following authorizations: New buildings, 204 extensions to existing buildings, 23, or a total of 227 erect.

The program of work contained in the act of 1913 has not been laid out as yet. Therefore it is impossible to state exactly approximately how long when any building authorized in that

act will be either authorized for bids or placed under contract.

If a subsequent act increases the limit of cost, or otherwise modifies prior legislation for a building or extension, before that project is reached in turn, the position of the project in the program of work is not affected thereby. If a project is set aside when its turn is reached in order to await action upon a proposed increase in the limit of cost, or for any other reason, it is taken up whenever "released," in as near its original position as the condition of the work, generally, may render possible.

No consideration can be given to suggestions that any one project is entitled to any more consideration than another, and requests that buildings be advanced out of their turn must be uniformly declined.

For the information of those not familiar with legislative terminology, it may be stated that an "authorization" is, as it implies, merely authority to acquire a site, erect a building, etc., within the limit of cost stated, and is not an actual "appropriation" of money out of the treasury. Appropriations are made by Congress on the basis of estimates submitted by the Secretary of the Treasury. These appropriations are carried in one or the other of the annual supply acts and are intended to be only sufficient to carry forward the building program for the fiscal year to which the acts apply. "Appropriations" are made on account of the limits of cost fixed by the "authorizations" and are not extensions of these limits. All appropriations for sites, buildings, extensions, etc., are available until expended, unless repealed by act of Congress, and are not automatically returned to the treasury if not expended before the expiration of the fiscal year.

The Public Buildings Act of 1912 authorized the Treasury Department to acquire sites, erect buildings, construct extensions, etc., aggregating a total cost of nearly \$12,000,000, but did not actually appropriate one cent toward the consummation of any one of these projects.

### CONSTRUCTION WORK ABROAD.

[Consul Abraham E. Smith, Victoria, British Columbia.]

#### Sewer Contract—Road Construction.

A contract has been let for the Equivalant sewer to Hugh Macdonald, for \$15,000. During 20 days in September 17 building permits were issued for small dwelling houses.

The council of the Spanish municipality, adjacent to Victoria, has passed a by law for the expenditure of \$82,000 for paying the district's main roads and the installation of a first class water distribution system. The paying will require about \$15,000 from the municipality, and the provincial government will give an additional amount of \$67,000. The works involve an expenditure of about \$1,000. This community expects to build a school at a cost of \$5,000.

#### CHILE.

[Review of the Labor Plata, the newspaper of the presumably Chilean community, 8, in which in paper of October 24, 1914, stated that the Chilean government had decided to build a school at a cost of \$5,000.]

Coal-Mining Extension, Provision Shops. The Atlantic Coast, the coast of Chile.

dustries have been in consultation as to the best measures to adopt for increasing the national output of coal. [Coal-mining development necessitates the purchase of construction materials and mining machinery.]

#### Railway Construction.

The Chamber of Deputies has approved projects of law authorizing the immediate execution of the following public works: Railway construction to the value of \$1,000,000; tunneling and culverts on various sections of the State railways to the value of \$3,000,000. These works are being put in hand to provide occupation to the numerous laborers who are at present out of work owing to the dislocation of trade produced by the war.

The cost of repairing the Talca Railway is calculated at \$12,000,000, which is said to be almost equal to what a total reconstruction of the line would cost.

The Council of State has approved a message to Congress appropriating \$900,000 to the exploitation of the South Longitudinal Railway by the Government as from August 1, 1914.

### OVER SIXTY BLOCKS OF CITY STREETS TO BE IMPROVED.

#### Board of Public Works Requests Supervisors to Make Funds Available To Carry Out Street Contracts.

The Board of Public Works has requested the Supervisors that the sum of \$220,000 be made available for making street improvements on certain streets throughout the city and county.

There are approximately sixty blocks to be improved according to the report of the Works Board and which will cost in the neighborhood of \$220,000 to carry out the work.

The streets to be improved are as follows: Civic Center, 14 blocks; Fillmore street, 5 blocks; Third street, 5 blocks; Kentucky street, 21 blocks; Eleventh street, 5 blocks; Drumm street, 3 blocks; Belden Place, 1 block; Clay from Drumm to the Embarcadero; California, from Presidio Ave to Parker, and Union from Octavia to S'elmer street.

### BOARD OF PUBLIC WORKS AWARD CONTRACTS.

The following contracts have been let by the Board of Public Works: Electric work, Academic Building, Polytechnic High School, to the Rutte Eng. & Elec. Co., heating and ventilating same building to the Scott Company, furnishing and delivering tracks to the United Steel Products Co., furnishing and installing motor generator sets for the Fire Alarm Central Station to the Crocker-Wheeler Co., and for furnishing gasoline engine generators for the same building to the Fairbanks Morse Company.

Six thousand bushels of lodgepole pine seed are being collected this fall on the Arapahoe national forest, Colorado, for use in reforestation work next spring.

The Philippine bureau of forestry has recently invited bids for the cutting of nearly 30,000 acres of choice timberland on the public forests on the island of Luzon.

# ADVANCE NEWS

Classified according to Character of Work

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 3 and 4 story and base. Class A construction, \$160,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Marine View Terrace Community Co. Details of plans which will result in the construction of one of the finest apartment houses yet erected in San Francisco are now being worked out. The property on which the building is to be erected is located at the southeast corner of Green and Taylor streets, covering an entire fifty vara lot and commanding one of the finest views of the entire city and bay. The scheme is to be carried out on the community plan, each occupant owning his or her own apartments. The proposed building will be of fireproof construction with reinforced concrete walls, floors and roof, and soundproof partitions. All rooms will be outside rooms. Suites will consist of from five to nine rooms, and will include servants' quarters, room gardens and garage space. Interiors will be finished in pine and hardwoods with hardwood floors throughout. Bath rooms will be finished in tile and equipped with special fixtures. Marble and tile will be used in the entrances. Nearly all apartments will have private entrances, private roof gardens and balconies. Provision will be made for housing the heating and hot water equipment in a separate building. Open fire places will be installed in all apartments. Exterior of the building will be faced with cement plaster. Plans are being prepared.

**SAN FRANCISCO**—Apartment house, 5 story and base, reinforced concrete, \$35,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, A. Pome. The building will be erected on the south side of Turk street east of Polk, and has been designed to contain in the neighborhood of 35 suites of two and three rooms. Interiors will be finished in pine and hardwood veneer. All suites will have private bath rooms and wall beds. Plans provide for steam heat, a hot water supply and automatic elevator. Bath rooms will have tile wainscot and floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with cement plaster. Plans are complete and segregated figures are now being taken.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and steel, \$40,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Kieran & O'Brien. The building will be erected on the east side of Mason street south of Sutter, covering an area of 35 by 62½ feet. Interior will be arranged for a number of two room suites with private baths. Interior finish will be of pine and hardwoods. Hardwood floors will be used in the halls and living rooms. There will be steam heat, hot water supply, elevator service and a vacuum cleaning system. Tile wainscot and composition floors

will be used in the bath rooms. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

**BERKELEY, ALAMEDA CO., CAL.**—Apartment house and stores, 2 story and base. Class C construction, \$25,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owners, Burst Bros. The building will be erected on Adeline street near Harmon, having a frontage of 50 feet and a depth of 133 feet. There will seven stores on the first floor besides the entrance to the apartments. Ten suites of three rooms will occupy the upper floor. Interiors will be finished in pine and redwood. There will be steam heat and a hot water system. Private baths and wall beds are specified. Bath rooms will have tile wainscot and composition floors. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**PORTLAND, ORE.**—Apartment house, 2½ story and base, brick and concrete, \$30,000. Architects, Ellis F. Lawrence and William G. Holford, Chamber of Commerce Bldg., Portland. Owners, Metropolitan Investment Co. The building will be erected on 19th street near Washington, and will cover a considerable area. There will be eight apartments of six rooms, each apartment occupying a part of both the first and second floors. Separate entrances will be provided for each apartment. Interiors will be finished in pine, eastern oak, mahogany and white enamel. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be steam heat and open fire places. Mantels will be of tile. Tile wainscot and floors will be used in the bath rooms. Exterior of the building will be faced with pressed brick. Plans are being prepared.

## BATH HOUSES.

**SAN RAFAEL, MARIN CO., CAL.**—Bath house equipment. Cost not stated. Architect, Thomas O'Connor, San Rafael. Owners, City of San Rafael. Two bids were received at the last meeting of the City Council for furnishing the laundry and other equipment for the new Municipal Baths. The American Machine Co. bid \$7,888.88, and James D. O'Mara bid \$8,205. Bids have been taken under advisement. The architect was instructed at the same meeting to prepare plans and specifications for completing the interior of the building.

## BANKS

**PORTLAND, ORE.**—Bank and offices, 1 story and base. Class A construction. Cost not stated. Architect, none. Owners, Citizens' Bank of Portland. The Citizens' Bank, 120 Grand avenue, Portland, has purchased the northwest corner of Grand avenue and Adler

street, and state that they will erect a four story structure of granite, brick or concrete. As yet no architect has been selected, but it is thought that the directors of the bank will make a selection soon. The site is 50 by 100 feet in dimensions. N. U. Carpenter is president of the bank. This report should not be confused with a report printed recently relating to the new building to be erected by the First National and Security Savings and Trust Co. of Portland on property at the southwest corner of 5th and Stark streets, Portland.

## BONDS.

**SACRAMENTO, CAL.**—The official returns of the good roads bond election show that the issue was defeated by 363 votes. The total vote cast was 13,101, 8,373 were cast in favor of the issue and 4,731 against.

In the city the vote stood 5,205 for the bonds and 3,165 against them. The vote in the country stood 4,225 for the bonds and 506 against.

**SANTA ROSA, SONOMA CO., CAL.**—Meetings are being held throughout the county of Sonoma continually urging the calling of a bond election for good roads.

**YREKA, SISKIYOU CO., CAL.**—Siskiyou County has purchased \$50,000 of the State Highway bonds. This latest purchase brings Siskiyou's total subscription up to \$150,000.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—For the purpose of erecting a library building in this city the Chamber of Commerce has under discussion the proposition of issuing a petition calling for a special bond election.

**REDLANDS, SAN BERNARDINO CO., CAL.**—The special election held in San Bernardino County recently resulted in the adoption of the good roads and hospital bonds by a vote of 4 to 1. In this city 1,843 votes were cast for the road bonds and only 290 against. Only 475 votes were cast against the hospital bonds and 2,060 for. In other parts of the county the vote shows similar majorities.

This means that San Bernardino County will spend \$1,750,000 for paved highways and \$150,000 for a county hospital.

**SAN DIEGO, SAN DIEGO CO., CAL.**—Unanimous endorsement of the State Fair and Capitol Extension bonds to be voted at the November election has been given by the San Diego Chamber of Commerce.

**WOODLAND, YOLO CO., CAL.**—A special election will be held on October 30th of voting bonds in the sum of \$100,000 for the purpose of raising funds to purchase school lots, and for building or purchasing one or more school houses and supplying same with necessary furniture. J. Reith, R. J. Gibson, J. L. Harlan, F. C. Ewert and J. W. Lentholt are members of the Board of Education.

**VACAVILLE, SOLANO CO., CAL.**—As soon as legal formalities can be complied with the question of bonding Vacaville for \$30,000 for street improvements will be submitted to the voters.

**PORTLAND, ORE.**—Bids, to be opened November 2, were invited for \$250,000 interstate bridge bonds by the bridge bonding committee.

The bonds were offered at popular sale in denominations of \$100, \$500 and \$1,000. They draw interest at 5 per cent, and are serial, their retirement beginning with \$10,000 at the end of five years, continuing with the retirement of \$10,000 every five years thereafter. Public support of the sale is urged.

**CATHLAMET, WASH.**—An election will be held November 3 to vote on the proposition of issuing bonds in the sum of \$75,000 for the construction of roads. The bonds shall be payable and redeemable after 10 years, and shall bear 6 per cent.

**BILLINGS, MONT.**—The Board of County Commissioners will take steps to submit to voters a proposition to bond the county in the sum of \$200,000 for the construction of bridges over the Yellowstone River at Marsh and Intake, and for installation of a new span in bridge crossing river at this city.

### BRIDGES AND DAMS.

**SACRAMENTO, CAL.**—Bridge, concrete and steel, \$3,400. Engineer, County Surveyor, Sacramento. Owners, Sacramento County. J. H. Wells of Sacramento presented the lowest figure for constructing a bridge over Arcade creek at \$2,564. Three other figures were received. Bids were referred to the Contract Committee.

**RED BLUFF, TEHAMA CO., CAL.**—Retaining wall, reinforced concrete. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Plans and specifications for a concrete wall across the Elder creek, near the Tyler place, have been accepted here by the Board of Supervisors, and bids will be received by them until November 5th at 10 a. m. Further information together with plans and specifications may be had from the County Surveyor.

**RIO VISTA, SOLANO CO., CAL.**—Bridge, steel and concrete, \$150,000. Engineers, County Surveyors, Solano and Sacramento Counties. Owners, Solano and Sacramento Counties. Plans for the proposed Rio Vista bridge have been approved by the War Department. The engineers delayed their decision because it was found necessary to revise the plans so as to place the draw nearer the Rio Vista side of the river. According to the plans the bridge will cost about \$150,000. It will be built jointly by Sacramento and Solano counties.

**ROSEVILLE, PLACER CO., CAL.**—Bridges, timber and reinforced concrete. Cost not stated. Engineer, County Surveyor, Auburn. Owners, Placer County. Work on three bridges has been started by Day Labor, Supervisor Wm. Haman has sent out a crew of men to commence construction of three new bridges in this section. Two of the structures will be of reinforced concrete, and will be at points on the State highway. The other structure will be of wood construction and will be erected at Riverdale.

**MODESTO, STANISLAUS CO., CAL.**—Bridges, timber and concrete. Cost not stated. Engineer, Modesto Irrigation District. Modesto. Owners, Modesto Irrigation District. Bids will be opened on November 10th for constructing a bridge over Briggs Ditch, a bridge over Lateral No. 5, a bridge over Lateral No. 4 and a siphon on Lateral No. 1. Plans and specifications together with other information can be secured by addressing the Secretary of the Modesto Irrigation District at Modesto.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. Plans and specifications for the construction of a reinforced concrete arch bridge over the Atascadero creek on the State Highway have been adopted by the Board of Supervisors, and bids will be received by them until November 5th at 10 a. m.

### Contracts Awarded.

**WOODLAND, YOLO CO., CAL.**—Bridge, concrete and timber, \$30,500. Engineer, County Surveyor, Woodland. Owners, Yolo County. Contractors, Clinton Fireproofing Co., Mutual Bank Bldg., S. F. Contract price, \$30,500.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Bridges, timber and reinforced concrete. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Contractors, Barrett & Hilp, S. F., bridge in Third township, \$5,308.50; Savage Bros., S. F., bridge in Fourth township, \$6,758.50.

### CHURCHES.

**MONTEREY, MONTEREY CO., CAL.**—Church, 2 story and base, brick and frame, \$25,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, First Presbyterian Church of Monterey. The building will be designed in the Spanish style and will contain a large auditorium, Sunday school rooms and social rooms. Interior finish will be of pine and redwood with some ornamental plaster. Art glass windows will be installed. There will be a central heating system. Exterior of the building will be faced with cement plaster. Plans are being prepared.

### Contracts Awarded.

**MERCED, MERCED CO., CAL.**—Church, 1 story, frame and plaster, \$6,000. Architect's name not given. Owners, St. Luke's Episcopal Church. Contractors, Wilcox & Groom, Livingston. Contract price exclusive of chairs, art glass and other furnishings, \$5,500.

### COURT HOUSES.

**SACRAMENTO, CAL.**—Improvement to Court House ground, \$16,274. Architect, R. A. Herold, Forum Bldg., Sacramento. Owners, Sacramento County. The contract with Trichter & Ambrose to improve the north half of the Court House Block to \$16,274 was accepted by the District Attorney for approval.

**CHICO, BUTTE CO., CAL.**—Court House, 2 story and base, Class A construction, \$100,000. Architect not selected. Owners, Butte County. The question before the people of Chico and Oroville at the present time is the building of a new county court house.

Oroville is now basing her fight against Chico's effort to get the county seat. The discussion now is on the question as to whether a court house can be built at the cost of \$100,000. People of Chico say that it can and they also have the word of architects in their favor. It is thought that an understanding will be reached within the near future, and the preparation of the plans for the building will be started.

### FACTORIES AND WAREHOUSES.

**SEATTLE, WASH.**—Cold storage warehouse, 4 story and base. Class A construction. Engineer, Port of Seattle Commission, Seattle. Owners, City of Seattle. All bids for the construction of the cold storage apple warehouse have been rejected by the Port of Seattle Commission and new plans have been ordered prepared. The new plans will include the fish storage warehouse. The Butler Contracting Company of Seattle was awarded the contract, but this award has been withdrawn. The building on which bids will be taken in about three months will cost in the neighborhood of \$200,000 exclusive of the machinery which will cost \$200,000 additional.

**LOS ANGELES, CAL.**—Brewery, 5 story and base, brick and steel, \$30,000. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, East Side Brewing Co. The building will be erected on North Main street, covering an area of 96 by 65 feet. Extra heavy construction will be used. Interior will be finished in pine. There will be special machinery, which is not included in the estimated cost. Exterior of the building will be faced with stock brick. Plans are now being prepared.

### FIRE HOUSES AND JAILS.

**RICHMOND, CONTRA COSTA CO., CAL.**—Fire house, 1 story and base, brick, \$5,000. Architect's name not given. Owners, City of Richmond. Plans and specifications for a one-story brick fire house building, to be erected on the corner of Barrett avenue and 19th street, were ordered prepared by the City Council at their last meeting. The structure will cost in the neighborhood of \$5,000 and will have a pressed brick front.

### FLATS.

**SAN FRANCISCO.**—Flats, 3 story and base, frame, \$7,000. Architect, none. Owner, Bert T. Owsley, 311 Sharon Bldg., S. F. The building will be erected on the west side of Clayton street, south of Hayes, having a frontage of 25 feet and a depth of 70 feet. There will be three flats of five and six rooms, with space for private garage in the basement. Interior finish will be of pine, redwood and hardwood veneer. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and tile or brick mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exterior of the house will be covered with rustic and brick veneer. Plans are complete and on the hands of the owner who will do the work by Day Labor. Materials are being purchased.

**SAN FRANCISCO**—Flat, 2 story and base, frame, \$6,700. Architect, none. Owner, W. W. Rednall, 2500 15th street, S. F. The building will be erected on the south side of Union street west of Baker, covering an area of 26 by 60 feet, and has been designed to contain two modern flats of five and six rooms. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places in the living rooms. Mantels will be of tile or brick. Bath rooms will have tile wainscot. Entrance will be finished in marble. Exterior of the building will be covered with red stock brick veneer and cement plaster on metal lath. Plans are complete and in the hands of the owner. The work will be done by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$6,000. Architect, M. Matanovich, David Hewes Bldg., S. F. Owners, L. H. and H. R. Kage. The building will be erected on the west side of Howard street north of Adair, having a frontage of 30 feet and a depth of 65½ feet. There will be two flats of six rooms each. Interior will be finished in pine, redwood and white enamel. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Wall beds are specified. Tile and marble will be used in the entrances. Exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are complete and figures are being taken.

**OAKLAND, CAL.**—Flat and stores, 2 story and base, frame, \$25,500. Architects, Thomas & Oliver, Pantages Theatre Bldg., Oakland. Owner, Robert Trimlett, 3126 High street. The building will be erected at the north-west corner of 38th and Brookdale avenues, and will contain two small stores on the first floor. Upper floor will be arranged for a six-room flat. Interior finish will be of pine and redwood. Some oak floors will be used. There will be an open fire place and tile or brick mantel. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner. Work will be done by Day Labor.

## GARAGES.

**CALIFORNIA**—Garages, 1 story, reinforced concrete. Cost not stated. Architect, none. Owners, Coast to Coast Auto Co., San Bernardino. Articles of incorporation have been filed in San Bernardino for the Coast to Coast Auto Company, which is to operate garages along the Old Trails National Highway. The incorporators are C. L. Wheatland, C. A. Anthony, O. M. Hale, R. F. Cline, all of San Bernardino, and W. A. Ramsey of Los Angeles. The capitalization is \$25,000. According to the plans of the corporation, garages will be taken over from Needles to San Bernardino, on toward Los Angeles, and probably from Barstow to San Francisco, and from Los Angeles to San Diego.

**SAN FRANCISCO**—Garage and stores, 2 story and base, reinforced concrete, \$70,000. Architects, Smith & Stewart, 244 Kearny street, S. F. Owner, A. H. Martin. The building will be erected on the west side of Van

Ness avenue between California and Sacramento, having a frontage of 70 feet and a depth of 150 feet. There will be a large commercial garage and sales rooms on the first floor. Upper floor will be arranged for offices and shipping department. Interior finish will be of pine and hardwood. There will be a tile floor and marble wainscot. Exterior of the building will be faced with cement plaster. Plans are complete and figures have been taken. A contract will be awarded within a few days.

**OAKLAND, CAL.**—Garage, 1 and 2 story and base. Class A construction. Cost not stated. Architect, J. J. Donovan, Oakland. Owners, City of Oakland. The building will be erected in the rear of the City Hall and will be designed for the use of the city's machines. Construction will be fireproof. There will be a cement first floor. Interior finish will be of pine throughout. Special gasoline storage tanks will be installed. Exterior of the building will be faced with cement plaster. Plans are being prepared.

## GOVERNMENT WORK & SUPPLIES.

### Roof Ventilators.

Abstract of proposals received by U. S. Reclamation Service, in connection with advertisement No. 345, for roof ventilators for the Okanogan project, Wash., bids opened at Los Angeles, Cal.:

American Cornice Works, Los Angeles, Cal., \$100.

California Cornice Works, Los Angeles, Cal., \$120.

### Tunnel Bulkhead.

Abstract of proposals for tunnel bulkhead, advertisement 335F, for Shoshone project, Wyo., opened at Los Angeles, Cal.:

Rosedale Foundry and Machine Co., Pittsburgh, Pa., \$1,840.

Minneapolis Steel and Machine Co., Minneapolis, Minn., \$2,027.

Charles F. Elmes Engineering Works, Chicago, Ill., \$2,800.

Fulton Engine Works, Los Angeles, Cal., \$2,925.

S. Morgan Smith Co., York, Pa., \$2,650.

Pittsburgh Valve, Foundry and Construction Co., Pittsburgh, Pa., \$2,100.

Union Machine Co., San Francisco, Cal., \$2,100.

The Hinman Hydraulic Mfg. Co., Denver, Colo., \$3,190.

Joshua Hendy Iron Works, San Francisco, Cal., \$3,415.

The Pelton Water Wheel Co., San Francisco, Cal., \$3,450.

Union Iron Works Co., San Francisco, Cal., \$3,700.

Midvale Steel Co., Philadelphia, Pa., \$4,989.90.

Nordberg Mfg. Co., Milwaukee, Wis., \$6,000.

### Las Animas Feed Water Heater.

All bids received at the bureau of yards and docks, Navy Department, Washington, D. C., for installing a feed water heater at the naval hospital, Las Animas, Colo., have been rejected as excessive. The specifications will be revised and the work readvertised.

### Philippines, Lumber.

Under bids recently opened for furnishing 506,333 feet Oregon pine lumber for buildings at Fort Mills, P. I.,

one contract has been awarded to the American Lumber Co. of San Francisco, at \$106,653, including transportation to Manila.

### Reclamation Advt. No. 318.

The following bids were received by the U. S. Reclamation Service, Los Angeles, Cal., for furnishing trash rack grubbings, flat valves, and side plates for the Okanogan project, Washington.

Bid 1, Smith & Watson Iron Works, Portland, Ore.; delivery, Portland.

2, Edgewell Iron Works, Los Angeles, Cal.; delivery Los Angeles.

3, Fulton Engine Works, Los Angeles, Cal.; delivery Los Angeles.

4, Willamette Iron Works, Portland, Ore.; delivery Portland.

5, Union Machine Co., San Francisco, Cal.; delivery San Francisco.

6, United Iron Works, Oakland, Cal.; delivery Oakland.

7, Baker Iron Works, Los Angeles, Cal.; delivery Los Angeles.

8, Union Iron Works, San Francisco, Cal.; delivery San Francisco.

9, Keystone Iron Works, Los Angeles, Cal.; delivery Los Angeles.

Item 1—Bid 1, \$55, 16 days; 2, \$72.50, 10 days; 3, \$58, 30 days; 4, \$60, 2 days; 5, \$91, 10 days; 6, \$83, 10 days; 7, \$106, 10 days; 8, \$85, 8 days; 9, \$95.30, 12 days.

Item 2—Bid 1, \$166, 16 days; 2, \$232.70, 10 days; 3, \$204, 20 days; 4, \$170, 4 days; 5, \$243, 14 days; 6, \$255, 10 days; 7, \$266, 10 days; 8, \$245, 10 days; 9, \$287, 12 days.

Item 3—Bid 2, \$48.50, 12 days; 3, \$109, 30 days; 4, \$120, 4 days; 5, \$79, 14 days; 6, \$88, 12 days; 7, \$48, 2 weeks; 8, \$110, 10 days; 9, \$118.30, 12 days.

Item 4—Bid 2, \$100, 12 days; 3, \$94, 20 days; 4, \$105, 3 days; 5, \$82, 10 days; 6, \$85, 10 days; 7, \$84, 1 week; 8, \$110, 8 days; 9, \$69.25, 12 days.

### San Francisco, Cal. Repairs.

The contract for repairs to pressed brick facing of the U. S. Appraisers' Building, San Francisco, Cal., has been awarded to Grant Fee at \$1,275.

### Transformers.

Abstract of proposals received by U. S. Reclamation Service in connection with advertisement No. 346, transformers for Okanogan project, Washington, bids opened at Los Angeles, Cal.:

Allis-Chalmers Mfg. Co., Los Angeles, Cal., \$97.

Maloney Electric Co., St. Louis, Mo., \$99.

Pittsburgh Transformer Co., Pittsburgh, Pa., \$118.50.

Westinghouse Electric and Manufacturing Co., Los Angeles, Cal., \$138.00.

General Electric Co., Los Angeles, Cal., \$173.73.

### San Francisco Bake Ovens for Transports.

Only one bid was received by the depot quartermaster, San Francisco, Cal., for 6 electric bake ovens, Navy circulating type, for the transports Sherman and Logan, that of the General Electric Co., at a total of \$1,722 for the 6 ovens and \$90 for 4 set extra grids. The bid was accepted.

### San Francisco, Cal. Painting, Etc.

The contract for painting and minor repairs at tax U. S. Appraisers' Building, San Francisco, Cal., has been awarded to W. R. Eaton at \$935.

### San Francisco, Cal., Repairs and Painting.

The contract for repairs and painting at the U. S. Marine Hospital, San Francisco, Cal., has been awarded to I. R. Kissel at \$1,500.

### Roof Trusses and Trolley Beams.

The following bids were received by the U. S. Reclamation Service, under advertisement No. 342, for roof trusses and trolley beams for the Okanogan project, Wash.:

- Bid 1. Los Angeles Iron Works, Los Angeles, Cal.
2. Fulton Engine Works, Los Angeles, Cal.
3. Seattle Dry Dock and Construction Co., Seattle, Wash.
4. Judson Mfg. Co., San Francisco, Cal.
5. Willamette Iron and Steel Works, Portland, Ore.

Item 1. Bid 1, \$19, at Los Angeles, 6 days; 2, \$73.80, at Los Angeles, 15 days; 3, \$84, at Seattle, 6 working days; 4, \$72.62, at Okanogan, 30 days; 5, \$92, at Portland, 3 days.

Item 2, bid 1, \$53, at Los Angeles, 6 days; 2, \$79.90, at Los Angeles, 15 days; 3, \$91, at Seattle, 6 working days; 4, \$80.88, at Okanogan, 30 days; 5, \$84, at Portland, 3 days.

Item 3, bid 1, \$93; 2, \$113.45; 3, \$158.50; 4, \$141.33; 5, \$184; deliveries same as item 2.

### San Diego, Cal., Extension to Coal Plant.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for extensions to coal platform and flume at the naval coal depot, San Diego, Cal.:

Fred Steffen, San Diego, Cal., \$8,215.50.

The Holland Construction Co., San Diego, Cal., \$9,760.

### San Diego, Cal., Repairs.

The contract for repairs to concrete casing of piles at the U. S. quarantine station, San Diego, Cal., has been awarded to Spreckles Bros. Commercial Co. at \$1,450.

**SAN FRANCISCO**—Government work. Cost not stated. Engineer, Constructing Quartermaster, Fort Mason. Owners, United States Government. Capt. Geary, Quartermaster at Fort Winfield Scott, will shortly open bids for repairs to the Torpedo wharf at Fort Winfield Scott. Bids will shortly be called for by the Constructing Quartermaster at Fort Mason for dredging around the Transport docks. Surveys and preliminary plans are being prepared in the office of the Constructing Quartermaster at Fort Mason for a tunnel to connect Fort Baker and Fort Berry, located in back of San Salito, Marin County. The proposed tunnel will be 2,100 feet long and will contain a single track. Included in the project is two miles of railroad. Bids will not be called for some time. Plans are also being completed in the same office for an ornamental iron gate at the Laxuma street entrance to the Transport docks. The gate will have concrete posts and arches.

### HALLS AND SOCIETY BUILDINGS.

**SAN MATEO, SAN MATEO CO., CAL.**—Lodge hall and theatre, 2 story and

base, concrete and frame, \$50,000. Architect, Will D. Shea, 214 Kearny street, S. F. Owners, Knights of Columbus Hall Association. Besides the two-story portion of the building, which will house the lodge room and offices, there will be a one-story part given over to a motion picture theatre. Plans have been revised and new figures will be called for at once. The theatre portion and first floor of the lodge rooms will be of concrete construction. Interior will be finished in pine and hardwood. There will be steam heat and open fire places. Mantels will be of tile. Exterior of the building will be faced with cement plaster.

**HILLSBORO, ORE.**—Lodge hall and store, 2 story and base, brick and concrete, \$30,000. Architects, Houghtaling & Dougan, Henry Bldg., Portland. Owners, Moose Lodge Hall Association. The building will have a frontage of 64 feet and a depth of 100 feet. The first floor will be leased for stores. Basement will contain a gymnasium, swimming tank, bowling alley and the mechanical equipment. Second floor will contain a large auditorium and ball room and social rooms. The third floor will also contain lodge rooms, cloak rooms and a banquet hall. Interior will be finished in pine and hardwood. A maple floor will be used in the ball room. There will be steam heat. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**FRESNO, FRESNO CO., CAL.**—Club house improvements. Cost not stated. Architect, none. Owners, Riverside Country Club. Extensive improvements have been planned by the Riverside Country Club. Extensive improvements are of 1,000 feet on the San Joaquin river, and they intend to improve this property. The work will consist of golf links, bowling alley, tennis courts, concrete swimming tank, boat house and other extensive improvements. J. C. Forkner is the president of the club.

### HOSPITALS.

**ELBRIDGE, SONOMA CO., CAL.**—Epileptic cottage, 1 story, frame and concrete, \$16,000. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. R. S. K. McMillen and Louis Cereghino & Son each submitted a bid of \$15,475 for constructing this building. They were the low men. The question of an award has been taken up by the State Board of Control. A complete list of the bids opened will be found under the heading of Marin, Contra Costa and Sonoma counties in this issue.

**VENTURA, VENTURA CO., CAL.**—Hospital, 2 story and base, brick and steel. Cost not stated. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, County of Ventura. All bids recently opened for this work have been rejected. Plans will be slightly revised and new figures will be called. Further mention will be made of the work at that time.

### Contracts Awarded.

**DECOTA, ALAMEDA CO., CAL.**—Detention, 2 story and base, brick and concrete, \$24,787. Architect, James H. Humphrey, Wells-Fargo Bldg., S. F. Owners, California Masonic Home, Con-

tractors, Thomas Day's Sons, S. F. Contract price, \$34,787.

**SAN FRANCISCO**—Hospital alteration and additions, 4 story, brick. Cost not stated. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Mary's Help Hospital. Contractor, John Hughes. Contract price not stated. This work will consist of installing a new children's ward.

### HOTELS.

**REDONDO BEACH, LOS ANGELES CO., CAL.**—Hotel, 5 story and base, Class B construction. Cost not stated. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owner, Mrs. Nelms. The building will be erected on Catalina street, having a frontage of 50 feet and a depth of 120 feet, and will contain 125 guest rooms besides a large office, dining room and lobby. Interior will be finished in pine with some hardwoods. There will be steam heat, a hot water supply and elevator service. A number of the rooms will have private baths which will be finished in tile. A tile floor will be used in the lobby. Exterior of the building will be faced with ruffled brick trimmed with terra cotta. Plans are being prepared.

### LIBRARIES.

**VACAVILLE, SOLANO CO., CAL.**—Library, 1 story and base, reinforced concrete, \$12,000. Architect, L. M. Turton, Napa. Owners, Vacaville Library Trustees. The building has been designed in the classic style and will contain a large reading room, stack room and office of the librarian. Interior will be finished in pine with maple floor. There will be a central heating system. Metal book stacks will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for at once. Further mention will be made of the work when an official notice to contractors is published.

**SAN FRANCISCO**—Library, 2 story and base, reinforced concrete or brick and steel, \$60,000. Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owners, City and County of San Francisco. Architect Lansburgh has been selected to prepare plans for the Mission Branch Library and is now engaged on the working drawings. The building will be of fireproof construction and will contain besides the usual reading rooms, a children's department. Interior will be finished in pine and hardwood with metal trim and metal book stacks. Plans include a central heating system, probably steam heat, vacuum cleaning and modern plumbing. The design will be in the classic style. Exterior will be faced with either pressed brick or cement plaster. Further mention will be made of the work.

### PANAMA—PACIFIC EXPOSITION WORK.

**SAN FRANCISCO**—Moving Life Saving Station. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on October 29th for moving the main station building, the bathhouse and storehouse of the United States Life Saving Station, known as the Fort

Point Life Saving Station, to another location on the Exposition grounds. Plans and complete information can be secured from the Director of Works. An official proposal appears in another column of this issue.

**SAN FRANCISCO**—Launchway and fender piles. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on November 2nd for constructing an iron and steel launchway, fender piles and walk at the new location of the Fort Point Life Saving Station. Plans and specifications can be secured from the Director of Works. An official proposal appears in another column of this issue.

**SAN FRANCISCO**—State exhibit building, 1 and 2 story, frame and plaster, \$20,000. Architects, Averstreet, Spencer & Pain, Jackson, Miss. Owners, State of Mississippi. Plans are complete and out for figures for the one and two story building which will house the official representatives and displays of the State of Mississippi at the Panama-Pacific International Exposition. Plans can be secured from the office of the Director of Works. Bids will be opened in the offices of the architects in Jackson, Miss.

### Contracts Awarded.

**SAN FRANCISCO**—Moving incinerator. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Contractor, Mart Jacobs. Contract price, \$550.

**SAN FRANCISCO**—County exhibit booth, \$2,500. Architect, William Binder, Rea Bldg., San Jose. Owners, Santa Clara County. Contractors, Lange & Bergstrom, Sharon Bldg., S. F. Contract price, \$2,500.

**SAN FRANCISCO**—Display booth, \$9,000. Architects, Ward & Blohne, Alaska Commercial Bldg., S. F. Owners, M. A. Gunst Co. Contractors, Baucus Bros., S. F. Contract price, \$9,000.

### RAILROAD CONSTRUCTION AND EQUIPMENT.

**RICHMOND, CONTRA COSTA CO., CAL.**—Track work and freight sheds, frame, \$14,000. Engineer, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. The State Railroad Commission has ordered the Southern Pacific to prepare plans, to be approved by the Commission, for a freight depot and a standard weighing system. The company has been given 60 days from October 13th in which to complete plans.

**OAKLAND, CAL.**—Store house and tower, 2 story, brick, \$20,000. Architect, Engineering Department of Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Plans are complete for a new storage house and tower to be erected in the East Oakland Yards. The building will cover a considerable ground area. Interior will be finished in pine. There will be special electric work, to be installed by the company. Exterior of the building will be faced with stock brick. Plans are complete and figures are being taken.

### RESIDENCES.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, George F. Cleese, 521 25th avenue, S. F. The dwelling will be erected on the west side of 15th avenue south of Anza street, and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood with some hardwood veneer. Hardwood floors will be used in the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor. Materials are now being purchased.

**San Francisco**—Residences, 2, 2 story and base, frame, \$2,000 each. Architect, none. Owners, C. J. and W. J. Keenan, Hayes and Central avenue, S. F. These two houses will be erected on the east side of 20th avenue north of California street, and each has been designed to contain seven rooms and bath. Interiors will be finished in pine and elm veneer. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, M. Fauth, 29 Alma street, S. F. The dwelling has been designed for a seven-room house with bath and will be erected on the west side of 21st avenue near Fulton street. Pine, redwood and elm interior trim will be used. Hardwood floors are specified in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. A brick veneer base will be used. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owners, Oscar Heyman Bro., 742 Market street, S. F. The dwelling will be erected on the east side of 23rd avenue, north of Irving street, and has been designed to contain seven rooms and bath. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 1 story and base, concrete. Cost not stated. Architect, John Hudson Thomas, First National Bank

Bldg., Berkeley. Owner, C. J. Boese. The dwelling will be designed to contain six rooms, bath and sleeping porch. Interior will be finished in pine and hardwoods with some white enamel. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be faced with cement plaster. A clay tile roof will be used. Plans are now being prepared.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$4,000. Architect, J. C. Kincaide, 6601 Dana street, Oakland. Owner, Louis E. Brann. The dwelling will be erected on Kenmore avenue near Lake Shore avenue, and has been designed to contain seven rooms, bath and sleeping porch. Interior will be finished in pine and hardwood with some white enamel. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$5,500. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Mason McDuffie Co. The dwelling will be erected in Claremont Park and has been designed to contain eight rooms, two baths and a sleeping porch. A garage will also be erected on the property. Interior finish will be of pine and hardwood with white enamel in the bed rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the dwelling and garage will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residences, 2, 2 story and base, frame, \$6,000 each. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Alameda County Home Builders. These dwellings will be erected in Northbrae and each has been designed to contain eight rooms, two baths and sleeping porch. Interiors will be finished in pine, redwood and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$5,000. Architect, none. Owner, C. J. Brann, 3157 Claremont avenue, Oakland. The dwelling will be erected on the west side of Moraga north of Pleasant avenue, and has been designed to contain eight rooms and bath. A garage will also be erected on the property. Interior of the house will be finished in pine and hardwood with white enamel in the bed rooms. Plans provide for furnace heat and open fire places. Man-

tels will be of tile or brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Charles W. McCall. Central Bank Bldg., Oakland. Owner, Dr. E. R. Jordan. The dwelling will be erected on Lake Shore Drive near Malvesta, and has been mentioned here before. Revised plans have been completed. The dwelling will contain seven rooms, two baths and sleeping porches. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

ALAMEDA, ALAMEDA CO., CAL.—Residence, 1 story and base, frame, \$3,000. Architect, H. P. Smith, Blake Bldg., Oakland. Owner, Joseph P. Wilson, 552 Taylor street, Alameda. The dwelling has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine and redwood with some hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room. Exterior of the house will be covered with rustic. Plans are complete and in the hands of the owner who is taking figures for the entire work.

BERKELEY, ALAMEDA CO., CAL.—Residences, 2, 2 story and base, frame, \$2,500 and \$4,000. Architects, Elite Planners, 1814 5th avenue, Oakland. Owner, Mr. Lecamm. These houses will contain seven and eight rooms, bath and sleeping porch. Interiors will be finished in pine, redwood and oak. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot and floors will be used in the bath rooms. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath. Plans are now being prepared and when complete the work will probably be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$2,500. Architect, none. Owners, Carroll and Deary, 1811 39th avenue, Oakland. The house will be erected on the south side of Hayes street west of 62nd avenue, and has been designed for a nine-room dwelling. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be furnace heat and open fire places. Mantels will be of tile. The wainscot will be used in the bath room. Exterior of the dwelling will be covered with rustic and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

PITTSBURGH, CONTRA COSTA CO., CAL.—Residence, 1½ story and base,

frame. Cost not stated. Architect, none. Owners, Pittsburg Congregational church, Rev. Littlewood. The dwelling has been designed for a parsonage and will be erected on Cumberland street. There will be six rooms and bath. Interior will be finished in pine and redwood. Some hardwood floors will be used. Plans provide for open fire place and tile mantel. Exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

REDWOOD CITY, SAN MATEO CO., CAL.—Residence, 2 story and base, frame, \$35,000. Architects, Bliss & Paville, Balboa Bldg., S. F. Owner, Jacob Stern. This house has been designed for a large country home and will be erected on property adjoining that of Mr. Stern's brother. There will be in the neighborhood of fourteen rooms, several baths and sleeping porches. Interior will be finished in pine and hardwood with white enamel in the bed rooms. Hardwood floors will be used in the principal rooms. There will be a central heating system and open fire places. Mantels will be of brick and tile. Bath rooms will have tile wainscot and composition floors. Vacuum cleaning and a hot water system will be installed. A hot house, stables and a garage will also be erected. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN JOSE, SANTA CLARA CO., CAL.—Residences, 2, 1 story and base, frame, \$1,200 and \$2,000. Architect, none. Owners, E. L. Jones, 504 South Second street, and S. G. Pelton, 445 South Third street. These two houses will contain six rooms and bath each. Interiors will be finished in pine and redwood. Some hardwood floors will be used. There will be an open fire place in each living room. Mantels will be of tile or brick. The wainscot will be used in the bath rooms. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the respective owners who will do the work by Day Labor.

### SCHOOLS.

FRESNO, FRESNO CO., CAL. School, 2 story and base. Class A construction, \$470,000. Architect, State Architect George H. McDougall, Sacramento. Owners, State of California. Work on the \$470,000 Fresno Normal School building will begin before the end of December, according to present indications. The plans have been practically completed by the State Architect. C. L. McElaine, president of the Normal School, says two representatives of the Department of Architecture were in Fresno a few days ago gathering final data for the plans. The next stage in the proceedings will be the submission of the plans to the advisory board of consulting engineers. This board will meet the first part of November. Bids probably will be called for some time in November, and work will begin in December unless there is a hitch in the proceeding. The State Board of Control has given permission to the Fresno Normal board to proceed with the building, which is only half of the appropriation of \$470,000 is now available.

OAKLAND, CAL.—School plumbing, etc. Cost not stated. Architect, none. Owners, City of Oakland. Plans are complete and figures are being taken for furnishing and installing plumbing fixtures in the Lakeview School. Plans can be secured from the Secretary of the Board of Education. Bids will be opened on November 3rd.

DIXON, SOLANO CO., CAL.—School, 2 story and base, brick, \$60,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. The building will cover a large ground area and will contain fourteen class rooms, an auditorium, offices, departments for manual training and domestic science. Interiors will be finished in pine with maple floors in the class rooms. Plans provide for steam heat, program clocks and vacuum cleaning. Modern school plumbing will be installed. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared.

### Contracts Awarded.

SAN FRANCISCO—School heating and electric work. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractors, Butte Electric and Engineering Co., electric work Academic Building, \$16,490; Scott Co., heating and ventilating, same building, \$8,260.

ALBANY, ORE.—School, 2 story and base, brick and concrete, \$39,150. Architect, Charles H. Burgraff, Albany. Owners, City of Albany. Contractor, N. E. Hoover, Albany. Contract price, \$39,150.

### SEWERS, STREET WORK & WATER SYSTEMS.

REDWOOD CITY, SAN MATEO CO., CAL.—Road construction, \$8,973. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. The bid of Blanchard-Brown, presented to the Supervisors at their last meeting, offering to construct 1.159 miles of the La Honda to San Gregorio road for \$14,503 has been rejected. The surveyor's estimate of the work was \$8,973. The clerk has been directed to advertise for new bids.

RICHMOND, CONTRA COSTA CO., CAL.—Street work. Cost not stated. Engineer, City Engineer, Richmond. Owners, City of Richmond. At the regular meeting of the City Council the bid of John Wood was rejected for the improvement of 16th street, as it was found to be illegal. New bids will be called for immediately.

GRASS VALLEY, NEVADA CO., CAL.—Canal construction. Cost not stated. Engineer's name not given. Owners, Chicago Park, Forest Hill and Union Hills Irrigation Districts. The Chicago Park, Forest Springs and Union Hill districts have launched a movement with the idea of organizing into a water district under the Wright Act for the purpose of voting irrigation bonds to construct 125 miles of canal in the southwestern portion of the county. By such a system of water distribution, it is stated that 22,000 acres can be brought under irrigation in 10 years. With the canals constructed, the farmers would purchase water from the Pacific Gas and Electric Company's supply ditch at \$1.00 per acre-foot.

**FORT BIDWELL, MODECO CO., CAL.**—Irrigation work. Cost not stated. Engineer's name not given. Owners, Cowhead Irrigation Project. With the visit of ex-Senator A. T. Currier and Luther E. Campbell, Southern California capitalists, to this section on an inspection trip of the Cowhead irrigation project, comes the announcement that the Modoco Irrigation Company has acquired the rights of the Surprise Valley Water Company. The new company, capitalized at \$1,000,000, has assumed the \$5,000 obligations its predecessor contracted in its efforts to consummate this great project. The project proposes the construction of a main canal for carrying the waters of Cowhead Lake to the 320,000 acres in Surprise Valley.

**RIVERBANK, STANISLAUS CO., CAL.**—Road improvement. Cost not stated. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Plans are complete and figures will be opened on November 10th for grading and improving the Burneyville road near Riverbank. Plans and specifications can be secured from the Clerk of the Board of Supervisors.

**FRESNO, FRESNO CO., CAL.**—Electroliters. Cost not stated. Engineer, City Engineer, Fresno. Owners, City of Fresno. The City Council is now gathering information on the different designs and makes of electroliters. It is thought that bids for this work will be called for within a few days. The system it is thought will cost \$45,000.

**REEDLEY, FRESNO CO., CAL.**—Water system. Cost not stated. Engineer, City Engineer, Reedley. Owners, City of Reedley. Plans and specifications have been completed for an auxiliary water system. Bids will be taken for this work as follows: Item 1, for the construction of a pump pit; 2, for the construction of a pump house and office; 3, for the furnishing and installing of pumping machinery and accessories. Plans and specifications can be secured by addressing the City Clerk. Bids will be opened on November 15th.

### Contracts Awarded.

**SAN RAFAEL, MARIN CO., CAL.**—Sewer work. Cost not stated. Engineer, City Engineer, San Rafael. Owners, City of San Rafael. Contractor, James H. O'Brien, San Rafael. Contract price, \$1,169.

**SAUSALITO, MARIN CO., CAL.**—Street work, \$21,027.55. Engineer, City Engineer, Sausalito. Owners, City of Sausalito. Contractors, Eaton & Smith, San Francisco, sub-grading. Contract price, \$21,027.55.

**SANTA ROSA, SONOMA CO., CAL.**—Sewer pipe. Cost not stated. Engineer, City Engineer, Santa Rosa. Owners, City of Santa Rosa. Contractors, Capitol Sewer Pipe Co., Sacramento. Contract price not stated.

**SANTA ROSA, SONOMA CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Santa Rosa. Owners, City of Santa Rosa. Contractors, City Street Improvement Co., San Francisco. Contract price 15¢ per square foot.

**RICHMOND, CONTRA COSTA CO., CAL.**—Sub-main sewer. Cost not stated. Engineer, City Engineer, Richmond. Owners, City of Richmond. Contractor, Clinch, Richmond. Contract price not stated.

**SAN JOSE, SANTA CLARA CO., CAL.**—Street paving. Cost not stated. En-

gineer, City Engineer, San Jose. Owners, City of San Jose. Contractors, Ransome-Crummey Co., Oakland. Contract price, \$10,000. Concrete gutters on same job awarded to Federal Construction Co., S. F. Contract price \$11,000.

**SACRAMENTO, CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractors, Clark Henry Construction Co., Sacramento. Contract price not stated.

**HOOD RIVER, ORE.**—Head works and intake, \$19,160. Engineer's name not given. Owners, East Fork Irrigation District. Contractors, Andras & Bode (North Construction Co.), Lewis Bldg., Portland. Contract price, \$19,160.

### STORES AND OFFICES.

**SAN FRANCISCO**—Stores and theatre, 1 story, mezzanine and base, brick and steel, \$76,000. Architects, Reid Bros., California Pacific Bldg., S. F. Owner, J. R. Hamifey. The building will be erected at the northwest corner of Fillmore and Eddy streets and will cover a large ground area. There will be several stores and a motion picture theatre. Foundation and steel will be heavy enough to carry additional stories. Interior of the building will be finished in pine with some ornamental plaster in the theatre. Patent store fronts are specified. Exterior will be faced with pressed brick trimmed with terra cotta. Plans are complete and figures are being taken.

**FRESNO, FRESNO CO., CAL.**—Stores and offices, 2 story and base, brick, \$16,000. Architect, L. F. Condragian, Fresno. Owner, V. S. Keoshyuan. The building will be erected on I street between Kern and Inyo, and will replace the building recently destroyed by fire. The structure will have a frontage of 50 feet and a depth of 140 feet. There will be two stores on the first floor and a number of modern offices on the upper floor. Interior finish will be of pine. Patent store fronts are specified. Exterior will be faced with pressed brick. Plans are complete and a contract will be let at once.

**RICHMOND, CONTRA COSTA CO., CAL.**—Stores, 1 story and base, brick, \$10,000. Architect, James T. Narbett, Richmond. Owner, Edward Olds. The building will be erected on the corner of 7th and Macdonald avenue, covering an area of 50 by 120 feet. There will be two stores. Interiors will be finished in pine and redwood. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**PORTLAND, ORE.**—Stores and apartments, 2 story and base, brick. Cost not stated. Architect, Earl A. Roberts, Selling Bldg., Portland. Owner's name withheld. The building will be erected at the corner of Broadway and Larrabee streets. There will be stores on the first floor. Upper floor will be arranged for modern apartments of two rooms each. Plans provide for steam heat and a hot water system. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**PORTLAND, ORE.**—Stores and offices, 2 story and base, brick, \$25,000. Architects, Hongtaling & Dougan,

Henry Bldg., Portland. Owner, Rodney E. Gilson. The building will be erected at the corner of 10th and Couch streets, covering an area of 100 feet square. There will be several stores on the first floor and a number of modern offices on the upper floor. Interior will be finished in pine with some hardwood. Marble and tile will be used. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**Package Fruit Exchange.** To deal in berries, fruits and fruit products. Capital Stock, \$75,000; 750 shares at \$100 each; amount subscribed, \$500. Place of business, San Francisco. Directors—A. Strakian, F. L. Guerrero, J. H. Riordan, R. Benjamin and R. W. Harrison, 1 share each.

**Bainly-Fisk Company.** General farming business. Capital Stock, \$75,000; 75,000 share at \$1 each; amount subscribed, \$30. Place of business, San Francisco. Directors—F. J. Solmsky, E. A. Potter and C. S. Morbio, 1 share each.

# PROPOSALS

## Bids Wanted

### NOTICE TO CONTRACTORS.

#### PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company, Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, at 9:00 A. M., Thursday, October 29, 1914, for Moving and Resetting the Main Station Building, The Boat House and The Storehouse, Elec. Fort Point Life Saving Station, in accordance with plans and specifications on file in the office of the Director of Works. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the Works may be obtained from the Director of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco. Any other information may be had from the Chief Construction, Room 211, Service Building. (3)

#### PROPOSALS FOR RECLAMATION WORK.

EARTHWORK AND STRUCTURES.—Department of the Interior, United States Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service at Provo, Utah, until 2 o'clock p. m. November 16, 1914, for the construction of divisions 1, 2 and 3 of the High Line Canal and structures, Strawberry Valley project, Utah, involving approximately 334,000 cubic yards of excavation, 2,300 cubic yards of excavation for structures, 5,200 cubic yards of reinforced concrete, 167,000 square feet of canal lining, 230 lineal feet of tunnel complete with concrete lining, laying approximately 700 feet of vitrified pipe of miscellaneous sizes, also 1,400 feet of backfilling and small quantities of rock-filling and stone paving and the placing of sluice gates and miscellaneous structural steel. The canal will extend in a southwesterly direction from the power plant of the U. S. Reclamation Service near the mouth of Spanish Fork Canyon to Station 700 plus 00, near Payson City, Utah County, Utah. For particulars address the United States Reclamation Service at Provo, Utah, or Washington, D. C. WILL R. KING, chief engineer.

#### PROPOSALS FOR REFRIGERATING PLANT.

REFRIGERATING PLANT.—Sealed proposals invited.—Proposals for Refrigerating Plant will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. November 21, 1914, and there must be opened, for furnishing and installing a refrigerating plant, complete, with all accessories at the main barracks post-camp, U. S. Navy yard, Mare Island, Cal. Plan and specifications may be obtained on application to the bureau or to the commandant of the navy yard named. H. R. STANFORD, chief of bureau.

#### DEPARTMENT OF ENGINEERING

#### CALIFORNIA HIGHWAY COMMISSION NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 517, Post Office Building, Sacramento, Cal., until 2 o'clock p. m. on November 9, 1914, and there will be publicly opened at that

for construction in accordance with the specifications therefor, to which special reference is made, portions of State highway as follows:

Columbia County from Williams to Colusa (111-Col-15-A), about 8.4 miles in length, to be built of Portland cement concrete.

Glenn County from the southerly boundary to Willows (111-Gl-7-A), about 1.5 miles in length, to be built of Portland cement concrete.

Solano County from a point 2 1/2 miles south of Cordelia to Fairfield (111-Sol-7-B), about 8.1 miles in length, to be built of Portland cement concrete.

Imperial County from Coyote Wells to Dixieland (111-Imp-12-B), about 11.7 miles in length, to be built of Portland cement concrete.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the said office and the same may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Lonsmire, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CHARLES D. BLANEY.

NEWELL D. DARLINGTON.

CAMARUS STEEN.

California Highway Commission.

AUSTIN E. FLETCHER.

Highway Engineer.

CHARLES ALLETT.

Acting Secretary. (4)

Dated: October 6, 1914.

#### PROPOSALS FOR CANAL SUPPLIES.

PANAMA CIRCULAR 571.—Office of the General Purchasing Officer, Panama Canal, Washington, D. C.—Sealed proposals will be received here until October 31, 1914, under circular 571 for furnishing electrical material, files, sheet copper, steam suction and water hose, wire nails, aluminum paint, lampblack in oil, white lead in oil, chloride of lime, lard oil, linseed oil, burnt sienna, liquid coal tar, turpentine, imitation damar varnish, rubbing varnish, white dry zinc, white zinc in oil, copper tacks, sheet zinc, round steel and steel angles. Particular information and new forms for bids, major corps of engineers, U. S. Army, general purchasing officer.

#### PROPOSALS FOR CANAL WORK.

CANAL WORK.—Department of the Interior, United States Reclamation Service, Washington, D. C.—Sealed bids will be received at the office of the United States Reclamation Service at Provo, Utah, until November 15, 1914, for the construction of divisions 1, 2 and 3 of the High Line Canal and structures, Strawberry Valley project, Utah, involving approximately 334,000 cubic yards of excavation, 2,300 cubic yards of excavation for structures, 5,200 cubic yards of reinforced concrete, 167,000 square feet of canal lining, 230 lineal feet of tunnel, complete with concrete lining, laying approximately 700 feet of vitrified pipe of miscellaneous sizes, also 1,400 feet of backfilling and small quantities of rock-filling and stone paving and miscellaneous structural steel. The canal will extend in a southwesterly direction from the power plant of the U. S. Reclamation Service, near the

mouth of Spanish Fork Canyon, to Station 700 plus 00, near Payson City, Utah County, Utah. For particulars address the United States Reclamation Service at Provo, Utah, or Washington, D. C. WILL R. KING, chief counsel.

#### PROPOSALS FOR BUILDING.

BUILDING.—Sealed proposals indorsed "Proposals for Ward Pavilions" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. October 31, 1914, and then and there publicly opened, for five temporary one-story wooden ward pavilions at the naval hospital reservation, Mare Island, Cal. Plans and specifications may be obtained on application to the bureau or to the commandant of the navy yard, Mare Island, Cal. H. R. STANFORD, chief of bureau.

#### NOTICE TO CONTRACTORS.

#### PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at 9:00 A. M., Tuesday, November 2nd, 1914, for Iron, Steel, Lanthway and Tender Piles and Walk Fort Point Life-Saving Station, in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$5.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and specifications to examine and bids will forfeit the deposit of Ten Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CHUCKER, (4)

Chairman.

#### COPARTNERSHIPS.

JOHN E. Rowley as California Fruit Growers, Kitzmiller, R. P. Duff as P. O. Sons.

#### RELEASE OF BUILDING CONTRACT.

1911 S. IRVING & W. SCH. P. Crothers with M. Widhain.

# ADVANCE NEWS

Classified according to Location

## SAN FRANCISCO.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, George P. Cleese, 524 27th avenue, S. F. The dwelling will be erected on the west side of 15th avenue south of Anza street and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood with some hardwood veneer. Hardwood floors will be used in the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCES**—2, 2 story and base, frame, \$3,000 each. San Francisco. Architect, none. Owners, C. J. and W. J. Keenan, Hayes and Central avenue, S. F. These two house will be erected on the east side of 20th avenue north of California street, and each has been designed to contain seven rooms and bath. Interiors will be finished in pine and elm veneer. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**GOVERNMENT WORK**—Cost not stated. San Francisco. Engineer, Constructing Quartermaster, Fort Mason. Owners, United States Government. Capt. Geary, Quartermaster at Fort Winfield Scott, will shortly open bids for repairs to the Torpedo wharf at Fort Winfield Scott. Bids will be called for by the Constructing Quartermaster at Fort Mason for dredging around Transport docks. Surveys and preliminary plans are being prepared in the office of the Constructing Quartermaster at Fort Mason for a tunnel to connect Fort Baker and Fort Berry, located in back of Sausalito, Marin County. The proposed tunnel will be 2,100 feet long and will contain a single track. Included in the project is two miles of railroad. Bids will not be called for some time. Plans are also being completed in the same office for an ornamental iron gate at the Laguna street entrance to the Transport docks. The gate will have concrete posts and arches.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, M. Faith, 29 Alma street, S. F. The dwelling has been designed for a seven-room house with bath and will be erected on the west side of 21st avenue near Fulton street. Pine, redwood and elm interior trim will be used. Hardwood floors are

specified in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. A brick veneer base will be used. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$3,500. San Francisco. Architect, none. Owners, Oscar Heyman & Bro, 712 Market street, S. F. The dwelling will be erected on the east side of 23rd avenue north of Irving street and has been designed to contain seven rooms and bath. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**MOVING LIFE SAVING STATION**—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on October 29th for moving the main station building, the boathouse and storehouse of the United States Life Saving Station, known as the Fort Point Life Saving Station, to another location of the Exposition Grounds. Plans and complete information can be secured from the Director of Works. An official proposal appears in another column of this issue.

**APARTMENT HOUSE**—3 and 4 story and base. Class A construction, \$160,000. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Marine View Terrace Community Co. Details of plans which will result in the construction of one of the finest apartment houses yet erected in San Francisco are now being worked out. The property on which the building is to be erected is located at the southeast corner of Green and Taylor streets, covering an entire fifty vara lot and commanding one of the finest views of the entire city and bay. The scheme is to be carried out on the community plan, each occupant owning his or her apartment. The proposed building will be of fire-proof construction with reinforced concrete walls, floors and roof, and soundproof partitions. All rooms will be outside rooms. Suites will consist of from five to nine rooms, and will include servants' quarters, roof gardens and garage space. Interiors will be finished in pine and hardwoods with hardwood floors throughout. Bath rooms will be finished in tile and equipped with special fixtures. Marble and tile will be used in the entrances. Nearly all

apartments will have private entrances, private roof gardens and balconies. Provision will be made for housing the heating and hot water equipment in a separate building. Open fire places will be installed in all apartments. Exterior of the building will be faced with cement plaster. Plans are being prepared.

**LAUNCHWAY AND FENDER PILES**—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on November 2nd for constructing an iron and steel launchway, fender piles and walk at the new location of the Fort Point Life Saving Station. Plans and specifications can be secured from the Director of Works. An official proposal appears in another column of this issue.

**STATE EXHIBIT BUILDING**—1 and 2 story, frame and plaster, \$20,000. San Francisco. Architects, Aversstreet, Spencer & Pain, Jackson, Miss. Owners, State of Mississippi. Plans are complete and out for figures for the one and two story building which will house the official representatives and displays of the State of Mississippi at the Panama-Pacific International Exposition. Plans can be secured from the office of the Director of Works. Bids will be opened in the offices of the architects in Jackson, Miss.

**APARTMENT HOUSE**—5 story and base, reinforced concrete, \$35,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, A. Pome. The building will be erected on the south side of Turk street east of Polk, and has been designed to contain in the neighborhood of 35 suites of two and three rooms. Interiors will be finished in pine and hardwood veneer. All suites will have private bath rooms and wall beds. Plans provide for steam heat, a hot water supply and automatic elevator. Bath rooms will have tile wainscot and floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with cement plaster. Plans are complete and segmented figures are now being taken.

**APARTMENT HOUSE**—4 story and base, brick and steel, \$10,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Kierman & O'Brien. The building will be erected on the east side of Mason street south of Sutter, covering an area of 35 by 62½ feet. Interior will be arranged for a number of two and three room suites with private baths. Interior finish will be of pine and hardwoods. Hardwood floors will be used in the halls and living rooms. There will be steam heat, hot water supply, elevator service and vacuum cleaning system. Tile wainscot and composition floors will be used in the bath rooms. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

**FLATS**—2 story and base, frame, \$7,000. San Francisco. Architect, none. Owner, Bert T. Owsley, 311 Sharon Bldg., S. F. The building will be erected on the west side of Clayton street south of Hayes, having a frontage of 25 feet and a depth of 70 feet. There will be three flats of five and six rooms, with space for private garage in the basement. Interior finish will be of pine, redwood and hardwood veneer. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and tile or brick mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exterior of the house will be covered with rustic and brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are being purchased.

**FLATS**—2 story and base, frame, \$6,700. San Francisco. Architect, none. Owner, W. W. Rednall, 2500 Filbert street, S. F. The building will be erected on the south side of Union street west of Baker, covering an area of 26 by 60 feet and has been designed to contain two modern flats of five and six rooms. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places in the living rooms. Mantels will be of tile or brick. Bath rooms will have tile wainscot. Entrance will be finished in marble. Exterior of the building will be covered with red stock brick veneer and cement plaster on metal lath. Plans are complete and in the hands of the owner. The work will be done by Day Labor.

**FLATS**—2 story and base, frame, \$6,000. San Francisco. Architect, M. Mattanovich, David Hewes Bldg., S. F. Owners, L. H. and H. R. Kager. The building will be erected on the west side of Howard street north of Adair, having a frontage of 20 feet and a depth of 65½ feet. There will be two flats of six rooms each. Interior will be finished in pine, redwood and white enamel. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and tile mantels. Tile and marble will be used in the entrances. Exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are complete and figures are being taken.

**LIBRARY**—2 story and base, reinforced concrete or brick and steel, \$60,000. San Francisco. Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owners, City and County of San Francisco. Architect Lansburgh has been selected to prepare plans for the Mission Branch Library, and is now engaged on the working drawings. The building will be of fireproof construction and will contain besides the usual reading rooms, a children's department. Interior will be finished in pine and hardwood with metal trim and metal book stacks. Plans include a

central heating system, probably steam heat, vacuum cleaning and modern plumbing. The design will be in the classic style. Exterior will be faced with either pressed brick or cement plaster. Further mention will be made of the work.

**STORES AND THEATRE**—1 story, mezzanine and base, brick and steel, \$70,000. San Francisco. Architects, Reid Bros., California Pacific Bldg., S. F. Owner, J. R. Hamifey. The building will be erected at the northwest corner of Fillmore and Eddy streets and will cover a large ground area. There will be several stores and a motion picture theatre. Foundation and steel will be heavy enough to carry additional stories. Interior of the building will be finished in pine with some ornamental plaster in the theatre. Patent store fronts are specified. Exterior will be faced with pressed brick trimmed with terra cotta. Plans are complete and figures are being taken.

**GARAGE AND STORES**—2 story and base, reinforced concrete, \$70,000. San Francisco. Architects, Smith & Stewart, 244 Kearny street, S. F. Owner, A. H. Martin. The building will be erected on the west side of Van Ness avenue between California and Sacramento, having a frontage of 93 feet and a depth of 159 feet. There will be a large commercial garage and sales rooms on the first floor. Upper floor will be arranged for offices and shipping department. Interior finish will be of pine and hardwood. There will be a tile floor and marble wainscot. Exterior of the building will be faced with cement plaster. Plans are complete and figures have been taken. A contract will be awarded within a few days.

**Contracts Awarded.**

**DISPLAY BOOTH**—\$9,000. San Francisco. Architects, Ward & Rohme, Alaska Commercial Bldg., S. F. Owners, M. A. Gunst Co. Contractors Baccus Bros., S. F. Contract price, \$9,000.

**MOVING INCINERATOR**—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Contractor, Matt Jacobs. Contract price, \$850.

**SCHOOL HEATING AND ELECTRIC WORK**—Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractors, Butte Electric and Engineering Co., electric work Academic Building, \$16,490. Scott Co. heating and ventilating, same building, \$8,260.

**HOSPITAL ALTERATION AND ADDITIONS**—1 story and brick. Cost not stated. San Francisco. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Mary's Help Hospital. Contractor, John Hughes. Contract price not stated. This work will consist of installing a new children's ward.

**New Bids Called On Big Tunnel.**

**Board of Works Takes Action on Twin Peaks Work, Rejecting Bid of Hans Pederson at Monday Meeting.**

The Board of Public Works, at a meeting held Monday afternoon, rejected the bid of Hans Pederson of Seattle for the construction of the Twin Peaks Tunnel. The Daily Pacific Builder published the fact that this action would be taken on Monday morning and was the only San Francisco paper giving its readers this important news, all other dailies claiming that a satisfactory contract would be entered into with Hans Pederson by the Board of Public Works.

Mr. Pederson submitted the only bid for the big contract on September 30th for \$3,475,300. The work will be re-advertised and new bids will be opened on October 28th.

In rejecting the bid and calling for new figures the Board of Public Works is acting on an opinion of the City Attorney that the bid submitted by Hans Pederson was irregular and therefore a valid contract could not be entered into. The Board of Works has assurance from several reliable contracting firms that they will submit figures for the Twin Peaks Tunnel on October 28th.

The City Attorney's opinion is based on Section 16, Chapter 1, Article 6 of the charter which, in part is as follows: "All proposals shall be made upon printed forms to be prepared by

the Board of Public Works and furnished gratuitously upon application to the Board of Public Works. All bids shall be clearly and distinctly written without any erasures or interlineations, and if any bid shall contain an erasure or interlineation it shall not be received or considered by the Board of Public Works. Any contract made in violation of any of the foregoing provisions, and in case of improvements of streets, any assessment for the work done under such contract shall be absolutely void."

## Local Firm And Two Others Bid.

### Board of Public Works Will Receive at Least Three Figures for Twin Peaks Tunnel Work.

The Board of Public Works has assurance from three contracting firms that they will submit figures at Wednesday's meeting of the Board on the Twin Peaks Tunnel. One Chicago firm, that has had its estimate prepared for some time and would have submitted a figure at the previous opening of bids had financial conditions at the time permitted, will have a figure ready Wednesday. Hans Pederson, the only bidder for the work previously, will submit a new figure. A San Francisco firm will also be ready with a figure.

Some criticism has been made that the time for figuring the work has not been long enough. The Board of Works states that specifications have been in circulation for the past five months and that copies of the same have been on file with the leading engineering publications throughout the country. The Board takes the stand that with specifications on file in so many places and for a period of five months that ample time has been allowed for all interested firms to prepare an estimate.

## City Bids Opened

### Bids For Work at the Academic Building Opened and Bids Postponed For Plaster Work at City Hall.

Bids were opened at the Wednesday afternoon session of the Board of Public Works for several important jobs of street and sewer work besides on the following building enterprises: Electric work on the Academic Building, Polytechnic High School, completion of the heating and ventilating in the same building; furnishing generator sets in the Central Fire Alarm Station; furnishing gasoline generator engine for the same building, and for track special work on the Municipal Railroads. The opening date for bids on the ornamental plaster work and composition plaster work in the new City Hall was postponed until next Wednesday, October 28th. A complete list of the figures received follows:

Standard Elec. Co., 17,174  
McGee, McKinney & Co., 16,500

### Heating and Ventilating, Academic Building.

Pacific Fire Extinguisher Co., \$17,249  
Victor Engineering Co., 18,529  
Wittman, Lyman Co., 17,328  
The Turner Co., 16,190  
H. Lawson ..... 18,775  
Kirkman & O'Brien ..... 17,174  
P. J. Walsh ..... 16,500  
J. E. O'Mara ..... 17,174  
Scott Company ..... 16,500

### Motor Generator Sets, Central Fire Alarm Station.

Fairbanks-Morse Co. (a) \$712 (b) \$187, (c) \$190.  
Westinghouse Mfg. Co. (a) \$740.75 (b) \$742, (c) \$188.  
Allis-Chalmers Co. (a) \$895.50, (b) \$517, (c) \$365.50.  
General Electric Co. (a) \$916.15, (b) \$185.90, (c) \$370.80.  
Crockett, Wheeler Co. (a) \$695.50, (b) \$128.25, (c) \$168.25.

### Gasoline Generator, Central Fire Alarm Station.

Butte Eng. & Elec. Co., \$2,065.00  
Fairbanks, Morse Co., 1,715.00  
General Electric Co., 2,568.20  
Union Gas Engine Co., 1,899.50

### Furnishing Track Special Work.

Pennsylvania Steel Co., \$8,375  
United States Steel Products, 6,161

### FIRE ESCAPES FOR CITY SCHOOLS.

The Board of Public Works has requested the Supervisors that they authorize the preparation of plans and specifications for the installation of metallic fire escapes on six school buildings throughout the city. The estimated cost of the work being \$12,000 or \$2,000 for each school building on which the escapes will be placed.

The schools which will be equipped with escapes are the Lagunda Honda, Sherman, Emerson, Dudley Stone, Rochambeau and the Grant School.

### DR. JORDAN TO LECTURE ON RED LIGHT ABATEMENT ACT.

Among the many amendments to be voted on November 3rd is the Red Light Abatement Act.

David Starr Jordan, Chancellor of the Stanford University, will discuss this subject tonight in Central Methodist Church, Leavenworth and O'Farrell streets.

Dr. Jordan has studied this problem both in the United States and in Europe, so he ought to know what he is talking about. A large audience should greet him.

Admission free. No collection.

## AGREEMENT

A. T. Johnson, A. Hofferman, P. Gibbons, P. C. Watson, N. Murray, J. Bern-

RESIDENCE — 2 story and base, frame, \$1,000, Oakland, Cal. Architect, L. C. Kincaid, 6604 Dana street, Oakland. Owner, Louis E. Brann. The dwelling will be erected on Kenmore avenue near Lake Shore avenue, and has been designed to contain seven rooms, bath and sleeping porch. Inter-

or will be finished in pine and hardwood with some white enamel. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile and enamel. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and orders are being taken.

**RESIDENCE**—2 story and base, frame, \$5,500. Berkeley, Alameda Co., Cal. Architect, H. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Mason McDuffie Co. The dwelling will be erected in Claremont Park, and has been designed to contain eight rooms, two baths and a sleeping porch. Garage will also be erected on the property. Interior finish will be of pine and hardwood with white enamel in the bed rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the dwelling and garage will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**RESIDENCES**—2, 2 story and base, frame, \$6,000 each. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Alameda County Home Builders. These dwellings will be erected in Northbrae and each has been designed to contain eight rooms, two baths and sleeping porch. Interiors will be finished in pine, redwood and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owner, C. J. Pfanz, 5487 Claremont avenue, Oakland. The dwelling will be erected on the west side of Moraga north of Pleasant avenue. It has been designed to contain eight rooms and bath. A garage will also be erected on the property. Interior of the house will be finished in pine and hardwood with white enamel in the bed rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Dr. E. R. Jordan. The dwelling will be erected on Lake Shore Drive near Alameda, and has been mentioned here before. Detailed plans have been completed. The dwelling will contain seven rooms, two baths and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places.

Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**APARTMENT HOUSE AND STORES**—2 story and base. Class C construction, \$25,000. Berkeley, Alameda Co., Cal. Architect, Clay S. Barrett, Albany Bldg., Oakland. Owners, Durst Bros. The building will be erected on Alameda street near Harmon, having a frontage of 50 feet and a depth of 135 feet. There will be seven stores on the first floor besides the entrance to the apartments. Ten suites of three rooms will occupy the upper floor. Interiors will be finished in pine and redwood. There will be steam heat and a hot water system. Private baths and wall beds are specified. Bath rooms will have tile wainscot and composition floors. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**FLAT AND STORES**—2 story and base, frame, \$3,500. Oakland, Cal. Architects, Thomas & Oliver, Pantages Theatre Bldg., Oakland. Owner, Robert Trimble, 2126 High street. The building will be erected at the northwest corner of 35th and Brookdale avenues, and will contain two small stores on the first floor. Upper floor will be arranged for a six-room flat. Interior finish will be of pine and redwood. Some oak floors will be used. There will be an open fire place and tile or brick mantel. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner. Work will be done by Day Labor.

**STORE HOUSE AND TOWER**—2 story, brick, \$20,000. Oakland, Cal. Architect, Engineering Department of Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Plans are complete for a new storage house and tower to be erected in the East Oakland yards. The building will cover a considerable ground area. Interior will be finished in pine. There will be special electric work to be installed by the company. Exterior of the building will be faced with stock brick. Plans are complete and figures are being taken.

**RESIDENCE**—1 story and base, frame, \$3,000. Alameda, Alameda Co., Cal. Architect, H. P. Smith, Blake Bldg., Oakland. Owner, Joseph P. Wilson, 752 Taylor street, Alameda. The dwelling has been designed for a six room house with bath and sleeping porch. Interior will be finished in pine and redwood with some hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room. Exterior of the house will be covered with rustic. Plans are complete and in the hands of the owner who is making figures for the entire work.

**RESIDENCES**—2, 2 story and base, frame, \$2,500 and \$3,000. Berkeley, Alameda Co., Cal. Architects, RFB Planners, 1811 5th avenue, Oakland. Owner, Mr. Leaman. These houses will contain seven and eight rooms, bath and sleeping porch. Interiors will be finished in pine, redwood and oak.

Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot and floors will be used in the bath rooms. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath. Plans are now being prepared and when complete the work will probably be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owners, Carroll & Deary, 1811 5th avenue, Oakland. The house will be erected on the south side of Hayes street west of 62nd avenue, and has been designed for a nine-room dwelling. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be furnace heat and open fire places. Mantels will be of tile. The wainscot will be used in the bath room. Exterior of the dwelling will be covered with rustic and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**SCHOOL, PLUMBING, ETC.**—Cost not stated. Oakland, Cal. Architect, none. Owners, City of Oakland. Plans are complete and figures are being taken for furnishing and installing plumbing fixtures in the Lakeview School. Plans can be secured from the Secretary of the Board of Education. Bids will be opened on November 3rd.

**GARAGE**—1 and 2 story and base. Class A construction. Oakland, Cal. Architect, J. J. Donovan, Oakland. Owners, City of Oakland. The building will be erected in the rear of the City Hall and will be designed for the use of the city's machines. Construction will be fireproof. There will be a cement first floor. Interior finish will be of pine throughout. Special gasoline storage tanks will be installed. Exterior of the building will be faced with cement plaster. Plans are being prepared.

### Contracts Awarded.

**LABORATORY**—2 story and base, brick and concrete, \$24,787. Decoto, Alameda Co., Cal. Architect, James H. Humphrey, Wells-Fargo Bldg., S. F. Owners, California Masonic Home. Contractors, Thomas Day's Sons, S. F. Contract price, \$24,787.

## SAN JOSE AND THE SANTA CLARA VALLEY.

CHURCH—2 story and base, brick and frame, \$25,000. Monterey, Monterey Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, First Presbyterian Church of Monterey. The building will be designed in the Spanish style and will contain a large auditorium, Sunday school rooms and social rooms. Interior finish will be of pine and redwood with some ornamental plaster. Art glass windows will be installed. There will be a central heating system. Exterior of the building

will be faced with cement plaster. Plans are being prepared.

LODGE HALL AND THEATRE—Two-story and base, concrete and frame, \$55,000. San Mateo, San Mateo Co., Cal. Architect, Will D. Shen, 214 Kearny street, S. F. Owners, Knights of Columbus Hall Association. Besides the two-story portion of the building, which will house the lodge room and offices, there will be a one-story part given over to a motion picture theatre. Plans have been revised and new figures will be called at once. The theatre portion and first floor of the lodge rooms will be of concrete construction. Interior will be finished in pine and hardwood. There will be steam heat and open fire places. Mantels will be of tile. Exterior of the building will be faced with cement plaster.

RESIDENCES—2, 1 story and base, frame, \$1,200 and \$2,000. San Jose, Santa Clara Co., Cal. Architect, none. Owners, E. L. Jones, 201 South Second street, and S. G. Pelton, 415 South 2d street. These two houses will contain six rooms each and bath. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be an open fire place in each living room. Mantels will be of tile or brick. Tile wainscot will be used in the bath rooms. Exteriors will be covered with rustic and cement plaster on metal bath. Plans are complete and in the hands of the respective owners who will do the work by Day Labor.

ROAD CONSTRUCTION—\$8,973. Redwood City, San Mateo Co., Cal. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. The bid of Blanchard-Brown presented to the Supervisors at their last meeting, offering to construct 1.459 miles of the La Honda to San Gregorio road for \$14,503, has been rejected. The Surveyor's estimate of the work was \$8,973. The Clerk has been directed to advertise for new bids.

## Contracts Awarded.

### MARIN, CONTRA COSTA AND SONOMA COUNTIES.

FIRE HOUSE—1 story and base,  
brick, \$5,000. Richmond, Contra Costa  
Co., Cal. Architect's name not given.  
Owners, City of Richmond. Plans and  
specifications for a one-story brick  
fire house building, to be erected on  
the corner of Barrett avenue and 15th  
street, have been ordered prepared by  
the City Council at their last meeting.  
The structure will cost in the neigh-  
borhood of \$5,000 and will have a  
pressed brick front.

EPILEPTIC COTTAGE—1 story,  
frame and concrete, \$5,000. Eldridge,  
Sonoma Co., Cal. Architect, State Ar-  
chitect George B. McDougall, Sacra-  
mento. Owners, State of California.  
R. S. K. McMillen and Louis Cereghino  
San Jose submitted a bid of \$5,475  
for constructing this building. They  
were the low men. The question of an  
award has been taken up by the State  
Board of Control. A complete list of  
the bids will be found under the head-  
ing of Marin, Contra Costa and Sonoma  
Counties in this issue.

BATH HOUSE EQUIPMENT—cost  
not stated. San Rafael, Marin Co., Cal.  
Architect, Thomas O'Connor, San Ra-  
fael. Owners, City of San Rafael. Two  
bids were received at the last meeting  
of the city clerk for furnishing all  
bath and other equipment for the  
new Alameda Bath. The American  
Machine Co. bid \$8,888.88 and the  
Dea Maria bid \$9,000. Bids have been  
taken under advisement. The award  
will be made at the next meeting of  
the city clerk. The American Machine  
Co. bid \$8,888.88 and the Dea Maria  
bid \$9,000. Bids have been taken under  
advisement. The award will be made  
at the next meeting of the city clerk.

Sacramento Counties. Owners, Solano  
and Sacramento Counties. Plans for the  
proposed Rio Vista bridge have been  
approved by the War Department. The  
engineers delayed their decision be-  
cause it was found necessary to revise  
the plans so as to place the draw  
nearer the Rio Vista side of the river.  
According to the plans the bridge will  
cost about \$150,000. It will be built  
jointly by Sacramento and Solano  
Counties.

LIBRARY—1 story and base, rein-  
forced concrete, \$12,000. Vacaville, So-  
lano Co., Cal. Architect, L. M. Turton,  
Napa. Owners, Vacaville Library Trus-  
tees. The building has been designed  
in the classic style and will contain  
one large reading room, stack room  
and office of the librarian. Interior  
will be finished in pine with maple  
floor. There will be a central heating  
system. Metal book stacks will be  
used. Exterior of the building will be  
faced with cement plaster. Plans are  
complete and figures will be called for  
at once. Further mention will be  
made of the work when an official no-  
tice to contractors is published.

TRACK WORK AND FREIGHT  
SHEDS—Frame, \$14,000. Richmond,  
Contra Costa Co., Cal. Engineer, En-  
gineering Department Southern Pacific  
Co., Flood Bldg., S. F. Owners, South-  
ern Pacific Co. The State Railroad  
Commission has ordered the Southern  
Pacific to prepare plans, to be ap-  
proved by the Commission, for a  
freight depot and a standard weighing  
system. The company has been given  
60 days time from October 13th in  
which to complete plans.

RESIDENCE—1½ story and base,  
frame. Cost not stated. Pittsburg,  
Contra Costa Co., Cal. Architect, none.  
Owner, Pittsburg Congregational  
Church, Rev. Littlewood. The dwell-  
ing has been designed for a parsonage  
and will be erected on Cumberland  
street. There will be six rooms and  
bath. Interior will be finished in pine  
and redwood. Some hardwood floors  
will be used. Plans provide for open  
fire place and tile mantel. Exterior of  
the house will be covered with shingles.  
Plans are complete and the work  
will be done by Day Labor.

RESIDENCE—2 story and base,  
frame, \$35,000. Redwood City, San  
Mateo Co., Cal. Architects, Bliss &  
Faville, Balboa Bldg., S. F. Owner,  
Jacob Stern. This house has been de-  
signed for a large country home and  
will be erected on property adjoining  
that of Mr. Stern's brother. There will  
be in the neighborhood of 11 rooms,  
several baths and sleeping porches.  
Interior will be finished in pine and  
hardwood with white enamel in the  
bed rooms. Hardwood floors will be  
used in the principal rooms. There  
will be a central heating system and  
open fire places. Mantels will be of  
oak and tile. Bath rooms will have  
tile, wainscot and composition floors.  
Vacuum cleaning and a hot water sys-  
tem will be installed. A hot house,  
bath and a garage will also be  
erected. Exterior of the house will be  
covered with cement plaster on metal  
lath. Plans are complete and figures  
are being taken.

SCHOOL—2 story and base, brick,  
\$10,000. Dixon, Solano Co., Cal. Archi-  
tect, Henry C. Smith, Humboldt Bank  
Bldg., S. F. The building will cover  
large ground area and will contain  
seventeen class rooms, an auditorium

offices, departments for manual training and domestic science, interior will be finished in pine with maple floors in the class rooms. Plans provide for steam heat, program clocks and vacuum cleaning. Modern school plumbing will be installed. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared.

**STREET WORK**—Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. At the regular meeting of the City Council the bid of John Word was rejected for the improvement of 16th street as it was found to be illegal. New bids will be called for immediately.

**STORES**—1 story and base, brick, \$10,000. Richmond, Contra Costa Co., Cal. Architect, James T. Narbett, Richmond. Owner, Edward Ollis. The building will be erected at the corner of 7th and Macdonald avenue, covering an area of 50 by 120 feet. There will be two stores. Interiors will be finished in pine and redwood. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

## FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

**SCHOOL.** 2 story and base. Class A construction, \$370,000. Fresno, Fresno Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Work on the \$370,000 Fresno Normal School building will begin before the end of December, according to present indications. The plans have practically been completed by the State Architect, C. L. McLane, president of the Normal school, says two representatives of the department of architecture were in Fresno a few days ago gathering final data for the plans. The next stage in the proceedings will be the submission of the plans to the advisory board of consulting engineers. This board will meet the first part of November. Bids probably will be called for some time in November, and work will begin in December unless there is a hitch in the proceedings. The State Board of Control has given permission to the Fresno Normal Board to go ahead with the building although only one-half of the appropriation of \$370,000 is now available.

**ROAD IMPROVEMENT**—Cost not stated. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Plans are complete and figures will be opened on November 10th for grading and improving the Burneyville road near Riverbank. Plans and specifications can be secured from the Clerk of the Board of Supervisors.

**IRRIGATION WORK**—Cost not stated. Fort Bidwell, Modoc Co., Cal. Engineer's name not given. Owners, Cowhead Irrigation Project. With the visit of ex-Senator A. T. Currier and Luther E. Campbell, Southern California capitalists, to this section on an inspection trip of the Cowhead irrigation project, comes the announcement that the Modoc Irrigation Company has acquired the rights of the Surprise Valley Water Company. The new company, capitalized at \$1,000,000, has assumed the \$85,000 obligations its predecessor contracted in its efforts to consummate this great project. The project proposes the construction of a main canal for carrying the waters of Cowhead Lake to the 320,000 acres in Surprise Valley.

**BRIDGES**—Timber and concrete. Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, Modesto Irrigation District. Modesto, Owners, Modesto Irrigation District. Bids will be opened on November 10th for constructing a bridge over Briggs Ditch, a bridge over lateral No. 5, a bridge over lateral No. 1, and a siphon on lateral No. 1. Plans and specifications together with other information can be secured by addressing the Secretary of the Modesto Irrigation District at Modesto.

**STORES AND OFFICES**—2 story and base, brick, \$16,000. Fresno, Fresno Co., Cal. Architect, L. P. Contrajian, Fresno. Owner, V. S. Koshyman. The building will be erected on I street between Kern and Inyo, and it will replace the building recently destroyed by fire. The structure will have a frontage of 50 feet and a depth of 110 feet. There will be two bays on the first floor and a number of modern offices on the upper floor. Interior finish

will be of pine. Patent store fronts are specified. Exterior will be faced with pressed brick. Plans are complete and a contract will be let at once.

**CLUB HOUSE IMPROVEMENTS**—Cost not stated. Fresno, Fresno Co., Cal. Architect, none. Owners, Riverside Country Club. Extensive improvements have been planned by the Riverside Country Club. The club owns a frontage of 1,000 feet on the San Joaquin river and they intend to improve this property. The work will consist of golf links, bowling alley, tennis courts, concrete swimming tank, boat house and other extensive improvements. J. C. Forkner is the president of the club.

**ELECTROLIERS**—Cost not stated. Fresno, Fresno Co., Cal. Engineer, City Engineer, Fresno. Owners, City of Fresno. The City Council is now gathering information on the different designs and makes of electroliers. It is thought that bids for this work will be called for within a few days. The system it is thought will cost \$15,000.

**WATER SYSTEM**—Cost not stated. Reedley, Fresno Co., Cal. Engineer, City Engineer, Reedley. Owners, City of Reedley. Plans and specifications have been completed for an auxiliary water system. Bids will be taken for this work as follows: Item 1, for the construction of a pump pit; 2, for the construction of a pump house and office; 3, for the furnishing and installing of pumping machinery and accessories. Plans and specifications can be secured by addressing the City Clerk. Bids will be opened on November 17th.

### Contracts Awarded.

**CHURCH**—1 story, frame and plaster, \$6,000. Merced, Merced Co., Cal. Architect's name not given. Owners, St. Luke's Episcopal Church. Contractors, Wilcox & Groom, Livingston. Contract price, exclusive of chairs, art glass and other furnishings, \$5,500.

## SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.

**BRIDGE**—Concrete and steel, \$3,400. Sacramento, Cal. Engineer, County Surveyor, Sacramento. Owners, Sacramento County. J. H. Wells of Sacramento presented the lowest figure for constructing a bridge over Arden creek at \$3,564. Three other figures were received. Bids were referred to the Contract Committee.

**RETAINING WALL**—Reinforced concrete. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Plans and specifications for a concrete wall across the Elder creek near the Tyler place have been accepted by the Board of Supervisors, and bids will be received by them until November 5th at 10 a. m. Further information together with plans and specifications may be had from the County Surveyor.

**COURT HOUSE**—2 story and base. Class A construction, \$100,000. Chico, Butte Co., Cal. Architect not selected. Owners, Butte County. The question before the people of Chico and Oroville at the present time is the building of a new county court house. Oroville is now losing her bid against Chico's effort to get the county seat. The discussion now on is the question as to whether a court house can be built at

the cost of \$100,000. People of Chico say that it can and they also have the word of Architects in their favor. It is thought that an understanding will be reached within the near future, and the preparation of the plans for the building will be started.

**BRIDGES**—Timber and reinforced concrete. Cost not stated: Roseville, Placer Co., Cal. Engineer, County Surveyor, Auburn. Owners, Placer County. Work on three county bridges has been started by Day Labor. Supervisor Wm. Haman has sent out a crew of men to commence the construction of three new bridges in this section. Two of the structures will be of reinforced concrete, and will be at points on the State Highway. The other structure will be of wood construction and will be erected at Riverside.

**CANAL CONSTRUCTION**—Cost not stated. Grass Valley, Nevada Co., Cal. Engineer's name not given. Owners, Chicago Park, Forest Hill and Union Hills Irrigation Districts. The Chicago Park, Forest Springs and Union Hill Districts have launched a movement with the idea of organizing into a water district under the Wright Act, for the purpose of voting irrigation bonds to construct 13½ miles of canal in the southwestern portion of the county. By such a system of water distribution, it is stated that 22,000 acres will be brought under irrigation in a few years. With the canals constructed, the farmers would purchase water from the Pacific Gas and Electric Company's supply ditch at Kreiss Summit.

### Contracts Awarded.

**BRIDGE**—Concrete and timber, \$30,500. Woodland, Yolo Co., Cal. Engineer, County Surveyor, Woodland. Owners, Yolo County. Contractors, Clinton Fireproofing Co., Mutual Bank Bldg., S. F. Contract price, \$30,500.

**IMPROVEMENT TO COURT HOUSE GROUNDS**—\$16,374. Sacramento, Cal. Architect, R. A. Herold, Forum Bldg., Sacramento. Owners, Sacramento County. The contract with Teichert & Ambrose to improve the north half of the Court House block for \$16,374 was referred to the District Attorney for approval.

**STREET PAVING**—Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractors, Clark-Henry Construction Co., Sacramento. Contract price not stated.

## Two Low Men Submit Same Figure.

State Engineering Department Receive Same Figure From Two Contractors For Eldridge Work.

(By Special Wire.)

**SACRAMENTO, CAL.**, Oct. 19, 1914.—An unusual condition developed this noon when bids for constructing the Epileptic Cottage for Girls at the Sonoma State Hospital were opened. The two low bidders, R. S. K. MacMillen and Lewis Cerghino & Son, both submitted a figure of \$15,475. This is the first time in the history of the State Department of Engineering when two low bidders submitted the same figure. No action has been taken and the matter will come up for considera-

### LOS ANGELES AND SOUTHERN CALIFORNIA.

GARAGES—1 story, reinforced concrete. Cost not stated. California. Architect, none. Owners, Coast to Coast Auto Co., San Bernardino. Articles of incorporation have been filed in San Bernardino for the Coast to Coast Auto Company, which is to operate garages along the Old Trails National Highway. The incorporators are C. L. Wheatland, C. A. Anthony, G. M. Hale R. F. Cline, all of San Bernardino, and W. A. Ramsey of Los Angeles. The capitalization is \$25,000. According to the plans of the corporation, garages will be taken over from Needles to San Bernardino, on toward Los Angeles, and probably from Barstow to San Francisco and from Los Angeles to San Diego.

HOTEL—5 story and base. Class B construction. Cost not stated. Redondo Beach, Los Angeles Co., Cal. Architect, L. B. Pemberton. Auditorium Bldg., L. A. Owner, Mrs. Nelms. The building will be erected on Catalina street, having a frontage of 50 feet and a depth of 120 feet, and will contain 125 guest rooms besides a large office, dining room and lobby. Interior will be finished in pine with some hardwoods. There will be steam heat, a hot water supply and elevator service. A number of the rooms will have private baths which will be finished in tile. A tile floor will be used in the lobby. Exterior of the building will

be faced with ruffled brick trimmed with terra cotta. Plans are being prepared.

HOSPITAL—2 story and base, brick and steel. Cost not stated. Ventura, Ventura Co., Cal. Architect, Albert C. Martin, Higgins Bldg., Los Angeles. Owners, Ventura County. All bids recently opened for this work have been rejected. Plans will be slightly revised and new figures will be called. Further mention will be made of the work at that time.

BRIDGE—Reinforced concrete. Cost not stated. San Luis Obispo, San Luis Obispo Co., Cal. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. Plans and specifications for the construction of a reinforced concrete bridge over the Mascadero creek on the State Highway have been adopted by the Board of Supervisors, and bids will be received by them until November 5th at 10 a. m.

BREWERY—5 story and base, brick and steel, \$20,000. Los Angeles, Cal. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, East Side Brewing Co. The building will be erected on North Main street, covering an area of 96 by 65 feet. Extra heavy construction will be used. Interior will be finished in pine. There will be special machinery, which is not included in the estimated cost. Exterior of the building will be faced with stock brick. Plans are now being prepared.

### PORTLAND AND OREGON.

BANK AND OFFICES—4 story and base. Class A construction. Cost not stated. Portland, Ore. Architect, none. Owners, Citizens' Bank of Portland. The Citizens' Bank, 120 Grand avenue. Portland, has purchased the northwest corner of Grand avenue and Adler street and state that they will erect a four-story structure of granite, brick or concrete. As yet no architect has been selected, but it is thought that the directors of the bank will make a selection soon. The site is 50 by 100 feet in dimensions. N. U. Carpenter is president of the bank. This report should not be confused with a report printed recently relating to the new building to be erected by the First National and Security Savings and Trust Co. of Portland on property at the southwest corner of 5th and Stark streets, Portland.

APARTMENT HOUSE—2½ story and base, brick and concrete, \$30,000. Portland, Ore. Architects, Ellis F. Lawrence and William G. Holford, Chamber of Commerce Bldg., Portland. Owners, Metropolitan Investment Co. The building will be erected on 19th street near Washington, and will cover a considerable ground area. There will be eight apartments of six rooms, each apartment occupying a part of both the first and second floors. Separate entrances will be provided for each apartment. Interiors will be finished in pine, eastern oak, mahogany and white enamel. Hardwood floors will be used in the living rooms, dining rooms and reception hall. There will be steam heat and open fire places. Mantels will be of tile. Tile wainscot and floor will be used in the bath rooms. Exterior of the building will be faced with pressed brick. Plans are being prepared.

STORES AND APARTMENTS — 2 story and base, brick. Cost not stated. Portland, Ore. Architect, Earl A. Roberts, Selling Bldg., Portland. Owner's name withheld. The building will be erected at the corner of Broadway and Larrabee streets. There will be stores on the first floor. Upper floor will be arranged for modern apartments of two rooms each. Plans provide for steam heat and a hot water system. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

STORES AND OFFICES — 2 story and base, brick, \$25,000. Portland, Ore. Architects, Houghtaling & Dougan, Henry Bldg., Portland. Owner, Rodney L. Gilson. The building will be erected at the corner of 4th and Couch streets, covering an area of 100 feet square. There will be several stores on the first floor and a number of modern offices on the upper floor. Interior will be finished in pine with some hardwood. Marble and tile will be used. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

LODGE HALL AND STORE—3 story and base, brick and concrete, \$30,000. Hillsboro, Ore. Architects, Houghtaling & Dougan, Henry Bldg., Portland. Owners, Moose Lodge Hall Association. The building will have a frontage of 64 feet and a depth of 120 feet. The first floor will be leased for stores. Basement will contain a gymnasium, swimming tank, bowling alley and the mechanical equipment. Second floor will contain a large auditorium and ball room and social rooms. The third floor will also contain lodge rooms, cloak rooms and a banquet hall. Interior will be finished in pine and hardwoods. A maple floor will be used in the ball room. There will be steam heat. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

### Contracts Awarded

HEAD WORKS AND INTAKE—\$19,100. Hood River, Ore. Engineer's name not given. Owners, East Fork Irrigation District. Contractors, Andrus & Bode (North Construction Co.), Lewis Bldg., Portland. Contract price, \$19,100.

### SEATTLE AND WASHINGTON.

COLD STORAGE WAREHOUSE—1 story and base. Class A construction. Seattle, Wash. Engineer, Port of Seattle Commission, Seattle. Owners, City of Seattle. All bids for the construction of the cold storage apple warehouse have been rejected by the Port of Seattle Commission, and new plans have been ordered prepared. The new plans will include the fish storage warehouse. The Butler Contracting Company of Seattle was awarded the contract, but this award has been withdrawn. The building on which bids will be taken in about three months will cost in the neighborhood of \$200,000 exclusive of the machinery, which will cost \$200,000 additional.

## COMMERCE AND INDUSTRY OF BRITISH COLUMBIA.

[Consul General R. E. Macdonald, Vancouver.]

The consular district of Vancouver includes all of British Columbia except the island of Vancouver, and also East Kootenay, and the jurisdiction of this consulate general extends over the entire Province and Yukon Territory, with consulates at Victoria, Dawson, and Fernie, and consular agencies at White Horse, Yukon, Cumberland, Nanaimo, Nelson, and Prince Rupert, British Columbia. The Province is the largest in the Dominion, having an estimated area of 395,500 square miles.

### Lumber Industry of British Columbia.

The lumber industry of British Columbia is the most important industrial feature of the Province. Half of the industrial capital is invested in the lumbering and woodworking business, half the pay roll of the Province is derived from the forests, and 37 per cent of the annual wealth production is attributed to the same source.

The lumber cut in British Columbia in 1912 amounted to 1,457,811,929 feet, a figure in excess of any previous record for the Province. Adding the material used in railway and other construction work during the year, the total is approximately 2,000,000,000 feet.

There were 800 logging operations in progress during the year on timber lands on which a royalty was reserved to the Crown. The result of these operations for the year was approximately 1,348,000,000 feet of logs, 87,805 cords of shingle bolts, 3,920,400 linear feet of piling, 35,000 mining props, 15,500 cedar posts, and 5,993,718 linear feet of cedar poles.

The total value of the timber products of the Province for the year was \$32,500,000. The export trade amounted to 51,500,000 feet. In addition to the lumber exports, British Columbia exported to the United States 55,000,000 feet of logs cut from private lands.

There are in operation in British Columbia some 275 sawmills, large and small, with an approximate daily capacity of 5,500,000 feet.

The forest area of the Province is estimated at 182,750,000 acres, including lands covered with small trees. The stand of merchantable timber is estimated at 120,000,000,000 feet. The coast is heavily timbered from the southern border to Alaska. The forest line follows the shore and river valleys, fringing the mountain sides. The most valuable trees are Douglas fir, cypress, red cedar, white spruce, and eastern hemlock. Other trees are white pine, tamarack, balsam, yew, maple, and cottonwood.

### Shipping—Harbor Improvements.

Ocean shipping constitutes one of the important branches of business in British Columbia. There are many fine harbors along the coast, chief among which are Vancouver, Victoria, New Westminster, and Prince Rupert, the first named being the principal outlet and transfer point on the mainland, as well as the railway, commercial, and industrial center of the Province. To accommodate the increasing business, extensive harbor improvements are being made in the ports mentioned, for which govern-

ment appropriation, approximately \$15,000,000 have been made.

The improvements in the Vancouver Harbor include a Government dock, now in course of construction at a cost of \$1,000,000, a dry dock and shipbuilding plant by the Dominion Shipbuilding & Dry Dock Co. (Ltd.), on the north shore of Burrard Inlet, a total cost of \$5,000,000, work on which was recently begun, a proposed drydock, shipbuilding, and engineering scheme immediately east of the first narrows on the inlet, by the Amalgamated Dry Dock & Shipbuilding Co., at an estimated cost of \$6,000,000, on which the Government guarantees an annual cash subsidy of 1 per cent, to be paid in proportion to the expenditures on the work as it progresses.

Other improvements in the Vancouver Harbor under way or already planned for Burrard Inlet and False Creek, the two bodies of water affording harbor facilities for the city, include the following: Piers and warehouses for the Canadian Pacific at a cost of \$750,000; reinforced concrete dock just completed for the Great Northern Railway Co., \$600,000; Canadian Northern terminals and docks, including causeways and reclaiming 160 acres of tidelands at a cost aggregating several million dollars; widening First Narrows channel entrance to the harbor from 100 to 2,200 feet, at an approximate cost of half a million dollars. In addition to these harbor works, other railway and steamship companies with terminals in Vancouver are building additions and making improvements to their wharves and piers, and otherwise increasing their facilities for handling the port business.

At New Westminster, the freshwater harbor under civic control is to be improved at an estimated cost of several million dollars, and the main channel of the Fraser River is to be dredged and a sea wall constructed at the mouth of the Pitt River, at an estimated expense of \$1,000,000.

Government work at Victoria includes a breakwater 2,550 feet long, from which will project four piers, the contract for two of which has been let, one 1,000 and one 800 feet long, and each 250 feet wide. For the initial expenditure on this project the Government has appropriated \$2,500,000.

Esquimalt Harbor, on Vancouver Island, which formerly was a British naval station, is also being improved. The Government has appropriated \$500,000 for the initial work on a dry dock, which will cost when completed \$1,000,000. The dock will be 1,150 feet long and 110 wide, with water depth of 25 feet. Its capacity will be equal to the largest vessels afloat. There is also at Esquimalt a shipbuilding plant that has turned out a number of fairly large passenger and freight vessels, including the Canadian Pacific Railway Co.'s coasters.

At Prince Rupert, a port that came into existence in 1906, a large dry dock and extensive harbor improvements are being constructed that will afford ample docking and repairing facilities for vessels. It is the terminus of the Grand Trunk Pacific Railway, the last link in the construction of which was completed this year. The railway connection will add greatly to the importance of the port, as the time traversed between British Co-

lumbia and other western ports, once the route is open in natural channels. The outlet for the products of the region is through Prince Rupert.

There was considerable activity in Vancouver during the last year, notwithstanding the serious depression through which it is only beginning to recover. Buildings completed and those being built last year which will be finished during the present year cost approximately \$7,250,000.

### Opportunities for American Trade.

British Columbia offers splendid opportunities for American Trade. Conditions are especially favorable for establishing new business. The country is still in the development stage, and is without the established trade connections common to older countries, but great progress was made in railway building in the Province during the last year, an aggressive campaign on railway construction is still going on, and transportation facilities are being extended into new territory, covering areas of country hitherto practically inaccessible, or reached with difficulty. In addition to railway building there has been great activity in the construction of highways, which has the encouragement and material assistance of the provincial government.

The increasing interest in forming in British Columbia furnishes opportunities for the sale of farm implements, machinery, and tools. The activity in the building trades furnishes a market for building material, and the construction of highways require road-making machinery and tools, all of which can be supplied by American manufacturers.

In the commercial centers, where there is an established trade, practically every article of utility of American manufacture can be found in the stores and shops, many of which are advertised as American, showing that the products of the United States are favorably regarded by the trade. Another important consideration is the large number of American citizens residing in the Province, many of whom favor American-made articles, especially in furniture, office furniture and supplies.

### Furniture—Building Hardware.

There is a demand in British Columbia for American-made furniture. Styles in architecture and the plans and arrangement of homes, especially in the matter of furniture, are influenced largely by the customs prevailing in the United States. The bulk of the stocks of furniture carried by the large wholesale and retail dealers in Vancouver are imported from the United States, and the trade depends largely upon the United States for its supply of home furnishings.

Building hardware is also in demand. The great activity in the building trades in recent years has furnished a market for hardware of all kinds, in which American exporters have secured a fair share of the trade. There is less building at present owing to the general financial and industrial depression prevailing throughout the Province, but the curtailment of trade incident to this unfavorable condition will, when it has passed, result in an increased demand for hardware that should be made the most of by American manufacturers and exporters.

## SAN FRANCISCO SECOND IN ERECTION OF CONCRETE BUILDINGS.

### BUILDING OPERATIONS SPASMODIC.

#### General Decrease in Expenditures in 1913, but No Index to Country's Prosperity.

If the degree of activity of the building industry is taken as an index to prosperity figures gathered by the United States Geological Survey of building operations in 1913 show that prosperity is sporadic. For instance, New York City, the largest building center of the country, showed in 1913 a considerable decrease from 1912, whereas Newark, only a few miles away, showed a large increase. Chicago, which showed the largest decrease in 1912, rallied and showed the largest increase in 1913. Most of the cities that showed increases in 1912 showed decreases in 1913. A few that showed decreases in 1912 showed increases in 1913, though none of these, except Chicago and Pittsburg, were among the larger cities. Many cities ascribe the decrease in 1913 to the fact that in 1912 the structures erected were unusually costly.

In 48 of the largest cities of the country, the total cost of building operations in 1912 was \$659,515,746, compared with \$728,989,516 in 1912. The greatest decrease was in New York City, \$56,414,655. The largest increase was in Chicago, \$6,492,527. New York City is the leading city in the cost of building operations, notwithstanding its large decrease in 1913. Last year the building operations of that city cost \$107,104,767. The maximum annual cost of building operations in New York City was reached in 1909, when it was \$186,917,477.

Efforts were made by the Geological Survey to obtain detailed information for all cities of 25,000 or more inhabitants—157 in number. Information was obtained from 147 of these cities in sufficient detail to permit the compilation of statistics. In these 147 cities the building operations in 1912 cost \$859,657,250. In 708 of these cities the new wooden buildings erected in 1913 cost \$174,197,866 and new brick buildings cost \$226,478,584. All other new buildings cost \$115,894,022. The cost of all additions, alterations and repairs was \$78,483,933. New concrete buildings were reported by 71 cities, of which Philadelphia was the leader, reporting a cost of \$4,634,855, and San Francisco was second, with \$3,715,389.

### STEEL PRODUCTION INCREASED.

The total production of all kinds of steel ingots and castings in 1913, according to the American Iron and Steel Institute, whose figures are accepted by the United States Geological Survey, was 31,200,871 long tons, against 21,599,931 long tons in 1912. The production of steel by the electric process in 1913 amounted to 26,180 tons, compared with 18,709 tons in 1912. In 1909 only 55 tons of electric steel was produced. In December, 1913, the number of completed runs, which were equipped for the manufacture of steel by the electric process, was an increase of 5 over the number a year previous.

The total marketed production of

ferro-alloys in 1913 as reported to the United States Geological Survey was 296,207 long tons, valued at \$13,015,362, compared with 328,885 long tons, valued at \$12,225,776, in 1912. Of the production in 1913, 121,517 long tons was made from imported ores received from Australia, Brazil, Canada, India, Indo-China, and Russia.

### CROTHERS FOR SUPERIOR JUDGE.

#### RESOLUTION Adopted and Approved by Over 500 Leading Attorneys.

Whereas, Superior Judge George E. Crothers, was appointed because of his exceptional qualifications in temperament, training and ability; and

Whereas, Judge Crothers has been designated by both the past and present Presiding Judge for the trial of important public and equity cases, which he has tried with such conspicuous fairness and ability that his decisions have the universal respect of counsel and litigants; and

Whereas, we, members of the bar of San Francisco, recognize the character and ability of Judge Crothers, and the urgent need of keeping him upon the Superior Bench;

Resolved, That we, regardless of political affiliations, recommend the nomination and election of Judge Crothers to succeed himself as Superior Judge, and we urge upon the members of the bar of San Francisco the duty of assisting in the election of Judge Crothers and the other men of proven integrity and ability who are candidates for judicial positions.

Judge Crothers has made good. He is a man of high character and learning and has proven himself eminently fitted for the position to which he has been appointed. Eight Superior Judges are to be elected at the general election November 3rd. Every voter should include him among the first names on his ballot.

### \$85,000 LUMBER SALE.

#### United States Forestry Service Opens Bids on 26,650,000 Feet of Timber in Crater Forest.

KLAMATH FALLS, Ore.—The Forest Service recently opened bids covering the sale of 26,650,000 feet of timber on the Crater National Forest, Oregon. The successful bidder is the Lamm Lumber Company.

The timber is situated on the watershed of Odessa Creek on the west side of Upper Klamath Lake, and consists of 21,000,000 feet of Western yellow pine and sugar pine, 5,000,000 feet of Douglas fir and oak, on foot of white fir.

The company is to pay for the timber at the rate of \$3.50 per thousand

## Time Table.

### Oakland, Antioch & Eastern Railway.

#### LEAVE KEY ROUTE FERRY.

Leave Daily except as noted.  
8:00A Bay Point, Diablo and Way Stations.  
9:00A Sacramento and Pittsburg only.  
Carries Parlor Observation Car.  
11:00A Sacramento, Pittsburg, Bay Point  
11:20A Bay Point and Way Stations.  
1:00P Sacramento, Pittsburg, Bay Point  
1:40P Concord and Way Stations.  
2:00P Sacramento, Pittsburg, Bay Point  
4:00P Bay Point and Way Stations.  
4:10P Pittsburg, Sacramento, Marysville, Colusa, Orville and Chico, Observation Car.  
5:15P Concord, Diablo and Way Stations, except Sundays.  
6:00P Pittsburg and Way Stations.  
8:00P Sacramento, Pittsburg & Way

### OAKLAND, ANTIOCH & EASTERN RAILWAY

Key Route Ferry, Phone Suter 2339.

Red Line Trans. Co., S. F. People's Express Co., Oakland.

for the Western yellow pine and sugar pine and 50 cents per thousand for the Douglass fir and white fir.

This sale will bring into the treasury of the United States approximately \$55,000, and 35 per cent of this amount will be spent locally for schools and roads.

The company plans to erect a saw mill on Upper Klamath Lake for the sawing of this timber.

### PIG IRON INCREASES.

The marketed production of pig iron in 1913, according to reports made to the United States Geological Survey, was 30,588,935 long tons, valued at the furnaces at \$158,342,315, compared with 30,180,969 long tons, valued at \$120,562,388, in 1912, an increase in quantity of 207,966 tons and in value of \$37,779,927. The average price per ton in 1913 was \$15.08, and in 1912 it was \$13.95.

### ADDRESSES AT LATIN AMERICAN TRADE CONFERENCE.

A pamphlet giving the statements made by representatives of Latin American countries at a trade conference with American bankers and business men in Washington, Thursday, September 10, has been issued by the Bureau of Foreign and Domestic Commerce and is available for general distribution. The conference was called by the Secretary of State and the Secretary of Commerce to obtain a clear statement of the commercial needs of both the United States and the Latin American countries and the facilities for co-operation in supplying those needs. The statements made by the Latin American representatives set forth the conditions in their respective countries and the particulars in which the assistance of interests in the United States is desired. The opening statement by the Hon. William J. Bryan, Secretary of States, and an address by the Hon. William C. Redfield, Secretary of Commerce, are also included. The pamphlet may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., for 5 cents.

## COMMERCE OF SALVADOR

(Vice Consul General A. J. Perrone,  
San Salvador.)

The latest available international trade statistics for the Republic of Salvador show the United States maintaining first rank in both the imports and exports of the Republic. Official reports of the Government indicate the total trade for 1913 to have been over \$5,500,000, of which the imports were \$3,170,000, a decrease of nearly 10 per cent compared with those of the previous year, and the exports amounted to over \$9,400,000, an increase of about 10 per cent. This latter difference is accounted for by a corresponding increase in the coffee production.

The decrease of the imports may be explained as a natural effect of the general financial condition which the republic underwent during the latter part of the year. It was toward the end of the third quarter that a slight depression began to be felt; imports and exports fell off, though almost imperceptibly, and early in November the so-called Banco Nacional del Salvador became insolvent, causing the failure of several concerns of the culture and dependent institutions broad, such as the firm of Trigueros, Arnold and Co., of London, and a banking house of Paris, a subsidiary of the Banco Nacional del Salvador. Capital was tied up and the situation became serious; business appeared to be at a early change for the better.

## Imports from the United States.

The imports from the United States declined from a total of \$2,627,700 in 1912 to \$2,491,145, in 1913. The greatest loss is to be noted in the value of cotton cloth. In 1912 the imports of this article from the United States were valued at \$628,758, compared with \$46,385 for 1913. The following are some of the principle commodities imported from the markets of the United States for the year 1913: Glass and china ware, \$4,374; Hardware, \$495,692; Machinery \$181,074; Petroleum, \$25,226.

## Financial Conditions.

Official statistics for 1913 show that the total revenues of the country were \$5,493,653, while the expenditures were \$6,471,564, a deficit of \$977,911. The figures for the calendar year 1912 were: Revenues, \$6,147,119; expenditures, \$6,671,520, a deficit of \$524,401.

On January 1, 1912, the total debt of Salvador according to the report of the Minister for Finance and Public Credit, was \$7,091,609; amortizations during the year amounted to \$132,094.

The semiannual balances of the four banks of Salvador, issued and published by the Government of Salvador early in July, 1913, showed the banks to be in excellent condition, the Banco Nacional del Salvador, with the others, showing a good profit for the period and paying a dividend of 4 pesos on 50 per cent paid-up stock. The Banco Nacional del Salvador, however, failed early in November, 1913, with a loss of \$1,600,000. This failure affected the business interests of the country to a considerable extent. It brought about a lack of confidence in the remaining three banks, which caused runs on all of them. This situation was saved by a decree of the Government issued on November 7, 1913, which required the banks to import half a million

pesos silver with which to meet their obligations, and exempting them from the necessity to pay such obligations, except in bank notes, for a period of six months thus enabling them to protect themselves by holding their silver in reserve.

## Public Works and Improvements.

While the work of paving and sanitation of San Salvador, the capital of the Republic, has not actually begun, steps have been taken to bring this about as early as possible. The local board of public works (Junta de Fomento) has been considering questions to further these projects. The impending difficulty at present is the lack of funds to begin the work, which the municipality has been unable to borrow owing to the financial difficulties arising from the failure of the Banco Nacional del Salvador.

The board of public works is carrying to conclusion as rapidly as possible the construction of the new national theatre in the capital and is completing the municipal theatres in Santa Ana and Sonsonate. The water supply of the capital and conditions connected therewith have been improved. Several large bridges and a number of small ones have been built during the year, and the principal highways have been slightly improved. The telephone and telegraph lines and service have been extended and improved, and the Government has for some time been considering the installation of a new and more modern telephone system.

A concession has been granted to a subject of Austria-Hungary for the digging of artesian wells, a prime necessity in Salvador owing to the scarcity of water in many sections of the country during the dry season.

The school system of the Republic has been improved and new schools established, such as the School of Graphic Arts and the School of Commerce.

## Railway Construction.

The Salvador Railway Co. (Ltd.) has continued its schedule of train service between the capital city and the port of Acajutla, and from the town of Sitio del Nino to the second city of the Republic, Santa Ana, a distance of 25 miles. The work of reconstructing the branch line from the town of Ateos to the town of Santa Tecla, which has not been in operation for several years, is nearly completed.

The Salvador section of the International Railways of Central America has progressed satisfactorily, the surveys having reached San Salvador and work having been taken up at Santa Ana on the same line. The matter of constructing a railroad from the port of La Libertad to San Salvador and Santa Tecla has been placed under the supervision of a concessionaire (whose name is on file in the Bureau of Foreign and Domestic Commerce). It is planned to begin work on this road in the fall of 1914 and to complete the construction within two years.

## Harbor and Shipping Facilities.

The wharf which was commenced in 1912 at La Union is completed and greatly facilitates the loading and unloading of steamers. The unsatisfactory methods of handling freight by lighters is still necessary at the ports of Acajutla and La Libertad. The steamers of the Pacific Mail Steam-

ship line, even in winter, had to touch at La Union for 10 to 12 days on a round trip to Panama, and the same delay for this service to Europe. The port of the Salvador Railway Co. (Banco Nacional del Salvador) at Acajutla, a harbor of deep, open bays, has become even more irregular, owing to the sinking of one of its breakers, the *Apollonio*, in 1914.

## MINOR JOBS ABOUT TOWN.

907 Gough, reshing roof, owner, E. C. Stewart, Premises, contractor, Ferguson & Son; cost, \$147.  
N California, 10 W Joice Place, alterations, owner, H. C. Lackman; cost, \$150.  
2817 Greenwich, alterations, owner, Mrs. A. Kuchuk; cost, \$100.  
3121 Washington, alter stairs, owner, W. Levy, 1501 Larkin; contractor, R. Ferguson, 1672 Geary; cost, \$200.  
SW Broderick and Green, construct pergola; owner, J. Pasqualetti, 785 Market; cost, \$190.  
1207-07-A Guerrero, terrazzo steps; owner, M. Tierney; cost, \$250.  
311 Spruce; repair for garage; owner, C. A. Shurtliff, Premises; cost, \$150.  
Market, Turk and Mason, electric sign, owner, Turner & Dahnen, Prem contractor, Novelty Elec. Co., 165 Eddy; cost, \$200.  
SW Hayward and Harrison; construct marquise; owner, Independent Brewing Co, Seattle, Wash.; contractor, Golden Rule Metal & Iron Works, 255 Jersey; cost, \$100.  
2145 Lombard; add porch and install door; owner, Jas. Early; contractor, R. Malster, 777 Ellis; cost, \$150.  
14 Phoenix; alterations; owner, F. Rodriguez, Premises; cost, \$200.  
1013 Stainer; alter and repair; owner, P. E. Acton, Premises; contractor, S. A. Hansbrough, 659 Fillmore; cost, \$200.  
1119 Stanyan; alter doors; owner, J. H. Mortza, Premises; cost, \$175.  
2164 Broderick; one-story frame shed, owner, May C. Monsarrat, contractor, Kenyon Pacific Co., Market & Franklin; cost, \$175.  
561 Columbus; repair store, owner, Ernest Lepoli, Premises, contractor, G. Gindici, 299 Broadway; cost, \$125.  
E Monroe 68-2 N Bush; alter apartments; owner, H. B. Pinney, 2830 Buchanan; cost, \$100.  
3224 22nd; alterations, owner, M. A. Deney, Premises, cost, \$165.  
1122 Market, alterations, owner, M. J. Platchek, Premises; cost, \$125.  
S Turk 175 W Baker, alter dwelling, owner, Mrs. B. Beissi, 1856 McAllister; cost, \$100.  
2917 Clay; new front and minor changes, owner, Dr. F. W. Richardson, Premises, contractor, Theo. S. Horn, 1419 Hyde; cost, \$250.  
171 6th, electric sign, owner, Aime Brewing Co, 1101 Sansome, contractor, Novelty Elec. Sign Co., 165 Eddy; cost, \$100.  
NE Mission and 15th, electric sign, owner, C. Morden, Premises, contractor, Novelty Elec. Sign Co., 165 Eddy; cost, \$100.  
1100 Grant Ave., electric sign, owner, Leong Entow, Premises, contractor, Brunfield Elec. Sign Co., 18 7th; cost, \$100.

300 San Bruno Ave. one-story frame barn, owner, S. Coen, Premises, cost, \$150.

673 Pacific, alterations; owner, Jos. Deonic, cost, \$200.

SE Webster and Vallejo; alter dwlg., owner, M. Malloy, 2825 Van Ness Ave.; contractor, Geo. Healey, 110 Jessie; cost, \$250.

1923 Bush; cement floor, owner, Wm. H. Kerrigan, 5153 Shafter Ave., Okd., cost, \$100.

1448 Union; excavate, concrete floor, and wash tray; owner, Mrs. C. Maushardt, Premises, contractor, L. Hippeley, 1164 Grove; cost, \$200.

E Steiner 70 N Post; ratproof basement; owner, A. Hansen Estate, 440 16th; contractor, Grant Fee; cost, \$100.

17 Sonoma; alter front; owner, P. Fario, Premises; cost, \$165.

237 Arguello Blvd.; one-story frame garage; owner, Ike Walker, Premises; contractor, T. J. Sheridan, 1468 Page; cost, \$100.

2228 Market; shingle roof and new gutter; owner, Mrs. E. C. Anderson; cost, \$100.

131 5th Ave.; erect furnace in basement; owner, E. Gmley, Premises; cost, \$160.

End of Chenery; two-story frame stable; owner, Crocker Estate Co., 525 Crocker Bldg.; contractor, Wm. Regan 326 Hanover; cost, \$400.

9 Fifth Ave.; repair for garage; owner, G. Brown, Premises; cost, \$50.

352 Linden Ave.; repair stable; owner, R. W. Leslie, Premises, cost, \$225.

SE Second Ave and Clement; shingle wall; owner, Wm. Spruce, Premises; cost, \$175.

#### PRESENT CONDITIONS IN ECUADOR AND CHILE.

[Vice Consul General Charles F. Baker, Guayaquil, Ecuador, Sept. 12.]

Conditions in Ecuador at present are not far from normal. The country had the good fortune to have exported the major portion of its cocoa crop before the war began. The rest of the crop is being exported, mainly to the United States, some small shipments going to England, Spain, and Italy. The prices today are 20 to 25 per cent lower than usual, it is true, but it is infinitely better to get these prices than to have no market at all, as might easily have happened. As it is, the farmers and the exporting merchants are able at least to pay expenses and to keep their labor forces intact.

Most of these goods go to New York and San Francisco, so that the United States is saving the situation in Ecuador, which fact is highly appreciated by the commercial interests of this country.

#### Great Variety of Goods Wanted—Remittances.

As regards imports, Ecuador seems to be pursuing a very sound policy, buying lightly, for the time being, and only in the line of necessities. It is said that if American interests aside from those dealing in necessities, seem to receive any special encouragement, or the price of goods should not be supposed to be kept in touch with the market, it would do little business.

Ecuador is almost entirely dependent upon the outside world for every-

thing but sugar, rice, vegetables, fresh fruits, tobacco, meats, and lumber.

#### Public Works.

Public works, such as sanitation at Guayaquil, railway surveys, railway construction, and various minor municipal improvements, have been continued without interruption.

[American Minister Henry P. Fletcher, Santiago, Chile.]

#### Unemployed Nitrate Workmen—Exchange.

The blow given to the nitrate industry by the European war deprives the Government of Chile of its main source of revenue and has already thrown many men out of employment. These men, being unable to subsist in the pampas, are being brought to Valparaiso and Santiago, and to keep them employed the Government proposes to hasten construction work on several branch railway lines and to employ as many as possible on other public works, including the highways, which are in need of repair.

According to the Minister of Foreign Affairs, arrangements have been made whereby Chilean currency will be delivered here against gold deposits to the order of the Chilean Government in certain New York banks. This has been of great assistance to the American and other companies operating in Chile, who found themselves in urgent need of currency to pay their employees and unable to obtain it in the usual way by selling drafts on London, because, since July 30, the banks have refused to quote London or European exchange, and heretofore practically all exchange business was done on London.

The establishment of an American bank in Chile would, in my opinion, undoubtedly facilitate and stimulate our trade, and is practically a necessity if we expect to get our share of the business here.

#### 'PREPARE FOR PEACE!'

The United States is a peace loving nation. There is not the slightest danger that it will ever succumb to what is known on the continent as "militarism." But that is not reason why I should refuse to take the precautions that common sense dictates to safeguard itself from attack.

It does not need and it does not want a large army. It does want a highly efficient army, with enough available reserves to make an effective defense. It does not require the largest navy in the world. It does require a navy large enough to protect it from invasion and to make its word respected.

In the next few years the Monroe Doctrine is likely to be challenged, it never has been before. If this government is to enforce the doctrine and to prevent the establishing of foreign military and naval bases in the New World, it must be prepared to do something more than say, "Oh, please don't do that." If it is so prepared it won't need to do anything more than say "Please." If it isn't so prepared it must be ready to see the Monroe Doctrine flouted, and to get the retort, "What are you going to do about it?"

The issue raised by Representative Gardner of Massachusetts in his resolution of investigation is not one of militarism or anti-militarism. It is one of self protection.—Kansas City Star.

## Editorial Comment.

### THE PARALLEL OF 1908-9.

Six years ago Europe was on the brink of war, and a conflict was only narrowly averted. The events leading up to that incident are of especial interest today, paralleling as they do some of the events that preceded the great war.

When Russia fought Turkey in the '70s, Austria obtained, as a reward for her neutrality, control of the Turkish provinces of Bosnia and Herzegovina. These provinces were inhabited by Servians, and while their administration was left to Austria, Servia looked forward to their ultimate annexation. The announcement in 1908 that Austria had formally annexed the two provinces created excitement almost equal to that occasioned by the dispatch of the ultimatum to Servia in July, 1914.

England at once announced that any modifications of the treaty of Berlin under which Austria was administering Bosnia and Herzegovina must be approved by another European congress, and Russia and France supported the demand. Germany, as was the case six years later, came to the aid of its ally. The tension increased through the winter. Russia began mobilizing. A note from Berlin conveyed the information that if military preparations continued, Russia would have Germany to fight as well as Austria. The czar's government was still crippled from its war with Japan. It could not afford a war with the great military monarchies of Central Europe. So it complied with the German demand.

Meanwhile England discovered a way out by which the members of the Triple Entente managed to save their face. Sir Edward Grey announced that Great Britain could not admit the right of any power to alter an international treaty without the consent of the other parties to it. But as Turkey was the power chiefly affected by Austria's action, England would be content to await its pleasure.

Turkey, knowing there was not the most remote possibility of ever regaining the provinces, was willing to compound Austria's offense by a small money payment, and the war danger gradually passed. A little later the kaiser, visiting Vienna, reminded the Austrians that he had stood 'in shining armor' beside their ruler in the recent crisis.

Undoubtedly the German government was ready then, as it was last July, to go to war on behalf of its ally. The proceedings of 1908-9 recall the statement made in the German official "White Paper," issued after the outbreak of war:

The Austro-Hungarian government advised us of its view of the situation (regarding Servia) and

asked our opinion in the matter. We were able to assure our ally most heartily of our agreement with her view of the situation and to assure her that any action she might consider it necessary to take to put an end to the movement in Servia directed against the existence of the Austro-Hungarian monarchy would receive our approval. We were fully aware in this connection that warlike moves on the part of Austro-Hungary against Servia would bring Russia into the question and might draw us into a war in accordance with our duties as an ally. However, recognizing the vital interests of Austro-Hungary which were at stake we could neither advise our ally to a compliance that would have been inconsistent with her dignity, nor could we deny her our support in this great hour of need.

War would have resulted in 1908-9 if Russia had been in shape to fight. Under analogous conditions in 1914 the war came because Russia refused to yield.—Kansas City Star.

There are two contrasting items in the world's news that show the folly of war. One showed how the people of Europe are flocking to subscribe to the war loans, and the other how the people of this nation were subscribing to the red cross funds and instituting means for the succor of the thousands of homeless and starving of Europe, made so by the armies of neighboring nations and by the funds that the people of Europe have subscribed.

So the world goes on so long as the world continues to arm and to listen to the talk of war. So long it will go until there is an effective international police that can and will discipline a nation that does not obey the law.

The project of bringing the destitute Belgians to California seems to be gaining favor with the people generally. It is worthy charity and even if some do become charges on the country we can help the world a little by help bearing the burden that has fallen on the innocent because of this brutal war.

There are a great many manufactures in Europe that are now at a standstill. And no doubt they will be for some time to come. Our people must find a substitute for the articles that have been imported heretofore and perhaps many of these people might be useful in building up manufactures of the articles that were produced in their home country.

This war may mean the end of kings and queens, as John Sobieski believes, but whether it does or not it means the end of hundreds of thousands of just plain people.

As many as 72 different kinds of wood are used in the manufacture of amphibious landings, and ships in this country.

## Some Suggestions On Estimating.

By L. M. Wilson in the Wood-Worker.

Estimating is being accomplished along more scientific lines each succeeding year, and the estimator who has a good, rapid and accurate system for this important work possesses something to be proud of. When I say rapid system I don't refer to the estimator who, when called upon to make an estimate on some work, begins by finding the number of cubic feet in the building or case and multiplies this by some mysterious fraction. While a few of these systems do very well in making a lump bid, they are not practical when considered from a business standpoint.

But these methods are fast disappearing. One reason for this is that the mill owner now wants his work done with some system. Most mills now have a list made out of all the different parts, and the listed forms are turned over to the estimator, who places an estimate on each part separately. These sheets are then handed to the proprietor or general manager for final approval. This listing of the different parts serves a two-fold purpose. One is that when the estimate is receiving its final examination, if one sees some part on which the estimate looks to be either too high or too low, the item can be checked off and the matter taken up with the estimator. The other good feature is that quite frequently the builder desires to make some change in the plans, such as leaving out a door or window or some interior change, and by referring to the parts to be changed the estimator can inform the builder in a few moments just what it will cost to make the change.

One method employed on dwellings, by some estimators, is to take the number of square feet contained in each floor and multiply this by some fraction; on furniture and store fixtures they find the number of cubic feet in the piece and multiply by some fraction. I have found, however, that this method is the cause of a great deal of annoyance. For instance, should the proprietor ask what a certain part of the work had been estimated at—that is, a section of some case that had been estimated in one solid body—you have to refigure this section, while if you make a list you can secure the estimating sheet for this contract and show him in a few minutes the amount at which this section had been estimated.

When estimating store fixtures or interior finish, it is only necessary to find the cost of one lineal foot and multiply the number of lineal feet in the design by this cost. But when estimating what is termed open work, one can work very accurately and rapidly upon the following method: Suppose we have to make an estimate upon some wall shelving, say 8-ft. high, 20-in. deep and 72-ft. long, the ends to be paneled and all exposed parts to be made of quartered white oak, the top, bottom, shelves and back to be made of cypress, the shelving to be made with eight com-

partments, 4-ft. on centers, joint to be in center, the pilasters to be 7x3-in. x 7-ft., with base 5-in. and cornice 7-in. high.

First we find the amount of material in the paneled ends, which is 25½-ft., and in the nine pilasters, 15½-ft. Next find the amount of material needed to construct the style of cornice and base. Then find the amount of material required to edge veneer and shelves and any part of the top or bottom which will be exposed. Add these amounts together and multiply by the fixed price you have on quartered white oak. Some estimators figure the strips to be used as edge veneers at a much lower price than the rest of the stock. I think this is wrong, for the firm pays just as much for the strips as for the wider stock, therefore they should be estimated at the regular market price.

Having obtained the amount of quartered oak required, and cost of same, we next find how many feet of material there is in one lineal foot of the top, bottom, back and shelves, and multiply this amount by the length of the case, which gives the total amount of stock required to construct these parts. Next we find the amount of material in one division, which may be either frame or panel construction, and multiply this amount by the number of divisions required, which, in this case, is eight, two being used at the center joint. Then find the amount of material in floor ribs, add all the amounts together and multiply by the market price you have on cypress. As to the amount to add for loss on these woods, you must decide this for yourself. Under average conditions I add 35 per cent on quartered oak and 15 per cent on cypress.

In estimating the machine and cabinet work much depends upon the kind of men your firm employs, also the equipment of the plant. Where one has no cost sheet to refer to, doubling the cost of material will prove a very safe way of estimating this kind of work—that is the style of case described. Suppose the total cost of material required to complete this case amounts to \$30. To this we will add \$20 more, to cover the cost of machine and cabinet work, making a total of \$50 for material and labor. On work which requires a large amount of machine and cabinet work this rule is not applicable, a great deal depending on the experience you have had in estimating on high-class work.

Next take the finishing. There are several good methods for estimating this part of the work, but I will only give two of them, and, owing to there being such a large difference in the cost in different factories, it is impractical to give exact figures. On large contracts first note the quality and kind of finish required—some work and some parts may only require one coat, some two and some three, and if it is to be rubbed and oil finish. The first thing to find out in the amount of the different kinds of mate-

rial to be used which will be required to finish one square yard or foot. By considering the scale of wages paid the finishers and the number of square yards or feet in the contract, one can take a safe and close estimate on the work. There is such a vast difference in the price of material purchased, and methods for doing the work, that when entering the employ of a new firm it is best to consult the invoice book and cost sheet of the finishing room.

On odd work, where one has no cost sheet to refer to and no specified kind of finish to be used, I usually add 15 per cent, which in this instance would be \$9. This brings the total cost of shelving to \$69, to which we will add 25 per cent for overhead charges, or \$17.25, making the entire cost of the shelving \$86.25, or about \$2.69½ per running foot. If the manufacturer has to bear the expense for shipping, 7 per cent of the total cost will usually cover it. Do not be misled and take these figures as a basis for making an estimate, as they are only approximate and only used to illustrate the method. As stated in the beginning, one must be governed to a certain extent by the labor conditions and the equipment for getting out the work. Some estimators on this class of work find the number of square feet face and multiply by 3. There being 232-ft. x 8-in. face measure in the case under illustration, it would make their estimate about \$84, but this is not a safe method, and should be used only in giving an approximate cost.

Any one not accustomed to making a list of the different parts with amount of the different kinds of material required to construct same, might say this method is too complicated, but when all things are considered, it is not so complicated as it looks. One advantage gained is that where one has a list to refer to, if the estimate looks to be too high, it is an easy matter to see just what part will stand cutting. This is frequently done in order to bring the figures down to what is considered a correct estimate on the work.

In making an estimate on a frame dwelling, find the cost of one square of the outside walls and multiply the number of squares by this cost. This method can be used also in estimating the inside walls, floors and roof. Figure the corner strips and cornice separately; the average cornice will cost from 25 to 30c per lineal foot. Most mills have their own fixed price for the regular sizes of door and window frames, but in estimating odd frames, such as French windows, front entrances with side lights, and special dormers, I have found it the best policy to make a list of the actual amount of material and the different kinds required to construct the frame. Then by comparing the construction of the frame with the regular stock of some similar frame which you have the cost of, you are always sure to give a correct estimate on the frame

to be made. When one has had several years' experience in different mills, working under various conditions, the work of estimating becomes more simplified, and it is not long until you can almost tell what an odd frame is worth by looking at the drawing; but this is not a safe method when competing with other firms.

Another reason why it is a bad practice to depend entirely on one's judgment and experience in estimating some part of the work that looks familiar, or in making a lump bid, is that if the firm employing an estimator who has adopted this method, should install a cost system, he will be in hot water almost continually. Allowing that the total amount of the bid is correct, yet when the cost is figured up on the different parts, you will find that the estimate may be \$15 too high on one part and \$10 too low on another. So, when estimating some specially-constructed frame, I don't think it safe to find the number of square feet face and multiply by some fraction.

In estimating stair work, find cost of one rise and run and multiply this amount by the number of rises in the stair. This method will be both accurate and rapid when one becomes familiar with it. The newels and any paneled work should be estimated separately. A very neat style of panel work can be furnished for 40c per foot in quartered oak, and 35c in plain oak. The cost of newel and angle post depends on the design. A round-corner rise and tread are usually estimated at \$5. For installing the regular pattern of platform stairs, \$25 is a safe estimate where a good stairbuilder is employed.

In estimating cased openings I have found that a great deal of time and useless figuring can be saved by figuring the opening complete, but writing the estimate out in itemized form. Should the opening have a number on the blueprint, give the estimate the same number. By using this method it is only necessary to estimate one opening, then count the number of openings shown of this size and pattern. When estimating heavily-cased openings, of some special design, I find it a good plan to get the cost of one lineal foot and multiply this amount by the number of lineal feet of this pattern to be made. Circle work is generally figured three times the price of straight work.

My advice to any young man who intends taking up this line of work is: Don't get into the habit of "taking a shot at it," as I have known some estimators to do. Study construction thoroughly, both in the mill and out on the job. Any spare time you may have can be profitably employed in visiting the different departments and getting the foreman to instruct you as to how this or that piece of work is done. Find out, as nearly as possible, the quantity that can be machined in a day on the different machines. If you think it will be of benefit to you, weigh the amount of glue, screws and nails used in some piece of work, so you can figure accurately. Last, and what I consider the most important part in becoming a successful estimator, is, keep in close touch with the cost clerk, jotting down any notes from time to time that you think will help you in the future.

# ELECTRICAL ASSOCIATION PROTESTS AGAINST PROPOSED ORDINANCE.

The San Francisco Section of the California Association of Electrical Contractors and Dealers have protested to the Supervisors against passing the proposed ordinance regulating the erection and maintenance of power and distribution plants and substations in connection therewith.

The Association states that the ordinance would interfere with any company doing business of furnishing the public with electric light and power, from making the necessary improvements to their service and thus working a hardship on the consumers. The matter will be taken up at the next meeting of the Board of Supervisors.

ment, owner, Somer E. Iate Co., 210 California, cost, \$100.

101 Guerrero; repair roof; owner, Gus Mahony, Premises, cost, \$100.

## WANTS GRADING FIGURES.

Engineer Charles E. Wetherill, 110 Jessie street, has plans for grading three city blocks located in the Richmond District and bounded by 29th, 32d avenues, Anza and Balboa streets. The material to be moved is light sand which is to be deposited in a fill adjacent to the property. Mr. Wetherill can be seen at 110 Jessie street, any day between the hours of 12 and 2.

A demonstration rice mill will be built in Butte County, Cal., by a Scottish rice machinery manufacturing concern, says the Sacramento Bee.

Throughout the national forests the rangers are posting the roads with permanent guide signs which tell distances and directions, especially at forks and cross-roads. The signs are usually put up in the winter when other work tends to be light. On some forests the rangers go on snowshoes, signboards to the roadside trees, dragging loaded sleds and nail the

## CONTRACT LET FOR STEEL ROLLING DOORS.

One of the largest contracts for steel rolling doors that has been awarded for some time, has just been let by the State Board of Harbor Commissioners to the Kinnear Manufacturing Co. for steel rolling doors for Piers 16, 18 and 37 on the waterfront of San Francisco.

The order specifies 151 openings varying in size from 28 feet wide by 22 feet high to 45 feet wide by 22 feet high.

This last order will make a total of 10 piers equipped with Kinnear Steel Rolling Doors and Shutters.

## APPOINTMENT OF COMMERCIAL ATTACHES.

The Department of Commerce announces the appointment of two more commercial attaches, among whom is Mr. Verne L. Havens, of Nebraska, commercial attache at Santiago, Chile, who has been chief or consulting engineer on many railway, electric, and irrigating projects throughout Latin America, and has made commercial reports for financing new enterprises. He is a member of the American Society of Civil Engineers.

American manufacturers and exporters desiring to communicate with any of the commercial attaches should address their letters to the Bureau of Foreign and Domestic Commerce, Washington, D. C.

Of the seventeen serious accidents to submarines in the last ten years eleven have occurred in British vessels.

A novel lever-operated vacuum washing machine can be assigned to the side of any station or laundry tub.

Folding rods, carrying wheels at their lower ends, have been patented to help bear the load of hand baggage.

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 2 story and base, frame, \$15,000. Architect, Charles C. Frye, 20 Montgomery street, S. E. Owner's name withheld. The building will be erected on Page street, having a frontage of 25 feet and a depth of 19½ feet. There will be a total of six suites of four rooms and bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be steam heat and a hot water system. All bath rooms will have tile wainscot and composition floors. Entrance will be finished in tile and marble. Exterior of the building will be faced with cement plaster on metal lath. Plans are now being prepared.

**OAKLAND, CAL.**—Apartment house, 2 story and base, frame, \$10,000. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owner, Hugh O'Kane. The building will be erected at the corner of College avenue and Taft street, and has been designed for two stories on the first floor. Upper floor will contain five apartments of one and two rooms. There will be private baths and wall beds. Pine and redwood will be used for interior finish. Patent store fronts are specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$21,000. Architect, Charles Skidmore, Foxcroft Bldg., S. E. Owner, H. C. Warwick, Hearst Bldg., S. E. The building will be erected at the southwest corner of Webster and Sacramento streets, having a frontage of 35 feet on one street and 82 feet on the other. There will be a total of twelve apartments of two and three rooms with bath. Interior finish will be of pine with some elm panels and hardwood floors. There will be steam heat, a hot water system and wall beds. All bath rooms will be finished in tile. Marble and tile will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SACRAMENTO, CAL.**—Apartment house, 2 story and base, frame, \$5,000. Architect, none. Owner, C. Spragis, 2315 Third street, Sacramento. The building will be erected on Third street and has been designed to contain four suites of four rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the living rooms. There will be a central heating system and hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and hipap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Apartment house, 7 story and base, Class A, \$150,000. Architect, Houghton Sawyer, Shreve Bldg., S. E. Owner, S. W. Moreshead. The building will be erected at the southwest corner of California and Mason streets, covering an area of 77½ by 60 feet. There will be but six apartments, the upper two floors being arranged for one large apartment to be occupied by the owner. Each of the other floors will contain one apartment. Interiors will be finished to suite the tenants. There will be a complete steel frame, exterior walls will be of brick faced with cement plaster. The building will be one of the most elaborate apartment houses in the city. A contract for the grading has been awarded to Sibley Grading and Teaming Co. and the structural steel work has been awarded to the Judson Manufacturing Co. Contract for the balance of the work will be let this week.

## BONDS.

**ETNA, SISKIYOU CO., CAL.**—Bonds of \$21,000 have been sold by the Town Trustees, and it is expected that within five days the complete issue will be sold. The bonds bear 6 per cent interest.

**VENTURA, VENTURA CO., CAL.**—The Board of City Trustees at Ventura are now considering a bond issue to be voted on in the near future. The amount of the bonds to be issued has not been stated up to the present time, but it is thought that they will reach \$100,000. The funds will be used in making improvements consisting of bridges, street work and probably a new city hall.

**GRASS VALLEY, NEVADA CO., CAL.**—The Chicago Park, Forest Springs and Union Hill Districts have launched a movement with the idea of organizing into a water district under the Wright act, for the purpose of voting bonds to construct 12½ miles of canal in the southwest portion of the county. By such a system of water distribution, it is stated that 22,000 acres will be brought under irrigation in a few years.

**SANTA ANA, ORANGE CO., CAL.**—The Westminster School District bonds have been sold to the Orange County Savings and Trust Company at par by the Board of Supervisors. Bonds are in the amount of \$15,000 and bear 5 per cent interest. The funds will be used in the construction of a school building.

**EL CENTRO, IMPERIAL CO., CAL.**—Stephens & Co. of San Diego have purchased the following bonds: Phoenix School District bonds, \$2,500; Calexico School District, \$2,000; Sunset Springs School District, \$3,000; Westmoreland School District, \$5,000; and the Centerville School District, \$3,500. Each of these districts will make improvement on their school buildings, on grounds,

**LOS ANGELES, LOS ANGELES CO., CAL.**—The Cienega School District have voted bonds in the sum of \$85,000 for the erection of a new school building.

**LOS ANGELES, LOS ANGELES CO., CAL.**—The Whittier Union High School bonds in the sum of \$15,000, recently purchased by the Board of Supervisors, have been resold to Torrence, Marshall & Co.

**WHEATLAND, YUBA CO., CAL.**—The Trustees of Reclamation District No. 817, which is located near Wheatland, are preparing to bond the district for \$25,000. The funds will be used in the making of improvements and additions to the district.

**BENICIA, SOLANO CO., CAL.**—With only ten votes against the proposition, the bond issue for \$10,000 carried. The funds will be used to construct a road to connect the present city pavement with the State Highway at Benicia Barracks.

**VISALIA, TULARE CO., CAL.**—The Board of Trustees has decided to call a special election to vote bonds in the sum of \$168,000 for the construction of a municipal sewer system in accordance with plans and specifications prepared by City Engineer McCabe.

**HERMOSA BEACH, LOS ANGELES CO., CAL.**—A special bond election held recently resulted in bonds in the sum of \$10,000 for a new city hall and \$5,000 for ample fire protection carrying a good majority.

**EAGLE ROCK SCHOOL DISTRICT, LOS ANGELES CO., CAL.**—An election will be held in Eagle Rock City on November 13th for the purpose of voting bonds of \$60,000, the funds to be used in the construction of school buildings for the district. P. H. Ducher and R. L. McMitt are the School Trustees.

**VISALIA, TULARE CO., CAL.**—The Board of Supervisors has set December 3rd as the date for holding a special bond election on the proposition of issuing bonds in the sum of \$1,188,555 for the raising of funds to construct a system of improved highways throughout Tulare County.

**CLAYDE PARK, MONT.**—The special election held here to vote on the issuing of \$19,000 bonds for the installation of a water works system resulted in favor of the proposition.

**BILLINGS, MONT.**—The City Council is considering the question of again advertising for sale \$150,000 water bond issue, bids to be opened about December 1st.

**BENICIA, SOLANO CO., CAL.**—Only ten votes were cast against the proposition to bond the city for building the extension to the present system of city pavements to connect with the State Highway.

**BRANWELL, IMPERIAL CO., CAL.**—By a vote of nearly ten to one the people of Imperial county authorized the issuance of \$5,500,000 bonds for the purchase of the entire valley irrigation system, including properties in California and Mexico.

**WOODLAND, YOLO CO., CAL.**—Two school buildings in Yolo County have been found unfit for school use and the Chamber of Commerce at Woodland urges the school authorities to call a special bond election to vote \$100,000, the funds to be used in the construction of two new buildings.

### BRIDGES AND DAMS.

**RED BLUFF, TEHAMA CO., CAL.**—Bridges, 7, steel and reinforced concrete. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Bids submitted for the construction of seven concrete and steel bridges on the west side of the State Highway in Road District No. 5 have been rejected by the Board of Supervisors. The plans and specifications will be revised and new bids will be taken until November 5th at 10 a. m. Plans and specifications together with full information may be obtained from the County Surveyor.

**PORTLAND, ORE.**—Bridges, 7, steel swing type. Cost not stated. Engineer, Jay J. Morrow, Major, United States Engineer Corps, Couch Bldg., Portland. Owners, United States Government. Bids have been authorized and plans and specifications will be completed in a few days under the supervision of Engineer Morrow for furnishing and erecting seven steel swing draw bridges. The structures are to be built at The Dalles-Celilo canal, and will consist of seven structures with a swing span of 65 feet to have short arm of girder type. There will be one span 15 feet long. Contractors figuring the work will submit their own plans. The government will build the trestles, foundations for the bridges and the approaches, which will not be included in the contract. Contractors bidding for the work may submit alternate bids for special types of foundations or other equipment to be furnished by the Government. Bids for the work will be opened in the P. S. Engineer's office, Couch Bldg., at 11 a. m. December 7th.

**VISALIA, TULARE CO., CAL.**—Bridges, 5, reinforced concrete. Cost not stated. Engineer, County Surveyor, Visalia. Owners, Tulare County. Bids will be received by the Board of Supervisors of Tulare County up to 11 a. m. of November 5th for the construction of five reinforced concrete bridges over ditches and creeks on the county highways in accordance with plans and specifications on file in the office of the County Surveyor. Avon M. Coburn is the Clerk of the Board.

### Contracts Awarded.

**SAN FRANCISCO**—Wharf, shed rolling doors. Cost not stated. Engineer, Assistant Engineer, Ferry Bldg., S. F. Owners, State of California. Contractors, Kinneer Manufacturing Co., S. F., steel rolling doors for Piers Nos. 16, 18, and 37. Contract price, \$56,454.

**SAN FRANCISCO**—Lumber. Cost not stated. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Contractors, Loop Lumber Co., S. F., furnishing lumber for fiscal year. Contract price, \$3,136.50.

**FORT BARRY, CAL.**—Wharf repairs, \$1,797. Engineer, Constructing Quartermaster's Office, Fort Mason.

Owners, United States Government Contractors, Thomson Bridge Co., S. F. Contract price, \$1,797.

### CHURCHES.

**SISSON, SISKIYOU CO., CAL.**—Church, 1½ story and base, frame. Cost not stated. Architects, L. B. and A. L. Valk, Sisson Bldg., L. A. Owners, First Methodist Church of Sisson. The building will contain an auditorium and Sunday school rooms. Interior will be finished in pine with some ornamental plaster in the main auditorium. A central heating system, probably furnace heat, will be installed. Art glass windows are specified. Exterior of the building will be covered with rustic. Plans are complete and figures are being taken.

### Contracts Awarded.

**SAN FRANCISCO**—Church, 1 story and balcony, brick and steel, \$80,000. Architect, Edgar A. Mathews, Phelan Bldg., S. F. Owners, Third Church of Christ, Scientist. Contractor, Arthur Arlett, Sheldon Bldg., S. F. Contract price, \$80,000.

### COURT HOUSES.

**SAN FRANCISCO**—City Hall plaster ornaments and sheet metal work. Cost not stated. Architects, Bakewell Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids were opened at the last Wednesday meeting of the Board of Public Works for the composition plaster ornament work and for the sheet metal work on the new City Hall, P. E. Derville presented the lowest figure at \$9,325 for the composition plaster ornament work, and the Fordeier Ornice Works the lowest figure for the sheet metal work. Contracts have not been awarded. A complete list of the bids opened appears under the heading of San Francisco in this issue.

### FACTORIES AND WAREHOUSES.

**SAN FRANCISCO**—Shop building, 2 story and base, brick and steel, \$25,000. Architects, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans have been completed for the new shop building to be erected for the Department of Electricity. The building will cover a considerable ground area and will be erected on the north side of Golden Gate avenue east of Hyde street. Interior will be finished in pine, and will be arranged for the special requirements of the department. Exterior will be faced with pressed brick. Bids have been called for and will be opened by the Board of Public Works on November 6th. Plans and specifications can be secured from the Department of Architecture.

**SEATTLE, WASH.**—Warehouse, 3 and 16 story and base, reinforced concrete, \$850,000. Architect, George C. Nimmans, People's Gas Bldg., Chicago. Owners, Sears-Roebuck Co. The building will be erected at the corner of Utah and Colorado streets, covering a large area. The main portion will be 16 stories high. Construction will be fireproof throughout. The entire building will be used as a warehouse, shipping department and offices of the owners. Figures will be submitted

on two systems of construction, in cantilever and the Chicago type. Unit prices will be taken for on a yard parts of the work. Among the other big items entering into the construction are 8½ ton of reinforcing steel and 781 ton of structural steel. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Bake ovens, brick construction, \$5,000. Engineer, C. W. Ayers, 3641 Washington street, S. F. Owners, Hygiene Baking Co., 209 French National Bank Bldg. The ovens will be installed in a brick building at the northwest corner of Arguello Boulevard and Geary street. Work will require considerable brick work, steel lintels and sheet metal work. Plans are complete and in the hands of the owners who will do the work by Day Labor.

### Contracts Awarded.

**LOS ANGELES, CAL.**—Warehouse, 4 story and base, Class C construction, \$26,000. Architect, none. Owners, Economy Paper Co., L. A. Contractors, Alta Planning Mill Co., 820 McGarry street, L. A. Contract price, \$26,000.

### FIRE HOUSES AND JAILS.

**PORTLAND, ORE.**—Detention Home, 2 or 3 story and base, brick and steel, \$25,000. Architect not selected. Owners, City of Portland. In the budget of 1915, which is now being prepared, an appropriation of \$25,000 has been made for the construction of a detention home. No mention is made of the site. All details are in the hands of Mayor Abbe of Portland. Further mention will be made of this work.

### FLATS.

**SAN FRANCISCO**—Flats, 2, 2 story and base, frame, \$5,000 each. Architect, none. Owners, Conservative Building and Investment Co., Phelan Bldg., S. F. These two buildings will be erected on adjoining property on the north side of Clement street west of 11th avenue. Each building will have a frontage of 25 feet and a depth of 60. There will be two modern flats of five and six rooms in each. Interiors will be finished in pine and elm with hardwood floors in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the buildings will be covered with cement plaster on metal lath and brick veneer base. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$2,500. Architect, J. Devenenzi, 1959 Union street, S. F. Owner, G. Barozzi, 4 Cannon Place. The building will be erected in the rear of 4 Cannon Place, and will cover an area of 20 by 13½ feet. There will be two flats. Interiors will be finished in pine. Exterior of the building will be covered with rustic and shingle. Plans are complete and the work will be done by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$300. Architect, none. Owner, Thomas A. O'Connell, 34½ Kelly street, S. F. The building will be erected at the corner of Broadway avenue and Mary street, covering an area of 15 by 10 feet. Plans provide for two modern two-room flats. Inter-

riors will be finished in pine and redwood. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Hardwood floors will be used in the living and dining rooms. Exterior of the building will be covered with shiplap and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$3,000. Architect, none. Owner, W. F. Massoli, 1242 Hollister street, S. F. The building will be erected on Railroad avenue near Hollister street, having a 25-foot frontage and a depth of 44 feet. There will be two modern five-room flats. Interiors will be finished in pine and redwood. Some hardwood floors will be used. Open fire places and tile mantels will be used in the living rooms. Tile wainscot is specified for the bath rooms and kitchens. Exterior of the building will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$6,700. Architect, none. Owner, W. W. Rednall, 2500 Filbert street, S. F. The building will be erected on the south side of Union street west of Baker, having a frontage of 25 feet and a depth of 60 feet. There will be two modern flats of six rooms and bath each. Interiors will be finished in pine and elm panels and redwood. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. Automatic water heaters will be installed. Entrances will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. A red stock brick veneer will be used. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$4,000. Architect, none. Owner, R. O. Hoffman, 1734 Turk street, S. F. The building will be erected on Natoma near 6th street, and will contain four small flats of four rooms and bath each. Interior finish will be of pine and redwood. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

### Contracts Awarded.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$3,000. Architect, Carl Geilfuss, 46 Kearny street, S. F. Owner, Adolph Pittmann. Contractor, O. C. Holt, 368 14th avenue, S. F. Contract price, \$3,000.

### GOVERNMENT WORK & SUPPLIES.

#### Prospective Bidders.

Specifications for work under the office of the supervising architect have been furnishing the following firms in addition to those previously noted:

**The Dalles, Ore., Construction, November, 12.**

Sound Engineering and Construction Co., Seattle, Wash.

Weich Bros. & Hannaman, Grass Valley, Cal.

Daniel T. McCarthy, 411 Walnut street, Philadelphia, Pa.

John Wallin, 1850 South Fifth street, Tacoma, Wash.

H. M. Gilman, Jr., National Metropolitan Bank Building, Washington, D. C.

Palmberg & Mattson, 831 Commerce street, Astoria, Ore.

J. L. Murphy Sons, Charleston, Wash.

Arthur W. Kutsche, 217 Yeon Building, Portland, Ore.

Pieter & Wenzel Construction Co., Wichita, Kan.

R. E. Campbell, Salt Lake City, Utah.

Pearson Construction Co., 755 New York Block, Seattle, Wash.

#### Yards and Docks.

Specifications for work under the bureau of yards and docks, Navy Department, have been furnished to the following firms in addition to those previously mentioned in these columns:

**Mare Island, Refrigerator Plant, November 21—Specification 216.**

Mayer Ice Machine and Engineering Co., Jersey City, N. J.

American Carbonic Machinery Co., Machinery Hall, Chicago, Ill.

United Iron Works Co., Springfield, Mo.

Vilter Manufacturing Co., Milwaukee, Wis.

Diehl Manufacturing Co., Washington, D. C.

Mechanical Refrigerating Co., Philadelphia, Pa.

#### Steel Rolling Crest.

The U. S. Reclamation Service is asking for proposals for furnishing one steel rolling crest for the Grand River diversion dam, Grand Valley irrigation project, Colo. This crest is to consist of six 70 ft by 10 ft 2-inch rollers and one 60 ft by 15 ft 4-inch roller and accessories, involving a total weight of 560,000 pounds. There is but one other irrigation dam of this type in this country, and that also a structure of the Reclamation Service, the Boise diversion dam in southern Idaho. The crest of the Colorado dam was to have been furnished by a manufacturing firm in Germany, but it was necessary to cancel the order on account of the war. The bids are to be opened at the office of the Reclamation Service in Washington, D. C., November 19, 1914.

#### Sale of Suction Dredge Caribbean.

The purchasing officer of the Panama Canal will soon offer for sale the steel sea-going suction dredge Caribbean. This dredge was purchased from the Maryland Steel Co. at a cost of \$362,425 and was delivered on the Isthmus in September, 1907. The dredge is equipped with Scotch marine boilers, 14 ft in diameter and 12 ft long, also with 2 26-inch single-suction centrifugal discharging pumps, and is designed to excavate to a depth of 40 feet. It is also equipped with galley and mess room has accommodations for nine officers and 56 men. Her length is 288 feet, with a beam of 17 feet 6 inches and a load line draft of 19 feet 6 inches. Her hopper capacity is 2,200 cubic yards, with a gross tonnage of 7,000. She is equipped with two compound surface condensing pumping engines, with two diesel engines (twinches) or hoists.

ma. engines), and four gate-winding engines with one steering engine.

#### Reclamation No. 337-F.

The following bids were received by the U. S. Reclamation Service, Los Angeles, Cal., under specification 337-F, for erecting steel pressure pipes for the Okanagan project, Wash.:

W. A. Kraner & Co., Portland, Ore., \$1,050; 30 days.

Thomas J. Shea, Portland, Ore., \$1,200; 35 days.

#### Port Townsend, Wash., Repairs.

The following bid was received by the custodian, U. S. quarantine station, Port Townsend, Wash., for repairs to wharf No. 25:

Port Townsend Pile Driving Co., Port Townsend, Wash., \$700 time, 30 days.

#### San Francisco, Water Distributing System.

The following bids were received by the depot quartermaster, San Francisco, Cal., under office circular No. 72, for constructing water distributing system at the San Francisco National Cemetery:

Bid 1. H. M. Pitman, 501 Sheldon Building, San Francisco, Cal., \$1,937.28.

2. Kiernan & O'Brien, 1756 Mission street, San Francisco, Cal., \$1,351.

3. Robert Dalziel, Jr., 218 1st street, San Francisco, Cal., \$1,172.

4. Pringle, Dunn & Co., 338 Pine street, San Francisco, Cal., \$999; award recommended to this firm.

5. Burnham Plumbing Co., 1220 Webster street, San Francisco, Cal., \$1,097.

6. Mahoney Bros., Merchants' Bank Building, San Francisco, Cal., \$1,265.

7. William Bruce, 2338 Pine street, San Francisco, Cal., \$1,535.

#### Slip Point Station, Wash., Diaphone.

The following bid was received by the light house inspector, 17th district, Portland, Ore., for furnishing one type "F" diaphone, complete, for Slip Point Light Station, Wash.:

Diaphone Signal Co., Toronto, Ontario, \$880; accepted.

#### Brigham City, Utah, Post Office.

As previously reported, the contract for the construction of the U. S. post office at Brigham City, Utah, was awarded to George A. Whitmeyer & Sons, Ogden, Utah, at \$51,193. In the construction of the building fixtures and materials manufactured by the following named firms will be used: Plumbing fixtures, Crane Co.; cast iron column radiators, Kewanee Boiler Co.; wall radiators, American Radiator Co.; air valves for radiators, Monash-Younger Co.; cabinet and tablet, Frank Adam Electric Co.; conduit, American Conduit Co.; rubber-covered wire, Phillips Insulated Wire Co.; air valves for end of steam mains, Jenkins Bros.; snap switches, General Electric Co.; radiator valves, Fairbanks Co.; damper regulator, American Radiator Co.

#### Sale of Scrap Rail.

The purchasing officer of the Panama Canal will soon issue a call for bids for furnishing under proposal No. 1, 5,000 tons of scrap rail, selected as 70 lbs and over per yard, including sections 3 ft long and over, and heads, ball rail worn curved or bent free from switch points, guard rail or angle bars.

Under class 2, 400 tons of scrap rail, including all sections not coming under specification No. 3 and including frogs, guard rails, and switch points.

Under class 3, 600 tons of scrap rail, short and long sections, 56 lbs and under per yard, split heads, ball rail worn, curved, bent and broken.

Under proposal 2, 6,000 tons of scrap rail made up approximately as described above and for which bids will be accepted for delivery on cars on docks within reach of ship's tackle at Cristobal.

It is noted that alternate bids are desired for the material delivered f. o. New York and f. o. b. cars Colon.

The above quantities are approximate, and the purchaser will be allowed to increase the delivery by 20 per cent if the additional quantities are available or be permitted to decrease by 10 per cent if he so desired. Bids will be opened at Balboa Heights, Canal Zone, simultaneously with those opened at Washington.

#### Earth Work and Structures.

The following bids were received at the office of the Reclamation Service, Malta, Mont., under specification 282, for earthwork and structures of the Nelson reservoir, Milk River project, Mont.:

- Bid 1, Security Bridge Co., Minneapolis, Minn.
- 2, Dooling Bros.
- 3, Charles Wilhite & Co., Malta, Mont.
- 4, James O'Connor, 231 Park avenue, Council Bluffs, Iowa.
- 5, W. J. Roy Co., St. Paul, Minn.
- 6, Houser & Sim, Malta, Mont.

#### Schedule 1.

- Excavation, class 1—Bid 1, 15.5c; 2, 5.9c; 3, 20c; 4, 18c; 5, 25c.
- Excavation, class 2—Bid 1, 55c; 2, 6c; 3, 50c; 4, 45c; 5, 65c.
- Excavation, class 3—Bid 1, 90c; 2, 6c; 3, 11c; 4, 12.25c; 5, 90c.
- Excavation for dike embankment, class 1—Bid 1, 15.5c; 2, 15.9c; 3, 20c; 4, 16c; 5, 25c.
- Overhaul—Bid 1, 2c; 2, 2c; 3, 2c; 4, 5c; 5, 2c.
- Paving—Bid 1, 2c; 2, 2c; 3, 3c; 4, 34c; 5, 17.5c.
- Total schedule 1—Bid 1, \$10,300; 2, 10,421; 3, \$13,600; 4, \$13,630; 5, \$14,025.00.

#### Schedule 2.

- Excavation, class 1—Bid 1, 33.75c; 5, 5c; 6, 70c.
- Excavation, class 2—Bid 1, 75c; 5, 6c; 6, 50c.
- Excavation, class 3—Bid 1, \$1.25; 5, 1.50; 6, \$2.
- Wet excavation—Bid 1, \$1.67; 5, \$3.00; 6, \$2.
- Puddling—Bid 1, 50c; 5, 75c; 6, 50c.
- Concrete—Bid 1, \$9.20; 5, \$10.50; 6, 12.
- Paving—Bid 1, \$2.40; 5, \$1.75; 6, \$2.
- Placing reinforcing steel—Bid 1, 1c; 5, 2.5c; 6, 1.5c.
- Erecting lumber—Bid 1, \$12; 5, \$20; 6, \$20.
- Riprap—Bid 1, \$1.80; 5, \$2.50; 6, \$1.
- Total schedule 2—Bid 1, \$18,159.90; 5, \$20,680.50; 6, \$27,620.

#### San Francisco, Cal., Metal Vault.

The contract for constructing and erecting metal vault equipment for the daily money vault in the new sub-treasury building, San Francisco, Cal., has been awarded to the Hermann

Safe Co., San Francisco, Cal., \$3,190, time, February, 1, 1915.

**JACKSON ENLARGEMENT PROJECT, WYO.**—Gate hoisting equipment. Cost not stated. Engineers, United States Reclamation Service, Boise, Idaho. Owners, United States Government. Plans are complete and figures are now being taken for furnishing the gate hoisting equipment for sluice gates on the Jackson Enlargement Project at Moran, Wyo. Plans and specifications can be secured on application to the engineers at Boise. Bids will be opened on November 22nd. An official proposal appears in another column of this issue.

**GRAND VALLEY PROJECT, COLO.**—Steel crest. Cost not stated. Engineers, United States Reclamation Service, Washington, D. C. Owners, United States Government. Plans are complete and figures are now being taken for furnishing one steel roofing crest for the Grand River Diversion Dam on the Grand Valley Project. Plans and complete particulars will be furnished on request at the Reclamation Service at Washington, D. C. Bids will be opened on November 19th. An official proposal appears in another column of this issue.

**MARE ISLAND, CAL.**—Cement, etc. Purchasing Office, Commandant at Mare Island Navy Yard. Owners, United States Government. Among other supplies for the navy, bids for which will be opened on November 17th at the Mare Island Navy Yard, are mentioned Portland cement, piles, line poles, copper cable, sheet copper and rod bronze.

#### Contracts Awarded.

**SAN FRANCISCO**—Vault equipment, \$3,195. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Contractors, Hermann Safe Co., S. F. Contract price, \$3,195.

**SAN FRANCISCO**—Electric work, bachelors' quarters. Cost not stated. Engineer, Constructing quartermaster's office, Fort Mason. Contractors, Buite Engineering and Electric Co., S. F. Contract price not stated.

#### HALLS AND SOCIETY BUILDINGS.

**SAN FRANCISCO**—Club addition, 3 story and base, brick and steel, \$65,000. Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owners, Concordia Club. The addition will be erected at the southeast corner of Van Ness and Post street, having a frontage of 60 feet on Van Ness avenue and 103 feet on Post street. The basement of the building will contain the mechanical equipment with a large swimming tank. Main floor will be arranged for a large gymnasium with a mezzanine floor containing dressing rooms. The library and main social hall in the old portion of the building will be enlarged and extended into the new portion. Interior will be finished in pine and hardwoods with hardwood and maple floors. Steam heat and a hot water system will be installed. Exterior of the building will be faced with Colusa stone. Plans are complete and figures are being taken.

#### HOSPITALS.

**SAN FRANCISCO**—Hospital addition, 3 story and base, Class A construction, \$150,000. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, Cooper Medical College, Leland Stanford, Jr. University. This building has been fully described in these columns several times before. Plans have been completed and are now out for figures. The building will be erected on the east side of Webster street between Sacramento and Clay. Construction will be fireproof. Special hospital plumbing and equipment will be installed. Exterior of the building will be faced with pressed brick.

**SPOKANE, WASH.**—Hospital, 1 and 1 story and base, Class A construction. Cost not stated. Architect, Riggs, Spokane. Owners, Spokane County. Plans for the new County Tuberculosis Sanitarium to be erected in Spokane have been completed. Architect Riggs is now going over the plans and specifications with Dr. Kelley of the State Board of Health in Seattle, and upon approval of the State Board of Health bids will be called. The building will be a fireproof structure covering a considerable ground area and containing all the most modern equipment. Exterior will be faced with pressed brick. Bids will be called for shortly. Further mention will be made of the work.

**MAINE ISLAND, CAL.**—Hospital ward pavilions, 5, frame. Cost not stated. Engineer, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Nine sets of figures were opened by the Bureau of Yards and Docks for constructing five frame hospital pavilions at the Mare Island Navy Yard, Cal. Without considering the five alternate propositions which were asked for, the bid of Gutleben Bros. of San Francisco was the lowest at \$23,300. H. C. Warwick was second low at \$23,405. Until complete figures including the alternates are received it is impossible to determine the low bidder. A complete list of these figures will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

#### HOTELS.

**POCATELLO, IDAHO**—Hotel, 3 or 4 story, brick and steel, \$125,000. Architect's name not given. Owners, G. S. Allen and H. E. Bartlett, Poston. It reported that Messrs. Allen and Bartlett are looking over conditions in Southern Idaho with the thought of erecting a modern hotel building to cost in the neighborhood of \$125,000. No definite information can be had at this time.

**REDONDO BEACH, LOS ANGELES CO., CAL.**—Hotel, 3 story and base, Class B construction. Cost not stated. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owner, Mrs. N. M. Sims. The building will be erected on Catalina street, having a frontage of 50 feet and a depth of 120 feet. There will be several stores on the first floor besides the hotel office, dining room and lobby. Upper floors will be arranged for a total of 200 guest rooms, a large percentage of which will have private baths. Interior will be finished in pine and hardwood. Tile floor will be used in the lobby and baths.

Plans provide for steam heat, elevator service and a hot water system. Patent store fronts will be used. Exterior of the building will be faced with ruffled brick. Plans are complete and figures are being taken.

### LIBRARIES.

**COLUMBIA CITY, WASH.**—Library, 1 story and base, reinforced concrete, \$30,000. Architect, W. M. Somerville, White Bldg., Seattle. Owners, Town of Columbia City. The building will be designed in the classic style and will contain two large reading rooms besides a children's department, office of the librarian, stack rooms and lecture hall. Interior will be finished in pine and hardwood with a maple floor. There will be steam heat and vacuum cleaning. Marble and tile will be used extensively. Metal book stacks are specified. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

### POST OFFICES.

**SAN FRANCISCO**—Branch post office, 2 story and base, brick and steel. Cost not stated. Architect, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Plans for the structural steel for the new Ferry Post Office have been completed and forwarded to the State Advisory Board for approval. Bids will be called for at the next meeting of the State Harbor Commission. Further mention will be made in these columns at that time.

**ALAMEDA, ALAMEDA CO., CAL.**—Painting plaster. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans are complete for painting plastering in the new Post Office building now under construction in Alameda. Bids will be opened on November 30th. Complete information relative to this work can be secured from either the Supervising Architect at Washington, D. C., or the custodian of the site at Alameda. An official proposal appears in another column of this issue.

### RAILROAD CONSTRUCTION AND EQUIPMENT.

**SAN FRANCISCO**—Power house, 2½ story and base, steel and reinforced concrete. Cost not stated. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for the new power house to be erected at the corner of McAllister and Larkin streets have been completed. This equipment will supply the buildings in the Civic Center with both light and heat. Construction will be fireproof. The original intention of the City Engineer was to construct a building with a steam generating plant costing in the neighborhood of \$15,000. The lighting engineers have recommended to the Supervisors that \$125,000 be spent and a plant installed using electricity that would be capable of supplying all buildings in the Civic Center. Bids are now being taken for the work, exclusive of the equipment, and will be opened by the Board of Public Works on November 11th.

### RESIDENCES.

**SAN FRANCISCO**—Residence, 1½ story and base, frame, \$5,000. Architect, none. Owners, D. E. and T. J. Penrose, 2530 28th avenue, S. F. The dwelling will be erected on the west side of 28th avenue south of Taraval, and has been designed for a six-room house with bath. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be an open fire place in the living room. Mantel will be of tile or brick. Tile wainscot and composition floor will be used in the bath room. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residences, 2, 1½ story and base, frame, \$2,500 each. Architect, none. Owner, N. J. Nelson, 427½ 23rd street, S. F. These two houses will be erected on the west side of Eureka street south of 22nd, and each has been designed to contain six rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the living rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**SAN FRANCISCO**—Residence, 2½ story and base, frame, \$8,000. Architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owner, Mrs. Rose Buckingham. The dwelling will be erected on Jackson street west of Divisadero, and has been designed to contain eight rooms and two baths. A large sun porch will be a feature of the building. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with rustic and shiplap. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, A. T. Morris, 501 11th avenue. The dwelling will be erected on the west side of 11th avenue north of Balboa, and has been designed for a six-room house with bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be an open fire place and tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, Joe Kock, 25 Cotton street, S. F. The dwelling will be erected on Cotton street west of Mission, and has been designed for a six-room house. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be a

large open fire place in the living room. Mantel will be of tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residence, 2½ story and base, frame, \$20,000. Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owner, F. W. Aitken. The dwelling will be erected in 32nd Avenue Terrace, and has been designed to contain fourteen rooms, three baths and sleeping porch. Interior finish will be of pine, redwood, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be a central heating system, probably hot air heat, and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile and equipped with showers. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame. Cost not stated. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, W. H. Schroeder. The dwelling will be erected in the Claremont Tract and has been designed for a ten or twelve room house with several baths, and sleeping porches. A garage will also be erected on the property. Interior of the dwelling will be finished in pine, redwood and hardwood. White enamel will be used in the bed rooms. There will be furnace heat, open fire places and a hot water system. Bath rooms will be finished in tile. Hardwood floors will be used in the principal rooms. Exterior of the house and garage will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$5,000. Architect, none. Owners, Felt Bros., 528 25th street, Oakland. The dwelling will be erected on Arimo west of Wallavista avenue, and has been designed for a seven-room house with baths and sleeping porch. Interior will be finished in pine and redwood with some white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**OAKLAND, CAL.**—Residence, 2 story and base, frame. Cost not stated. Architect, Clinton Day, Nevada Bank Bldg., S. F. Owner, Mrs. T. L. Barker. The dwelling has been designed for a ten-room house and will be erected in Piedmont. There will be several bath rooms and sleeping porch. Interior finish will be of pine, redwood, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile and equipped with showers. Exterior of the house will

be covered with cement plaster on metal lath. Plans are complete and figures will be called for shortly.

**SAN FRANCISCO**—Residence, 6, 2 story and base, frame, \$3,000 to \$4,000. Architect, none. Owner, Thomas Scoble, 363 14th avenue, S. F. These dwellings will be erected on the property bounded by 29th, 32nd avenues, Anza and Balboa streets. Each house will contain seven rooms and bath. Interiors will be finished in pine, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat in the more expensive homes. Open fire places and tile or brick mantels will also be used. The waistcoat is specified in the bath rooms and kitchens. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2, 2 story and base, frame, \$4,000 each. Architects, Elite Planners, 1844 5th avenue, Oakland. These two houses will contain six and seven rooms with bath and sleeping porches. Interiors will be finished in pine, redwood and white enamel. Hardwood floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

**SAN LEANDRO, ALAMEDA CO., CAL.**—Residence, 2, 1 story and base, frame, \$2,000. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, Judge Toffelmeyer. Each house will contain four rooms and bath. Pine and redwood interior finish will be used. There will be open fire places and tile or brick mantels. Exteriors will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**PORTLAND, ORE.**—Residence, 2 story and base, brick and reinforced concrete, \$40,000. Architects, Doyle & Patterson, Worcester Bldg., Portland. Owner's name withheld. The dwelling will be erected in Portland Heights and has been designed for a large city residence. There will be in the neighborhood of fourteen rooms, three baths and a large conservatory. Interior will be finished in pine, hardwoods and white enamel. Hardwood floors will be used throughout. Bath rooms will be finished in tile and equipped with showers. Plans provide for a central heating system, probably steam heat. Open fire places and tile mantels will be used. Vacuum cleaning and a hot water supply are also specified. Exterior of the house will be faced with pressed brick. Plans are now being prepared.

#### Contracts Awarded.

**BURLINGAME, SAN MATEO CO., CAL.**—Residence, 1½ story and base, frame, \$8,000. Architect, Harris Allen, Central Bank Bldg., Oakland. Owner, Carl Schilling. Contractors, Van Sant-Houghton Co., 503 Market street, S. F. **SAN MATEO, SAN MATEO CO., CAL.**—Residence, 2, 1 story and base, frame, \$6,000. Architect, Ernest Nor-

berg, Bank Bldg., Burlingame. Owner, J. D. Culbert. Contractor, A. Cook, San Mateo. Contract price, \$6,000.

#### SCHOOLS.

**SAN FRANCISCO** Academic building plastering. Cost not stated. Architect, City Department of Architecture, Temporary City Hall. Owners, City and County of San Francisco. Plans have been completed for the plastering in the Academic building of the Polytechnic High School Group and figures are now being taken. Bids will be opened by the Board of Public Works on November 11th. Plans and specifications can be secured at the City Department of Architecture.

**COMPTON, LOS ANGELES CO., CAL.** Schools, 2, 1 story and base, hollow tile construction. Cost not stated. Architects, Tuttle & Angel, Delta Bldg., L. A. Owners, Compton School District. One building will cover an area of 116 by 86 feet and the other 140 by 73 feet. Interiors will be finished in pine with pine floors. There will be a modern system of heating and ventilating. Composition blackboards will be used. Modern school plumbing is specified. Exteriors of the buildings will be faced with cement plaster. Tile cornice and roof will be used. Plans are now being prepared. Further mention will be made of the work.

**PORTLAND, ORE.**—School, 2 story and base, reinforced concrete, \$160,000. Architect, F. A. Naramore, Portland. Owners, City of Portland. The building will be erected at the corner of Park and Hall streets, covering a large ground area. Construction will be fireproof with reinforced concrete floors, walls and roof slabs. There will be 24 class rooms, library, a large auditorium, office, gymnasium with large swimming pool and departments for manual training and domestic science. Interior will be finished in pine with maple floors. Plans provide for steam heat, a modern system of ventilation, vacuum cleaning and program clocks. Slate blackboards will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Bids will be opened on November 11th.

**FRESNO, FRESNO CO., CAL.**—School heating system. Cost not stated. Architect, none. Owners, Fresno School District. Plans are complete and bids are now being taken for an oil burning system to be installed in the Lincoln School. Plans and specifications can be secured from C. C. Starr who is Secretary of the Board of Education.

**FRESNO, FRESNO CO., CAL.**—School, 2 story and base, Class C construction. Cost not stated. Architects, Coates & Traver, Head Bldg., S. F. Owners, City of Fresno. The following bids were submitted for the construction of the Webster School:

Bidder	Total
James L. Daly	\$17,350 \$1,925
Richard Hill	19,550
Alfred Kohn	19,800 750
Smith & James	50,983
Trewhitt & Shields Co.	52,610 752
R. C. Blackwell	52,500
Brandt & Stevens	53,700

The column headed "Add" is for concrete floors.

All bids were taken under advisement by the Board of Education.

#### Contracts Awarded.

**PORTLAND, ORE.**—School, 1 story and base, brick and reinforced concrete, \$119,584. Architect, F. A. Naramore, Portland. Owners, City of Portland. Contractors, Boyajohn Arnold Co., Panama Bldg., Portland. Contract price, \$119,584. Note: This contract does not include plumbing, bids for which were rejected and will be readvertised.

#### SEWERS, STREET WORK & WATER SYSTEMS.

**SAN FRANCISCO** Grading. Cost not stated. Engineer, Charles E. Witherell, 110 Jessie street, S. F. Owner, Thomas Scoble, Engineer Witherell has plans for grading city blocks in the Richmond District bounded by 29th and 32nd avenues, Anza and Balboa. The material to be moved is light sand and is to be placed in a fill adjacent to the work. Mr. Witherell can be seen at 110 Jessie street any day between 12 and 2 o'clock.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Slough protection. Cost not stated. Engineer, County Surveyor, Stockton. Owners, San Joaquin County. Plans and specifications for additional and necessary improvements in the Mormon Slough Protection District have been adopted by the Board of Supervisors. The proposed work is the reinforcement of brush mattresses, the installation of heavier embankments in certain places and a general plan which has to do with some extensive construction work.

**LODI, SAN JOAQUIN CO., CAL.**—Road construction, \$15,000. Engineer's name not given. Owners, State of California. The Lodi Chamber of Commerce is interesting itself in a move to obtain an appropriation of \$15,000 from the State to build six miles of road between Clements and the Mokelumne River where Amador, Calaveras and San Joaquin corner.

**EL CENTRO, IMPERIAL CO., CAL.**—Transmission line and substation. \$60,000. Engineer, Chief Engineer Holton Power Co., El Centro. Owners, Holton Power Co., The Holton Power Co., operating at El Centro and Seedley, Imperial County, has been granted permission by the Railroad Commission to issue bonds in the amount of \$200,000. A new transmission station is to be erected at El Centro at a cost of \$15,000, and a transmission line will be built between El Centro, Seedley and Dixieland, three important towns in the Imperial Valley. The line will cost \$12,078.

#### Contracts Awarded.

**SAN FRANCISCO**—Twin Peaks tunnel construction, \$3,372,000. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractors, Robert C. Storie Co., S. F. Contract price, \$3,372,000. For a complete list of the bids submitted for this work see San Francisco.

#### STORES AND OFFICES

**OAKLAND, CAL.** Stores and loft alteration, 2 story, brick, \$7,000. Architect, Clay N. Burge, A Bany Bldg., Oakland. Owner's name withheld. A brick and steel loft building located on Washington street will undergo extensive alterations. The work will include new interior finish, hardwood

lature work, electric work, plumbing, plastering, painting and patent store fronts. Marble and tile will also be used. Plans are now being prepared.

**SEATTLE, WASH.**—Stores and offices, 3 story and base, brick and steel, \$20,000. Architect, V. W. Voorhees, Eitel Bldg., Seattle. Owner, Louis Anderson. The building will be erected at the corner of Market and Leary streets and will cover a considerable ground area. There will be stores on the first floor. Upper floors will be arranged for modern offices and rooms. Interior finish will be of pine and hardwood. There will be steam heat and elevator service. Patent store fronts will be used. Marble bases are also specified. Exterior of the building will be faced with pressed brick. Plans and specifications have been completed and figures will be called for at once.

**PORTLAND, ORE.**—Stores and offices, 2 story and base, brick, \$25,000. Architects, Houghtaling & Dougan, Henry Bldg., Portland. Owner, Rodney L. Gibson. The building will be erected at the corner of 4th and Couch streets, covering an area of 100 by 100 feet. Stores will occupy the street frontages and a large warehouse the remainder of the ground floor. Upper floor will be arranged for offices. Interior finish will be of pine. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

## THEATRES.

**SAN FRANCISCO**—Theatre and stores, 2 story and base. Class A construction, \$200,000. Architect, William Beasley, 127 Montgomery street, S. F. Owner, Sidney Grauman. An attempt is being made to secure a long-term lease on the valuable property at the southeast corner of Market and Fourth streets. The architect states that if negotiations now pending can be brought to a conclusion that the present building will be practically torn down, a heavy steel frame erected and a theatre building erected which will be one of the largest in the west. Besides the theatre preliminary plans show four stores on the street fronts. Plans are only in the preliminary stage. Further mention will be made of the work.

## SEALED PROPOSALS.

### PROPOSALS.

**OFFICE OF THE BOARD OF PUBLIC WORKS OF THE CITY AND COUNTY OF SAN FRANCISCO.**

Sealed proposals will be received at this office between the hours of 10 o'clock a. m. and 11 o'clock a. m. on Friday, the 6th day of November, 1914, for doing the following work, including the furnishing of the necessary labor and materials thereon, to wit:

The construction of Shop Building for the Department of Electricity, to be located on Golden Gate Avenue, between Hyde and Leavenworth streets.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be completed within five (5) calendar days from receipt of written notice from the Board of Public Works, and completed within 75 calendar days thereafter. All proposals must be accompanied by a check or cash for a

responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the amount of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works, E. J. CHILDS, Secretary.

### PROPOSALS FOR PAINTING PLASTERING.

**PAINTING PLASTERING**—Office of the Custodian, U. S. Public Building, Alameda, Cal.—Sealed proposals will be received here until 3 p. m. November 30, 1914, for painting plastering. For further information address T. C. STODOLAK, postmaster.

### PROPOSAL FOR ROLLING CREST.

**STEEL ROLLING CREST**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Washington, D. C., until 2 o'clock p. m. November 10, 1914, for furnishing one steel rolling crest for the Grand River diversion dam, Grand Valley project, Colo., consisting of six 70-foot x 10-foot 3-inch rollers and one 60-foot x 15-foot 3-inch roller and accessories, involving a total weight of approximately 550,000 pounds. For particulars address the United States Reclamation Service, Washington, D. C., chief counsel.

### PROPOSALS FOR HOISTING EQUIPMENT.

**GATE HOISTING EQUIPMENT**—U. S. Reclamation Service, Boise, Idaho.—Sealed proposals will be received here until 2 p. m. November 22, 1914, for furnishing certain gate hoisting equipment for sluice gates in connection with the new Jackson enlargement project, Moran, Wyo. For particulars address the U. S. Reclamation Service, Boise, Idaho, or Washington, D. C. E. H. NEWELL, director.

### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 875**—Proposals for Fuel Oil for the Year Ending December 31, 1915.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until 10:30 a. m. November 23, 1914, at which time they will be opened in public, for furnishing the above mentioned article. Blank and general information relating to this circular (No. 875) may be obtained from this office or the office of the assistant purchasing agent, 1004 North Point street, San Francisco, Cal., also from the U. S. engineer offices in the following cities: Seattle, Wash., Los Angeles, Cal. F. C. BURGESS, major, corps of engineers, U. S. army, general purchasing officer.

### PROPOSAL FOR LOCOMOTIVE.

**LOCOMOTIVE**—Sealed proposals, indorsed "Proposals for Locomotive" will be received at the Bureau of Vapors and Docking, Navy Department, Washington, D. C., until 11 o'clock a. m. November 11, 1914, and thereafter they will be publicly opened, for one narrow gauge saddle tank switching locomotive, Pearl Harbor, Hawaii. Specification may be obtained on application in person or to the commandant of the naval station named, H. R. STANFORD, chief of bureau.

### PROPOSALS FOR COMPRESSORS.

**COMPRESSORS**—Sealed proposals will be received at the office of the light house inspector, Portland, Ore., until 2 o'clock p. m. November 6, 1914, and then opened, for furnishing 2 1/2 horsepower compressors on the Golden Gate and San Pedro Light Stations. They may be obtained by application to the light house inspector, Portland, Ore.

## PROPOSALS FOR RECLAMATION WORK.

**EARTHWORK AND STRUCTURES**—Department of the Interior, United States Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service at Provo, Utah, until 2 o'clock p. m. November 16, 1914, for the construction of divisions 1, 2 and 3 of the High Line Canal and structures, Strawberry Valley project, Utah, involving approximately 354,000 cubic yards of excavation, 2,200 cubic yards of excavation for structures, 3,200 cubic yards of reinforced concrete, 167,000 square feet of canal lining, 230 lineal feet of tunnel complete with concrete lining, laying approximately 1,000 feet of vitrified pipe of miscellaneous sizes; also 1,400 feet of backfilling and small quantities of rock-filling and stone paving and the placing of sluice gates and miscellaneous structural steel. The canal will extend in a southwesterly direction from the power plant of the U. S. Reclamation Service near the mouth of Spanish Fork Canyon at Station 700 plus 60, near Payson City, Utah, to the Utah. For particulars address the United States Reclamation Service at Provo, Utah, or Washington, D. C. WILL R. KING, chief counsel.

## PROPOSALS FOR REFRIGERATING PLANT.

**REFRIGERATING PLANT**—Sealed proposals indorsed "Proposals for Refrigerating Plant" will be received at the Navy Department, Washington, D. C., until 11 o'clock a. m. November 21, 1914, and then there publicly opened, for furnishing and installing a refrigerating plant complete, with all accessories at the marine barracks reservation, U. S. navy yard, Mare Island, Cal. Plan and specifications may be obtained on application to the bureau commandant of the navy yard named, H. R. STANFORD, chief of bureau.

## DEPARTMENT OF ENGINEERING

### CALIFORNIA HIGHWAY COMMISSION NOTICE TO CONTRACTORS.

**SEALED PROPOSALS** will be received at the office of the California Highway Commission, 20 Forum Building, Sacramento, Cal., until 2 o'clock p. m. on November 9, 1914, at which time they will be publicly opened and read for construction in accordance with the specifications of the project, to which special reference is made, portions of State highway as follows:

Colusa County from Williams to Colusa (III-Col-15-A), about 8.4 miles in length, to be built of Portland cement concrete.

Glenn County from the southerly boundary to Willows (III-Gle-7-A), about 8.5 miles in length, to be built of Portland cement concrete.

Solano County from a point 2 1/2 miles south of Cordelia to Fairfield (III-Sol-7-B), about 8.1 miles in length, to be built of Portland cement concrete.

Imperial County from Coachella Wells to Dixieland (VII-Im-12-B), about 11.7 miles in length, to be built of Portland cement concrete.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Salinas, Bismarck, Sacramento, San Francisco, San Luis Obispo, Fresno and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the commission. The attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all

bids or to accept the bid deemed for the best interests of the State.

 Highway Engineer,  
 CHARLES C. CARLETON,  
 Acting Secretary. (\*)  
 Dated: October 6, 1914.

**PROPOSALS FOR CANAL WORK.**

**CANAL WORK.**—Department of the Interior, United States Reclamation Service, Washington, D. C. Sealed bids will be received at the office of the United States Reclamation Service at Provo, Utah, until **November 15, 1914**, for the construction of divisions 1, 2 and 3 of the High Line Canal and structures, Strawberry Valley project, Utah, involving approximately 35,000 cubic yards of canal excavation, 2,300 cubic yards of excavation for structures, 3,300 cubic yards of reinforced concrete, 167,000 square feet of canal lining, 230 linear feet of tunnel, complete, with concrete lining, laying approximately 1,700 feet of vitrified pipe of miscellaneous sizes, 1,100 cubic yards of back-filling and small quantities of rock-filling and stone paving and the placing of sluice gates and miscellaneous structural steel. The canal will extend in a southwesterly direction from the power plant of the U. S. Reclamation Service, near the mouth of Spanish Fork Canyon, to Station 700 plus 00, near Payson City, Utah County, Utah. For particulars address the United States Reclamation Service at Provo, Utah, or Washington, D. C. **WILL R. KING**, chief counsel.

**NOTICE TO CONTRACTORS.**

**PANAMA-PACIFIC INTERNATIONAL EXPOSITION.**

**SEALED PROPOSALS** will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213 in the Service Building, Fillmore and Chestnut Streets, San Francisco, at **9:00 A. M., Thursday, November 5th, 1914, for Structural Frame For Fountain of Energy, South Gardens**, in accordance with plans and specifications on file in the office of the Director of Works.

The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company. Plans and specifications for the work may be obtained from the Director of Works, Room 267, Service Building, Fillmore and Chestnut Streets, San Francisco. Any other information may be had from the Chief of Construction, Room 211, Service Building. (\*)

**NOTICE TO CONTRACTORS.**

**PANAMA-PACIFIC INTERNATIONAL EXPOSITION.**

**SEALED PROPOSALS** will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213 in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at **9:00 A. M., Tuesday, November 10th, 1914, for Constructing Interior Pavement in the Palace Arts Building**, in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required on the faithful performance of the contract; the surties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company. Progressive payments will be made.

Let the County Official Know Where You Saw the Official Proposal.

The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company. Plans and specifications for the work may be obtained from the Director of Works, Room 267, Service Building, Fillmore and Chestnut Streets, San Francisco, at any time after Noon, Tuesday, November 3, 1914, by depositing \$10.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Ten Dollars to the Exposition Company. By order of the Buildings and Grounds Committee.  
**WILLIAM H. CROCKER,**  
 Chairman. (\*)

Classified according to Location

## SAN FRANCISCO

**APARTMENT HOUSE**—2 story and base, frame, \$15,000. San Francisco. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner's name withheld. The building will be erected on Page street, having a frontage of 25 feet and a depth of 79½ feet. There will be a total of six suites of four rooms and bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be steam heat and a hot water system. All bath rooms will have tile wainscot and composition floors. Entrance will be finished in tile and marble. Exterior of the building will be faced with cement plaster on metal lath. Plans are now being prepared.

**SHOP BUILDING**—2 story and base, brick and steel, \$25,000. San Francisco. Architects, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans have been completed for the new shop building to be erected for the Department of Electricity. The building will cover a considerable ground area and will be erected on the north side of Golden Gate avenue east of Hyde street. Interior will be finished in pine and will be arranged for the special requirements of the department. Exterior will be faced with pressed brick. Bids have been called for and will be opened by the Board of Public Works on November 6th. Plans and specifications can be secured from the Department of Architecture.

**FLATS**—2, 2 story and base, frame, \$5,000 each. San Francisco. Architect, none. Owners, Conservative Building and Investment Co., Phelan Bldg., S. F. These two buildings will be erected on adjoining property on the north side of Clement street west of 14th avenue. Each building will have a frontage of 25 feet and a depth of 69. There will be two modern flats of five and six rooms in each. Interiors will be finished in pine and elm with hardwood floors in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the buildings will be covered with cement plaster on metal lath and brick veneer base. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**FLATS**—2 story and base, frame, \$2,500. San Francisco. Architect, I. Devenezzi, 1069 Union street, S. F. Owner, G. Barozzi, 1 Bannan Place. The building will be erected in the rear of No. 1 Bannan Place and will cover an area of 20 by 112 feet. There will be two flats. Interiors will be finished in pine. Exterior of the building will be covered with tile and shiplap. Plans are complete and the work will be done by Day Labor.

**FLATS**—2 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, Thomas McCormick, 419½

street, S. F. The building will be erected at the corner of Richland avenue and Murray street, covering an area of 25 by 10 feet. Plans provide for two modern five-room flats. Interiors will be finished in pine and redwood. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Hardwood floors will be used in the living and dining rooms. Exterior of the building will be covered with shiplap and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**FLATS**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, P. Massoli, 1242 Hollister street, S. F. The building will be erected on Railroad avenue near Hollister street, having a 25-foot frontage and a depth of 44 feet. There will be two modern five-room flats. Interiors will be finished in pine and redwood. Some hardwood floors will be used. Open fire places and tile mantels will be used in the living rooms. Tile wainscot is specified for the bath rooms and kitchens. Exterior of the building will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**FLATS**—2 story and base, frame, \$6,700. San Francisco. Architect, none. Owner, W. W. Rednall, 2500 Filbert street, S. F. The building will be erected on the south side of Union street west of Baker, having a frontage of 25 feet and a depth of 60 feet. There will be two modern flats of six rooms and bath each. Interiors will be finished in pine and elm panels and redwood. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. Automatic water heaters will be installed. Entrances will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. A red stock brick veneer will also be used. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**FLATS**—2 story and base, frame, \$1,000. San Francisco. Architect, none. Owner, R. D. Hoffman, 1731 Turk street, S. F. The building will be erected on Natoma near 6th street, and will contain four small flats of four rooms and bath each. Interior finish will be of pine and redwood. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**HOSPITAL ADDITION**—5 story and base, Chris A. construction, 8 pages in San Francisco. Architects, Bakewell

Brown, 251 Kearny street, S. F. Owners, Cooper Medical College, Leland Stanford, Jr., University. This building has been fully described in these columns several times before. Plans have been completed and are now out for figures. The building will be erected on the east side of Webster street between Sacramento and Clay. Construction will be fireproof. Special hospital plumbing and equipment will be installed. Exterior of the building will be faced with pressed brick.

**CITY HALL PLASTER ORNAMENTS AND SHEET METAL WORK**—Cost not stated. San Francisco. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids were opened at the last Wednesday meeting of the Board of Public Works for the composition plaster ornament work and for the sheet metal work on the new City Hall, P. E. Derville presented the lowest figure at \$9,325 for the composition plaster ornament work, and the Ford-er Cornice Works the lowest figure for the sheet metal work. Contracts have not been awarded. A complete list of the bids opened appears under the heading of San Francisco in this issue.

**CLUB ADDITION**—3 story and base, brick and steel, \$65,000. San Francisco. Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owners, Concordia Club. The addition will be erected at the southwest corner of Van Ness and Post street, having a frontage of 60 feet on Van Ness and 129 feet on Post street. The base of the building will contain the mechanical equipment and a large swimming tank. Main floor will be arranged for a large gymnasium with a mezzanine floor containing dressing rooms. The library and main social hall in the old portion of the building will be enlarged and extended into the new portion. Interior will be finished in pine and hardwoods with hardwood and maple floors. Steam heat and a hot water system will be installed. Exterior of the building will be faced with Colusa stone. Plans are complete and figures are being taken.

**BRANCH POST OFFICE**—2 story and base, brick and steel. Cost not stated. San Francisco. Architect, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Plans for the structural steel for the new Ferry Post Office have been completed and forwarded to the State Advisory Board for approval. Bids will be called at the next meeting of the State Board of Harbor Commissioners. Further mention will be made in these columns at that time.

**RESIDENCE**—1½ story and base, frame, \$2,000. San Francisco. Architect, none. Owners, D. U. and T. J. Enrosio, 2529 25th avenue, S. F. The dwelling will be erected on the west side of 25th avenue south of Taraval, and has been designed for a six-room house with bath. Interior will be fin-

shed in pine and redwood. Some hardwood floors will be used. There will be an open fire place in the living room. Mantel will be of tile or brick. Tile wainscot and a composition floor will be used in the bath room. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCES**—2, 1½ story and base, frame, \$2,500 each. San Francisco. Architect, none. Owner, N. J. Nelson, 4278 23rd street, S. F. These two houses will be erected on the west side of Eureka street south of 22nd and each has been designed to contain six rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the living rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**RESIDENCE**—2½ story and base, frame, \$8,000. San Francisco. Architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owner, Mrs. Rose Buckingham. The dwelling will be erected on Jackson street west of Divisadero, and has been designed to contain eight rooms and two baths. A large porch will be a feature of the building. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with rustic and shiplap. Plans are complete and figures are being taken.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, A. T. Morris, 501 11th avenue. The dwelling will be erected on the west side of 11th avenue north of Balboa, and has been designed for a six-room house with bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be an open fire place and tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, Joe Kock, 23 Cotter street, S. F. The dwelling will be erected on Cotter street west of Mission, and has been designed for a six-room house. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be a large open fire place in the living room. Mantel will be of tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2½ story and base, frame, \$20,000. San Francisco, Archi-

tect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owner, F. W. Allen. The dwelling will be erected in 22nd Avenue Terrace, and has been designed to contain fourteen rooms, three baths and sleeping porch. Interior finish will be of pine, redwood, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be a central heating system, probably hot air heat, and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile and equipped with showers. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**APARTMENT HOUSE** 3 story and base, frame, \$21,000. San Francisco. Architect, Charles Skidmore, Foxcroft Bldg., S. F. Owner, H. C. Warwick, Hearst Bldg., S. F. The building will be erected at the southwest corner of Webster and Sacramento streets, having a frontage of 36 feet on one street and 82 feet on the other. There will be a total of twelve apartments of two and three rooms with bath. Interior finish will be of pine with some elm panels and hardwood floors. There will be steam heat, a hot water system and wall beds. All bath rooms will be finished in tile. Marble and tile will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**POWER HOUSE**—2½ story and base, steel and reinforced concrete. Cost not stated. San Francisco. Engineer, City Engineer. Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for the new power house to be erected at the corner of McAllister and Larkin streets have been completed. This equipment will supply the buildings in the Civic Center with both light and heat. Construction will be fireproof. The original intention of the City Engineer was to construct a building with a steam generating plant costing in the neighborhood of \$75,000. The lighting engineers have recommended to the Supervisors that \$125,000 be spent and a plant installed using electricity that would be capable of supplying all buildings in the Civic Center. Bids are now being taken for the work, exclusive of the equipment, and will be opened by the Board of Public Works on November 11th.

**ACADEMIC BUILDING PLASTERING**—Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall. Owners, City and County of San Francisco. Plans have been completed for the plastering in the Academic Building of the Polytechnic High School. Group and figures are now being taken. Bid. will be opened by the Board of Public Works on November 11th. Plans and specifications can be secured at the City Department of Architecture.

**GRADING**—Cost not stated. San Francisco. Engineer, Charles E. Withersell, 116 Jessie street, S. F. Owner, Thomas Seabie, Engineer. Withersell has plans for grading city blocks in the Richmond District bounded by 29th and 32nd avenue, Anza and Balboa. The material to be

excavated light one mile in length and 100 feet adjacent to the city. It is estimated that the work can be done in about any day between now and March.

**THEATRE AND STORAGE**—3 story and base. Class A construction. 400,000. San Francisco. Architect, William Barclay, 127 Montgomery street, S. F. Owner, Sidney Graman. An attempt is being made to secure a long term lease on the valuable property at the southwest corner of Market and Broadway streets. The architect states that if negotiation, now pending can be brought to a conclusion that the present building will be practically torn down, a heavy steel frame erected and a theatre building erected which will be one of the largest in the west. Besides the theatre preliminary plans show four stories on the street fronts. Plans are only in the preliminary stage. Further mention will be made of the work.

**APARTMENT HOUSE** 7 story and base. Class A, \$150,000. San Francisco. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owner, S. W. Moreshead. The building will be erected at the southwest corner of California and Mason streets, covering an area of 7½ by 60 feet. There will be but six apartments, the upper two floors being arranged for one large apartment to be occupied by the owner. Each of the other floors will contain one apartment. Interiors will be finished to suit the tenants. There will be a complete steel frame, exterior walls will be of brick faced with cement plaster. The building will be one of the most elaborate apartment houses in the city. A contract for the grading has been awarded to the Sibley Grading and Tearing Co. and the structural steel work has been awarded to the Hudson Manufacturing Co. Contracts for the balance of the work will be let this week.

**BAKE OVENS**—Brick construction, 4,000. San Francisco. Engineer, C. W. Ayers, 1641 Washington street, S. F. Owners, Hygienic Baking Co., 506 French National Bank Bldg. The ovens will be installed in a brick building at the northwest corner of Arguello Boulevard and Geary street. Work will require considerable brick work, steel lintels and sheet metal work. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**RESIDENCES**—6, 2 story and base, frame, \$3,000 to \$5,000. Architect, none. Owner, Thomas Seabie, 305 11th avenue, S. F. These dwellings will be erected on the property bounded by 29th, 32nd avenues, Anza and Balboa streets. Each house will contain seven rooms and bath. Interiors will be finished in pine, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat in the more expensive homes, open fire places and tile or brick mantels will also be used. The wainscot is specified in the bath rooms and kitchens. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

#### Contracts Awarded.

**City Bids Opened.**

Robert C. Storrie Co. Present Low Figure For Twin Peaks Tunnel. Sheet Metal Bids Also Received.

Robert C. Storrie & Co. submitted the lowest figure for the construction of the Twin Peaks Tunnel at the meeting of the Board of Public Works Wednesday afternoon. Their bid was for \$3,372,000 being \$102,200 lower than the previous bid submitted by Hans Pedersen of Seattle. Three other figures for this work were received by the Board of Public Works all being submitted in due form and entitled to consideration. These figures were as follows:

**Twin Peaks Tunnel.**

Hans Pedersen ..... \$3,474,200  
Robert C. Storrie & Co. .... 3,372,000  
Twhy Bros. .... 3,609,620  
3,636

McArthur Bros. Co., S. F., \$355,960. Conditions surrounding the bidding remained unchanged from the last time, unit prices being submitted on fifteen parts of the work. Confusion in tabulating these prices make it impossible to give a list of the unit prices until the next issue.

Bids were also opened at the same meeting for the composition plaster ornament work at the new City Hall and for the sheet metal work on the same building. Following is a list of the bids received:

**Composition Plaster Ornament Work.**  
D. Mowatt ..... \$16,558  
C. C. Morehouse ..... 13,770  
P. E. Derville ..... 9,325

**Sheet Metal Work, City Hall.**  
Forderer Cornice Works, Prop. 1, \$118,800.

U. S. Metal Products Co., Prop. 1, \$127,600.  
Paraffine Paint Co., Prop. 1, (a) \$6429  
Western Furnace Co., Prop. 1 (c) \$27,200.  
Conlin & Roberts, Prop. 1, \$129,380.  
Robert Dalziel & Co., Prop. 1 (b) \$80,672; Prop. 1 (c) \$25,987.

**Building Contracts Awarded.**

### OAKLAND AND ALAMEDA COUNTY.

**APARTMENT HOUSE**—2 story and base, frame, \$10,000. Oakland, Cal. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owner, Hugh O'Kane. The building will be erected at the corner of College avenue and Taft street, and has been designed for two stores on the first floor. Upper floor will contain five apartments of one and two rooms. There will be private baths and wall bed. Pine and redwood will be used for interior finish. Patent store fronts are specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

**RESIDENCE**—2 story and base, frame, cost not stated. Alameda Co., Cal. Architect, Alameda Park Foxcroft Bldg., S. F. Owner, W. H. Schroeder. The dwelling will be erected

in the Claremont Tract, and has been designed for a ten or twelve room house with several baths and sleeping porches. A garage will also be erected on the property. Interior of the dwelling will be finished in pine, redwood and hardwood. White enamel will be used in the bed rooms. There will be furnace heat, open fire places and a hot water system. Bath rooms will be finished in tile. Hardwood floors will be used in the principal rooms. Exterior of the house and garage will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**RESIDENCE**—2 story and base, frame, \$7,000. Oakland, Cal. Architect, none. Owners, Fred Bess, 128 14th street, Oakland. The dwelling will be erected on Arimo west of Waller avenue and has been designed for a seven-room house with baths and sleeping porch. Interior will be finished in pine and redwood, with white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath

rooms will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, cost not stated. Oakland, Cal. Architect, Clinton Day, Nevada Bank Bldg., S. F. Owner, Mrs. T. L. Barker. The dwelling has been designed for ten-room house, and will be erected in Piedmont. There will be several bath rooms and sleeping porch. Interior finish will be of pine, redwood, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile and equipped with showers. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures will be called for shortly.

**PAINTING PLASTER**—Cost not stated. Alameda, Alameda Co., Cal. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans are complete for painting plastering in the new Post Office building now under construction in Alameda. Bids will be opened on November 30th. Complete information relative to this work can be secured from either the Supervising Architect at Washington, D. C., or the custodian of the site at Alameda. An official proposal appears in another column of this issue.

**STORES AND LOFTS ALTERATION**—2 story, brick, \$5,000. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner's name withheld. A brick and steel loft building situated on Washington street will undergo extensive alterations. The work will include new interior finish, hardwood fixture work, electric work, plumbing, plastering, painting and patent store fronts. Marble and tile will also be used. Plans are now being prepared.

**RESIDENCES**—2, 2 story and base, frame, \$1,000 each. Berkeley, Alameda Co., Cal. Architects, Elite Planners, 144 5th avenue, Oakland. Owner, M. Lecamm. These two houses will contain six and seven rooms with bath and sleeping porches. Interiors will be finished in pine, redwood and white enamel. Hardwood floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

**RESIDENCES**—2, 1 story and base, frame, \$2,000. San Leandro, Alameda Co., Cal. Architects, Elite Planners, 144 5th avenue, Oakland. Owner, Judge Toffelmier. Each house will contain four rooms and bath. Pine and redwood interior finish will be used. There will be open fire places and tile or brick mantels. Exteriors will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

The column headed "Add" is for concrete floors.

All bids were taken under advisement by the Board of Education.

## SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.

**BRIDGES—7, steel and reinforced concrete.** Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Bids submitted for the construction of seven concrete and steel bridges on the west side of the State Highway in Road District No. 5 have been rejected by the Board of Supervisors. The plans and specifications will be revised and new bids will be taken until November 5th at 1 a. m. Plans and specifications together with full information may be obtained from the County Surveyor.

**CHURCH—1½ story and base, frame.** Cost not stated. Sisson, Siskiyou Co., Cal. Architects, L. B. and A. L. Valk, Stimson Bldg., L. A. Owners, First Methodist Church of Sisson. The building will contain an auditorium and Sunday school rooms. Interior will be finished in pine with some ornamental plaster in the main auditorium. A central heating system, probably furnace heat, will be installed. Art glass windows are specified. Exterior of the building will be covered with rustic. Plans are complete and figures are being taken.

**APARTMENT HOUSE—2 story and base, frame, \$8,000.** Sacramento, Cal. Architect, none. Owner, C. Sprogis, 2315 Third street, Sacramento. The building will be erected on Third street, and has been designed to contain four suites of four rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the living rooms. There will be a central heating system and hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SLOUGH PROTECTION—Cost not stated.** Stockton, San Joaquin Co., Cal. Engineer, County Surveyor, Stockton. Owners, San Joaquin County. Plans and specifications for additional and necessary improvements in the Mormon slough protection district have been adopted by the Board of Supervisors. The proposed work is the res-

urfacing of brush lands with the use of heavier embankments and levees, and a general plan of work to be done with some extension of irrigation work.

**LODI CONSTRUCTION.**—Lodi, Cal. Engineer, none. Owner, State of California. The Lodi Chamber of Commerce is interesting itself in a move to obtain an appropriation of \$15,000 from the State to build an mile of road between Clements and the Mokelumne River, where Amador, Calaveras and San Joaquin corner.

LOS ANGELES AND SOUTHERN  
CALIFORNIA.

HOTEL—5 story and base. Class B  
construction. Cost not stated. Redondo  
Beach, Los Angeles Co., Cal. Archi-  
tect L. R. Pemberton, Auditorium  
Bldg., L. A. Owner, Mrs. Nelms. The  
building will be erected on Catalina  
street, having a frontage of 50 feet and  
a depth of 120 feet. There will be sev-  
eral stores on the first floor, besides  
the hotel office, dining room and lobby.  
Upper floors will be arranged for a  
total of 125 guest rooms, a large per-  
centage of which will have private  
baths. Interior will be finished in  
pine and hardwood. Tile floor will be  
used in the lobby and baths. Plans  
provide for steam heat, elevator serv-  
ice and a hot water system. Patent  
stone fronts will be used. Exterior of  
the building will be faced with ruffled  
brick. Plans are complete and figures  
are being taken.

## CONSTRUCTION WORK ABROAD.

### JAPAN.

[Consul Gen. N. West, Kobe, Sept. 16.]  
**The Kobe Harbor Works.**

This day seven years ago the Kobe plan was to reclaim land for an area of 432 acres off Onohama, providing four piers and numerous other means of facilitating harbor traffic and communication, including 12 miles of railway track, at an aggregate cost of \$6,337,701, the main purpose being materially to add to the accommodation of the Kobe customhouse, and also to construct a breakwater about 3,500 feet long, at a cost of \$1,750,000.

Last year the work was pushed forward chiefly in regard to the con-

struction of quays and roads along and on the reclaimed land, the depositing of rubble for the base of the breakwater and dredging. The reclamation for No. 1 and No. 1 piers, numbering from the east, the latter being that jutting out from Kyobashi, has now been completed, and the laying out of roads and drainage has been finished on the former and nearly finished on the latter. The reclamation works on No. 2 pier have for the most part been completed, while those on the remaining pier, No. 3, have only recently been commenced. Along the east side of Pier No. 4 temporary provisions for mooring have been made, and since October 1 last, when the *Yawata Maru*, of the Nippon Yusen Kaisha, moored there for the first time, about 120 steamers have put up in the new moorings up to date. As to the long breakwater, the construction has been completed for a length of about 900 feet. Roughly speaking, a little more than half of the work has been completed up to the present; it was originally estimated that all would be completed by September, 1918.

Pier No. 1 is to be devoted to passenger accommodation, and a post office, hotel, barrooms, etc. will be erected thereon.

[General plans of the Kobe Harbor works and the breakwater may be seen on application to the Bureau of Foreign and Domestic Commerce.]

### NEW ZEALAND.

[Consul General J. I. Brittain, Auckland, Sept. 15.]  
**Contemplated Railway Improvements.**

Very important proposals in regard to new railway works in Auckland and in other parts of the Dominion are outlined in the first report of E. H. Hiley, general manager of the New Zealand Government railways, at Wellington, New Zealand. The proposals include an extensive scheme for improving the facilities in Auckland city and Province, one of the works proposed being an up-to-date railway station at Auckland.

The report also recommends the building of new railway stations and increased terminal facilities at Wellington and Christchurch, two leading cities in the Dominion. It further recommends the extensive construction of additional tracks, strengthening of bridges, building of tunnels, and new lines of railways and the erection of automatic alarm signals at crossings. It says that the railway department is short of rolling stock, and that the North Island Main Trunk Railway, which is not only the means of communication between Wellington and Auckland but is also the main arterial line for the whole of the North Island traffic, is not suitably equipped to carry satisfactorily the business offering at present.

### Purchase of New Locomotives.

Concerning rolling stock, the report says that there are no fewer than 72 engines of various types now at work which are obsolete. It is imperative that 33 of these should be scrapped and replaced at the earliest opportunity, and that the remainder should be similarly dealt with as opportunity offers. As all the workshops at which engines are manufactured in the Dominion are working at full pressure, the general manager says that he is constrained reluctantly to recommend the importation of 20 locomotives from

## Time Table.

### Oakland, Antioch & Eastern Railway.

#### LEAVE KEY ROUTE FERRY.

Leave—Daily except as noted.

### OAKLAND, ANTIOCH & EASTERN RAILWAY

Key Route Ferry, Phone Suter 2339.  
 Red Line Trans. Co., S. F. People's Express Co., Oakland.

abroad, 10 of these to be similar to the present "A" type and 10 of the Garrett type. If a contract for the "A" class were placed in America they could be delivered in a few months. It recommends the erection of a workshop at Newmarket (Auckland) for the building of locomotives, but it would take at least two years to complete the shop ready for operations. The estimated cost of this workshop is \$145,800. There are too many types of engines at present in use, and standardization is advocated. More passenger cars are required, but the report says it is not necessary at present to go outside the Dominion for them.

The number of cars available is insufficient to meet the demand, the deficiency being particularly pronounced in the case of sheep trucks. A considerable number of new cars are in course of construction in the railway workshops, and an effort is being made to relieve the position by keeping the shops fully employed.

### Employment of Skilled Workmen—Cost of Improvements.

The appointment of a fully qualified assistant signal and interlocking engineer is advised, and it is recommended that application for the position be invited at an early date in Australia, the British Isles, and America, the salary to commence at £100 (£1,946.60) per annum. The staff of the signal engineer is being increased by the appointment of additional signal inspectors, signal adjusters, and linemen.

To carry out these estimated improvements a loan of \$5,795,000 is proposed, extending over a period of five years, the following amounts to be expended: First year, \$2,110,212; second year, \$1,078,262; third year, \$1,701,152; fourth year, \$2,960,712; fifth year, \$1,911,722.

The total earnings on all lines during the past financial year was \$19,650,574, as against \$19,299,069 for the previous year. The expenditure last year was \$2,998,869, as compared with \$13,119,129 in 1912-13. Last year's net profit was \$5,652,701, as against \$6,135,229 in the previous year. The total sum now invested in the railways is \$157,000,000. The net revenue last year was equal to a return of 3.61 per cent.

## HERE THE FIGURES.

Isn't it nearly time to "can that bunk" about the "extravagance" of the Johnson administration? It has been disproved so many times that it is an abuse of the patience of the people to discuss it further. But, having nothing else to say which they dare say, the opponent and the stalking horse still continue to purvey it. So, here for once more, are the facts.

The Johnson administration did cost more than its predecessors, as each of them had cost more than its predecessors, but the increase was nowhere near as much as these figure-jugglers claim, and it did not go where they insinuate it did. It did cost more, \$7,966,155.68 more, in fact. Here are the exact figures of total general and special appropriations of the past three administrations:

Pardee .....	\$18,855,142.16
Gillett .....	21,767,077.77
Johnson .....	32,416,233.45
Less cash revolving fund .....	682,000.00

Net Johnson .....

Net Johnson .....	\$32,733,233.45
Increase .....	7,966,155.68

Now, where did this \$7,966,155.68 go? Well, here is where most of it—\$7,192,070, to be exact, went. Go over the items carefully, and see which you would cut out, if you could. The items marked "increase" merely show the excess of appropriations over similar appropriations in the preceding administration.

Here are the figures:

R. R. Commission (increase) .....	\$52,000.00
Free text books .....	510,000.00
Agricultural College (inc.) .....	732,000.00
Civil Service .....	50,000.00
Board of Control .....	192,000.00
University of California (exclusive of agricultural department) increase .....	868,000.00
Buildings for Hospitals, 1911 .....	890,000.00
Idaho, 1912 .....	890,000.00
Presno Normal .....	285,000.00
River control .....	400,000.00
Santa Barbara Normal .....	170,000.00

Total increase .....	7,966,155.68

Net increase .....

Net increase .....	\$ 778,085.68
--------------------	---------------

These are the figures of the State Board of Control.

They account for \$7,192,070 or all but \$778,085.68 of the total increase, leaving only this residue to cover the natural increase in general expenses, due to the increase of population and industries in the state. Of course this is not near enough. The rest had to be made up by savings. If the state had done no new things these ten years, if it had merely gone on doing the old things, practically all the extra cost of doing those things in a growing state would have been met by the saving of doing those things in a new and more

economical way. As it was, the natural growth was in fact met by savings, plus this \$778,085.68 of extra appropriations, and all the remaining increase amount-

## THE CARNIVAL.

Oh, the autumn tide is the carnival tide.

And what shall the carnival wear? Shall it be the blue of the haze-hung skies

That is blent with gold and with topaz dyes?

Shall it be the pied soft green that lies on the meadow slope and the mountain side.

Shimmering far and fair?

Nay, none of these for the carnival tide, For red is the carnival wear!

And never a redder carnival shone Than now where the Sun and the Aisne flow on.

In the red of the eve, in the red of the dawn,

And the war fires rule and the thunders ride

Under the autumn air? Of what avail is this carnival tide.

This blood red carnival wear, These carnival lines that rock and reel

And eddy and sally and meet and wheel And break like a surge on a shore of steel?

Ay, what, when the doom-led men have died,

Does the King of the carnival care? —Clinton Scollard.

William Penn. in his Charter of Rights, provided that for every five acres of forest cleared one acre should be left in woods. Foresters today maintain that on an average one-fifth of every farm should be in timber.

## MINOR JOBS ABOUT TOWN.

827 Noe, repair porch, owner, F. E. Blanton, Premises, contractor, E. C. Ellet, 120 Burnett Ave., cost, \$100.

2446 Howard, add porch; owner, J. C. Benndsen, Premises, cost, \$180.

1414 Divisadero, concrete floor; owner, H. Anixter & Sons, contractor, California Concrete Co., cost, \$175.

1731 Clay, electric sign, owner, M. Rose, Premises, contractor, Brumfield Elec. Sign Co., 18 7th, cost, \$100.

3673 22nd, change front, owner, Mike Landers, cost, \$34.

285 Geary, minor additions, owner, Schnusler Bros., Premises, contractor, Robt. G. B. Black, Alameda, cost, \$265.

308 Kearny, add front, owner, Jim & Co., contractor, J. Kusich; cost, \$150.

1541-46 Fillmore, add mezzanine floor, owner, A. Simos, Premises, cost, \$250.

1025 Green, one-story frame garage owner, L. Butler, Premises, cost, \$80.

885 29th and Alabama, reshingle dwelling, owner, A. Corbett, Premises, cost, \$65.

1725 Irving, add porch, owner, Geo. J. Straker, Premises, cost, \$100.

1311 29th, raise and underpin dwlg., owner, John Phelan, Premises, contractor, J. Dwyer, 18 27th.

1506 17th Ave., alter dwelling, owner, Mrs. Foss, Premises, contractor, W. Harkins, 2077 Union, cost, \$80.

1712 Fillmore, electric sign, owner, J. Goodman, Premises, contractor, Federal Sign System, 277 8th, cost, \$80.

143 Clay, add porch, owner, A. J. Martin, Premises, cost, \$205.

2863 Mission, alterations, owner, C. Katz, 1200 Dolores; cost, \$250.

3222 Buchanan, alter dwelling, owner, Mrs. Sweeney, Premises; contractor, Ferguson & Son, 1739 Union; cost, \$30.

537 Market, electric sign; owner, Walter Real Estate Co., Premises; contractor, Novelty Elec. Sign Co., 165 Bddy; cost, \$200.

554 London, alter and raise dwlg.; owner, Mrs. W. Herbers, Premises; cost, \$100.

1255 3rd Ave., concrete floor; owner, Mr. Lewis; cost, \$165.

S Filbert 260 E Hyde; alter and add to dwelling; owner, Mrs. Spalsbury, Premises; contractor, J. D. Bell, 549 Pacific Bldg.; cost, \$50.

131 11th Ave., enclose porch; owner, M. T. Simpson, Premises; contractor, T. Mowat, 2135 Market; cost, \$150.

S Geary E Octavia; reshingle roof; owner, First English Lutheran Church, Premises; cost, \$284.

707 Clement; alter front; owner, J. J. Stokes, 1146 Clement; contractor, G. W. Dougherty, 1146 Clement; cost, \$250.

121 Juniper; repair fire damage; owner, Mrs. Berger, Premises; cost, \$100.

## FINISH CONDUIT FOR ELECTROLIER SYSTEM.

LINDSAY, Tulare Co.—The conduit work for the city's new electrolier system is now completed. Five thousand three hundred feet of cable work was completed yesterday in eight hours. The cable is of No. 6 copper wire, with a heavy insulation of rubber, asbestos and lead, making the conduit both water and fire proof. It is expected that the lights will be ready for use by the time the paving is completed.

## DIAMOND MATCH LUMBER CUT.

CHICO (Butte Co.), Oct. 27.—When the Diamond Match Company logging camps close down sometime between November 10th and 15th, it is estimated, by V. S. Woolley, Pacific Coast manager of the company, that 37,500,000 feet of lumber will have been the output for the season.

This is slightly under the average season's cut of 40,000,000 feet. The mill will close down as soon as the logs in the pond have been run.

## BUSINESS IS GOOD.

To show that business is good in San Francisco, especially in the building line, we call attention of our readers to the totals of the Building Department of the Board of Public Works. Yesterday between the hours of 10:30 A. M. and 4:20 P. M. there were 45 applications filed, the cost of these improvements being estimated at \$125,000.

Six thousand bushels of lodgepole pine seed are being collected this fall on the Arapahoe national forest, Colorado, for use in reforestation work next spring.

The fellow who always says just what he thinks is the one who's all in trouble.

Officers of the Okanogan national forest in the state of Washington are installing powerful signal lanterns for use in reporting forest fires from lookout peaks.

## Editorial Comment.

What with the war in Europe and the election in California, the prospect of the state going dry and half a hundred other amendments to vote on, the month of October has been one of excitement even if business has been dull. Now that the election is over and things remain substantially as they were builders naturally look for prospects for business and what the outlook is for work for the coming months.

Everything considered the month of October has been pretty good for San Francisco. Permits and contracts for the month amounted to \$2,576,013, and to this may be added the contract for the Twin Peaks tunnel, which amounted to \$3,372,000, making in all a grand total of \$5,948,013. Segregated under several headings the figures are as follows: Brick and concrete, \$355,912; frame construction, \$960,563; alterations and additions, \$166,944. Total for private construction, \$1,482,424. To this is to be added Panama-Pacific construction, \$584,257; city buildings, \$144,722; street and sewer work, \$6,161; State work within the city, \$338,664; U. S. Government work, \$12,785, and the Twin Peaks tunnel contract, \$3,372,000.

Compared with other years the record of the month of October is as follows:

October, 1905 .....	\$1,490,510
October, 1906 .....	6,836,331
October, 1907 .....	4,980,508
October, 1908 .....	3,632,047
October, 1909 .....	2,083,235
October, 1910 .....	1,772,952
October, 1911 .....	1,928,826
October, 1912 .....	1,918,839
October, 1913 .....	2,152,909
October, 1914 .....	2,570,013

It will thus be seen that exclusive of the Twin Peaks tunnel the total for the month is greater than any year since 1908. The new war tax goes into effect in December. Things are now adjusting themselves to the changed conditions. The coming months should witness a return of confidence and more activity in building lines.

### THE CASE OF BELGIUM.

W. A. White in the Euphoria Gazette.  
One of the most perfect specimens of the complete standpoint mind is found under the alabaster brow—or is it perhaps ivory?—of our handsome friend, Charles F. Scott of Iola. Mr. Scott in a recent editorial took the position that Belgium might have done better than they did by fighting and meeting defeat, if they like Luxembourg, had permitted Germany to pay Belgium for

the privilege of crossing Belgian territory. Mr. Scott very succinctly puts it that a dead hero is not comparable to a live citizen who is not so heroic.

That, fundamentally, is the reasoning of the standpoint mind. Now it seems to us that the sturdy example of the fighting Belgians, dying for what they believe is right, standing by their pledge of neutrality and refusing to accept bribe or ransom to betray their allies, the Dutch, the English and the French, who were depending upon Belgian neutrality—it seems to us that the sturdy example of the Belgians is worth more to the world than all the money piled up for ransom could do for the civilization of Belgians. Moreover, if all the Belgians but one man were killed, he would be worth more for breeding purposes to the world, and would pass to posterity a stronger, worthier line in blood and tradition than all the living bribed Belgians would be worth if they had taken the money.

Of course, there is right on both sides of the controversy. History is filled with justification for either side—the man who stands compromising with Erasmus, or the man who nails the theses to the door, like Luther; the man who sees the truth and turns away like the rich young man of the parable, or the man, like the great and good St. Francis, who goes out naked to give his life to the world.

But of all the examples of history, it seems to us the example of the great Young Jew is the best. He saw his native land oppressed and tax-ridden. He saw his religion the refuge of grafters who used the temple to line their pockets. He saw the alliance between the high priests and the alien politicians, and he saw Rome rising like a great menace to liberty in the earth. He seems to have been pretty well over his world and to have come back in his early thirties schooled in public speaking, keen and wise in world wisdom. He could have gone into politics, joined the two old parties, the Romans and the Pharisees, reformed his country from the inside, and he could have been a great prophet, a great giver of the law, a real liberator. But he was infinitely wise. He chose to give his life. So he saved the world. It took faith—the greatest faith that man ever has shown. But his faith has been justified.

Belgians had exactly the young Jew's choice. They could have gone into the German empire and could have made their country great. But they gave their lives—and are helping to save the world.

### REMOVAL NOTICE.

E. T. LEITER & SONS, CONTRACTORS, have moved to 27 Post Street

# Lime, Its Composition, Manufacture and Properties.

Abstract of Paper in Concrete Cement  
Age.

By Richard K. Meade.

The use of lime as a binding agent for brick, stone and other material dates back into antiquity, and what people first employed it and at what early time it was discovered are not known. It is fairly certain, however, that it was the first binding material other than clay used in masonry construction. It is found between the stones of what remains of a very ancient temple on the island of Cyprus, supposed to be the oldest ruin in the world, and the walls of many ancient structures were held together by lime and sand mortar.

Lime is made, as nearly every one knows, by burning limestone. This latter mineral, consists of carbonate of lime or, as the chemists would call the latter compound, "calcium carbonate." Limestones, however, are more or less impure and always contain some carbonate of magnesia, silica, oxide of iron and alumina mixed in with carbonate of lime. A good high calcium limestone will contain less than 2 per cent of such impurities. Carbonate of lime in its turn is composed of lime, or, as the chemists term it, "calcium oxide," and carbon dioxide. Calcium oxide is composed of the metal calcium and oxygen, while carbon dioxide is composed of carbon and oxygen.

## Reactions in Manufacturing.

When we heat carbonate of lime to a temperature above 1,700 degrees Fahrenheit it breaks up into carbon dioxide, which, being a gas, passes off, and lime, which, being a solid, remains behind. For every 100 pounds of carbonate of lime we shall have produced 44 pounds of carbon dioxide and 56 pounds of lime.

Limestone, as we have said, is composed of more or less pure carbonate of lime. The principal impurities are silica, iron oxide, manganese and alumina. Mixed with the carbonate of lime is always some carbonate of magnesia, the amount varying from a trace to about 45 per cent. This carbonate of magnesia should not be considered as an impurity, however, since it is decomposed by heat, just as carbonate of lime, into magnesia and carbon dioxide. The magnesia which remains in the lime confers on it certain valuable properties and increases its usefulness for some purposes.

When limestone is heated to a red heat it is decomposed, gives off its carbon dioxide and leaves a residue consisting of lime and magnesia mixed with the impurities in the limestone. These impurities, as has been said, consist of silica, iron oxide, alumina and manganese (which must not be confused with magnesia). These all exert more or less influence on the properties of the lime and particularly on its color. The purer the lime is the better, and hence the purer the limestone, the better lime it will make. The blue and gray colors usually associated with limestone is caused by the presence of organic matter in the latter. This organic matter burns when the limestone is heated, and

hence the color of the limestone is not often any indication of the quality of lime it will produce. Some nearly black limestones burn to a white lime. Lime always contains a much higher percentage of impurities than the limestone from which it was produced, and a limestone containing 2 per cent of impurities will produce a lime containing over 2½ per cent impurities.

Magnesium carbonate is present in limestone in quantities varying from a mere trace to 45 per cent. In the latter case the limestone is known technically as dolomite, and limestone containing a high percentage of magnesium carbonate as magnesium or dolomitic limestone, and the lime resulting from the burning of such limestones is known as magnesian or dolomitic lime. Generally speaking, it may be said that dolomitic limes are preferred for plastering, because they spread more easily, although both kinds are used, while for agricultural purposes the high calcium limes are preferred.

The National Lime Manufacturers' Association has officially adopted the following classification for limes based on the amount of magnesia which they contain:

High calcium lime contains 0 to 5 per cent magnesia.

Magnesian lime contains 5 to 25 per cent magnesia.

Dolomitic lime contains 25 to 45 per cent magnesia.

Super-dolomitic lime contains over 45 per cent magnesia.

## Uses of Lime.

Lime is employed for many purposes besides building. Among these may be mentioned its uses as a fertilizer, for water softening, for purifying coal gas, in tanning leather, in the manufacture of sugar, wood paper-pulp, glass, calcium carbide, bleaching powder, lyo and many other chemicals. For most of these purposes a high calcium lime is required, although both kinds are used for fertilizer, and dolomitic lime is preferred for wood pulp manufacture. For all of these purposes the value of the lime increases with its purity.

The presence of very small amounts of iron tends to color the lime red or yellow, while manganese makes it gray or black. Silica decreases the plasticity of lime and also its sand-carrying capacity, but alumina, on the other hand, increases both of these properties. When lime is to be used for building purposes, other than for plaster, mashing, and for chemical purposes, it may contain quite a large amount of impurities, and many limes, and extensive use which contain from 5 to 10 per cent impurities. Some of the lime sold locally for building is very impure, containing as often as 65 per cent lime. Where such a lumpy, gray dust, however, is usually quite pure.

Lime is made extensively from the Atlantic seaboard and is sold in bags which are composed of a cheap

lime (as are all shells) and are quite free from impurities.

## Lime in Building Work.

Lime owes its use in building to the fact that when it is mixed with water it combines with some of this latter to form calcium hydrate or slaked lime. When this latter is mixed with sand and used as a mortar, the lime absorbs carbon dioxide from the air to form again carbonate of lime, the substance from which it originally was made. So it will be seen that in the manufacture and use of lime we have a complete cycle of events. Starting with limestone or calcium carbonate, we decompose this into carbon dioxide and lime, and this lime in turn, when made up into mortar, re-absorbs carbon dioxide, which is always present in the air, and reverts back to calcium carbonate or limestone. Magnesia absorbs carbon dioxide just as does lime, and hence it, too, acts as a binder.

## High Calcium Lime and Magnesia Lime.

A high calcium lime slakes very quickly and generates considerable heat, and unless great care is exercised in its slaking it is apt to "burn." This is occasioned by uneven distribution or slow mixing of the water and the lime. A magnesian lime, on the other hand, slakes more slowly and with evolution of much less heat, and there is no danger of burning, but time must be given it to hydrate thoroughly. Both limes increase in volume on slaking, the swelling being most marked in the case of the high calcium limes. On the other hand, both limes decrease in volume when they harden in the work, the shrinkage being least with the magnesian lime.

Magnesian mortars generally work more smoothly and spread more freely under the trowel than high calcium limes. They are hence generally preferred by plasterers. The high calcium limes, on the other hand, give a larger volume of "putty" and carry more sand, so that when they can be used they are often cheapest. Magnesian limes are generally considered stronger than high calcium. The actual crushing strength of 1:3 sand-lime mortar, mixed by weight, is approximately 100 pounds per square inch at the end of one year.

## Air Slaking of Lime.

If lime is left in the air it will absorb water and carbon dioxide from the latter. The lumps fall to pieces and the lime is said to "air slake." Such lime is ordinarily considered worthless, as the absorption of carbon dioxide simply converts it back to limestone. How badly spoiled such lime is will depend entirely on how much carbon dioxide has been absorbed. Unquestionably when the lumps begin to crumble the lime product has simply taken up water, and hence is merely dry water-slacked lime and similar in composition to hydrated lime. After a time, however, it is completely changed to the car-

bonate, when it is worthless. Crushed lime will keep much longer than lump lime, as the air cannot get to all parts of it as well.

Lime is often sold by the "barrel" and the "bushel." Owing to the fact that the lime is in lumps, which vary greatly in their relation between weight and volume, both units are uncertain and not only vary with the locality but also even with the brand of lime. The bushel generally weighs from 35 pounds to 50 pounds, with about 50 pounds as an average, and a barrel of lime from 150 pounds to 350 pounds. Generally a barrel is considered as 200 pounds.

The production of lime in this country amounts to about 3,500,000 tons annually, and the average price is about \$1 per ton. Pennsylvania and Ohio are the largest producers. About 45 per cent of the lime manufactured goes to the building trade, and about 17 per cent to the farmer, while of the balance the chemical works, sugar factories, paper mills and tanneries consume the larger share.

### NEW YORK ARCHITECTURE.

New York is no less cosmopolitan in its architecture than in its population. Crowded together with the narrow boundaries of Manhattan Island will be found examples of every recognized architectural style, and many which are not, often in violent contrast to each other. A little search will reveal many interesting corners, sometimes a block or more of buildings which might have been transplanted bodily from some foreign city.

Many of these reproductions have been carried out with great fidelity and the illusion of being in a foreign city is perfect. New York's skyline is composed of line borrowed from several countries, contends a writer in the New York Sun. It is almost impossible to walk for a block on any street without meeting with some hint in the facades of the many countries from which the population is drawn. The styles are besides borrowed from many periods, many of them very ancient, so that the famous cities of the past as well as the present are represented.

There is more than a hint of ancient Rome in several New York streets. The colonnade of the new post office, for example, with its full score of great columns, would have been worthy of Rome at its height. The colonnade has been carried out with a classic severity and correctness which would doubtless have won high praise from Roman critics. The colonnade before the new municipal building, although of somewhat more modern line, would have looked well facing the Roman forum.

No city has probably exerted a greater influence upon New York's architecture than Paris. In many sections of the older city the mansard roof, or some adaptation of it, lends the air of Paris roof lines to entire blocks. There are hundreds of examples of modern Parisian architecture in all parts of the city. Many of the newer apartment houses and hotels might have been transplanted bodily from Paris, so closely do they follow the originals. Scores of examples might be sighted of doorways in the newer office buildings, hotels and

apartment houses, which exactly reproduce Parisian originals. The beauties of the French chateaux have so been freely borrowed. A roomy chateau has been almost perfectly reproduced on Riverside drive, and the surrounding lawns and trees complete the picture.

The influence of London on New York's architecture has naturally been great, although less than that of Paris. Half a century ago many blocks of houses were built exactly reproducing London. One of the most interesting of these will be found in a narrow street in Greenwich village which might have been transferred intact from Whitechapel. The bracketed lanterns and the absence of a cornice of any kind give the block a surprisingly foreign appearance. In the neighboring streets and squares of Greenwich village one could easily imagine himself in London of the past generation. Several of the smartest shops on Fifth avenue and the side streets are closely copied from originals in Bond or Regent street. The skyline of New York is broken by scores of church spires more or less in the spirit of Sir Christopher Wren, and almost all the church architecture strongly hints English originals.

The Italian influence is clearly shown in many of New York's newest residences on the upper East side. The general design of famous originals, especially in Milan, has been freely used.

It is surprising that New York, because of its Dutch ancestry, has not more of the architecture of Holland, either ancient or modern. The original town of New Amsterdam has, of course, long since disappeared. In recent years, however, an attempt has been made in several parts of the city to introduce the architecture of modern Holland.

### PROGRESS OF AGRICULTURAL EDUCATION IN AMERICA.

During the past ten years the number of students taking the full four-year course in agriculture in American agricultural colleges has increased from about 2,500 to 12,500, or 500 per cent. The number of white students registered in short or special courses has doubled in the same period, amounting now to about 11,000. Since 1910 the yearly number of graduates in agriculture has increased from 708 to 1,384, and the number receiving advanced degrees from 74 to 164. The aggregate revenues of the land-grant colleges have about tripled, while those of the experiment stations have more than tripled. The men on the staffs of the experiment stations have increased from about 750 to about 1,600, and the number of those doing no teaching from 375 to 925. An especially notable development of the last decade has been the growth of agricultural instruction in secondary schools. In 1903 very few secondary schools gave such instruction, while at present over 2,000 do so. Remarkable progress is also to be noted in agricultural extension work, outside of that carried on in farmers' institutes. There are now 1,200 men employed as state, district and county agents, and as boys' and girls' club workers. The operations of the Smith-Lever Act will greatly increase this class of work. The above

figures are quoted from a recent address by Dr. A. C. True, director of the United States office of Experiment Stations.—Scientific American.

### EFFECT OF ROAD IMPROVEMENT ON ADJACENT LAND VALUES.

WASHINGTON, D. C., Nov. 6, 1911.—The following cases showing the relation between improved roads and adjacent land values are cited by the specialists of the Office of Public Roads in the United States Department of Agriculture (Bulletin No. 136).

Manatee County, Florida, built 64 miles of macadam and shell road. From 1911 to 1912 land on the road increased in value \$20 per acre, and land a mile away from the road showed an increase of \$10 per acre.

Spotsylvania County, Virginia, improved 11 miles of road and land which formerly sold on an average of \$24.74 changed hands within three years at an average of \$41.71 per acre.

In Dinwiddie County, Virginia where 125 miles of road were built, land between 5 and 10 miles from Petersburg advanced on an average from \$15.25 to \$30 an acre in about 15 instances, while land 10 miles from town increased on an average, in 16 cases, \$16.52 an acre.

In Franklin County, New York where 124 miles of road were built, eight pieces of land selected at random showed an increase of 27.8 per cent after the improved roads were built while in Lee County, Virginia, which built 84 miles of road, land similarly advanced 25 per cent.

### SCHOOL ATTENDANCE.

The construction of the bond-built highways in several of the counties herein mentioned has been of decided benefit to school attendance. In Spotsylvania County one consolidated school replaces three one-room schools and another consolidated school is planned. In Dinwiddie County school attendance increased 17 1-2 per cent in one year on the improved roads, and several school wagons carrying 24 pupils each have been put in service. In Lee County school attendance along the improved roads shows an average of 71 per cent against 62 per cent along other roads. In Wise County, Virginia several successful school consolidations have been effected since 1909. The Pole Bridge School in this county on the road from Coburn to Wise replaces four one-room schools.

### APPROPRIATIONS WANTED BY BOARD OF PUBLIC WORKS FOR STREET IMPROVEMENTS.

At the regular meeting of the Board of Public Works last Friday the following appropriations were asked of the Supervisors for street improvements to be done in the City and County:

Union street, from Franklin to Gough \$275 for construction of side walks.  
Chestnut street, from Webster to Laguna, \$525 for paving at railroad tracks.

Stockton street, from California to Pine, \$1000 for repaving street.  
Russia avenue and Mission street, reconstruction, \$250.

The Board also accepted the street work done on Adams street from 11st to 12nd avenue.

Classified according to Character of Work

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house and stores, 3 story and base, brick and frame, \$50,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected at the southeast corner of Sixth and Shipley streets and will cover a large ground area. There will be four stories on the first floor besides the entrance. Upper floors will be divided into 71 suites of two rooms each. Interior will be finished in pine and redwood. There will be private baths and wall beds. Plans provide for steam heat, elevator service and a hot water supply. The Fess system of oil burning will be used. Bath rooms will have tile wainscot and composition floors. Patent store fronts will be used. Marble wainscot is specified. Exterior of the building will be faced with pressed brick and cement plaster. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$20,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The building will be erected at the northeast corner of 6th avenue and Irwin streets and has been designed to contain nine apartments of two, three and four rooms. Interiors will be finished in pine and redwood with some white enamel. Hardwood floors will be used in the principal rooms. There will be steam heat and a hot water supply. All suites will have wall beds, Marshall-Stearns being specified. Bath rooms will be finished in tile and will have composition floors. Marble and tile will be used in the entrance. Exterior of the building will be covered with cement plaster, shingles and half timber. Plans are complete and segregated figures are being taken.

**OAKLAND, CAL.**—Apartment house, 3 story and base, frame, \$25,000. Architect, none. Owner, E. A. Schmidt, 1484 Harrison street, Oakland. The building will be erected on the north side of 10th street east of Telegraph avenue, and has been designed to contain a total of sixty-six apartments of two and three rooms. Interiors will be finished in pine, redwood and hardwood. Hardwood floors will be used in the living and dining rooms. There will be steam heat and a hot water system. All suites will have wall beds and private baths. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**PORTLAND, ORE.**—Apartment house, 2 story and base, brick \$8,000. Architects, Goodrich & Goodrich, Abington Bldg., Portland. Owners, Commonwealth Realty Co. The building will be erected on Sandy Road,

having a frontage of 44 feet and a depth of 95 feet. There will be a total of 16 suites of two and three rooms. The three-room apartments will have two disappearing beds and the other apartments one. Interiors will be finished in pine throughout. Some hardwood floors will be used. Plans provide for steam heat and a hot water system. Each apartment will have a private bath. Exterior of the building will be faced with pressed brick. Plans are prepared and the work will be done by Day Labor.

**SAN FRANCISCO**—Apartment house, 3 story and base frame, \$21,000. Architect, Charles H. Skidmore, Foxcroft Bldg., S. F. Owner, Maud Warwick. The building will be erected at the southwest corner of Sacramento and Webster streets, covering an area of 36 by 72 feet and has been designed to contain twelve suites of two and three rooms. Interiors will be finished in pine, redwood and elm panels. Hardwood floors will be used in the living rooms. Plans provide for steam heat and a hot water system. All suites will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the baths. Entrance will be finished in marble. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and in the hands of H. C. Warwick, Hearst Bldg., who will do the work by Day Labor.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$15,000. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner's name withheld. The building will be erected on Page street and has been designed to contain nine suites of three and four rooms. Interior finish will be of pine and redwood. Some hardwood floors will be used. All apartments will have private baths and wall beds. Bath rooms will have composition floors and tile wainscot. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**LOS ANGELES, CAL.**—Apartment house and theatre, 3 story and base, brick and steel. Cost not stated. Architect, Charles M. Moffet, San Fernando Bldg., L. A. Owner, A. Duperval. The building will be erected at the corner of Washington and 5th avenue, covering an area of 75 by 150 feet. Ground floor will be arranged to contain a theatre seating 500 people and six stores. Upper floors will contain eighteen suites of two rooms each. There will be wall beds and private bath rooms. Interior will be finished in pine with some ornamental plaster in the theatre. Plans provide for steam heat and a hot water supply. Bath rooms will have composition floors. Patent store fronts are specified. Exterior will be faced with pressed brick. Plans are being prepared.

## Contracts Awarded.

**LOS ANGELES, CAL.**—The contract for the construction of a 3 story and

base, frame, \$15,000. Architect, none. Owner, Dr. Mack. Contractor, G. B. Schuler, Sunset Boulevard and Gardner street, L. A. Contract price, \$15,000.

## BANKS

**BERKELEY, ALAMEDA CO., CAL.**—Bank alteration, 1 story and base, brick, \$10,000. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Homestead Savings Bank. The building is located at 2570 Shattuck avenue and will undergo extensive repairs. Included in the work will be complete new fixtures, hardwood trim, plumbing, electric work, plastering and painting. New vaults and vault doors will be required. Plans are being prepared and figures will be taken shortly. Further mention will be made of the work.

## BONDS.

**AUBURN, PLACER CO., CAL.**—Attorney General U. S. Webb holds that the Roseville Union High School bonds of \$10,000 and the Auburn Grammar School bonds of \$15,000 are valid in spite of the fact that the attorneys for Torrence, Marshall & Co. found slight technical errors in both of the issues and turned them down.

It is probable that the bids will be readvertised for the sale of both issues.

**WOODLAND, YOLO CO., CAL.**—By a vote of 1,120 to 121 the bond issue of \$100,000 for a new grammar school or schools, as the Trustees may decide was authorized at the election held October 30th.

Work on the plans will commence immediately by Architect W. H. Weeks, 75 Post street, San Francisco.

**LOS ANGELES, CAL.**—Sealed bids will be received by H. J. LeLande, County Clerk of Los Angeles County, until November 16th for the purchase of the Los Angeles County Irrigation bonds No. 2, in the sum of \$15,000. Proceeds will be used in the erection of buildings for contemplated water works and the laying of pipe lines.

**EL CENTRO, IMPERIAL CO., CAL.**—The Railroad Commission has rendered a decision authorizing the Holton Power Company to issue \$200,000 face value of its 6 per cent first and refunding mortgage gold bonds at not less than 80 and accrued interest. The proceeds of the sale will be used by the company for various additions and betterments to its plant, including a transmission sub-station at El Centro to cost \$12,000, and a transmission line from El Centro to Seeley and Highland to cost about \$12,075.

**COLTON, SAN BERNARDINO CO., CAL.**—An election will be held in the Colton School District on November 16 for the purpose of voting bonds in the sum of \$50,000 to raise funds for the erection of a new school building on the Lincoln School site, on

Seventh street between D and E streets.

Mrs. Seth Harley, E. H. Prichard and E. G. Palmer are the Cotton school trustees.

**CORONADO, SAN DIEGO CO., CAL.**—School bonds in the sum of \$65,000 for the proposed new high school building for Coronado were defeated on October 27th by a large majority.

**SAN FRANCISCO**—City Hall bonds to the amount of \$220,000 of \$1,000 denomination; \$210,000 Municipal Railway of \$500 denomination, and \$105,000 of the same of \$100 denomination, are now being sold over the counter by City Treasurer John E. McDougald. The price fixed was par and accrued interest.

**LOS GATOS, SANTA CLARA CO., CAL.**—The Town Board has passed an ordinance to issue bonds in the sum of \$6,000 for the purchase of additional fire apparatus.

**SUSANVILLE, LASSEN CO., CAL.**—A special election will be called on Monday, November 23rd, on two separate bonding propositions—one to issue \$50,000 to acquire or build a water system, and another to issue \$10,000 for street and bridge improvements, if the resolutions now pending before the City Trustees is adopted.

**FAIRFIELD, SOLANO CO., CAL.**At a meeting here the Supervisors of Solano County authorized County Treasurer George Weniger to purchase \$100,000 worth of the State Highway bonds.

This will be \$225,000 of the bonds purchased by Solano County, \$150,000 having been taken six months ago, and in another six months another \$100,000 will be taken.

**MODESTO IRRIGATION DISTRICT, STANISLAUS CO., CAL.**—Bids will be received by the Board of Directors of the Modesto Irrigation District, Modesto, until December 14th, for the sale of bonds in the sum of \$355,000, bearing interest at the rate of 6 per cent.

Proceeds of the sale will be used in the making of improvements in and about the district. C. S. Abbott is secretary of the district.

## BRIDGES AND DAMS.

**SAN RAFAEL, MARIN CO., CAL.**—Bridge, concrete construction, \$1,160. Engineer, County Engineer, San Rafael. Owners, Marin County. The Supervisors have rejected all bids submitted for the construction of a concrete bridge across San Antonio creek on the Red Hill road. The estimated cost of the bridge was \$4,100, but when bids were opened they ran as high as \$5,800. The building of the bridge has been postponed until the early part of next year.

**RICHMOND, CONTRA COSTA CO., CAL.**—Wharf construction, timber. Cost not stated. Engineers, Haviland & Tibbitts, Alaska Commercial Bldg., S. F. Owners, Town of Richmond. Haviland & Tibbitts, harbor engineers, have completed plans and specifications for the outer wharf to be constructed in this city. The plans call for the construction of a wharf 500 feet long and 30 feet wide, on the approval of the plans by the city council bids will be called for.

**EVERETT, WASH.**—Wharf, timber pile. Cost not stated. Engineer, Chief Engineer, Great Northern Railway, St.

Paul. Owners, Great Northern Railway Co. Plans for a large timber pile wharf to be constructed on the company's waterfront yard have been completed and approved. Bid opening called for at once. Full particulars can be secured by address in the company's engineer in charge of the work at Everett.

**VANCOUVER, WASH.**—Jetty, \$100,000. Engineers, Port of Vancouver, Commission, Vancouver. Owners, Town of Vancouver. Plans have been completed and bids will be received by the Commission until 2 p. m. Monday, November 16th, for the immediate construction of a jetty to extend from the Oregon shore line into the Columbia River at an angle of 45 degrees. The structure is to be approximately 2,100 feet long, of pile and timber construction. Alternate bids will also be received for the different parts of the work in separate contracts as follows: Furnishing piling, driving piling, framing, furnishing lumber, spikes, etc., and for furnishing and placing rock. The cost of the improvement of the amount appropriated for the work is not given, but according to a very conservative estimate made by a local engineer, a structure of this character would cost about \$200,000. W. B. DuBois is secretary of the Commission.

## Contracts Awarded.

**WOODLAND, YOLO CO., CAL.**—Bridge, timber and concrete, \$14,000. Engineer, Knights Landing Irrigation District. Owners, Knights Landing Irrigation District. Contractors, Jenkins & Wells, Sacramento. Contract price, \$14,000.

## CHURCHES.

**SAN FRANCISCO**—Church, 2 story and base, brick and steel. Cost not stated. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owners, Third Church of Christ, Scientist. It has been announced that owing to a lack of funds this building will not go ahead until after the first of the year.

**OAKLAND, CAL.**—Church, 1 and 2 story, brick and concrete, \$75,000. Architect, William A. Newman, David Hewes Bldg., S. F. Owners, Second Church of Christ, Scientist. The building will be erected at the corner of 34th and Elm streets and has been designed in the classic style. There will be a main auditorium and several classrooms. Interior will be finished in pine and ornamental plaster. There will be a central heating system. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will shortly be called.

## COURT HOUSES.

**SAN FRANCISCO**—City hall, sheet metal work. Cost not stated. Architects, Bakewell & Brown, 271 Kearny street, S. F. Owners, City and County of San Francisco. All bids on Proposition No. 2 of the sheet metal contract for the City Hall have been rejected and new figures will be called. Awards were made on Propositions Nos. 1 and 2.

**OAKLAND, CAL.**—City Hall, heating fixtures. Cost not stated. Supervising Architect, John L. Donovan, Oakland. Owners, City of Oakland. Plans will be received up to November 12th

at 1 o'clock for the heating and installing special heating fixtures in the new City Hall. Plans and full particulars can be secured from City Engineer Frank M. Smith, Oakland.

## FACTORIES AND WAREHOUSES.

**SEATTLE, WASH.**—Motion picture building, group of 1 and 2 story buildings, frame and concrete, \$250,000. Architects' name not given. Owners, West Sound Film Producing Co., 1000 Bldg., Seattle. The West Sound Film Producing Company will spend approximately \$250,000 in buildings. The first unit will cost \$50,000 and will be built this year, but it has only just been announced that \$100,000 in building construction will be spent each year for the next two years. Those mentioned as interested in the company are E. K. Lamson, E. C. Wilcox and A. Belasco. The class of construction or the character of the buildings are not stated.

**SAN FRANCISCO**—Shop building, 2 story and base, brick and steel, \$11,000. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened by the Board of Public Works for constructing the shop building to be used by the City Department of Electricity show T. E. Davis & Son low on the two propositions as follows: Proposition A, \$13,200, Proposition B, \$11,551. They will probably be awarded the contract. A complete list of the figures received for this work will be found under the heading of San Francisco in this issue.

**SAN FRANCISCO**—Machine shop, 1 story and base, brick, \$6,000. Architect, W. H. Crim, Jr., 425 Kearny street, S. F. Owner, John McConaghy. The building will be erected on the south side of Grove street west of Polk, having a frontage of 34 feet and a depth of 120 feet. There will be a cement floor and metal window sash. Plans are complete and figures are being taken.

**LOS ANGELES, CAL.**—Warehouse, 6 story and base, reinforced concrete. Cost not stated. Engineer, Los Angeles Harbor Engineer, L. A. Owners, City of Los Angeles. Plans and specifications have been submitted to the harbor commission by the harbor engineer for the first of the municipal warehouses to be erected at the harbor. The engineer recommends that the structure should be six stories and basement. The plans provide for a building 152 by 180 feet, and of reinforced concrete construction. It will have large freight elevators in the center, light whip hoists over each tier of cargo docks on each side of the building, automatic sprinkler system and electric lighting system. Working drawings will be completed as soon as these plans receive approval of the Harbor Commission.

**SAN BERNARDINO, SAN BERNARDINO CO., CAL.**—Factory, 1 and 2 story, brick and concrete. Cost not stated. Architect, Norman E. Marsh, Broadway Central Bldg., L. A. Owner, Norman Food Products Co., represented by Martin M. Koenig, 1001 Union St. The specifications are being prepared and the selection of site for the new building is only preliminary drawings have been made and it is impossible to give details of construction. Further men-

tion will be made as the work progresses.

**SAN FRANCISCO**—Breweries, 3 complete plants, Class A construction, \$500,000 to \$750,000 each. Architect not selected. Owners as follows: Three of the largest brewers in the west, affected by the recent prohibition elections in Washington and Oregon, have announced their intention of coming to San Francisco and erecting extensive plants. Two other brewers are considering the California field and will locate in one or the other of the Bay Cities. These companies all have local representatives and enjoy extensive business in this state. The Seattle Brewing and Malting Co., capital stock \$2,000,000, is represented in San Francisco by John Rapp. Louis Hemrich is their water expert and will shortly arrive in this city. The company will expend about \$750,000 in new buildings. The Tacoma Brewing and Malting Co. is represented here by George Alpers and their capital stock is \$1,000,000. They intend to spend \$750,000 in new construction. The Independent Brewing Co. of Georgetown, Wash., is represented by C. F. Wagner and is capitalized for \$500,000. Gambrinus Brewing Co. Portland and Weinhard Brewing Co. of the same city will locate in California, but have not announced the selection of any particular town.

#### Contracts Awarded.

**LOS ANGELES, CAL.**—Warehouse, 3 story and base. Class C construction, \$65,000. Architects, William Curlett & Son, Merchants' Bank Bldg., L. A. Owners, Rudgear-Merle Co. Contractors, F. O. Engstrom Co., 5th and Seaton streets, L. A. Contract price, \$65,000.

#### FERRY BUILDING.

**SAN FRANCISCO**—Ferry addition, 2 story, Class A construction, \$37,500. Architect, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Bids received by the State Board of Harbor Commissioners Thursday for constructing an extension to the Ferry Building to be used as an additional baggage room for the railroads show the Construction and Engineering Co., Inc., low at \$37,400. Masow & Morrison were next at \$37,448. Eighteen bids in all were received. A contract has not been awarded.

#### FIRE HOUSES AND JAILS.

##### Contracts Awarded.

**WOODLAND, YOLO CO., CAL.**—Jail, 2 and 2 story and base, reinforced concrete, \$35,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Yolo County. Contractor, Harvey A. Klyce, Sheldon Bldg., S. F., general construction only. Contract price, \$23,571. Note: This contract does not include plumbing, electric work, heating or special fall cells and equipment.

#### FLATS.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$6,500. Architect, C. V. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, Miss G. Bray. The building will be erected on the south side of Filbert street east of Polk and has been designed to contain two modern flats of six rooms each. Interiors will

be finished in pine, redwood and oak. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and tile or brick mantels. Bath rooms will be finished in tile and will have composition floors. Simplex or Hassen window sash are specified. Exterior of the building will be covered with rustic and shingles. Plans are complete and figures are being taken.

#### GARAGES.

**FRESNO, FRESNO CO., CAL.**—Garage, 1 story and base, reinforced concrete, \$50,000. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, J. C. Phelan, 1412 I street, Fresno. The building will be erected at the corner of K and Mono streets, covering an area of 100 by 150 feet. Construction will be fireproof with reinforced concrete floors, walls and steel roof trusses. Interior will be finished in pine. There will be special gasoline storage tanks. Metal window sash and frames are specified. Exterior of the building will be faced with cement plaster. Plans are being prepared. A contract for the excavating has been awarded to Thompson Bros.

#### GOVERNMENT WORK & SUPPLIES.

##### 1 Beam Trolleys.

Abstract of proposals for 1-beam trolleys, advertisement 351, Okanagan project, Wash., opened at Los Angeles, Cal.:

Maris Bros., Philadelphia, Pa., item 1, \$45; 2, \$13.50; at Philadelphia.

B. F. Kierulff, Jr., & Co., Los Angeles, Cal., item 1, \$56; 2, \$21; at Mentor Falls, N. Y.

New Jersey Foundry and Machine Co., New York City, item 1, \$60; 2, \$23; at Garwood, N. J.

Harron, Rickard & McCone, Los Angeles, Cal., item 1, \$60.25; 2, \$19. at Philadelphia, Pa.

Wright Mfg. Co., Lisbon, Ohio, item 1, \$67; 2, \$25.10; at Okanagan, Wash.; 30 days.

Western Engineering Sales Co., San Francisco, Cal., item 1, \$94; 2, \$26.50, at St. Louis, Mo., 7 days.

Manning, Maxwell & Moore, San Francisco, Cal., item 1, \$103.50; 2, \$31.50, at New York.

H. Chinnon & Co., Chicago, Ill., item 1, \$104; 2, \$32; at Chicago, Ill.; 1 day.

Yale & Towne Mfg. Co., New York City, item 1, \$112; 2, \$35.20; at Cleveland, Ohio.

##### Earthwork.

Abstract of bids opened by the U. S. Reclamation Service at Grand Junction, Colo., for earthwork between stations 329-655 and 357, main canal, Grand Valley project:

Thorn & Whiting, Springville, Utah, \$9,100.

##### San Francisco, Cal. Painting, Etc.

The following bids were received by the custodian, U. S. post office, San Francisco, Cal., for painting and minor repairs at the U. S. Appraiser's Building, San Francisco, Cal.:

Wagner Bros., 526 Gough street, San Francisco, Cal., \$1,200, 25 days.

J. R. Kissel, 1723 Polk street, San Francisco, Cal., \$1,000, 20 days.

W. R. Carter, San Francisco, Cal., \$925; 20 days.

##### Light House Service, Sirens.

The following bid was received by the light house inspector, eighteenth district, San Francisco, Cal., for furnishing two electrically-operated sirens for stock and stores, eighteenth district:

Heath Siren Co., San Francisco, Cal., \$1,064, accepted.

##### Hanford, Cal., Post Office.

As previously reported, the contract for the construction of the U. S. post office at Hanford, Cal., was awarded to Frank Gallagher, San Francisco, Cal., at \$52,990. In the construction of the building fixtures and material manufactured by the following firms will be used: Plumbing fixtures, Crane Co.; cast iron column radiators and wall radiators, U. S. Radiator Corporation; non-conducting coverings, Keesbey & Mattison Co.; radiator valves, Jenkins Bros.; damper regulator, American Radiator Co.; air exhausting apparatus, Bishop, Babcock, Becker Co.; air valves for end of steam mains, C. A. Dunham; alternate oil-burning apparatus, Fess System Co.; motor for oil-burning apparatus, Holtzer-Cabot Electric Co.; rheostat for motor, Fess; cabinet and tablet, Frank Adam Electric Co.; conduit, Enameled Metals Co.; rubber-covered wire, Bay State Insulated Wire & Cable Co.; lighting fixtures, Reading Chandelier Works; reflectors and glassware, Macbeth-Evans Co.; pendant switches, Perkins; canopy switches, Cutler-Hammer Mfg. Co.; keyless sockets, Weber; automatic gas water heater, Pittsburgh Water Heater Co.; flush switches, Perkins; reflectors, type F-20, Weisbach Co.

##### Denver, Colo., Post Office.

An addition has been made to the contract of Norman Ker, New York City, for additional interior finish, etc., at the U. S. post office at Denver, Colo. The contract price amounted to \$9,675.

##### Honolulu, H. T., Painting.

The contract for painting several buildings at the U. S. quarantine station, Honolulu, H. T., has been awarded to George M. Yameda, Honolulu, H. T., at \$3,200.

##### Denver, Colo., Plaster Models.

The contract for furnishing plaster models for the U. S. post office, Denver, Colo., has been awarded to Neumann & Even, 329 E. 4th street, New York City, at \$6,530.

##### Honolulu, H. T., Lumber, Etc.

The contract for furnishing lumber and hardware for the U. S. quarantine station, Honolulu, H. T., has been awarded to Allen & Robinson at \$646.20.

##### Grass Valley, Cal., Post Office.

As previously reported, the contract for the construction, complete, of the U. S. post office, Grass Valley, Cal., was awarded to Welch Brothers, Oakland, Cal. In the construction of the building fixtures and material manufactured by the following firms will be used: Plumbing fixtures, Crane Co.; reflectors and glassware, Macbeth-Evans Co.; lighting fixtures, Reading Chandelier Works; radiator valves, Crane Co.; pendant switches, Perkins; canopy switches, Cutler-Hammer Mfg. Co.; keyless sockets, Weber; porcelain sockets, Bryant Electric Co.; cast-iron

garbage burner, Richardson & Bon-ton; cast-iron column radiators, Kewanee Boiler Co.; wall radiator, Fowler & Wolff; non-conducting coverings, H. W. Johns-Manville Co.; damper regulator, American Radiator Co.; air valves for radiators, National Steam Specialty Co.; air valves for end of steam mains, do.; oil-burning apparatus, Fess System Co.; motor for oil-burning apparatus, Wagner Electric Mfg. Co.; thermostatic element for controlling oil supply, American Radiator Co.; cabinet and tablet, J. Lang Electric Co.; conduit, Mark Mfg. Co.; rubber-covered wire, Belden Mfg. Co.; flush switches, Perkins.

**FORT KAMEHAMEHA, HAWAII**—Government post, frame construction. Cost not stated. Engineer, Constructing Quartermaster's Office, Honolulu. Owners, United States Government. The Constructing Quartermaster's Office at Honolulu is completing plans for an entire new barracks which is to be constructed at once at the new Government army post to be known as Fort Kamehameha. There will be 52 new buildings all of which will be of frame construction. This work will provide barracks, general quarters, administration building, post headquarters, guard house, stables, officers' quarters, warehouses and commissary store. Plans will shortly be out for figures.

**MARE ISLAND, CAL.**—Steel barges, \$135,432. Engineer, Navy Department, Washington. D. C. Owners, United States Government. Twelve steel coal barges to cost \$135,432 have been ordered built at Mare Island by Secretary of the Navy Daniels. The steel lighters will have 500 tons capacity. On completion seven of them will be sent to Pearl Harbor. The remaining five will be assigned to nearby naval stations. The hull department will place the order for material at once and the barges will be constructed in the vicinity of drydocks 1 and 2.

#### HOSPITAL CON AWARD

**ELDRIDGE, SONOMA CO., CAL.**—Hospital cottage, 1 story, concrete and frame, \$15,475. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Contractors, Louis Cereghino & Son, S. F. Contract price, \$15,475.

#### HALLS AND SOCIETY BUILDINGS.

**LODI, SAN JOAQUIN CO., CAL.**—Club house, 2 story and base, frame, \$6,500. Architect's name not given. Owners, Women's Club of Lodi. Members of the Women's Club of Lodi are viewing various sites for the erection of a club building. The funds for the erection of the building have already been secured and nothing remains but the selecting of the site. The building will be of frame construction, probably two stories in height.

**EUGENE, ORE.**—Armory, 2 story and base, reinforced concrete, \$75,000. Architects, Hunzicker & Prouse, Eugene. Owners, State of Oregon. This building has been mentioned here a number of times before when plans were being prepared. The building will cover an area of 149 by 122 feet and will be of fireproof construction. Basement will contain a large banquet hall, store rooms and gymnasium. First floor will be arranged for a drill

room 141 by 88 feet. The second floor will contain a balcony around the drill room and officers' quarters. Interior will be finished in pine throughout. A maple floor will be used in the drill room. Plans provide for steam heat. Plans are complete and figures are being taken. Separate bids will be taken for the general construction, heating, plumbing and electric work. Bids will be opened on November 21st in the office of Adj. Gen. W. E. Finzer at Portland.

#### HOTELS.

##### Contracts Awarded.

**SAN FRANCISCO**—Hotel addition, 2 story, frame, \$35,000. Architect, A. A. Cantin, Foxcroft Bldg., S. F. Owners, Hoteling Estate, Contractor, John MacBain, Redwood City. Contract price, \$35,000. This building is now known as the Seal Rock Cafe and is located on the Ocean Boulevard.

#### LIBRARIES.

**EXETER, TULARE CO., CAL.**—Library, 1 story and base, reinforced concrete, \$10,000. Architects, Bowen & Davis, Fresno. Owners, City of Exeter. The building has been designed in the classic style and will contain a large main reading room, stack room and office for the librarian. Interior will be finished in pine and redwood with a maple floor in the reading room. Plans provide for furnace heat. Metal book shelves will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for at once.

#### PANAMA-PACIFIC EXPOSITION WORK.

Churchill, and E. S. Hall, secretary, have awarded to J. B. Newman, Napa county bridge builder, the contract for the facade for the Napa County exhibit at the Panama-Pacific Exposition.

#### POST OFFICES.

##### Contracts Awarded.

**PORTLAND, ORE.**—Distributing post office, 1 story and base, reinforced concrete, \$12,000. Architect, Earl A. Roberts, Selling Bldg., Portland. Owners, Pioneer Trust Co. Contractor, John Hedstrom, 756 Kerby Street, Portland. Contract price, \$12,000.

#### RAILROAD CONSTRUCTION AND EQUIPMENT.

**SAN FRANCISCO**—Power house equipment. Cost not stated. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans have been completed and figures are now being taken for the equipment for the new Municipal Power House to be erected in the Civic Center. Plans and specifications can be secured from the City Engineer. Bids will be opened by the Board of Public Works on November 11th.

**SAN FRANCISCO**—Car barns, 1 and 2 story and base, reinforced concrete, \$125,000. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Working drawings have been completed and approved for the new Municipal Car Barns to be erected in the Potrero District. The building will be a fireproof structure occupying the block bounded by 15th, Hampshire, York and Mariposa streets, covering an area of 240 by 150 feet. There will be reinforced concrete walls and floors, and steel roof trusses. Interior will be arranged for storage of cars, repair shops and offices. Pine and metal trim will be used. Special electric work will be installed. Exterior of the building will be faced with cement plaster. Plans will be out for figures next week.

**LOS ANGELES, CAL.**—Freight shed, 1 story, reinforced concrete. Cost not stated. Engineer, Chief Engineer Santa Fe Co., Kerrohoff Bldg., L. A. Owners, Santa Fe Railway Co. The building will be erected at the corner of 3rd and Santa Fe avenue, covering an area of 60 by 200 feet, with a wing 60 by 150, designed for an unloading shed for automobiles. Walls and floor will be of reinforced concrete. Metal doors and window sash are specified. Plans call for modern plumbing and electric work. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Railroad work. Cost not stated. Engineer, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. A crew of Southern Pacific engineers are now in Martinez making surveys for the spur tracks which are to be built

from the main line through the lands of the Shell Company where the big oil refinery is to be built. The main spur track is to extend from the main line at a point near the present spur track connections southerly through the canyon in which the old Fraser home stood to the southernmost limits of the tract. Additional spur tracks are to be built at once to other parts of the 400-acre tract.

LOS ANGELES, CAL.—Express depot, 1 and 2 story and base, Class A and Class C construction. Cost not stated. Architect, James H. Humphreys, Wells-Fargo Bldg., S. F. Owners, Wells-Fargo Co. The building will be erected at the corner of 11th street and Central avenue, covering a ground area of 100 by 225 feet. The main portion of the building will be of Class A construction with a steel frame and reinforced concrete walls and floor. Steel roof trusses will be used. Interior will be finished in pine and metal trim. Metal window sash and frames will be used. Exterior will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

### RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$6,000. Architect Charles J. Rousseau, 46 Kearny street, S. F. Owners, H. B. and L. D. Allen, 128 Sutter street, S. F. The dwelling will be erected on the east side of 8th avenue north of Moraga, and has been designed for an eight-room house with two baths and sleeping porch. Interior will be finished in pine, redwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residences, 6, 1 story and base, frame, \$2,500 each. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. These houses will be erected on Hillway street south of Carl, and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living rooms and dining rooms. There will

be open fire places and tile or brick mantels. Tile wainscot will be used in the baths and kitchens. Exteriors will be covered with rustic, shiplap and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**PIEDMONT, ALAMEDA CO., CAL.**—Residence, 2 story and base, brick and frame. Cost not stated. Architect, Clinton Day, Nevada Bank Bldg., S. F. Owner, Mrs. T. L. Barker. The dwelling will be erected on Sea View avenue and has been designed to contain twelve rooms, three baths and sleeping porch. A garage will also be erected on the property. Interior of the house will be finished in pine and redwood, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. A vacuum cleaning system and automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the house will be covered with brick veneer and cement plaster on metal lath. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Residence, 2 story and base, reinforced concrete, \$10,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mrs. Clarence Musto. The dwelling will be erected at the corner of Vallejo and Divisadero streets and has been designed for a city dwelling containing sixteen rooms, several baths and conservatory. Interior will be finished in pine, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be steam heat, a hot water system and vacuum cleaning. Open fire places and tile and marble mantels will be used. All bath rooms will be finished in tile. Exterior of the house will be covered with cement plaster. Plans have been out for figures and the three lowest contractors are now redrawing slight changes. A contract will be awarded this week.

**LOS GATOS, SANTA CLARA CO., CAL.**—Residence, 2 story and base, frame, \$5,000. Architect, William C. Hayes, First National Bank Bldg., S. F. Owner's name withheld. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared. Figures will be called for shortly.

## SCHOOLS.

**SAN FRANCISCO**—School fire escapes, \$12,000. Architect, City Department of Architecture. Owners, City and County of San Francisco. The City department of Architecture is preparing plans for installing fire escapes on the following school buildings: Laguna Honda, Sherman, Dudley, Stone, Rochambeau, Emerson and Grant. Bids will be taken for all work and for the

work at each building. Bids will shortly be called for by the Board of Public Works.

**OAKLAND, CAL.**—School, 2 story and base, reinforced concrete, \$160,000. Architect, John J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. This building will be erected at the corner of 32nd and Magnolia streets and will cover a large ground area. Construction will be of the semi-fireproof type with reinforced concrete walls, floors and stairways. There will be fourteen class rooms, departments of domestic science and manual training and offices. Plans also show a large auditorium. Interior will be finished in pine with maple floors. There will be steam heat, vacuum cleaning and modern plumbing. Program clocks will also be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

**WOODLAND, YOLO CO., CAL.**—Schools, 2, 1 and 2 story and base, brick and reinforced concrete, \$100,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Woodland School District. These two buildings will be erected from funds recently voted by the citizens. One building will be erected on the Oak street site and the other on the Walnut street site. Construction will be of the slow-burning type with fireproof corridors, walls and stairways. Interiors will be finished in pine with maple floors in the class rooms. There will be departments for manual training and domestic science. Exteriors will be faced with cement plaster. Plans are being prepared and it will be some time before bids will be called. Further mention will be made of the work.

**LOS ANGELES, CAL.**—School, 1 story and base, reinforced concrete, \$60,000. Architect, H. Alban Reeves, Chamber of Commerce Bldg., L. A. Owners, Eagle Rock School District. The building will have reinforced concrete walls, corridors and stairways. There will be eleven class rooms, an auditorium seating 500 people, office and departments for manual training and domestic science. Interior will be finished in pine throughout with maple floors in the class rooms. There will be steam heat, a modern system of ventilation and plumbing and program clocks. Exterior will be faced with cement plaster. Preliminary plans only have been prepared. Bonds will be voted on November 12th and if the issue carries working drawings will be completed at once.

**SEATTLE, WASH.**—School, 3 story and base, reinforced concrete and brick. Cost not stated. Architect, Architectural Department Board of Education, Seattle. Owners, City of Seattle. Bids were opened recently for the construction of the Ballard School. The Sound Construction and Engineering Co., Seattle, was low on the general construction at \$235,841; P. J. Lavan low on the heating at \$32,250. Peterson Heating and Plumbing Co. low on the plumbing at \$29,500, and the Ne Page-McKenna Co. low on the electric work. Contracts have not been officially awarded.

**HOLTVILLE, IMPERIAL CO., CAL.**—School, 1 story and base, hollow tile construction, \$10,000. Architects, Gibson & Allison, L. A. Owners, Holtville School District. The building will contain eight class rooms, an

auditorium, department for domestic science and manual training. Interior will be finished in pine with maple floors. There will be a modern system of ventilation, program clocks and modern school plumbing. Exterior will be faced with cement plaster. Bonds have been sold and the money will be available at once. Bids will be called for shortly.

## SEWERS, STREET WORK & WATER SYSTEMS.

**RICHMOND, CONTRA COSTA CO., CAL.**—Street work. Cost not stated. Engineer, Chapman, Richmond. Owners, City of Richmond. City Engineer Chapman has been instructed to prepare plans for the grading of a 10-foot street to connect the outer harbor wharves and the Santa Fe mole with the extension of Washington avenue. On the completion of the plans bids will be called for. Resolutions of intention to pave Contra Costa street have been passed by the City Council.

**RICHMOND, CONTRA COSTA CO., CAL.**—Sewer construction, \$90,000. Engineer, City Engineer Chapman, Richmond. Owners, City of Richmond. Plans for the sewer for the Canal subdivision on the west side of this city have been presented to the City Council for approval. The sewer will cost in the neighborhood of \$90,000 and will be one of the most important undertakings of its kind in Richmond. Plans will be called for shortly.

**CHICO, BUTTE CO., CAL.**—Sidewalk construction. Cost not stated. Engineer, City Engineer, Chico. Owners, City of Chico. An order has been made by the City Board authorizing the calling for bids for the construction of 1,123 feet of sidewalks in districts 2 and 3. The work must be started and the contracts let before the first of the year.

**ORLAND, GLENN CO., CAL.**—Sewer and water extensions. Cost not stated. Engineer, City Engineer, Orland. Owners, City of Orland. There were eight bidders for the construction of the extension work of the sewer and water systems, and the prices for the work ranged from \$15,480 to \$19,522.29. Bier & Siller of Fresno had the lowest bid. S. E. Vincent, who built the sewer system now being used in this city was next lowest with \$12,352.92. The Trustees did not award the contract at the time, but will probably determine which contractor will be given the job shortly.

**FRESNO, FRESNO CO., CAL.**—Electroliters, concrete, brass or iron. Cost not stated. Engineer, City Engineer, Fresno. Owners, City of Fresno. Specifications for the proposed lighting system in Fresno have been withdrawn by the City Trustees and new specifications will be drawn, to be submitted to the Trustees at their next meeting. The makers of copper, iron, steel, concrete and all other kinds of electroliters posts will be given a chance to submit a bid according to the new specifications.

**SUNNYSIDE, WASH.**—Reclamation project. Cost not stated. Engineer, United States Reclamation Service, Washington, D. C. Supervising Engineer, C. H. Swartzel, Sunnyside. Owners, United States Government. Bids for the construction of the Sunnyside unit of the Yakima project which were opened last week, are as follows: Valley Construction Co., \$91,675; Oregon

Bridge and Construction Co., \$87,653; Nettleton, Bruce & Eschbach, \$99,720; Consolidated Contract Co., \$96,239; George P. Wright, \$81,093; McDonald & McGuire, \$197,973; Grant Smith & Co., \$96,128; The Pacific Tank and Pipe Co., bid \$10,976 for the pipe; and the Chamberlain Construction Co. bid \$12,998 for the same; and the bid of the Redwood Lumber Co. was \$14,099; alternate, \$12,133; Washington Pipe and Foundry Co., \$10,777; alternate, \$10,571. REEDLEY, FRESNO CO., CAL.—Auxiliary water system. Cost not stated. Engineer, City Engineer, Reedley, Owners, City of Reedley. Plans and specifications have been completed for the auxiliary water system and figures are now being taken. Bids will be taken separately for (1) construction of the pump pit, (2) construction of pump house and office and (3) for furnishing and installing pumping machinery and accessories. Bids will be opened on November 17th. Plans and specifications can be secured from the City Clerk.

FRESNO, FRESNO CO., CAL.—Pressure irrigation system, \$30,000. Engineer, City Engineer Cronkhite, Fresno, Owners, City of Fresno. According to statements made by the Board of Park Commissioners a pressure irrigation system costing \$30,000 will be started before the end of the year. A pumping station and block of automatic sprinklers to cost about \$2,500 will be the initial installment. City Engineer Cronkhite will make a survey of the proposed system and report at the next meeting of the commissioners.

#### Contracts Awarded.

SAN FRANCISCO—Paving piers, wood pavement, \$18,279. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Contractors, Rolph-Mills Co., S. F. Contract price for Piers 18, 19 and 20, \$18,279.

STOCKTON, SAN JOAQUIN CO., CAL.—Street work, curbs and paving. Cost not stated. Engineer, City Engineer, Stockton, Owners, City of Stockton. Contractor, William Haskill, Stockton. Contract price not stated. Mr. Haskill's contract calls for paving Sonora street east of San Joaquin and curbs on Church street.

CALEXICO, IMPERIAL CO., CAL.—Filtration plant, \$11,000. Engineer, City Engineer, Calexico, Owners, City of Calexico. Contractors, Blaisdell Filtration Co., care of City Clerk, Calexico. Contract price \$11,000 for work complete.

#### STORES AND OFFICES.

SAN FRANCISCO—Stores, 1 story and base, brick and steel, \$15,000. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Tammy Bakery. The building will be erected at the southwest corner of Ninth and Howard streets, having a frontage of 105 feet on Howard and lot on Ninth. There will be eight stores and a saloon. Interior will be finished in pine throughout. A cement floor will be used. Special saloon fixtures and bakery equipment will be installed. Exterior of the building will be faced with pressed brick. Plans now being prepared and will be out for figures shortly.

SAN FRANCISCO—Undergarment establishment, 1 story and base, frame

\$10,000. Architect, Carl Giffuss, 16 Kearny street, S. F. Owner, Charles Warren West Estate. The building will be erected on the east side of Valencia street north of 26th and has been designed in the classic style. Interior will be arranged for five private rooms, chapel, office, work room and morgue. Interior will be finished in white enamel with hardwood floors. Exterior will be faced with cement plaster on metal lath. Plans are complete and figures have been taken. A contract will be let within a few days.

SAN FRANCISCO—Stores, 1 story, brick and steel, \$12,000. Architects, O'Brien Bros. Clinic Bldg., S. F. Owner's name withheld. The building will be erected on East street south of Market, having a frontage of 50 feet and a depth of 31 feet. There will be several stores with patent store fronts, marble bases and plate glass windows. Interior will be finished in pine. The building will be carried on a scow foundation. Exterior will be faced with pressed brick. Plans are being prepared and figures will be called for shortly.

Thursday, November 12, 1914, for Constructing and Installing a Timber Screen for the South Face, West Face and East Bulkhead, Fulton Basin, in accordance with plans and specifications on file in the office of the Director of Works.

The right is reserved to reject any and all bids and to waive technical defects in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco. Any other information may be had from the Chief of Construction, Room 211, Service Building. (\*)

#### NOTICE TO CONTRACTORS.

##### PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213 in the Service Building, Fillmore and Chestnut Streets, San Francisco, at 9:00 A. M. Thursday, November 12, 1914, for Stair Work for Lighting Fixtures for Festival Hall, in accordance with plans and specifications on file in the office of the Director of Works.

The right is reserved to reject any and all bids and to waive technical defects in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco. Any other information may be had from the Chief of Construction, Room 211 Service Building. (\*)

#### NOTICE TO CONTRACTORS.

##### PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213 in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at 9:00 A. M. Tuesday, November 17th, for Constructing Race Track Grand Stand No. 1, in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten per cent of the amount of the bid, or the same will not be considered. When the award of contract is made, checks will be returned to the respective bidders, except that filed with accepted proposals of bid, which work will be returned upon the successful bidder signing the contract and filing the required bond. A bond

in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract, the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$10.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Ten Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER.

## PROPOSALS FOR PAINTING PLASTERING.

C., until 10:30 a. m. November 25, 1914, at which time they will be opened publicly for furnishing the above mentioned article. Blanks and general information relating to this circular (No. 575) may be obtained from the office of the assistant purchasing agent, 108 North Point street, San Francisco, Cal.; also from the U. S. engineer of fuel in the following cities: Los Angeles, Wash., Los Angeles, Cal. F. C. POGGS, major, corps of engineers, U. S. army, general purchasing officer.

## PROPOSALS FOR RECLAMATION WORK.

**EARTHWORK AND STRUCTURES**—Department of the Interior, United States Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service at Provo, Utah, until 2 o'clock p. m. November 16, 1914, for the construction of divisions 1, 2 and 3 of the High Line Canal and structures, Strawberry Valley project, Utah, involving approximately 284,000 cubic yards of excavation, 2,500 cubic yards of excavation for structures, 3,200 cubic yards of reinforced concrete, 167,000 square feet of canal lining, 250 linear feet of tunnel complete with concrete lining, laying approximately 1,700 feet of vitrified pipe of miscellaneous sizes; also 1,400 cubic yards of back-filling and small quantities of rock-filling and stone paving and the placing of sluice gates and miscellaneous structural steel. The canal will extend in a southwesterly direction from the power plant of the U. S. Reclamation Service, near the mouth of Spanish Fork Canyon, to Station 700 plus 60, near Payson City, Utah County, Utah. For particulars address the United States Reclamation Service at Provo, Utah, or Washington, D. C. WILL R. KING, chief counsel.

**PROPOSALS FOR REFRIGERATING PLANT.**

**REFRIGERATING PLANT**—Sealed proposals indorsed "Proposals for Refrigerating Plant" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. November 24, 1914, and then and there publicly opened, for furnishing and installing a refrigerating plant, complete, with all accessories, at the marine barracks, Navy Station, U. S. navy yard, Mare Island, Cal. Plan and specifications may be obtained on application to the bureau or to the commandant of the navy yard named, H. R. STANFORD, chief of bureau.

## PROPOSALS FOR CANAL WORK.

**ANAL WORK**—Department of the Interior, United States Reclamation Service, Washington, D. C.—Sealed bids will be received at the office of the United States Reclamation Service at Provo, Utah, until November 15, 1914, for the construction of divisions 2 and 3 of the High Line Canal and structures, Strawberry Valley project, Utah, involving approximately 284,000 cubic yards of excavation, 2,500 cubic yards of excavation for structures, 3,200 cubic yards of reinforced concrete, 167,000 square feet of canal lining, 250 linear feet of tunnel, complete with concrete lining, laying approximately 1,700 feet of vitrified pipe of miscellaneous sizes; also 1,400 cubic yards of back-filling and small quantities of rock-filling and stone paving and the placing of sluice gates and miscellaneous structural steel. The canal will extend in a southwesterly direction from the power plant of the U. S. Reclamation Service, near the mouth of Spanish Fork Canyon, to Station 700 plus 60, near Payson City, Utah County, Utah. For particulars address the United States Reclamation Service at Provo, Utah, or Washington, D. C. WILL R. KING, chief counsel.

## PROPOSALS FOR LOCOMOTIVE.

**LOCOMOTIVE**—Sealed proposals, indorsed "Proposals for Locomotive" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. November 14, 1914, and then and there publicly opened, for one narrow-gauge saddle-tank switching locomotive, delivered at the naval station, Pearl Harbor, Hawaii. Specification may be obtained on application to the bureau or to the commandant of the naval station named, H. R. STANFORD, chief of bureau.

## NOTICE TO CONTRACTORS.

**PANAMA-PACIFIC INTERNATIONAL EXPOSITION.**

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at 9:00 A. M. Tuesday, November 17th, 1914, for Constructing Water Front Entrance, in accordance with plans and specifications to be in the office of the Director of Works.

Proposals must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company, of the amount of ten per cent of the amount bid, or the same will not be considered. When the award of contract is made, all checks will be returned to the contractor.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco. Any other information may be had from the Chief of Construction, Room 211, Service Building.

## INCORPORATIONS.

**CALIFORNIA RICE MILLS, INC.** To grow, store warehouse rice, grain and cereals. Capital Stock, \$250,000; 2500 shares at \$100 each; amount subscribed \$500. Place of business, San Francisco. Directors—F. S. Glass, J. W. Sperry, C. E. Hale, A. S. Lilley and A. J. Dohblee, 1 share each.

## BUILDING OPERATIONS MUST BE IN PROGRESS OCTOBER.

Report of the Board of Public Works Shows That \$1,479,518 Has Invested in Building Construction.

Approximately \$1,500,000 was invested in building construction during the month of October, as shown by a report compiled by the Bureau of Building Inspection of the Board of Public Works.

The report shows that during the month there were 612 permits issued at an estimated cost of \$1,479,518. Of this amount \$16,200 was for work done in the Panama-Pacific Exposition grounds and \$9,000 for public buildings being constructed by the city.

A complete and segregated report is as follows:

Class	No. of Permits	Value
Class 1	2	\$ 7,000.00

Classified according to Location

## SAN FRANCISCO.

**APARTMENT HOUSE AND STORES**—2 story and base, brick and frame, \$50,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected at the southeast corner of Sixth and Shipley streets, and will cover a large ground area. There will be four stores on the first floor besides the entrance. Upper floors will be divided into 71 suites of two rooms each. Interior will be finished in pine and redwood. There will be private baths and wall beds. Plans provide for steam heat, elevator service and a hot water supply. The Fess system of oil burning will be used. Bath rooms will have tile wainscot and composition floors. Patent storefronts will be used. Marble wainscot is specified. Exterior of the building will be faced with pressed brick and cement plaster. Plans are complete and figures are being taken.

**APARTMENT HOUSE**—2 story and base, frame, \$20,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The building will be erected at the northeast corner of 6th avenue and Irwin street, and has been designed to contain nine apartments of two, three and four rooms. Interiors will be finished in pine and redwood with some white enamel. Hardwood floors will be used in the principal rooms. There will be steam heat and a hot water supply. All suites will have wall beds. Marshall-Stearns being specified. Bath rooms will be finished in tile and will have composition floors. Marble and tile will be used in the entrance. Exterior of the building will be covered with cement plaster, shingles and half timber. Plans are complete and segregated figures are being taken.

**TIMBER SCREENS**—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are complete and figures are now being taken for furnishing and constructing timber screens for the South Face, West Face and East Bulkhead of the Fulton Basin. Bids will be opened on November 12th. Plans and specifications can be secured from the Director of Works. An official proposal appears in another column of this issue.

**FERRY ADDITION**—2 story. Class A construction, \$7,500. San Francisco. Architect, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Bids received by the State Board of Harbor Commissioners Thursday for constructing an extension to the Ferry Building to be used as an additional baggage room for the railroads show the construction and Engineering Co., now low at \$27,400. Masow & Morrison were next at \$37,148. Eighteen bids in all were received. A contract has not been awarded.

**CHURCH**—1 story and base, brick and steel. Cost not stated. San Francisco. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owners, Third Church of Christ, Scientist. It has been announced that owing to a lack of funds this building will not go ahead until after the first of the year.

**CHURCH**—1 and 2 story, brick and CITY HALL SHEET METAL WORK—Cost not stated. San Francisco. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. All bids on proposition No. 3 of the sheet metal contract for the City Hall have been rejected and new figures will be called. Awards were made on propositions Nos. 1 and 2.

**GOVERNMENT POST**—Frame construction. Cost not stated. Fort Kamehameha, Hawaii. Engineer, Constructing Quartermaster's Office, Honolulu. Owners, United States Government. The Constructing Quartermaster's Office at Honolulu is completing plans for an entire new barracks, which is to be constructed at once at the new Government army post to be known as Fort Kamehameha. There will be fifty-three new buildings, all of which will be of frame construction. This work will provide barracks, general quarters, administration building, post headquarters, guard house, stables, officers quarters, warehouses and commissary store. Plans will shortly be out for figures.

**FLATS**—2 story and base, frame, \$6,500. San Francisco. Architect, C. A. Meusdorffer, Humboldt Bank Bldg., S. F. Owner, Miss G. Bray. The building will be erected on the south side of Filbert street east of Polk, and has been designed to contain two modern flats of six rooms each. Interior will be finished in pine, redwood and oak. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and tile or brick mantels. Bath rooms will be finished in tile and will have composition floors. Simplex or Hassen window sash are specified. Exterior of the building will be covered with rustic and shingles. Plans are complete and figures are being taken.

**STEEL BARGES** \$135,132. Mare Island, Cal. Engineer, Navy Department, Washington, D. C. Owners, United States Government. Twelve steel coal barges to cost \$135,132 have been ordered built at Mare Island by Secretary of the Navy Daniels. The steel barges will have 500 tons capacity. On completion seven of them will be sent to Pearl Harbor. The remaining five will be assigned to naval stations. The hull department will place the order for material at once, and the barges will be constructed in the vicinity of drydocks 1 and 2.

**RESIDENCE**—1 story and base, frame, \$6,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. The dwelling will be

erected on the east side of 5th avenue north of Moraga, and has been designed for an eight-room house with two baths and sleeping porch. Interior will be finished in pine, redwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath, rustic and brick veneer. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCES**—2, 2 story and base, frame, \$3,000 each. San Francisco. Architect, none. Owner, C. A. Hall, 1318 5th avenue, S. F. These two houses will be erected on the east side of 12th avenue north of Balboa and each will contain seven rooms and bath. Interiors will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot will be used in the bath rooms. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath, rustic and brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are being purchased.

**RESIDENCES**—2, 1½ story and base, frame, \$2,500 each. San Francisco. Architect, T. Boehm, 1419 19th street, S. F. Owner, E. M. Person, 1427 23rd street, S. F. These two houses will be erected on the east side of 14th avenue south of Judah, and each has been designed to contain six rooms and bath. Pine, redwood and some elm will be used for interior finish. Hardwood floors will be used throughout. There will be an open fire place in each living room. Mantels will be of tile or brick. Tile wainscot will be used in the bath rooms. Exteriors will be covered with rustic, shingles and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCES**—1, 2 story and base, frame, \$3,000. San Francisco. Architect, none. Owners, Wade and Carlson, 71 Pierce street, S. F. The dwelling has been designed for a seven-room house and will be erected on Surry street south of Van Buren. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room and dining room. There will be a large open fire place of tile or brick mantel. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with rustic and shiplap. Plans are complete and in the hands of the owner.

ers. Work will be done by Day Labor. Materials are now being purchased.

**RESIDENCE**—1 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, M. Mullin, 178 19th avenue, S. F. The dwelling will be erected on the west side of 19th avenue south of Cabrillo, and has been designed for a six-room house with bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be an open fire place and tile mantel. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, William P. Nolan, 1550 Fillmore street, S. F. The dwelling has been designed for a six-room house with bath and will be erected on the west side of 15th avenue south of Anza. Interior will be finished in pine, redwood and some elm. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner. The work will be done by Day Labor. Materials are being purchased.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, E. J. Spence, 537 25th avenue, S. F. Owners, Spence and Peirick, 537 25th avenue. The dwelling will be erected on the east side of 19th avenue near Balboa, and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood with some hardwood floors. There will be open fire places and tile or brick mantels. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**GRAND STAND**—Timber construction. Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are complete for constructing grand stand No. 1 at the Race Track. Bids are being taken and will be opened by the Buildings and Grounds Committee on November 17th. Plans and specifications can be secured from the Director of Works. An official proposal appears in another column of this issue.

**STAFF WORK**—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are complete and figures are now being called for on furnishing and installing the staff work for the lighting fixtures in the Festival Hall. Plans and specifications can be secured from the office of the Director of Works. Bids will be opened on November 12th. An official proposal appears in another column of this issue.

**APARTMENT HOUSE**—1 story and base, frame, \$21,000. San Francisco. Architect, Charles H. Skidmore, Foxcroft Bldg., S. F. Owner, Mand Warwick. The building will be erected at the southwest corner of Sacramento and Webster streets, covering an area of 36 by 72 feet and has been designed to contain twelve suites of two and three rooms. Interior will be finished in pine, redwood and elm panels. Hardwood floors will be used in the living rooms. Plans provide for steam heat and a hot water system. All suites will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the baths. Entrance will be finished in marble. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and in the hands of H. C. Warwick, Hearst Bldg., who will do the work by Day Labor.

**APARTMENT HOUSE**—3 story and base, frame, \$16,000. San Francisco. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner's name withheld. The building will be erected on Page street and has been designed to contain nine suites of three and four rooms. Interior finish will be of pine and redwood. Some hardwood floors will be used. All apartments will have private baths and wall beds. Bath rooms will have composition floors and tile wainscot. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SHOP BUILDING**—2 story and base, brick and steel, \$11,000. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened by the Board of Public Works for constructing the shop building to be used by the City Department of Electricity show T. E. Davis & Son low on the two propositions as follows: Proposition A, \$12,269; Proposition B, \$11,851. They will probably be awarded the contract. A complete list of the figures received for this work will be found under the heading of San Francisco in this issue.

**MACHINE SHOP**—1 story and base, brick, \$6,000. San Francisco. Architect, W. H. Crim, Jr., 125 Kearny street, S. F. Owner, John McConaghy. The building will be erected on the south side of Grove street west of Polk, having a frontage of 34 feet and a depth of 120 feet. There will be a cement floor and metal window sash. Interior will be finished in pine. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

**POWER HOUSE EQUIPMENT**—Cost not stated. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans have been completed and figures are now being taken for the equipment for the new Municipal Power House to be erected in the Civic Center. Plans and specifications can be secured from the City Engineer. Bids will be opened by the Board of Public Works on November 11th.

**CAR BARN**—1 and 2 story and base, reinforced concrete, \$12,500. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Working drawings have been completed and approved for the new Municipal Car Barns to be erected

on in the Potrero district. The building will be a fireproof structure occupying the block bounded by 18th, Hampshire, York and Marquis streets, covering an area of 240 by 80 feet. There will be reinforced concrete walls and floors and steel roof trusses. Interior will be arranged for storage of cars, repair shops and offices. Pine and metal trim will be used. Special electric work will be installed. Exterior of the building will be faced with cement plaster. Plans will be out for figures next week.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, J. C. Kirby, 21524 Market street, S. F. The dwelling will be erected on the west side of 12th avenue north of Anza street and has been designed for a six room house with bath. Interior will be finished in pine and blue gum. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCES**—6, 2 story and base, frame, \$2,500 each. San Francisco. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. These houses will be erected on Hillway street south of Carl, and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living rooms and dining rooms. There will be open fire places and tile and brick mantels. Tile wainscot will be used in the baths and kitchens. Exteriors will be covered with rustic, shiplap and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**STORES**—1 story and base, brick and steel, \$15,000. San Francisco. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Tamony Bakery. The building will be erected at the southwest corner of Ninth and Howard streets, having a frontage of 102 feet on Howard and of 100 on Ninth. There will be eight stores and a saloon. Interior will be finished in pine throughout. A cement floor will be used. Special saloon fixtures and bakery equipment will be installed. Exterior of the building will be faced with pressed brick. Plans are being prepared and will be out for figures shortly.

**BREWERIES**—3 complete plants. Class A construction, \$50,000 to \$75,000 each. San Francisco. Architect not selected. Owners, as follows: Three of the largest breweries in the west, affected by the recent prohibition elections in Washington and Oregon, have announced their intention of coming to San Francisco and erecting extensive plants. Two other brewers are considering the California field and will locate in one or the other of the Bay cities. These companies all have local representatives and enjoy extensive business in this state. The Seattle Brewing and Malting Co., capital stock \$2,000,000, is represented in San Francisco by John

W. R. BRODE, Pres. LOUIS R. HOLM, Sec. R. J. BRODE, Vice-Pres.

**BRODE IRON WORKS**Established 1886—Incorporated 1913  
Tel. Kearny 2464.

Fabricators and Contractors of Structural Steel and Ornamental Iron Work

Office &amp; Works: 31-37 Hawthorne St., bet. Howard &amp; Folsom Sts., San Francisco, Cal.

Happ, Louis Hemrich is their water expert and will shortly arrive in this city. The company will expend about \$750,000 in new buildings. The Tacoma Brewing and Malting Co. is represented here by George Alpers, and their capital stock is \$1,000,000. They intend to spend \$750,000 in new construction. The Independent Brewing Co. of Georgetown, Wash., is represented by C. F. Wagner, and is capitalized for \$500,000. Gambrinus Brewing Co., Portland, and Weinhard Brewing Co. of the same city will locate in California, but have not announced the selection of any particular town.

**RESIDENCE**—2 story and base, reinforced concrete, \$40,000. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mrs. Clarence Musto. The dwelling will be erected at the corner of Vallejo and Divisadero streets, and has been designed for a city dwelling containing sixteen rooms, several baths and conservatory. Interior will be finished in pine, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be steam heat, a hot water system and vacuum cleaning. Open fire places and tile or marble mantels will be used. All bath rooms will be finished in tile. Exterior of the house will be covered with cement plaster. Plans have been out for figures and the three lowest contractors are now refiguring slight changes. A contract will be awarded this week.

**UNDERTAKING ESTABLISHMENT**—1 story and base, frame, \$10,000. San Francisco. Architect, Carl Geilfuss, 46 Kearny street, S. F. Owner, Charles Warren Welsh Estate. The building will be erected on the east side of Valencia street north of 26th, and has been designed in the classic style. Interior will be arranged for five private rooms, chapel, office, work room and morgue. Interior will be finished in white enamel with hardwood floors. Exterior will be faced with cement plaster on metal lath. Plans are complete and figures have been taken. A contract will be let within a few days.

**STORES**—1 story, brick and steel, \$12,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will be erected on East street south of Market, having a frontage of 50 feet and a depth of 91 feet. There will be several stores with patent store fronts, marble bases and plate glass windows. Interior will be finished in pine. The building will be carried on a scow foundation. Exterior will be faced with pressed brick. Plans are being prepared and figures will be called for shortly.

**SCHOOL FIRE ESCAPES**—\$12,000 San Francisco. Architect, City Department of Architecture. Owners, City and County of San Francisco. The City Department of Architecture is preparing plans for installing fire escapes on the following school buildings: Laguna Honda, Sherman, Dud-

ley, Stone, Rochambeau, Emerson and Grant. Bids will be taken for all work and for the work at each building. Bids will shortly be called for by the Board of Public Works.

**Contracts Awarded.**

**FAÇADE COUNTY EXHIBIT BUILDING**—Cost not stated. San Francisco. Engineer's name not given. Owners, Napa County. The Napa County Exposition Commission, consisting of Bismark Brunk, chairman, E. W. Churchill and E. S. Bell, secretary, have awarded to J. B. Newman, Napa county bridge builder, the contract for the facade for the Napa County exhibit at the Panama-Pacific Exposition.

**PAVING PIERS**—Wood pavement, \$18,279. San Francisco. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Contractors, Rolph-Mills Co., S. F. Contract price for Piers 16, 18 and 37, \$18,279.

**HOTEL ADDITION AND ALTERATION**—2 story, frame, \$35,000. San Francisco. Architect, A. A. Cantin, Foxcroft Bldg., S. F. Owners, Hoteling Estate. Contractor, John MacBain, Redwood City. Contract price, \$35,000. This building is now known as the Seal Rock Cafe and is located on the Ocean Boulevard.

## City Engineer's Reply To Seattle Record.

**Twin Peaks Tunnel Contract Arouses Seattle Daily's Ire and San Francisco Rated as "Rube Town."**

In its issue of October 30th the Seattle Daily Record publishes an article condemning the action taken by the San Francisco Board of Public Works in the matter of the award on the Twin Peaks Tunnel and branding as unfair the treatment received in this city by Hans Pederson, the Seattle contractor who furnished the first and only bid on this big work.

According to the Seattle publication, San Francisco in general and the Board of Public Works in particular, acted in the same spirit of fairness as Captain Kidd and his pirate crew would have done and were aided and abetted by the newspapers of this city.

City Engineer M. M. O'Shaughnessy has forwarded a letter setting forth the true conditions surrounding the action taken by the Board of Works on Hans Pederson's bid for the Twin Peaks work to the Seattle Record, which it is hoped will cause them to change their opinion of San Francisco and its business methods.

Following is the article from the Seattle Record and also City Engineer O'Shaughnessy's letter in reply:

## Nearest to Everything

**POWELL ST. AT O'FARRELL**

Best located and most popular hotel in the City; circulating ice water in every room.

**Especial attention to ladies travelling alone.**

Excellent, reasonable priced grill. Meet your friends at the Manx

European Plan Rates \$1.50 up.

Management.

Chester W. Kelley

**SAN FRANCISCO PULLS RUDE TOWN STUNT.**

**Hurry Seattle Contractor Under Technicalities and Pass Big Job to California Man.**

**Former Bids Redueced.**

City Eng. M. M. O'Shaughnessy of San Francisco, Cal., sent a special wire to the Daily Record stating that bids opened Wednesday and tabulated yesterday for the construction of the Twin Peaks tunnel in that city, show R. C. Storrie of San Francisco lowest bidder of four received, at \$3,372,000. Hans Pederson was third low at \$3,450,300.

The history of this job is interesting. Bids were first called for to be opened Aug. 20th. No bids were received as conditions were such in the demands made in the specifications that contractors could not see their way clear to finance the work. These conditions were changed somewhat and bids again called for. No one would submit figures and Hans Pederson, the Seattle contractor, was practically begged to give a figure. This he did after great expense in engaging engineers to estimate and examine the ground. Bids were opened and his was the only one received at \$3,475,300, and all indications pointed to a speedy signing of the contract and the work started. San Francisco and eastern contractors were deeply chagrined when it became apparent that a Seattle contractor was not afraid to tackle the biggest job the city had to offer, and immediately got busy. What wires they pulled is not known but that there were wires is evident. The daily papers started a campaign against Pederson, and the fact that he was from Seattle and that the job ought to go to a home company. The city attorney found that his bid was not tendered on the city's regular bidding blank and rejected his return. With Mr. Pederson's figure as the property the result as shown in the wire was to be expected.

The San Francisco Chronicle in the

course of its campaign against Pederson stated that "It was a shame that San Francisco had to go to the little town of Seattle to get a contractor to build its big tunnel."

Seattle may not compare as favorably as does San Francisco in point of population and it may be smaller (the next census will tell) but we are not small in principle and if there was ever a sample of jay town principle San Francisco has certainly got it written on her from Front St. to Sloat Boulevard and from the Golden Gate to Inglefield.

November 2, 1914.

EDITOR,

Seattle Daily Record,

Seattle, Washington.

Dear Sir:—

In your issue of October 30, 1914, I notice some statements headed "San Francisco Pulls Rube Town Stunt," in which are contained derogatory remarks regarding the procedure in awarding contracts on the Twin Peaks Tunnel project, in this City.

I am sure if you were fully advised of all the facts bearing on the subject you would not have been so unjust to the City of San Francisco and to an important department of its municipal government. Hans Pederson, the Seattle Contractor, like every other contractor who sought information with regard to the Twin Peaks Tunnel, was extended every courtesy by the City Officials, and in fact his plucky spirit in tackling this large project received our admiration and respect.

Printed forms of contract and specifications were made out by this Department of the Board of Public Works of the City of San Francisco, on which all intending bidders were to fill in the blanks on making out their bids. Mr. Pederson, however, under the advice of the Attorney, Mr. Metson, for the Scandinavian American Bank of Seattle, cut out with a scissors the pages from our printed forms which he should have filled in, and inserted special forms, drafted by Mr. Metson in lieu of the others. While we were very anxious to award this contract to Mr. Pederson, on the strength of advice from the City Attorney, who guides the legal policy of the City, the bid of Mr. Pederson was rejected. A very distinguished attorney, Mr. Charles Wheeler, was employed by Mr. Pederson to consult on the legality of his proposal, and his opinion was that Mr. Pederson's mutilation of the proposal blank made it illegal, and Mr. Pederson seemed to be entirely satisfied with the conclusion of his own attorney.

New bids were then advertised for by the Board of Public Works and were received on October 28, 1914. Mr. Pederson's bid being beaten by two independent firms, R. C. Storrie & Co., of San Francisco and Texas, and McArthur Brothers of Chicago and New York.

I can assure you that Mr. Pederson would have been just as welcome as any other bidder and that no discrimination was exercised against him because he was from Seattle or any other outside place.

Trusting you will give this letter the same prominence you gave the adverse comments on San Francisco, I am

Very respectfully yours,

M. M. O'SHAUGHNESSY,  
City Engineer.

## Three New Enterprise Will Locate Here.

Seattle and Portland Breweries Notify Their Local Representatives of Intention to Build Plants.

As a result of prohibition existing in the States of Washington and Oregon, local representatives of the Seattle Brewing & Malting Co., of Seattle, Tacoma Brewing and Malting Co., Tacoma and Independent Brewing & Malting Co., Georgetown, Washington, have been informed of the intention of the manufacturers to move their equipment to San Francisco and erect suitable buildings in which to house them. Besides the three above named breweries, which are the largest in the West, two Portland breweries, Gambrinus Brewing Co. and Weinhard Brewing Co., are considering locations in either San Francisco, Oakland or Richmond.

C. F. Wagner, San Francisco representative of the Independent Brewing Co., has received a wire from Seattle stating that this company will come to San Francisco at once. John Rapp, representing the Seattle Brewing & Malting Co., states that Louis Hemrich, water expert for the company, will arrive in San Francisco shortly and locate a site. This company has a capital of \$2,000,000 and will expend about \$750,000 in constructing a new plant in this city. Nearly as much will be spent by the Tacoma Brewing & Malting Co. and in the neighborhood of \$500,000 by the Independent Brewing & Malting Company.

## Architects To Raise War Relief Fund.

Strong Plea Being Made By American Architects For Funds With Which to Aid Stricken Europe.

A War Relief Fund is being raised among the Architects of America under the direction of the following well

known members of the profession: Robert H. Sturges, Chairman, President of the American Institute of Architects; Frank Miles Day, Philadelphia; William M. Elliott, Baltimore; Charles A. Gray, New Orleans; Cass Gilbert, New York City; Elmer C. Jensen, Chicago; William M. Kendall, New York City; J. Lawrence Mauran, St. Louis; Edward Stoltz, Pittsburgh; C. H. Whitaker, Treasures of the Fund, The Octagon, Washington, D. C.; E. C. Kemper, Chief of the Committee.

In calling on the profession, members of the Architects of American War Relief Fund make the following appeal:

The debt which architecture owes to the countries of Europe is neither measurable in words nor payable in money, but in view of the appalling conditions brought about by the present war—the terrible suffering—the threatened destruction of that which can never be replaced—it is eminently fitting that the Architects of America should unite and in the name of their profession and their art, do their part toward affording some measure of relief to those upon whom this horrible burden of the most frightful war the today bearing the almost intolerable world has ever seen.

Help extended at such a moment is a solemn obligation upon those who are spared the indescribable anguish and horror which war heaps upon the men, women and children who lie in its path.

Money is needed—in vast sums—and it is profoundly hoped that every architect will contribute in the largest possible measure. It is further sincerely hoped that every architect will give something—for the Committee wish that this fund may not only be large but that it may be truly representative of the profession, which, more than all others, owes its inspiration to the forebears of these people who are catastrophe has fallen.

## City Bids Opened.

Fourteen Sets of Figures Received by Board of Public Works For Shop Building For The City.

Bids were opened at Friday's meeting of the Board of Public Works for constructing the two-story brick and steel shop building for the Department of Electricity. Three propositions were considered, the lowest bid on each being submitted by T. E. Davis & Son, who will probably be awarded the contract. Fourteen bids were submitted. Following is a complete list of the figures:

Bidder	Prop. No. 1	Prop. No. 2	Prop. No. 3
1 W. A. Newson	\$13,700	\$12,420	\$1,270
2 T. W. McLennahan & Co.	14,700	13,550	1,300

## OAKLAND AND ALAMEDA COUNTY.

**APARTMENT HOUSE**—3 story and base, frame, \$26,000. Oakland, Cal. Architect, none. Owner, E. A. Schmidt, 1484 Harrison street, Oakland. The building will be erected on the north side of 40th street east of Telegraph avenue and has been designed to contain a total of sixty-six apartments of two and three rooms. Interiors will be finished in pine, redwood and hardwood. Hardwood floors will be used in the dining and living rooms. There will be steam heat and a hot water system. All suites will have wall beds and private baths. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**BANK ALTERATION**—1 story and base, brick, \$10,000. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Homestead Savings Bank. The building is located at 2270 Shattuck avenue and will undergo extensive repairs. Included in the work will be complete new fixtures, hardwood trim, plumbing, electric work, plastering and painting. New vaults and vault doors will be required. Plans are being prepared and figures will be taken shortly. Further mention will be made of the work.

**CITY HALL LIGHTING FIXTURES**—Cost not stated. Oakland, Cal. Supervising Architect, John J. Donovan, Oakland. Owners, City of Oakland. Bids will be received up to November 12th at 12 o'clock for furnishing and installing special lighting fixtures in the new City Hall. Plans and full particulars can be secured from City Clerk Frank M. Smith, Oakland.

**RESIDENCE**—1 story and base, brick, \$5,000. Oakland, Cal. Architect, Charles E. Wetherill, 119 o'Connell street, S. F. Owner's name withheld. The dwelling will contain six rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be

used in the principal rooms. There will be a large open fire place in the living room. Mantels will be of tile. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**RESIDENCES**—4, 1½ story and base, frame, \$3,000 each. Oakland, Cal. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner, Edwin C. Graff, Syndicate Bldg., Oakland. These houses will be erected in the Fourth Avenue Heights and each has been designed for a seven-room dwelling with bath and sleeping porch. Interiors will be finished in pine, redwood, some elm panels and white enamel. Hardwood floors will be used in the living rooms, dining rooms and reception halls. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot and composition floors will be used in the bath rooms. Exteriors will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, brick and frame. Cost not stated. Piedmont, Alameda Co., Cal. Architect, Clinton Day, Nevada Bank Bldg., S. F. Owner, Mrs. T. L. Barker. The dwelling will be erected on Sea View avenue and has been designed to contain twelve rooms, three baths and sleeping porch. A garage will also be erected on the property. Interior of the house will be finished in pine and redwood, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. A vacuum cleaning system and automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the house will be covered with brick veneer and cement plaster on metal lath. Plans are complete and figures are being taken.

**SCHOOL**—2 story and base, reinforced concrete, \$160,000. Oakland, Cal. Architect, John J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. This building will be erected at the corner of 32nd and Magnolia streets and will cover a large ground area. Construction will be of the semi-fireproof type with reinforced concrete walls, floors and stairways. There will be fourteen class rooms, departments of domestic science and manual training and offices. Plans also show a large auditorium. Interior will be finished in pine with maple floors. There will be steam heat, vacuum cleaning and modern plumbing. Program clocks will also be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

concrete, \$75,000. Oakland, Cal. Architect, William A. Newman, David Howes Bldg., S. F. Owners, Second Church of Christ, Scientist. The building will be erected at the corner of 31th and Elm streets and has been designed in the classic style. There will be a main auditorium and several class rooms. Interior will be finished in pine and ornamental plaster. There will be a central heating system. Exterior of the building will be faced with pressed brick. Plans are now

complete and figures will shortly be called.

### MARIN, CONTRA COSTA AND SONOMA COUNTIES.

**BRIDGE** — Concrete construction, \$4,100. San Rafael, Marin Co., Cal. Engineer, County Engineer, San Rafael. Owners, Marin County. The Supervisors have rejected all bids submitted for the construction of a concrete bridge across San Antonio creek on the Red Hill road. The estimated cost of the bridge was \$4,100, but when bids were opened they ran as high as \$5,800. The building of the bridge has been postponed until the early part of next year.

**WHARF CONSTRUCTION**—Timber. Cost not stated. Richmond, Contra Costa Co., Cal. Engineers, Haviland & Tibbitts, Alaska Commercial Bldg., S. F. Owners, Town of Richmond. Haviland & Tibbitts, harbor engineers, have completed plans and specifications for the outer wharf to be constructed in this city. The plans call for the construction of a wharf 800 feet long and 90 feet wide. On the approval of the plans by the City Council bids will be called for.

**STREET WORK**—Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, City Engineer Chapman, Richmond. Owners, City of Richmond. City Engineer Chapman has been instructed to prepare plans for the grading of a 40-foot street to connect the outer harbor wharves and the Santa Fe mole with the extension of Washington avenue. On the completion of the plans bids will be called for. Resolutions of intention to pave Contra Costa street have been passed by the City Council of Richmond.

**SEWER CONSTRUCTION** — \$90,000. Richmond, Contra Costa Co., Cal. Engineer, City Engineer Chapman, Richmond. Owners, City of Richmond. Plans for the sewer for the Canal subdivision on the west side of the city have been presented to the City Council for approval. The sewer will cost in the neighborhood of \$90,000 and will be one of the most important undertakings of its kind in Richmond. Figures will be called for shortly.

**RAILROAD WORK**—Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. A crew of Southern Pacific engineers are now

in Martinez making surveys for the spur tracks which are to be built from the main line through the lands of the Shell Company, where the big oil refinery is to be built. The main spur track is to extend from the main line at a point near the present spur track connections southerly through the canyon in which the old Fraser home stood to the southernmost limits of the tract. Addition spur tracks are to be built at once to other parts of the franchise tract.

#### Contracts Awarded.

**HOSPITAL COTTAGE**—1 story, concrete and frame, \$15,475. Eldridge, Sonoma Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Contractors, Louis Cereghino & Son, S. F. Contract price, \$15,475.

#### FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA.

**SEWER AND WATER EXTENSIONS**—Cost not stated. Orland, Glenn Co., Cal. Engineer, City Engineer, Orland. Owners, City of Orland. There were eight bidders for the construction of the extension work of the sewer and water systems, and the prices for the work ranged from \$15,450 to \$19,825.39. Bier & Siller of Fresno had the lowest bid. S. E. Vincent, who built the sewer system now being used in this city was next lowest, with \$12,332.02. The Trustees did not award the contract at the time, but will probably determine which contractor will be given the contract shortly.

**ELECTROLIERS**—Concrete, brass or iron. Cost not stated. Fresno, Fresno Co., Cal. Engineer, City Engineer, Fresno. Owners, City of Fresno. Specifications for the proposed lighting system in Fresno have been withdrawn by the City Trustees and new specifications will be drawn to be submitted to the Trustees at their next meeting. The makers of copper, iron, steel, concrete and all other kinds of electroliers will be given a chance to submit a bid according to the new specifications.

**Wybro**

**Panels of proven Quality-- Wybro**

WYBRO Panels have been tried and tested time and again. They are now of proven quality.

Users have proven to themselves that there are no better panels made than the WYBRO—that is why WYBRO Panels are great repeaters.

**GARAGE**—1 story and base, reinforced concrete, \$50,000. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, J. C. Phelan, 1412 1 street, Fresno. The building will be erected at the corner of K and Mono streets, covering an area of 100 by 150 feet. Construction will be fireproof with reinforced concrete floors, walls and steel roof trusses. Interior will be finished in pine. There will be special gasoline storage tanks. Metal window sash and frames are specified. Exterior of the building will be faced with cement plaster. Plans are being prepared. A contract for the excavating has been awarded to Thompson Bros.

**LIBRARY**—1 story and base, reinforced concrete, \$10,000. Exeter, Tulare Co., Cal. Architects, Bowen & Davis, Fresno. Owners, City of Exeter. The building has been designed in the classic style and will contain a large main reading room, stack room and office for the librarian. Interior will be finished in pine and redwood with a maple floor in the reading room. Plans provide for furnace heat. Metal book shelves will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for at once.

**AUXILIARY WATER SYSTEM**—Cost not stated. Reedley, Fresno Co., Cal. Engineer, City Engineer, Reedley. Owners, City of Reedley. Plans and specifications have been completed for the auxiliary water system, and figures are now being taken. Bids will be taken separately for (1) construction of the pump pit, (2) construction of a pump house and office and (3) for furnishing and installing pumping machinery and accessories. Bids will be opened on November 17th. Plans and specifications can be secured from the City Clerk.

**PRESSURE IRRIGATION SYSTEM**—\$30,000. Fresno, Fresno Co., Cal. Engineer, City Engineer Cronkhite, Fresno. Owners, City of Fresno. According to statements made by the Board of Park Commissioners a pressure irrigation system costing \$30,000 will be started before the end of the year. A pumping station and block of automatic sprinklers to cost about \$2,500 will be the initial installment. City Engineer Cronkhite will make a survey of the proposed system and report at the next meeting of the commissioners.

#### Contracts Awarded.

**FILTRATION PLANT** \$11,000. Cal. exico, Imperial Co., Cal. Engineer,

City Engineer, Calexico. Owners, City of Calexico. Contractors, Blaisdell Filtration Co., care of City Clerk, Calexico. Contract price \$11,000 for work complete.

#### SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.

**JAIL**—2 and 3 story and base, reinforced concrete, \$35,000. Woodland, Yolo Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Yolo County. Contractor, Harvey A. Klyce, Sheldon Bldg., S. F. General construction only. Contract price, \$23,571. Note. This contract does not include plumbing, electric work, heating or special jail cells and equipment.

**CLUB HOUSE**—2 story and base, frame, \$6,500. Lodi, San Joaquin Co., Cal. Architect's name not given. Owners, Women's Club of Lodi. Members of the Women's Club of Lodi are viewing various sites for the erection of a club building. The funds for the erection of the building have already been secured and nothing remains but the selection of the site. The building will be of frame construction, probably two stories in height.

**SCHOOLS** 2, 1 and 2-story and base, brick and reinforced concrete, \$30,000. Woodland, Yolo Co., Cal. Architect, W. H. Weeks, 75 Post street, S

F. Owners, Woodland School District. These two buildings will be erected from funds recently voted by the citizens. One building will be erected on the Oak street site and the other on the Walnut street site. Construction will be of the slow-burning type with fireproof corridors, walls and stairways. Interiors will be finished in pine with maple floors in the class rooms. There will be departments for manual training and domestic science. Exteriors will be faced with cement plaster. Plans are being prepared and it will be some time before bids will be called. Further mention will be made of the work.

**SIDEWALK CONSTRUCTION**—Cost not stated. Chico, Butte Co., Cal. Engineer, City Engineer, Chico. Owners, City of Chico. An order has been made by the City Board authorizing the calling for bids for the construction of 1,139 feet of sidewalks in districts 2 and 3. The work must be started and the contracts let before the first of the year.

#### Contracts Awarded.

**BRIDGE**—Timber and concrete, \$14,000. Woodland, Yolo Co., Cal. Engineer, Knights Landing Irrigation District. Owners, Knights Landing Irrigation District. Contractors, Jenkins & Wells, Sacramento. Contract price, \$14,000.

**STREET WORK, CURBS AND PAVING**—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. Contractor, William Haskill, Stockton. Contract price not stated. Mr. Haskill's contract calls for paving Sonora street east of San Joaquin and curbs on Church street.

#### LOS ANGELES AND SOUTHERN CALIFORNIA.

#### APARTMENT HOUSE AND THEATRE—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Charles M. Moffet, San

Fernando Bldg., L. A. Owner, A. Du-

perault. The building will be erected

at the corner of Washington and 5th

avenue, covering an area of 75 feet by

150 feet. Ground floor will be ar-

ranged to contain a theatre seating

500 people and six stores. Upper floors

will contain eighteen suites of two

rooms each. There will be wall beds

and private bath rooms. Interior will

be finished in pine with some orna-

mental plaster in the theatre. Plans

provide for steam heat and a hot water

supply. Bath rooms will have composi-

tion floors. Patent store fronts are

specified. Exterior will be faced with

pressed brick. Plans are being pre-

pared.

#### FREIGHT SHED—1 story, rein-

forced concrete. Cost not stated. Los

Angeles, Cal. Engineer, Chief Engi-

neer Santa Fe Co., Kerchoff Bldg., L.

A. Owners, Santa Fe Railway Co. The

building will be erected at the corner

of 3rd and Santa Fe avenue, covering

an area of 60 by 200 feet with a wing

60 by 150 designed for an unloading

shed for automobiles. Walls and

floor will be of reinforced concrete.

Metal doors and window sash are

specified. Plans call for modern

plumbing and electric work. Exterior

of the building will be faced with ce-

ment plaster. Plans are complete and

figures are being taken.

#### SCHOOL, 1 story and base, rein-

forced concrete, \$60,000. Los An-

geles, Cal. Architect, H. Alban Reeves,

Chamber of Commerce Bldg., L. A.

Owners, Eagle Rock School District. The building will have reinforced concrete walls, corridors and stairways. There will be eleven class rooms, an auditorium seating 500 people, office and departments for manual training and domestic science. Interior will be finished in pine throughout with maple floors in the class rooms. There will be steam heat, a modern system of ventilation and plumbing and program clocks. Exterior will be faced with cement plaster. Preliminary plans only have been prepared. Bonds will be voted on November 15th and if the issue carries working drawings will be completed at once.

**WAREHOUSE**—6 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Engineer, Los Angeles Harbor Engineer, L. A. Owners, City of Los Angeles. Plans and specifications have been submitted to the harbor commission by the harbor engineer for the first of the municipal warehouses to be erected at the harbor. The engineer recommends that the structure should be six stories and basement. The plans provide for a building 152 by 480 feet, and of reinforced concrete construction. It will have large freight elevators in the center, light whip hoists over each tier of cargo doors on each side of the building, automatic sprinkler system and electric lighting system. Working drawings will be completed as soon as these plans receive approval of the Harbor Commission.

**FACTORY**—1 and 2 story, brick and concrete. Cost not stated. San Bernardino, Cal. Architect, San Bernardino Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owner, Nemeal Food Products Co., represented by Martin M. Kallman. Mr. Kallman has recently returned from a trip to San Bernardino and has announced the selection of a site for the new buildings. Only preliminary drawings have been made and it is impossible to give details of construction. Further mention will be made as the work progresses.

**SCHOOL**—1 story and base, hollow tile construction, \$10,000. Holtville, Imperial Co., Cal. Architects, Allison & Allison, L. A. Owners, Holtville School District. The building will contain eight class rooms, an auditorium, departments for domestic science and manual training. Interior will be finished in pine with some maple floors. There will be a modern system of ventilation, program clocks and modern school plumbing. Exterior will be faced with cement plaster. Bonds have been sold and the money will be available at once. Bids will be called for shortly.

**EXPRESS DEPOT**—1 and 2 story and base. Class A and Class C construction. Cost not stated. Los Angeles, Cal. Architect, James H. Humphreys, Wells-Fargo Bldg., S. F. Owners, Wells-Fargo Co. The building will be erected at the corner of 4th street and Central avenue, covering a ground area of 100 by 225 feet. The main portion of the building will of Class A construction with a steel frame and reinforced concrete walls and floor. Steel roof trusses will be used. Interior will be finished in pine and metal trim. Metal window sash and frames will be used. Exterior will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

### Contracts Awarded.

**APARTMENT HOUSE**—1 story and base, frame, \$15,000. Long Beach, Los Angeles Co., Cal. Architect, Henry J. Mack, Contractor, 411 J. Schuler, Sunset Boulevard and Gardner street, L. A. Contract price, \$15,000.

**WAREHOUSE**—3 story and base, Class C construction, \$65,000. Los Angeles, Cal. Architects, William Carleton & Son, Merchants' Bank Bldg., L. A. Owners, Rutledge-Merle Co. Contractors, E. O. Engstrom Co., 5th and Seaton streets, L. A. Contract price, \$65,000.

### PORTLAND AND OREGON.

**APARTMENT HOUSE**—2 story and base, brick, \$20,000. Portland, Ore. Architects, Goodrich & Goodrich, Abington Bldg., Portland. Owners, Commonwealth Realty Co. The building will be erected on Sandy road, having a frontage of 11 feet and a depth of 95 feet. There will be a total of 16 suites of two and three rooms. The three-room apartments will have two disappearing beds and the other apartments one. Interiors will be finished in pine throughout. Some hardwood floors will be used. Plans provide for steam heat and a hot water system. Each apartment will have a private bath. Exterior of the building will be faced with pressed brick. Plans are prepared and the work will be done by Day Labor.

**ARMORY**—2 story and base, reinforced concrete, \$75,000. Eugene, Ore. Architects, Hunzicker & Preussner, Eugene. Owners, State of Oregon. This building has been mentioned here a number of times before when plans were being prepared. The building will cover an area of 149 by 132 feet and will be of fireproof construction. Basement will contain a large banquet hall, store rooms and gymnasium. First floor will be arranged for a drill room 144 by 88 feet. The second floor will contain a balcony around the drill room and officers' quarters. Interior will be finished in pine throughout. A maple floor will be used in the drill room. Plans provide for steam heat. Plans are complete and figures are being taken. Separate bids will be taken for the general construction, heating, plumbing and electric work. Bids will be opened on November 21st in the office of Adj. Gen. W. E. Finzer at Portland.

### Contracts Awarded.

**DISTRIBUTING POST OFFICE**—1 story and base, reinforced concrete, \$12,000. Portland, Ore. Architect, Earl A. Roberts, Selling Bldg., Portland. Owners, Pioneer Trust Co. Contractor, John Hedstrom, 756 Kirby street, Portland. Contract price, \$12,000.

### SEATTLE AND WASHINGTON.

**MOTION PICTURE STUDIO GROUP**—1 and 2 story buildings, frame and concrete, \$250,000. Seattle, Wash. Architects name not given. Owners, Puget Sound Film Producing Co., Elbers Bldg., Seattle. The Puget Sound Film Producing Company will spend eventually \$250,000 on buildings. The first unit will cost \$50,000 and will be built this year, but it has only just been announced that \$100,000 in building construction will be spent each

for the next two years. Those estimated as interested in the project are E. K. Lamson, 1200 Wilcox street, S. Belson. The names of companies or the character of the building are not stated.

**WHARF**—Timber pile. Cost not stated. Everett, Wash. Engineer, Chief Engineer, Great Northern Railway Co., St. Paul. Owners, Great Northern Railway Co. Plans for a large timber and pile wharf to be constructed at the company's waterfront yards have been completed and approved. Bids will be called for at once. Full particulars can be secured by addressing the company engineer in charge of the work at Everett.

**JETTY WORK**—\$100,000. Vancouver, Wash. Engineer, Port of Vancouver Commission, Vancouver. Owners, Town of Vancouver. Plans have been completed and bids will be received by the Commission until 2 p. m. Monday, November 16, for the immediate construction of a jetty to extend from the Oregon shore line into the Columbia River at an angle of 45 degrees. The structure is to be approximately 2,100 feet long, of pile and timber construction. Alternate bids will also be received for the different work in separate contracts as follows: Furnishing piling, driving piling, framing, furnishing lumber, spikes, etc., and for furnishing and placing of rock. The cost of the improvement or the amount appropriated for the work is not given, but according to a very conservative estimate made by a local engineer, a structure of this character would cost about \$100,000. W. B. Dubois is secretary of the Commission.

**SCHOOL**—2 story and base, reinforced concrete and brick. Cost not stated. Seattle, Wash. Architect, Architectural Department Board of Education, Seattle. Owners, City of Seattle. Bids were opened recently for the construction of the Ballard School. The Sound Construction and Engineering Co., Seattle, was low on the general construction at \$235,841; P. J. Lavan low on the heating at \$33,250; Peterson Heating and Plumbing Co. low on the plumbing at \$29,900, and the Ne Pace-McKenna Co. low on the electric work. Contracts have not been officially awarded.

**RECLAMATION PROJECT**—Cost not stated. Sunnyside, Wash. Engineer, United States Reclamation Service, Washington, D. C. Supervising Engineer C. H. Switzer, Sunnyside. Owners, United States Government. Bids for the construction of the Sunnyside unit of the Yakima project, which were opened last week, are as follows: Valley Construction Co., \$91,625; Oregon Bridge and Construction Co., \$87,652; Nettleton, Bruce & Eschbach, \$99,720; Consolidated Contract Co., \$96,220; George P. Wright, \$81,093; McDonald & McGuire, \$195,973; Grant Smith & Co., \$96,128; The Pacific Tank and Pipe Co., \$10,976 for the pipe, and the Chamberlain Construction Co. bid \$12,298 for the same, and the bid of the Redwood Mfg. Co. was \$11,039, alternate, \$15,133; Washington Pipe and Foundry Co., \$10,777, alternate, \$19,571.

### REMOVAL NOTICE.

ASHTON & BRIDGMAN have removed their offices from the Foxcroft building, 68 Post Street, and are now located at 503 Market Street.

### VALUABLE PHILIPPINE HARDWOODS.

[Vic. Consul General A. E. Carleton, Hongkong, China.]

Exports of the famous Philippine hardwoods to the markets of the Orient and to the United States are steadily increasing, and the demands are much greater than the current production can fill. It is estimated that 300,000,000 board feet could easily be marketed outside the islands, while the quantity exported last year was less than 10,000,000 feet.

According to the returns of the collector of customs the value of the timber exported in 1913 was \$9,665, a slight increase over 1912. Lumber has shown an advance in export value from \$63,155 in 1912 to \$214,814 in 1913, the greater part going to the United States. The United States imports chiefly narra and tanguile woods, both being among the best woods obtainable for construction and cabinet work. **Hongkong's Purchases of Philippine Woods—Lack of Capital.**

The imports into Hongkong have increased from \$8,529 in 1912 to \$31,407 in 1913. Although there are no definite figures to work upon, one Hongkong lumber firm estimates the imports of Philippine woods for the first seven months of 1914 at 3,000,000 board feet. These figures are far in excess of those for any year since 1895.

In the Philippines the great trouble seems to be lack of capital to move timber from the virgin forests; it costs much more to log wood in the islands than elsewhere, for instance, in Borneo, where there are many more rivers available for carrying the timber from the forests to the saw mills. Prior to the American occupation of the Philippines the greater part of the hardwoods used in Hongkong and South China ports were imported from the Philippines. Owing to the increased demand in Manila, and other portions of the islands and the consequent rise in prices, this trade gradually dropped off, Hongkong traders going to Borneo. It will, therefore, require persistent effort on the part of those interested in exploiting the Philippine export lumber trade to again obtain a fair share of the business in this section of the Far East.

#### Varieties Most Sought.

The woods most frequently inquired about are yacal, apitong, pagatpat, lumhayao, and red lauan. The first named is said to be particularly good for flooring boards, in fact all these woods have proved to be excellent for general house construction. For the construction of motor boats, lumhayao and lauan are highly recommended for planking purposes where the timber is not to be painted, as they both take an excellent polish. For heavier construction work on vessels of a larger type, yacal has proved very acceptable, being more durable and of greater tensile strength than the Borneo timber.

[The timber resources of the Philippines, their exploitation, and the market for American sawmill and woodworking machinery, are discussed in a monograph issued by the Bureau of Foreign and Domestic Commerce, "Lumbering Industry of the Philippines," Special Agents Series No. 38, copies of which may be obtained from

the Superintendent of Documents, Government Printing office, Washington, for 5 cents.]

### EXPOSITION NEWS NOTES.

Eight paintings by Frank Brabgwyn arrived on the grounds of the Panama-Pacific International Exposition from England on October 15 and are pronounced by Director of Color Jules Guerin as "perfectly wonderful." The subjects of these great murals are "Fire," "Water," "Air" and "Earth" and each is treated in two paintings. Brabgwyn is considered to be the greatest master of his art in modern times. His paintings and etchings hang in twenty of the large national galleries of the world.

The Concatenated Orded of Hoo Hoo broke ground for its \$30,000 building on the grounds of the Panama-Pacific International Exposition on Saturday October 17. The building will be built just south of the Palace of Horticulture and will be constructed of rough logs of every species of lumber common to the Pacific Coast. It will contain the auditorium for the accommodation of the twelve lumbermen's associations which will meet in San Francisco in 1915.

Justin F. Denechaud, executive commissioner to the Panama-Pacific International Exposition from Louisiana, arrived in San Francisco on October 20 and before returning will take part in the dedication of the Louisiana site on the exposition grounds. The Exposition directors and the Louisiana society of California will entertain the commissioner and have a big part in the dedicatory exercises.

As additional proof that the European war is having no effect on the Panama-Pacific International Exposition announcement has just been made by the director of congresses and conventions of the exposition that since the outbreak of the war all records have been broken in obtaining 1915 conventions for San Francisco. For the past 15 days there has been one big convention a day that has chosen San Francisco. The total number of national and international congresses and conventions to meet in San Francisco the coming year is more than 300.

Plans are being made for the dedication of the Tennessee site on the grounds of the Panama-Pacific International Exposition. Colonel Faxon, president of the Tennessee Exposition commission, Governor Hooper, and the architect and prominent Tennesseans are expected to arrive in San Francisco this week. The Tennessee building will be a reproduction of "The Hermitage," the old home of Andrew Jackson.

### CONTRACTS AWARDED BY BOARD OF PUBLIC WORKS.

Contracts for city improvements have been awarded by the Board of Public Works as follows:

St. Mary's avenue, from Mission to College avenue, and crossing at Hill and New streets to Flynn & Tracy, Sweeney, between Garfield and Geylton to S. F. Johnson, Railroad

### Time Table.

#### Oakland, Antioch & Eastern Railway.

##### LEAVE KEY ROUTE FERRY.

Leave	Daily except as noted.

avenue from Hudson to Innes and Keith from Evans to Galvez to The State Improvement Co.; Seventeenth avenue from Rivera to Santiago to M. Slosser and Pierce street outfall sewer to Pacific Construction Company.

### SIDE WALK PERMITS ISSUED.

The following sidewalk permits have been issued by the Board of Public Works during the past week:

Bothin Real Estate Company; N Lombard 156 E Broderick.  
Mission Concrete & Mosaic Co.; W Third 112-6 N Townsend.

Mrs. Jas. Wiseman; SW Garabaldi and Union.

M. Thide; S Geary 60 E 31st Ave.  
Robinson & Nugent; SW Franklin and Redwood.

Bothin Real Estate Co.; E Van Ness Ave 50 N Greenwich.

### STREET PAVING PLANNED BY UNITED RAILROADS.

The United Railroads has notified the Board of Supervisors that they will pave with vitrified brick between and on the sides of its tracks on Powell street from Sutter to Bush street; on Third street with asphalt, Polk street from Market to Hayes and on Hayes street from Polk to Larkin with asphalt.

### COTTON SEED INDUSTRY.

One of the most dramatic developments of a material kind in the last 25 or 30 years has been the rise of the cottonseed industry, the value of its crude product increasing since 1880 from something more than \$7,000,000 to \$150,000,000.

### NEW YORK'S NEW JAIL BUILDING.

New York will have the highest jail building so far erected. It will be built in Thirteenth street near Sixth avenue. The building will be fourteen stories tall and will cost about \$450,000. It is planned chiefly for the care of women prisoners.

## TESTS OF REINFORCED CONCRETE IN CHINA.

[Consul General Thomas Sammons, Shanghai.]

A technical report has been prepared by a special committee of the Engineering Society of China regarding the use of reinforced concrete. The municipal council at Shanghai permitted the use of its testing appliances in connection with the investigations made on this subject, and also contributed about \$750 toward the expenses incurred in conducting the experiments. In making this appropriation the municipal council made it a condition that copies of the reports should be sold at approximately \$5 each.

While the report is largely of a technical character and therefore not of interest to the general public, it may be said that the following gives a fairly accurate outline of the scope of the work of the committee:

In all the experiments and tests which have been carried out, the general principal has been adopted of conducting them in such a manner as might be expected to be met with under ordinary local conditions at Shanghai.

It may be argued that the experiments and tests, having been carried out under expert supervision, may be expected to give better results than could be obtained in actual practice. To this the committee can only reply that expert supervision is just as essential in actual practice as in experimental tests, and wishes to express the most emphatic opinion that no reinforced-concrete work should be undertaken unless thoroughly trustworthy supervision is provided.

No less important is it to employ only workmen who have been trained in the proper methods of fixing the reinforcement and mixing and placing of concrete. This, in turn, points to the undesirability of employing a contractor who has had no experience in reinforced-concrete construction. The committee is glad to be able to record that there are now in Shanghai a considerable number of contractors who are capable of carrying out such work, and competition between them is sufficiently keen to prevent any suggestion of monopoly being established or considered.

Three factors which have to be borne in mind are expert supervision, reliable workmen, and good materials.

Supervision and workmen have already been dealt with. There remains only the question of the materials, and on this point the committee is of opinion that in this respect Shanghai will compare favorably with any place in the world.

## IMPORTANT MATTERS DISCUSSED AT THE MEETING OF THE BOARD OF WORKS.

At the regular meeting of the Board of Public Works last Monday the following important matters came up before the Board:

Granting permit to the Conservative Building & Investment Company to construct water supply main on the north side of Clement street, between 14th and 15th avenues.

Granting permit to A. A. Hicks to construct water supply main on the east line of 33th avenue between Balboa and Cabrillo.

Granting permit to Peter K. Clausen to construct water supply main on north side of Clement street between 22nd and 23rd avenues.

Granting permission to the Pacific Gas & Electric Company to install gas distribution main in Minna street, between 7th and 8th streets.

Satisfactory completions of street work on the following streets were

passed by the Board: Improvement of the crossing at 18th avenue and Ulloa, by the State Improvement Company; improvement of Ulloa street between 17th and 18th avenues; improvement of Ulloa street between 18th and 19th avenues.

Directing City Engineer to prepare resolutions of expediency for the improvement of 35th avenue between Cabrillo and Fulton where not already improved.

Accepting offer of the Fay Improvement Company to construct sidewalks on Beale street under the Beale street viaduct at Harrison street.

Award contract for construction of the Twin Peaks Tunnel to R. C. Storrie & Co., for \$3,372,000.

Granting permission to the San Francisco Golf and Country Club to construct a wooden bridge on the east line of Junipero Serra Blvd. at their club house driveway.

Requesting the Supervisors to appropriate \$350 extra for the enlargement of culvert for Islais Creek under Oakdale avenue.

Directing City Engineer to prepare plans and estimates of a water supply for the City of San Francisco.

Awarding Proposition No. 1 of sheet metal contract on the City Hall Building to the Paraffine Paint Co. on their bid of \$6,582.

Awarding Proposition No. 2 of the sheet metal contract on the City Hall Building to the United States Metal Products Company on their bid of \$79,900.

Rejecting all bids under Proposition No. 3 of the sheet metal work on the City Hall Building.

Awarding contract for composition plaster ornament work on the City Hall to P. E. Denivel on his bid of \$9,325.

## KAURI GUM INDUSTRY IN NEW ZEALAND.

[Vice Consul General L. A. Bachelder, Auckland.]

The "Report of the Commission Appointed by the New Zealand Government to Inspect and Classify the Kauri Gum Reserves in the Auckland Land District" has just been issued. The United States is the largest consumer of New Zealand kauri gum, having taken in 1912 3,894 tons, valued at \$1,131,782, out of a total exportation of 7,908 tons, valued at \$1,952,951. Kauri gum is an important item in the manufacture of good varnishes.

The opinion of exporters of this gum is that this official report is comprehensive and valuable, but, speaking generally, the local firms which buy and grade kauri gum for export do not regard as practical the idea advanced by the commission for the Government to undertake grading the gum, claiming that no universal standard would be as satisfactory for the varnish makers as the existing system of long standing.

It is recognized that almost every large buyer of kauri gum has his own special method of preparing the product which best suits his requirements. Exporters think that for the Government to undertake the grading would only mean added expense to the industry with no adequate result, as exporters generally would continue to rely upon their own methods of

grading, which were adopted at the same time.

A copy of the Government report referred to may be consulted on application to the Bureau of Foreign and Domestic Commerce, Washington.

## MINOR JOBS ABOUT ALAMEDA CO.

117th, Okd., alterations; owner, Brooklyn Masonic Hall Association; contractor, Bares & Kennedy, cost, \$100.

531 55th, Okd.; alterations and reshingle; owner, W. Hermann; cost, \$100.

2122 Telegraph Ave., Okd.; shed; owner, A. Troest; contractor, E. C. Nielsen; cost, \$100.

The Chronicle is highly elated in that it sees in the election returns that President Wilson and his policies were repudiated at the polls. It runs a big headline from ex-president Taft to the effect that the Progressives have been relegated to the realm of "innocuous desuetude." That sonorous phrase has been resurrected from the speeches and messages of ex-president Cleveland and is now used by the reactionaries to express a situation which they themselves enjoy.

Foris Penrose and Joe Cannon are in the public eye. They are the champions for which the Chronicle stands. And they stand for the policies that are to bring prosperity to our country and cause the sun to shine and the grass to grow.

The policies that have repudiated are no doubt the reform measures adopted and our policy towards Mexico. Certainly these things are to be repudiated by the special privilege class. The great corporations can not corrupt the half-savages in Mexico and then plunge this country into war to make good their claim. They can not force a protective tariff that diverts millions of dollars from the masses into the hands of a few plutocrats. And they can not dump worthless securities onto paying concerns and thus bankrupt a good property and get away with the loot as was done in the case of the New Haven Railroad. And under the new currency act every man will not have to go down on his knees to the Morgans of Wall street to get enough money to float a legitimate enterprise.

All these readjustments have upset business. The war has come along and upset the income of the government. New taxes must be imposed. Conditions are hard. But most of the reforms that have been started are right and just and when conditions have adjusted themselves a much fairer basis will exist and a more permanent prosperity established.

The war has taught us many things already. That the wisdom of Washington has been followed and has left us free from entangling alliances. That as long as nations exist whose people think that the chief business of the human race is to make war, that we will have to prepare to defend ourselves at all times. This policy of building a navy and training a reserve army for national defense has not been a party issue. Ex-president Roosevelt has called attention to what he considers the necessity for such action and that is much or more the part of the Progressive party than that of the reactionaries or any other party.

#### COURAGE ISN'T ENOUGH.

In the battle between Toul and Verdun, where the French losses were reported to be forty thousand, the French officers, the news dispatches said, "complained of the inferior quality of the French troops"—"inferior," though with bravery attested by their death.

It is not enough in modern war that soldiers should merely know how to die. Were that all, the making of an army simply would be a matter of dressing up a mob in uniforms and putting guns in their hands. One lesson that Napoleon learned too late was that he could not replace with re-

cruits called to the army two years before their time the veterans he left on the fields of Austerlitz, of Arcola and of Wagram.

It may come as a shock, to French patriotism, as it doubtless would to the patriotism of any country, to learn that enormous sacrifice of life in battle is quite as likely to mean inefficiency in an army or its leadership as heroic fighting qualities or last ditch courage. The new military science can forgive great losses rarely—never unless they gain great ends. In military annals great retreats are classed with great victories, and the worst crime an army can commit is to die like sheep in a pen.

General McClellan counted his most brilliant feat in the Civil War the safe withdrawal of the Army of the Potomac from Harrison's Landing. The impatient North saw only another defeat and another retreat. McClellan saw the saving of his army. It has been said of McClellan, perhaps with some picturesque exaggeration, that with the exception of the Battle of Antietam, he never saw his army in action. In all its battles, once his plans were made for victory at the front, he was to be found where he deemed a careful general's place to be—in the rear making other plans to protect its base and keep its lines of retirement open. It was this sort of generalship, whatever its immediate shortcomings, that ultimately placed in Grant's hands the finest army ever marshaled in war.

The battle is over and forty thousand Frenchmen have died bravely. Yet they were "inferior troops." A hard saying, but probably true from the military viewpoint. Perhaps they showed too great courage and needlessly exposed themselves. Perhaps they pursued the enemy too far or in wrong military order. Perhaps they didn't know how to retreat. In any case, good Frenchmen, but bad soldiers.

Americans ought to learn before this war is over that something more is needed to a proper national defense than a multitude of brave young men who are willing to die for their country. It behooves both patriot and country to see to it, the one that his country does not sink a helpless victim when its hour of trial comes, and the other that he does not die a useless sacrifice, a brave American, but an "inferior" fighting man.

#### MARE ISLAND WILL BUILD COAL BARGES.

MARE ISLAND, Solano Co., Cal.—Twelve steel coal barges to cost \$125,432 have been ordered built at Mare Island by Secretary of the Navy Daniels. The steel lighters will have a 200-ton capacity. On completion seven of them will be sent to Pearl Harbor. The remaining five will be assigned to nearby naval stations. The hull department will place the order for material at once and the barges will be constructed in the vicinity of Drydocks 1 and 2.

#### WANT BIDS FOR CITY WORK.

Three Sets of Bids to be Opened by Works Board on November 11th.

Three sets of bids will be opened by the Board of Public Works at the

regular meeting next Wednesday, November 11th. Bids will be taken for furnishing and installing the necessary equipment for the Civic Center power plant, for plaster work on the Academic Building of the Polytechnic High School and for improvement of the northerly one-half of Chestnut street from Laguna to Webster by constructing granite curbs, asphalt pavement and catch basins.

#### UNCLE SAM'S NEW BATTLESHIPS.

The newest battleship building for the United States will be 1400 tons larger than Japan's largest 3400 tons larger than Germany's 3900 tons larger than Great Britain's and 6550 tons larger than anything France has.

#### EXPOSITION NOTES.

Vahan Cardashian, Imperial Ottoman Adjutant High Commissioner and Executive Director to the Panama-Pacific International Exposition, recently inspected the progress of the Ottoman pavilion at the exposition and assured the department of live stock that the Ottoman empire will be well represented in that department. Arabian horses, Angora goats and cats and sheep of several breeds will be entered for premiums.

The attendance on the grounds of the Panama-Pacific International Exposition Sunday October 11 broke all pre-exposition records. The actual count shows that more than 31,000 persons passed through the exposition womers on the pageant of the landing of Columbus. This number does not include the hundreds on the bay who took part in the celebration.

Three hundred tons of construction and decorative materials to be used on the Japanese and Philippine buildings of the Panama-Pacific International Exposition have arrived in San Francisco on the Steamship Chiyo Maru. The Philippine building is nearing completion and the Japanese pavilion was built and then "knocked down" in Japan and shipped to the exposition grounds.

#### RUSSIAN SERVICE, PUGET SOUND—VLADIVOSTOK.

Commercial Agent W. R. Henderson, Seattle, Wash., Oct. 17.]

It is authoritatively announced that a Russian line of steamships has been established between Vladivostok and Seattle, despite the present state of affairs in Russia. It is the Volunteer Fleet that will open this service to the Pacific coast, and the announcement comes through Mr. N. Bogolayevsky, the Imperial Russian consul, in a communication to the New Seattle Chamber of Commerce.

Balfour Guthrie & Co., who have branch offices in this city, were consulted regarding this matter and stated that the service has already been put into effect so far as Vancouver and Vladivostok are concerned, and that it is ready to come to Seattle and Tacoma as soon as the business in these cities shall justify it.

## Editorial Comment.

The various bonding propositions put up to the people at the last election seem to have all been carried. There has therefore been an indebtedness authorized of \$7,800,000 for various building propositions throughout the State. And in addition to that Harbor bonds to the amount of \$10,000,000 have been authorized for the San Francisco water front to be paid for from the income from the Harbor front. So that altogether there was authorized at last Tuesday's election the sum of \$17,800,000 to be expended in improvements. Tabulated the items are as follows:

For State buildings at Sacramento .....	\$ 2,000,000
For State buildings at San Francisco .....	1,000,000
For State buildings at Los Angeles .....	1,250,000
For buildings on State Fair Grounds .....	750,000
For buildings at University .....	1,800,000
For Harbor improvement, San Francisco .....	10,000,000

Total .....

\$18,000,000

This indicates that so far as the State is concerned there will be considerable activity in the building line in the near future. We are now in progress of building a State Highway under an authorized issue of 18 million dollars. Copied with the 18 million just authorized there will be expended in the State a total of 36 million for improvements and that means work and business for the building craft in its various departments.

### CONSERVATIVE.

The people are conservative. They may vote for radical candidates and they will, under leadership, approve of radical measures. But on direct reference, without the support of organized government, the people vote with cautious conservatism. And they refuse to pass class legislation of any sort. Witness the overwhelming defeat of the universal eight-hour law in California and everywhere it was presented. In Oregon, of 28 propositions, only five carried. This is, to be sure, nothing against direct legislation. Most bills introduced in state legislatures, or in Congress, are defeated, too. Arizona defeated an anti-blacklist law, and a law requiring 80 per cent of mine workers to be Americans. Both were labor-class measures, defeated by the vote of all the people. This is not to say that the people may not have been mistaken, or overcautious, as to one or the other of these laws. The point is that if they made a mistake, they made it on the conservative side. The referendum is the weapon of conservatism. The initia-

tive is the appeal of radicalism, but the appeal is usually vain. And the best thing to do with a radical proposition is to give it a fair chance. It is pretty sure to be defeated, but the conservatism of the people, and that sort of a defeat leaves even the radicals satisfied. For the radicals believe in government by the people, even when it decides against them.—Fresno Republican.

William Randolph Hearst is again at the front with his editorials in capitals criticising the policy of President Wilson in regard to Mexico and generally distorting facts and figures to throw mud at the administration. Surely San Francisco is cursed with newspaper proprietors. The Chronicle is the organ of the special interests. The Call is a colorless merchant of the news. The Bulletin has gone crazy on the underworld idea and on the proposition of freeing Ruff so that there is nothing that the public can depend on in the daily papers unless he imports a newspaper from the outside world.

It is a strange situation and results from the character of the men who own the papers. Hearst employs the best talent in the country. Yet aside from the special articles and cartoons the news is not dependable and the editorials, when Hearst writes them, are an insult to the intelligence of a South African Hottentot. The Chronicle prints a lot of news, but it is usually dull and stupid and editorially is always against the people. The Call advertises that it is the one paper of character, yet character is the thing that it lacks absolutely. While the Bulletin is obsessed with the idea of liberating all the criminals in the world and it distorts facts to play to the morbid public that revels in the stories of the underworld. Some day maybe San Francisco will have a good clean daily paper after the present proprietors have passed to the great beyond.

The gift ship of the Chronicle has started for Europe. It is a good thing and well intentioned no doubt, but when children and women are crying for food it seems something like a society bazaar sending prayer books to savages to send toys to starving people. The relief ship will be sent soon, is scheduled to sail on December 1st and that is of far more importance to those of us who wish to help those who have been deprived of all they possess in the world through no fault of their own. And as time goes on this crying need will be more and more apparent. And these people will have to be fed and clothed and housed and there will be ample opportunity for all to give and help bear the burden that has been heaped upon mankind by the brutal hand of militarism.

## Large Plants and Efficiency.

C. D. Gray in the Wood-Worker.

The recent failure of the house of Chadlin, which controlled a number of large department stores in leading communities, was a striking proof of the contention which has been made for a long time by some business observers that mere bigness does not necessarily make efficiency. And what is true in this respect of the mercantile world is equally true of the manufacturing business.

The large size of an institution may possibly be a handicap to it. The brains that can organize a business may not be sufficiently numerous to run it at top speed all the way. Lack of competent managers may offset the excellent ideas originated by those at the head of the business, and failure to carry out plans which have been formulated at headquarters may prevent full success from being won.

These facts are suggested, not as a criticism of the large manufacturing plant, but as encouragement to the small one. A good many wood-workers whose capital is not sufficient to enable them to establish great factories such as some of their competitors possess, are inclined to worry over this and to imagine that they are at a great disadvantage in the race for success. But the disadvantage which may result from being small may be more than made up for, if the owner of the business determines it, by the numerous economies and savings which can be made by the man who is on the job, close to the work, and looks at everything from the standpoint of the proprietor.

There are plenty of big factorles which are very poorly run. Sometimes they succeed, but just as often they fail in the long run. Occasionally their manufacturing inefficiencies are covered up by the reputation of the product, which can be sold at a high price, or by unusually complete control of the market, or something of that kind.

For example, there is a big manufacturing plant in a western city which buys probably fifty carloads of hardwood lumber a year. Nevertheless, it is not located on a railroad switch, and every foot of this material has to be brought by wagon to the factory. This immense waste has to be absorbed by the business and must show in the cost of the product. Yet this company is considered one of the successful concerns in its field and seems to be able to handle a handicap of that kind without serious difficulty.

Another big plant has a lot of obsolete wood-working machinery, which cannot possibly produce the work at the minimum cost. For example, its gluing up of narrow stock is handled on a piece of equipment that has been thrown out of the most up-to-date plants because it is not 50 per cent as efficient as the modern machines. It is still being used here, though, because it is doing good work, within its original limitations, no account apparently being taken of the increased cost.

Another plant—one of the largest of its kind in the country—is paying an excessive fire insurance rate, which could be reduced to a fraction of the present amount by the installation of automatic sprinkler equipment. The building is of good construction and well adapted to the change, but the heads of the concern seem to be satisfied with present conditions, and refuse to make the improvement.

On the other hand, there are numerous small wood-working plants which are not efficient, in spite of the opportunity which their owners have of getting close to them and making them up-to-date in every way. A chair factory in an Ohio valley city is run by two men, brothers, who are familiar with every detail of its work. The factory is one huge conglomeration of out-of-date and behind-the-times methods, from the way the lumber is handled into the factory until the time the finished product is shipped out. These men are content, apparently, to equal the record made in the past. They decline to spend money on improvements, and think that they can make up in the selling department for the weakness of the manufacturing end. Perhaps they can and do, but certainly they are not taking advantage of the opportunity to do the thing the best possible way.

A planing mill which has only a moderate capacity, and has its owner as the manager and superintendent, could be improved greatly without much expense. The building, however, is old and tumble-down, and what is really needed is a new plant. The owner hesitates to change the arrangement of his machinery, improve the drying, gluing and shipping departments, and make the other betterments that he must know are necessary, as long as he is in the old mill. Some time, after he has had a fire, he may make the changes. The only trouble is that his rate is so high that he is not very well covered by insurance, and may find himself unable to rebuild at all if a fire once puts him out of business. What he should do is to make his plant, as it is, the best possible, and then work toward the ideal he has in mind in the form of a new plant.

A small box manufacturer, to revert to the possibilities of the situation, has a plant which is about one-third the size of his largest local competitor. Yet it suffers nothing by comparison with the other. The machinery is well arranged, the work moves forward through the factory without loss of time, there is ample room and good light, the machinery is motor-driven, and the plant is kept clean and ship-shape all the time. This manufacturer is on intimate terms with all his employees, and they do things for him personally that they might not do for an impersonal corporation employer. He is putting his personality and his individuality into the work, and his production expense is probably no greater than that of the immense plant

against which he must compete. He is taking advantage of the opportunity of the small man to make improvements which are likely to escape the attention of the big fellow, who is too far away from the details of his proposition.

Another wood-working concern conducts a planing mill which is not large but is as good as the best. Here the owner is the superintendent, and knows just how his lumber is running, and just why each job pleases or fails to please. He is nearly always selected by the architects to make up the high grade interior finish which goes into the best jobs, because they know that he can be depended upon to turn out work which will give satisfaction. That is one of the big advantages of the small manufacturer. The customer looks to him personally for satisfaction, and he is a position to insure it, because he can supply the personal attention which is entirely lacking as far as the presence and interest of the head of the large plant are concerned. The latter necessarily must trust to subordinates; they are perhaps competent, but the customer doesn't know this. When he knows the owner himself, and knows that the latter is going to stay with his work until it is put through the entire process of manufacture, he is much more likely to be satisfied.

There is a small flooring factory in the middle west which doesn't have to play second fiddle to any plant in the country. In the difficult work of parquet and fancy flooring manufacture this concern is given first place by many experts. The owner has used to the fullest extent his opportunities to improve, and his plant shows the effects of his constant thought. He originated a conveying system for lumber that saved many dollars in handling expenses. He devised a "vulcanizing" treatment which is used in coloring the woods which are used in the fancy work. He improved the design of the typical warehouse used for storing hardwood flooring, which is an unusually difficult material to keep in perfect condition as to dryness. The result of all this is that he never has any trouble selling his stock, and his factory is always busy.

As a matter of fact, the little fellow who is always on the job, who is never content with today's achievements and is constantly planning to make tomorrow's a little better, is bound to succeed. No matter whether his competition comes from concerns which are bigger or smaller than his is, he is able to meet that competition, because his painstaking efforts are certain to insure satisfaction to the customer. And that, after all, is the best guarantee of success. If the people for whom the work is being done believe that it could not have been done better, and are thoroughly satisfied, mere price competition will not be of much importance. And, as has been suggested, the small wood-worker who takes advantage of his opportunities

need not imagine that he is bound to have a higher factory cost than the big house. It may work out just the other way.

### THE PROGRESS OF MUNICIPAL OWNERSHIP.

Municipal ownership is marching on. Despite numerous attempts to stop it the principle of a community controlling its own utilities is rapidly being recognized by the progressive towns and villages throughout the United States. A summary of recent developments in the field of municipal ownership is interesting.

#### Southern States.

Melbourne, Florida.—A contract for a municipal electric light plant has been given to the J. B. McCrary Co. of Atlanta, Ga.

Pablo Beach, Florida, will undoubtedly have a municipal electric light plant. The city council propose to have the voters decide on a \$10,000 bond issue.

Punta Gorda, Florida, will have a municipal plant. A 50 H. P. Drexel engine will furnish current for 1,500 lamps.

Newport, Tenn., will issue \$5,000 in bonds for the establishment of a municipal plant.

MacClenny, Florida, has plans completed for a municipal plant.

Melville, La., plans for a municipal plant are complete and work is now commenced.

Estill, S. C., has issued bonds to build and control all public utilities in that city.

Mount Vernon, Ga., decides November 3 whether to issue \$50,000 bonds for the erection of a municipal plant.

Gadsden, Ala., will shortly put out bonds to take care of a new municipal lighting plant.

Rivera, Tex., will have the new municipal plant in operation within five months.

#### Middle Atlantic States.

Perth Amboy, N. J., will decide on November 3 in the matter of issuing \$120,000 in bonds for a municipal plant. Local sentiment favors the establishment of such a plant.

Kittaning, Pa., construction work for a municipal plant is actively going on. The town had no difficulty in selling \$112,000 in bonds.

Butler, N. J., is to have a producer-gas municipal lighting plant.

Mont Alto, Pa., will install a municipal plants when funds are assured.

Lynchburg, Va., will install a municipal plant to cost \$150,000.

#### New England States.

Lyndonville, Vt., will rebuild the municipal light plant at a cost of \$25,000.

East Norwalk, Conn., is putting up a new producer gas power plant.

Boston, Mass., will put in a municipally owned central power plant on Deer Island.

#### Central States.

Dayton, Ohio, voters will soon have opportunity to decide whether bonds will be issued for \$500,000 for the erection of a municipal plant.

Princeton, Ky., will decide November 3 by vote on the issuance of bonds for a municipal plant.

Atwood, Ill., is to have a small municipal plant costing not over \$7,000.

Portage, Wis., has conferred for a municipal plant to cost \$60,000.

Lincoln, Neb., extensive additions

and alterations are being made to the city's municipal plant.

Queensburg, Kans., is another place where additions are being made to take care of increased business of the municipal light plant.

Saginaw, Mich., will shortly decide on the issuance of bonds for a municipal plant.

Norwood, Ohio, has purchased machinery for the new municipal plant. Harrisburg engines were chosen.

Sandusky, Ohio, will issue \$200,000 in bonds for the erection of a municipal plant.

Shawnee, Wis., will have a water power municipal plant.

Huntington, Ind., work on the new \$50,000 municipal plant has started.

Farmhamville, Iowa, has a municipal plant placed in operation this September.

Parker, S. D., has awarded the contract for a municipal plant to cost approximately \$20,000.

Kalamazoo's, Mich., municipal plant will enter the commercial field this month.

Mount Vernon, Ohio, if the voters approve, will shortly have a municipal plant.

Aurelia, Iowa, has approved of the plan to erect a municipal plant of \$7,000.

Renwick, Iowa, will have a municipal plant. Bonds have been voted.

Ridgeway, Iowa, also voted bonds for a municipal plant.

Shenandoah, Iowa, will submit the question of a \$10,000 municipal plant to the voters.

Sioux City, Iowa, will have a municipal plant to cost \$10,000.

Bucklin, Kans., has taken over the local central station which it will operate as a municipal plant.

Wessington Springs, S. D., will have a municipal plant to cost \$20,000.

De Witt, Neb., is planning to install a \$15,000 municipal plant.

Ewing, Neb., voters will decide on the question of municipal ownership for the electric light plant.

Uepling, Neb., will put up a municipal plant.

Blanchester, Ohio, has issued \$5,000 in bonds for the erection of a municipal light plant.

De Graf, Ohio, after losing the municipal light plant by fire has undertaken construction of another plant.

Ottoville, Ohio, will have a small municipal plant.

North Mankato, Minn., will install a small municipal plant.

Akron, Iowa, expects to join the ranks of municipal ownership shortly when a lighting plant will be erected.

Charter Oak, Iowa, will have a new municipal plant to cost \$10,000.

Sergeant Bluff, Iowa, will have a municipal plant to cost \$10,000.

Spencerville, Ohio, will shortly award contracts for the construction of a municipal plant.

Duluth, Minn., has already secured \$55,000 of the money necessary for the erection of that city's municipal plant.

Larchwood, Iowa, will have a municipal plant to cost in the neighborhood of \$10,000.

Smithville, Mo., will have a municipal plant.

Hech, S. D., has chosen Murray Iron Works apparatus for the new municipal plant.

#### Pacific States.

Loveland, Colo., has voted \$10,000

for the erection of a municipal hydro electric plant.

Atchamnet, Wash., will erect a municipal plant.

Consent Grove, Calif., will follow the example of other Utah cities and install a municipal plant.

Grand Junction, Colo., has big prospects in hand for the erection of a municipal hydro electric plant.

Yoncalla, Ore., will decide in December on the erection of a municipal lighting plant.

### WAR SHOULD RESULT IN INCREASED AMERICAN POTTERY EXPORTS.

The American demand for several minor mineral products will be stimulated by the changes in trade with Europe, with the result of increasing materially the production for 1914 and following years. In the case of pottery this movement toward a stronger hold of the domestic market is already under way. The production in 1913 was the largest in the history of the industry. The underlying cause of this prosperity is no doubt the improvement in the character of the American product in texture, finish, color, decoration, and the prevention of crazing, the higher grades of American pottery equaling if not surpassing some of the best imported ware. For many years the value of the imported pottery exceeded the value of that made at home, but about the close of the nineteenth century domestic production caught up with imports, and since that time it has greatly exceeded them, the production in 1913 being nearly four times as great in value as the imports. There was, however, last year a considerable decrease in exports of pottery, a record which should now be reversed by reason of the changes in the world's commerce that have become inevitable. (Bulletin 599, U. S. Geological Survey.)

Whales are gradually being wiped out. Only 157 were captured in Scottish waters last year, the average catch per steamer falling from 40 to 25.

Starting at the top leaves you no One hundred and forty million gallons of oil are extracted yearly from plants. Solza, olives, linseed, palm and castor beans yield 120,000,000 of this quantity.

Broken falls have been responsible for the deaths of 175 persons, injuring 6,001 and \$3,237,793 damage in the last ten years.

Persia will supply the oil fuel for the British navy in the future. The present output of the fields in which the admiralty has acquired right amounts to 210,000 tons a year.

The first section of the Trans Sahara railway, a narrow gauge line of 175 miles from Biskra to Tazout, is now open for traffic. It is to be continued to Wargla, 100 miles farther into the desert.

By connecting the Atlantic with the oil brake system of the distribution in the present case, the present system of distributing oil to the trucks are changing to a more efficient one.

Classified according to Character of Work

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$25,000. Architect, Charles J. Rousseau, 16 Kearny street, S. F. Owners, Mensor Bros. The building will be erected at the southwest corner of Laguna and California streets, and has been designed to contain six apartments of five rooms each. Interiors will be handsomely finished in pine and hardwoods. Each apartment will have two baths, two toilets and wall beds. Hardwood floors will be used in the principal rooms. There will be steam heat, a hot water supply, elevator service and a vacuum cleaning system. Bath rooms will be finished in tile. Entrance will have tile wainscot and marble steps. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and segregated figures will be called for shortly.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$17,000. Architect, O. E. Evans, 2347 Mission street, S. F. Owner, C. A. Honaas. The building will be erected on the east side of Gough street south of Green and has been designed to contain six apartments of three and four rooms. Interiors will be finished in pine throughout. There will be wall beds and private baths. Some hardwood floors will be used. Bath rooms will have tile wainscot and composition floors. Steam heat, with an automatic electric control will be installed. Tile and marble will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath and brick veneer. Plans are complete and figures will be called for at once.

**OAKLAND, CAL.**—Apartment house, 2 story and base, frame, \$25,000. Architect, P. D. Voorhees, Central Bank Bldg., Oakland. Owner's name withheld. The building will be erected at the corner of 11st and Montgomery streets and will cover a large ground area. Plans provide for a total of sixteen suites arranged in two and three room apartments. Interior finish will be largely of pine and redwood with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be steam heat and a hot water supply. All apartments will have wall beds and private bath rooms. Entrance will be finished in tile and marble. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken by the architect.

**LOS ANGELES, CAL.**—Apartment house, 2 story and base, brick. Cost not stated. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owner's name withheld. The building will be erected at the corner of Jefferson and Vermont streets, covering an area of 50 by 55 feet. There will be two stores on the ground floor. Upper floor will be ar-

ranged for six suites of two, three and four rooms. Interior will be finished in pine and elm panels. Plans provide for a hot water system, wall beds and private baths. There will be painted store fronts. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

## Contracts Awarded.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$30,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, Miss Dolores Loaiza. Contractor, James Hjul, Mills Bldg., S. F. Contract price, \$30,000. Note: The contractor is now taking subfigures on this work.

## BANKS

**BERKELEY, ALAMEDA CO., CAL.**—Bank alteration, 1 story and base. Class C, \$10,000. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Homestead Savings Bank of Berkeley. This work will consist of the installation of two new bank vaults, new interior finish, plastering, marble work, electric wiring plumbing and lighting fixtures. Complete new bank fixtures will also be installed. Little or no exterior work is required. Plans are complete and figures are now being taken.

## BONDS.

**PUEBLO UNION HIGH SCHOOL DISTRICT, LOS ANGELES CO., CAL.**—An election will be held in the Pueblo Union High School District of Los Angeles County on December 1st to vote bonds in the sum of \$65,000. The proceeds of the election will be used in the construction of new buildings and additions.

A. G. Clabaugh, Solomon Geer, E. W. Lawrence, F. C. Macey and R. P. Paden are members of the School Board.

**HOLTVILLE, IMPERIAL CO., CAL.**—The Holtville School Trustees have awarded the \$43,000 bond issue to Wilson, Cramer & Co., brokers, of Denver.

The School Board has ordered bids called for the construction of the school building. The plans were prepared by Allison & Allison, Hibernia Bldg., Los Angeles.

**HAWTHORNE SCHOOL DISTRICT, LOS ANGELES CO., CAL.**—Bonds of \$10,000 have been voted here for the construction of a new school building. The plans for the building are now being prepared by Architect W. C. Pennell, Baker-Betwiler Bldg., Los Angeles.

**CHENEGA SCHOOL DISTRICT, LOS ANGELES CO., CAL.**—Bonds of \$35,000 have been voted here for the erection of a new school building.

The building, according to word received, will be of brick and concrete

construction, containing eight class rooms and a large auditorium. Mrs. Blanche Melty is chairman of the Board of School Trustees of the district.

**OWENSMOUTH UNION HIGH SCHOOL DISTRICT, LOS ANGELES CO., CAL.**—An election will be held in the Owensmouth Union High School District of Los Angeles County on December 1st for the purpose of voting bonds of \$100,000 for the purpose of raising money to build one or more high school buildings, furnishing, equipping, insuring, etc. Bonds will be in denomination of \$1,000 each, bearing 6 per cent interest per annum.

N. A. Gray, Mrs. J. Tweedy, John Haas, B. F. Failer and Frank Goodall are members of the High School Board of the Owensmouth District.

**SEATTLE, WASH.**—At a meeting of the School Board, the recommendation of Superintendent Cooper of the Board for the expenditure of \$500,000 in the construction of new school buildings and additions was considered at some length, and the matter was deferred for further consideration at the next meeting.

**SANTA ROSA, SONOMA CO., CAL.**—The bond issue held here for \$1,000,000 was defeated by a large majority. The proceeds were to be used in the construction of good roads through Sonoma County.

**RED BLUFF, TEHAMA CO., CAL.**—The City Trustees have ordered an election in the matter of bonding the city of Red Bluff in the sum of \$35,000 for the establishment of a municipal water system. The date for the election has been set for December 10th.

**STISUN, SOLANO CO., CAL.**—The Board of Supervisors has directed the County Treasurer to purchase additional State Highway bonds to the amount of \$100,000. The money will be spent in rebuilding a stretch of road between Fairfield and Cordelia, and another stretch between Vacaville and Batavia.

**SACRAMENTO, CAL.**—The Sacramento County Good Roads Association will call a meeting in the near future for the purpose of reorganizing the body. It is planned to conduct another campaign for a bond issue for good roads. The session today will probably be confined exclusively to reorganization. The association advocated a bond issue recently of \$2,425,000 for good roads for Sacramento.

**WARRENTON, ORE.**—At a special election held here bonds in the sum of \$30,000 were voted for the purpose of constructing a water system. The pipe line will extend from the Lewis and Clark River a distance of 16 miles.

**CORNING, TEHAMA CO., CAL.**—At a special meeting of the Corning Trustees a resolution was passed declaring their intention of adopting an ordinance calling for an election on the proposal to issue \$30,000 worth of bonds for the purpose of extending the water and sewer mains of the city.

Should the election be called and carry there will be nine miles of extensions.

BRIDGES AND DAMS.

OAKLAND, CAL. — Wharf repairs. Cost not stated. Engineer, City Engineer, Oakland. Owners, City of Oakland. Plans are complete for repairs to the deck of the Franklin street wharf and figures are now being taken. Bids will be opened by the City Council on November 19th. Plans and specifications can be secured from the office of the City Clerk, Frank M. Smith.

FRESNO, FRESNO CO., CAL. — Bridge, reinforced concrete, \$5,000. Engineer, City Engineer Bert Cronkhite, Fresno. Owners, City of Fresno. Plans are complete for a new bridge to be erected over Dry Creek at Van Ness avenue. Bids will be called for on approval of the plans and specifications by the City Council. At the next meeting of the Council the City Engineer will recommend that a similar bridge be constructed over Dry Creek at Coast avenue.

MODESTO, STANISLAUS CO., CAL. — Bridge, reinforced concrete. Cost not stated. Engineer, City Engineer, Modesto. Owners, City of Modesto. A suggestion has been made that a new bridge be constructed over Lateral No. 4 at the intersection of Laurel and Washington streets. The matter will be considered at the next meeting of the City Council. If a favorable decision is reached the City Engineer will at once prepare plans for this work.

COLUSA, COLUSA CO., CAL. — Bridge, trestle construction. Cost not stated. Engineer, County Surveyor, Colusa. Owners, Colusa County. Bids opened by the Supervisors for the construction of a trestle bridge over the Moulton break show the following bidders and their bids:

Albert O. Dokken .....	\$3,610.50
J. R. Schelmer .....	4,198.00
E. J. Sparling .....	5,342.00
Edward Tolson .....	3,680.00
J. M. Peart .....	3,685.00

The letting of the contract will be considered at the next meeting of the Board.

SAN JOSE, SANTA CLARA CO., CAL. — Bulkhead, reinforced concrete and earth. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. For the second time no bid was offered for constructing the earth and concrete bulkhead along Coyote Creek at 17th street. What action will be taken by the Board of Supervisors has not been decided. Probably the work will be carried out by Day Labor.

SEATTLE, WASH. — Draw bridge, timber construction, \$40,000. Engineer, City Engineer A. H. Dimock, Seattle. Owners, City of Seattle. Preliminary plans have been completed by City Engineer A. H. Dimock for the construction of a timber drawbridge over the Duwamish River at 8th avenue So., which will cost about \$20,000. The bridge will be 30 feet wide and about 200 feet long. Permission has been asked from the U. S. Government for the construction of this bridge and for the approval of the location.

RED BLUFF, TEHAMA CO., CAL. — Bridges, 8 reinforced concrete, \$24,723. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Contractor, C. E.

Cotton, S. F. Contract price, \$4,420. Other bidders were: Wm. Stephens, \$28,350; Chilo Construction Co., \$5,985; Walcott & Brunk, \$27,981; and E. W. Moller, \$25,500. McCartney & Haskell were given the contract for the construction of the Salt Creek bridge, east of Red Bluff. Their bid was \$2,671.

RICHMOND, CONTRA COSTA CO., CAL. — Bulkhead wharf, timber construction, \$60,000. Engineers, Hayland & Tibbets, Alaska Commercial Bldg., S. F. Owners, Ellis Landing Co. Contractors, Pacific Construction Co., 16 California street, S. F. Contract price, \$60,000.

HANFORD, KINGS CO., CAL. — Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Hanford. Owners, Kings County. The Board of Supervisors of Kings County is advertising for bids for the construction of a bridge across Cross Creek in accordance with plans and specifications which may be obtained from the County Surveyor.

SAN FRANCISCO — Dry dock construction, \$1,500,000. Engineers, Union Iron Works, S. F. Owners, Union Iron Works. San Francisco is now assured of the construction of the big dry dock by the signing of a contract between the Union Iron Works and the Navy Department. The Navy Department agrees to pay the Union Iron Works \$50,000 per year for six years. The dock will be the largest on the Pacific Coast, being 1000 feet long, 110 feet wide and 40 feet over the sills. Construction will be started at once and the dock completed within eighteen months or two years. The cost is estimated at \$1,500,000.

SALINAS, MONTEREY CO., CAL. — Jetty work, rock and concrete. Cost not stated. Engineer, County Surveyor Hare, Salinas. Owners, Monterey County. County Surveyor Hare's plans for jetty protection work at King City bridge have been adopted by the Supervisors. Bids on the work will soon be called for.

SEATTLE, WASH. — Dock, 2 story, frame and corrugated iron, \$75,000. Engineers, Webster & Ford, Lyon Bldg., Seattle. Owners, Grand Trunk Pacific Railroad Co. Plans and specifications will be complete and ready for figures in about six weeks for the construction of a two-story frame dock for the Grand Trunk Railway Company at the foot of Marion street. Construction throughout will be of corrugated metal and heavy timbers.

Contracts Awarded.

SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL. — Bridge, reinforced concrete, \$7,900. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. Contractor, Paul H. Ehlers, 5618 Harold avenue, L. A. Contract price, \$7,900. Other bids received for this work were as follows: Mercereau Bridge and Construction Co., \$10,085 and \$9,785; Gutleben Bros., \$10,465 and \$9,927; Boardman Construction Co., \$11,448 and \$11,228; S. M. Kerns, \$11,887.75 and \$11,223.75; Mesmer & Rice, \$12,742 and \$12,412.

MERCED, MERCED CO., CAL. — Bridges, 3, reinforced concrete, \$1,453.67. Engineer, County Surveyor, Merced. Owners, Merced County. Contractors, Thompson Bros., Fresno. Contract price, \$4,153.67.

MODESTO, STANISLAUS CO., CAL. — Bridges and spanon, reinforced concrete, \$4,953.34. Engineer, County Sur-

vivor, Modesto. Owners, Stanislaus County. Contractor, R. M. Simpson, Modesto. Contract price, \$4,953.34.

CHURCHES.

PINOLE, CONTRA COSTA CO., CAL. — Church alteration, frame. Cost not stated. Architect, John J. Foley, 16 Kearny street, S. F. Owners, St. Joseph's Church of Pinole. This work will consist of the addition of a new tower of galvanized iron and frame, some new interior finish and ornamental plaster. Bids will be called for as soon as working drawings can be completed.

HOLY CROSS CEMETERY, SAN MATEO CO., CAL. — Mausoleum, 1 story, reinforced concrete and granite, \$5,000. Architects, Fahre & Bearwald, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building will be designed in the classic style and will contain six receptacles. Interior will be finished in marble and tile. Ornamental bronze and iron will be used. Art glass windows are also to be specified. Exterior of the building will be faced with granite. Plans are nearly complete and figures will be called for shortly.

PORTLAND, ORE. — Church, 2 story and base. Class A construction. Cost not stated. Architect not selected. Owner, Archbishop Christie, Portland. Archbishop Christie, acting for the Roman Catholic Church, has purchased a lot 260 feet on Laddington street and 249 on 49th street, in the Laurelhurst District of Portland. A new building will be erected on the site shortly. Further mention will be made of the work when an architect is selected.

Factories and Warehouses.

WHITTIER, LOS ANGELES CO., CAL. — Dairy buildings, 5, 1 story, reinforced concrete. Cost not stated. Architect, Charles E. Shattuck, Mason Bldg., L. A. Owner, A. V. Hardorf, Glendale. Contractor, Frank L. Spaulding, 1460 Dana street, L. A. Contract has been taken on a percentage basis and no amount is given.

SAN FRANCISCO — Shop building, 2 story and base, brick, \$14,250. Architect, City Department of Architecture, Temporary City Hall. Owners, City and County of San Francisco. Contractors, T. E. Davis & Son. Contract price, \$14,250.

FIRE HOUSES AND JAILS.

RICHMOND, CONTRA COSTA CO., CAL. — Fire house, 1 story, brick, \$2,500. Architect, James T. Narbett, Richmond. Owners, City of Richmond. Plans have been completed for the new fire station to be erected at the corner of Barrett and 19th streets. Bids will be called for on approval of the plans and specifications. The building will contain quarters for one engine company. Interior will be finished in pine throughout. There will be a hot water system and modern plumbing. Exterior will be faced with pressed brick. Plans are complete.

FLATS.

SAN FRANCISCO — Flats, 2 story and base, frame, \$100. Architects, Fahre Knoll, Haist Bldg., S. F. Owners,

**El Manuel Evangelical Association.** The building will be erected on 19th street near Capp on property adjoining the new church building, and will be used as a parish house. Each flat will contain seven rooms and bath. Interiors will be finished in pine, redwood and elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places in each living room. Mantels will be of tile or brick. Tile wainscot will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are being taken.

**SAN FRANCISCO—Flats.** 2 story and base, frame, \$5,000. Architect, Joseph M. Gorry, 2581 Post street, S. F. Owner, Miss Delia K. Farrell. The building will be erected on the east side of Sanchez street north of 25th, having a frontage of 25 feet and a depth of 57 feet. There will be two modern flats of six and seven rooms. Interiors will be finished in pine and redwood with some hardwood veneer. Hardwood floors will be used in the principal rooms and in the reception halls. Bath rooms will have tile wainscot and composition floors. There will be open fire places and tile mantels. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the direction of the architect. Materials are now being purchased.

**SAN FRANCISCO—Flats.** 2 story and base, frame, \$3,500. Architect, none. Owner, A. V. Anderson, 1608 10th avenue, S. F. The building has been designed to contain two flats of six rooms each and will be erected at the southeast corner of Lawton and 10th avenues, covering a ground area of 25 by 42 feet. Interior finish will be largely of pine with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. Tile wainscot and composition floors will be used in the bath rooms. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO—Flats.** 2 story and base, frame, \$4,000. Architect, none. Owner, G. Lindner, 1629 26th street, S. F. The building will be erected on the south side of 26th street west of Sanchez, having a frontage of 25 feet and a depth of 55 feet. There will be four small apartments of four rooms each. Interiors will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living and dining rooms. Wall beds will be used. There will be open fire places and tile mantels. Bath rooms will be finished in tile and will have composition floors. Entrance will have marble wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**OAKLAND, CAL.—Flats.** 2 story and base, frame, \$7,000. Architect, E. D. Voorhees, Central Bank Bldg., Oakland. Owner's name withheld. The building will be erected at the corner

of 41st and Montgomery streets and has been designed to contain four modern flats of four rooms and bath each. Interiors will be handsomely finished in pine, redwood and hardwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Automatic water heaters will be installed. Bath rooms will be finished in tile with composition floors. Wall beds will be used. Exterior of the building will be covered with cement plaster on metal lath. Plans also provide for steam heat with an oil burning furnace. Plans are complete and figures are being taken.

S. Berger, St. Paul, Minn., \$17,000; Turtle Mountain, N. D., \$17,000; Shear & Gernschi, Reno, Nev., \$5,000; Carson, Nev., \$10,000; San Xavier, Ariz., \$10,000; Phoenix, Ariz., \$5,000; Pima, Ariz., \$10,000; Selman Construction Co., Carson, Nev., \$13,400; Carson, Nev., \$10,000; Lovell, Minneapolis, Minn., \$10,000; for all six buildings.  
N. Bruce, San Francisco, Cal., \$15,000; Carson, Nev., \$10,000; Shaw, El Paso, Tex., \$20,000; Pima, \$21,182.00; San Xavier, \$67.39; Mesalero, N. Mex., \$10,000; Shulind, Alexander, Minn., \$14,000; Turtle Mountain, N. D., \$14,219,000; Sisseton, Mont., \$10,000.

**San Francisco—Wharf repairs exhibit pavilion.** Cost not stated. Hect, Constructing Quartermaster, Fort Mason, Owners, United States Government. Bids are now being taken for repairs to the Fort Mason wharf, consisting of fender piles, chafing strips. Plans at the office of the Constructing Quartermaster, Fort Mason, Owners, United States Government. Bids will be called for constructing a pavilion for the United States Military Academy to be erected in the Liberal Arts Building of the Panama-Pacific Exposition. Bids will be figured from the office of the Constructing Quartermaster at Fort Mason.

**CLUBS AND SOCIETY BUILDINGS.**

**Oakland, Cal.**—City Hall lighting fixtures, \$24,700. Architects, Palmer & Abbot, New York, J. J. Donovan, Consulting Architect, Oakland. Owners, City of Oakland. Bids for the final lighting fixtures for the city hall, Rotunda, Council Chambers, and Mayor's Chambers were received by

the City Council. The contract had been tendered by H. S. Titus, San Francisco, the other bids, \$4,700. There were four other bidders as follows: Thomas Day Co., \$4,700; Tiffany Studio, \$1,700; Maxwell H. Ware Co., \$25,000; and the Electric Light Co., \$39,262. The bids were referred to the legal department of public works.

**FRESNO, CAL.**—Fresno Co., Cal., hall and stores, 1 story and base. Construction, \$30,000. Architect, Swartz, Hotchkiss & Swartz, Fresno Bldg., Fresno. Owner, E. M. Rice. The building will be erected at the corner of L and Tulare streets, covering an area of 75 by 115 feet. There will be several stories on the first floor while the entire second floor will be leased to the Fresno Lodge of Elks and will be fitted up for handsome lodge rooms, living apartments, social rooms and billiard hall. Interior finish will be of pine and hardwoods. Hardwood floors will be used. There will be steam heat and a hot water system. Patent stone fronts are specified. Exterior of the building will be faced with pressed brick. Plans are being completed and figures will be called for shortly. A contract for the excavating has already been let.

**HOSPITALS.**

**MARE ISLAND, CAL.**—Hospital pavilions, frame construction. Cost not stated. Architect, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. A complete list of the general figures and all alternate propositions for these buildings will be found under the heading of San Francisco in this issue.

**SPOKANE, WASH.**—Hospital, 1 and 2 story and base. Class A construction. Cost not stated. Architect, Archibald Riggs, Spokane, Owners, Spokane County. Plans for this building, which has been mentioned here before, have received the approval of the County Supervisors and the State Department of Public Health. The buildings have been designed for a Tuberculosis Hospital and will be located in the Spokane Valley. Bids will be called for shortly.

**HOTELS.**

**SAN FRANCISCO**—Hotel, 6 story and base. Class C construction, \$65,000. Architect, A. A. Cantin, Foxcroft Bldg., S. F. Owner, A. W. Maltby. The building will be erected on the south side of Ellis street east of Mason, and has been designed to contain in the neighborhood of 110 rooms, nearly all of which will have private baths. A large lobby and parlors will be a feature of the hotel. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. All bath rooms will have tile floors and wainscot. Interior finish will be of pine, redwood and hardwood veneer. Marble, tile and ornamental plaster will be used in the lobby. Exterior of the building will be faced with pressed brick and terra cotta. Plans are nearly complete and figures will be called for at once.

**BANNING, RIVERSIDE CO., CAL.**—Hotel and stores, 1 story and base. Brick, \$25,000. Architect, C. H. Russell, Story Bldg., Los Angeles. Charles Dreyer. The building will be erected

on Bannington avenue at the corner of Main street. The building will be 100 by 50 by 10 feet. There will be two stories, the lower floor will be divided into a dining room, kitchen and a private bath. A one story addition containing sleeping porch will also be constructed. Interior will be of pine throughout. Rooms will be finished in tile. Plans provide for steam heat and a hot water system. Patent stone fronts are specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**LOS ANGELES, CAL.**—Hotel and stores, 1 story and base. Class A construction. Cost not stated. Architect, John J. Effenfelder, Story Bldg., Los Angeles. Owner, H. O. Thompson. The building will be erected on the east side of 5th street near Los Angeles, and will have a frontage of 50 feet and a depth of 150 feet. There will be a complete steel frame, brick exterior walls, concrete floors and hollow tile interior partitions. There will be several stories on the ground floor besides the hotel lobby and office. Upper floors will contain a total of 212 rooms, a large percentage of which will have private baths. Interior trim will be of hardwood. Bath rooms will be finished in tile. Ornamental plaster, marble and tile will be used in the lobby. Plans provide for two passenger elevators, one freight elevator, steam heat, vacuum cleaning and a hot water supply. Exterior of the building will be faced with enameled brick. Plans will be complete and figures called for about December 1st.

**LIBRARIES.**

**VACAVILLE, SOLANO CO., CAL.**—Library, 1 story and base, reinforced concrete, \$10,000. Architect, L. M. Turton, Napa. Owners, Town of Vacaville. The building has been designed in the classic style and will contain one large reading room, stack room and office of the librarian. Interior will be finished in pine with maple floor in the reading room. A warm air system of heating will be installed. Metal book stacks are specified. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the Library Trustees who are now taking figures. Bids will be opened on December 1st. Plans and complete information can be secured from George H. Sharpe, Secretary, at Vacaville.

**Contracts Awarded.**

**SOUTH SAN FRANCISCO, SAN MATEO CO., CAL.**—Library, 1 story and base, brick, \$12,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Town of South San Francisco. Contractors, O'Rourke & Brady, S. F. Contract price, \$9,914. A complete list of the figures will be found under the heading of San Jose and the Santa Clara Valley in this issue.

**PANAMA-PACIFIC EXPOSITION WORK.**

**SAN FRANCISCO**—City of San Francisco, 1 story and base, brick, \$25,000. Architect, C. H. Russell, Story Bldg., Los Angeles. Charles Dreyer. The building will be erected on Bannington avenue at the corner of Main street. The building will be 100 by 50 by 10 feet. There will be two stories, the lower floor will be divided into a dining room, kitchen and a private bath. A one story addition containing sleeping porch will also be constructed. Interior will be of pine throughout. Rooms will be finished in tile. Plans provide for steam heat and a hot water system. Patent stone fronts are specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

17th for constructing additional boundary fence at the Exposition Grounds. Plans and specifications can be secured from the Director of Works. An official proposal appears in another column of this issue.

**SAN FRANCISCO**—Water front entrance. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are complete and figures are now being taken for construction of the Water Front Entrance to the Exposition Grounds. Bids will be opened by the Buildings and Grounds Committee on November 17th. Plans and specifications can be secured from the Director of Works. An official proposal appears in another column of this issue.

**SAN FRANCISCO**—Temporary boiler plant. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans and specifications are complete and figures are now being taken for furnishing and installing a temporary boiler plant at the Exposition Auditorium in the Civic Center. Plans and full particulars can be secured at the office of the Director of Works. Bids will be opened on November 24th. An official proposal appears in another column of this issue.

### POST OFFICES.

**SAN FRANCISCO**—Branch post office, 2 story. Class A construction. Cost not stated. Architect, State Architect, George B. McDougall, Sacramento. Owners, State of California. Plans for the general construction of the new Ferry Post Office have been completed and have received the approval of the State Board of Engineering and Postmaster Fay. Bids will be advertised for at once. Exterior of the building will be faced with cut stone. The date for opening the bids has not been set.

### RAILROAD CONSTRUCTION AND EQUIPMENT.

**CORONA, RIVERSIDE CO., CAL.**—Railroad construction. Cost not stated. Engineer, Engineering Department Pacific Electric Co., L. A. Owners, Pacific Electric Co. Actual work on the electric car line for the Pacific Electric Railway between Arlington and Corona has been started by Shearer & Co., contractors, of Los Angeles. There are eight miles of road to be built and it is expected to have the road completed by January, 1915.

**LOS ANGELES, CAL.**—Express depot, 1 and 2 story and base, brick and steel. Cost not stated. Architect, James H. Humphreys, Wells-Fargo Bldg., S. F. Owners, Wells-Fargo Express Co. The building will be erected at the corner of 3rd and Central avenue, covering an area of 100 by 200 feet. Construction will be partly of the Class A type and partly of the Class C. The one-story section of the building will house an automobile unloading platform. Interior finish will be of pine. Cement floors will be used. There will be steel roof trusses and metal window sash and frames. Steel rolling doors will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Baggage and express rooms, 1 story and base, frame,

\$15,000. Architect, Architectural Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. The building will be erected on the Third and Townsend street property of the company and will cover an area of 32½ by 288 feet. Construction will be of concrete frame and steel. Steel roof trusses will be used. Exterior of the building will be covered with cement plaster on metal lath. Roof will be of tar and gravel and clay tile. Plans are complete and the majority of the work will be done by Day Labor.

### RESIDENCES.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$35,000. Architect, G. A. Applegarth, Call Bldg., S. F. Owner, Mrs. M. R. Sudden. The dwelling will be erected in West Clay Park and has been designed for a fourteen-room house with several baths and sleeping porches. A garage will also be erected on the property. Interior finish in the dwelling will be of pine and hardwoods with white enamel in the bed chambers. Hardwood floors will be used throughout. There will be a central heating system, probably hot water, open fire places and a vacuum cleaning system. Bath rooms will be finished in tile and equipped with showers. Mantels will be of tile. Exterior of the dwelling and garage will be covered with cement plaster on metal lath. Plans are now being prepared and figures will be called for shortly. Further mention will be made of the work.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$7,000. Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owner's name withheld. The dwelling will be erected in West Clay Park and has been designed for an eight-room house with two baths. Interior will be finished in pine and redwood with some hardwood panels. Hardwood floors will be used in the living room, dining room, library and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot will be used in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Bids have been opened and show six remarkably close figures, which have been taken under advisement.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, A. R. Lapham, 511 12th avenue, S. F. The dwelling, which has been designed for a seven-room house, will be erected on the east side of 12th avenue near Balboa street. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and tile mantels. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residence, 1½ story and base, frame, \$2,500. Architect, O. R. Thayer, 20 Montgomery street, S. F. Owner, Mr. Benk. The

house will be erected at 4321 26th street and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood throughout. Hardwood floors will be used in the living room and dining room. There will be a large open fire place and tile mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Considerable built-in furniture will be called for. Exterior of the house will be covered with rustic and shingles. Plans are complete and figures are now being taken.

**SAN FRANCISCO**—Residences, 4, 1½ story and base, frame, \$2,000 each. Architect, none. Owners, MacArthur Bros., 1560 Fell street, S. F. These houses will be erected at the southwest corner of Milton and Bosworth streets and each has been designed to contain five rooms and bath. Interiors will be finished in pine and redwood. Some oak floors will be used. Each living room will have a large open fire place with either a tile or brick mantel. Bath rooms will have tile wainscot and composition floors. Exteriors will be covered with rustic shingles and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 1 story and base, concrete block. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, C. J. Boise. The dwelling will be erected in Cragmont and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the dining room and living room. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will have tile wainscot. Exterior of the house will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$20,000. Architect, Albert Caldwell, 2 West 47th street, New York. Owners, Ada M. Ayers and Florence Pearson. The dwelling has been designed for a double residence and will be erected on Bellevue and Allita avenues. Each dwelling will contain eight rooms and baths. Interiors will be finished in pine, redwood and hardwoods with some white enamel. Hardwood floors will be used in the principal rooms. There will be a central heating system and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile with composition floors and showers. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who are taking figures on the work.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, W. H. Sellander. The dwelling will be erected in the Claremont District and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine, redwood, white enamel and hardwoods. There will be hardwood floors in the living room, dining room and reception hall. Plan

vide for furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

**OAKLAND, CAL.**—Residence, 1 1/2 story and base, frame, \$3,000. Architect, none. Owner, A. S. Holmes, Dail Bldg., Oakland. The dwelling will be erected on Haddon Road north of 101st avenue and has been designed as a seven-room house with bath and sleeping porch. Interior finish will be pine and redwood with some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**MILL VALLEY, MARIN CO., CAL.**—Residence, 1 1/2 story and base, frame, \$500. Architects, Falch & Knoll, 1st Bldg., S. F. Owner, W. R. Mann. The dwelling has been designed to contain five rooms, bath and sleeping porch. Interior will be finished in pine and redwood throughout. Hardwood floors will be used in the living room and dining room. There will be large open fire place with brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic cement plaster. Plans are complete and figures are being taken.

**BURLINGAME, SAN MATEO CO., CAL.**—Garden work, concrete, \$10,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owner, Mr. Newhall. The work will consist of constructing formal gardens and a large concrete fountain. Plans are complete and the work will be done by Day Labor. Materials are now being purchased under the direction of the architect.

**SAN FRANCISCO**—Residences, 2, 2 story and base, frame, \$4,500 each. Architect, Paul Demartini, 2123 Powell St., S. F. Owner, Mrs. McDonough. These two dwellings will be erected in the southeast corner of Union and Jones streets and each has been designed to contain seven rooms and bath. Interiors will be finished in pine and redwood with some hardwood panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Exteriors will be covered with cement plaster on metal lath. Plans are being prepared.

**SOUTH SAN FRANCISCO, SAN MATEO CO., CAL.**—Residence, 2 story and base, frame, \$3,500. Architect, Jay R. Angler, 450 Monadnock Bldg., S. F. Owner, W. H. Coffinberry. The dwelling has been designed to contain seven rooms and bath. Interior will be finished in pine and redwood with some hardwood panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantels will be of tile or brick. Tile wainscot will be used in the bath room.

There will be an automatic water heater installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and now out for figures.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$3,500. Architect, H. P. Smith, 1000 Rialto Bldg., Oakland. Owner, R. B. Patterson, 2187 Shattuck Avenue, Berkeley. The dwelling will be erected on Bellevue Avenue and has been designed for an eight-room house. Interior will be finished in pine and redwood with some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

**OAKLAND, CAL.**—Residence, 1 1/2 story and base, frame, \$3,500. Architects, Elite Planners, 1811 5th Avenue, Oakland. Owner, Frank Hayward. The dwelling will be erected in Rockridge Park and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and redwood with some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath rooms. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

### SEWERS, STREET WORK & WATER SYSTEMS.

**SAN FRANCISCO**—Street sweeping. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids are now being taken by the Buildings and Grounds Committee of the Exposition Co. for sweeping and cleaning streets in the Exposition Grounds. Bids will be opened on November 19th. Full particulars can be secured from the office of the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

**SAN FRANCISCO**—City work. Cost not stated. Architect, City Department of Architecture, Temporary City Hall. Owners, City and County of San Francisco. At the present time the City Department of Architecture of the Board of Public Works has much work underway. The following jobs are worthy of mention. Plans and specifications for the electrical work on the new City and County Jail building are now being checked by the Department and will be ready for figures at an early date. Plans and specifications for the general interior work on the Polytechnic School have been completed and figures will be taken after the Bureau receive instructions from the Board of Education regarding several changes and additions. Plans and specifications for the Civic Center Power House have been completed and figures will be called for shortly. Drawings for the electrical work and water system in the Civic Center Public Square are 75 per cent complete. Drawings for the Ambulance Cow Barn have been completed and have been forwarded to the Superintendent of

San Francisco. Plans and specifications for stand pipe water supply system for the City and County Jail building are 75 per cent complete and drawings for the same are being prepared. The following system drawings on the Jail building have been started. Part of the detail work is now being prepared and the work will be completed in the following buildings: Washington Irving and Polytechnic High Schools, City Center, Public Library and the County Jail building. Drawings for the Civic Center Power House underground system are 75 per cent complete and will be checked for completion.

**SAN FRANCISCO**—Power plant equipment. Cost not stated. Engineer, City Engineer, Temporary City Hall. S. F. Owners, City and County of San Francisco. Bids opened by the Board of Public Works for furnishing and installing the power plant equipment for the Municipal Power Plant to be erected in the Civic Center show P. P. Walsh low on both propositions as follows: Prop. No. 1, \$11,311, and Prop. No. 2, \$11,880. Contract will probably be awarded this month. A complete list of the bids for this work will be found under the heading of San Francisco in this issue.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Road and street work. Cost not stated. Engineer, County Surveyor Neuman, Redwood City. Owners, San Mateo County. At the regular meeting of the Board of Supervisors of San Mateo County, County Surveyor Neuman presented a map and specifications for grading and macadamizing the new portion of the road leading from Menlo Park to Portola. Same were accepted on motion and the Clerk was directed to publish a notice calling for bids on the work. The Surveyor presented a map and specifications for building what is known as the Moyu road at Lobitos in the Fourth township, which were adopted. The Surveyor presented a map and specifications for the construction of Kelly Avenue in Halfmoon Bay, which were adopted. The Clerk being instructed to advertise for bids.

**RED BLUFF, TEHAMA CO., CAL.**—Road improvement, \$19,000. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Resolutions have been passed by the Supervisors ordering the Red Bluff-Susanville and Red Bluff-Harrison Gulch roads improved. The improvements will cost approximately \$19,000 and bids will be called immediately, which will insure an early start toward their completion.

**TULARE, TULARE CO., CAL.**—Electroliers. Cost not stated. Engineer, City Engineer, Tulare. Owners, City of Tulare. Plans for an elaborate system of electroliers have been presented to the City Council by a committee from the Merchants Association and the City Attorney was instructed to draw up a contract for the system for carrying out the same. The proposal for the system was \$100,000 and the City Council has ordered the City Attorney to draw up a contract for the same.

**ACACOSTO, STANISLAUS CO., CAL.**—Drainage ditch, 10 miles long. Cost not stated. Engineer, Stanislaus County Engineer, Acacosto. Owners, Stanislaus County. Plans for a drainage ditch 10 miles long, from Acacosto to the Stanislaus River, have been completed and figures will be taken after the Bureau receive instructions from the Board of Supervisors regarding several changes and additions. Plans and specifications for the general interior work on the Polytechnic School have been completed and figures will be taken after the Bureau receive instructions from the Board of Education regarding several changes and additions.

connect with the district main drainage canal at Carver road.

**HOLTVILLE, IMPERIAL CO., CAL.**—Sewer work. Cost not stated. Engineer, City Engineer, Holtville. Owners, City of Holtville. The Trustees have passed resolutions ordering that bids be called on Tuesday, November 24th, for the construction of both the sewer outfall system and the Vrooman Tract sewer work.

**SAN RAFAEL, MARIN CO., CAL.**—Road work widening, etc. Cost not stated. Engineer, County Surveyor, San Rafael. Owners, Marin County. The Board of Supervisors has ordered the County Engineer to prepare plans and specifications for widening the county road between Lagunitas bridge and the Tocaloma bridge and to make a report at the next meeting. The County Engineer was also given instructions by the Board to prepare plans and specifications for the cost of rebuilding the county road across the marsh from the bottom of the hill at Chicken Point to the McNear brickyard.

**FAIRFIELD, SOLANO CO., CAL.**—Road fencing. Cost not stated. Engineer, County Surveyor, Fairfield. Owners, Solano County. Plans are complete and figures are now being taken for constructing 3,500 rods of fence along the new State Highway in Solano County. Bids will be opened on December 7th. Plans and specifications can be secured from the County Surveyor.

**VALLEJO, SOLANO CO., CAL.**—Incinerator, reinforced concrete. Cost not stated. Engineer, City Engineer, Vallejo. Owners, City of Vallejo. A resolution has been adopted by the City Council authorizing the City Clerk to call for bids on the construction of the incinerator plant to be erected here. The construction will be of brick or concrete. The plant is to be a complete garbage and refuse incinerator with all equipment, containing furnaces, building and driveways or approaches from the surface grade to the dumping floor. Bids will be opened between 10 and 11 o'clock Wednesday morning, November 25th.

#### Contracts Awarded.

**FRESNO, FRESNO CO., CAL.**—Road work, \$4,700. Engineer, County Surveyor, Fresno. Owners, Fresno County. Contractor, C. M. Baker, Fresno. Contract price, \$4,700.

**RICHMOND, CONTRA COSTA CO., CAL.**—Sewer work, \$71,536.20. Engineer, City Engineer, Richmond. Owners, City of Richmond. Contractors, Chambers & Heafy, Richmond and San Francisco. Contract price, \$71,536.20.

#### SCHOOLS.

**BERKELEY, ALAMEDA CO., CAL.**—University buildings. Class A construction, \$1,800,000. Architect, John Galen Howard, 601 Mission street, S. F. Owners, University of California. Work will be commenced upon the new buildings soon after the beginning of the new year, and within three years the campus will be the pride of every Californian. The unsightly recreation building known as North Hall, which has been in use for nearly half a century, will have been torn away and replaced by a new granite and steel structure in conformity with the general architectural plan. The par-

tially finished Doe Library will be built up according to the original plans. The needs of the Department of Agriculture will be cared for through the construction of one and possibly two more granite buildings in the "Agricultural group," where hereafter all of the branches of this department will be housed, instead of occupying cramped quarters in attics and made-over horse-sheds, as at present. Facilities for an almost endless extension of the correspondence courses in Agriculture, which are now reaching tens of thousands of people, will be provided in the new buildings. It is planned to make this bureau one of the most thorough and valuable adjuncts of the Greater University. Finally, there is to be erected one wing of what will eventually be a great Chemistry building, where every facility for instruction in this science will be provided. When these improvements are completed, California may justly lay claim to proprietorship of one of the greatest universities in America, not only in size and numbers but in beauty and service.

**RICHMOND, CONTRA COSTA CO., CAL.**—School, 2 story and base, brick, \$50,000. Architects, Stone & Wright, Stockton. Owners, Richmond Board of Education. The Richmond Board of Education has called in plans for the new two story and basement brick school, designed by Architects, Stone & Wright. The Board decided upon certain minor changes in the plans. The building is estimated to cost \$50,000.

**HUGHSON, STANISLAUS CO., CAL.**—School auditorium, 1 story and base, frame. Cost not stated. Architect, none. Owners, Hughson School District. Plans and specifications for a large frame auditorium have been completed and figures for the construction are now being taken. Basement of the building will be arranged for dressing rooms and showers for the gymnasium. Interior finish will be of pine and redwood. Special plumbing fixtures will be installed. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of F. C. Nickle, Clerk of the School Board at Hughson. Bids will be opened on November 20th.

**HOLTVILLE, IMPERIAL CO., CAL.**—School, 2 story and base, hollow tile. Cost not stated. Architects, Allison & Allison, Hibbard Bldg., L. A. Owners, Holtville Grammar School District. The building will contain twelve class rooms, principal's office and lavatories. Interior will be finished in pine with maple floors in the class rooms. There will be a central heating system, modern school plumbing and a system of ventilating and vacuum cleaning. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Bids will be opened on December 3rd. Plans and specifications can be secured from the architects.

**WHITTIER, LOS ANGELES CO., CAL.**—School, 1 story and base, hollow tile, \$25,000. Architects, Tuttle & Angel, Delta Bldg., L. A. Owners, Whittier School District. The building will be designed to contain six class rooms, principal's office and an assembly hall. Interior will be finished in pine. Maple floors will be used in the class rooms. There will be steam heat and a modern system of

ventilation. Exterior of the building will be covered with cement plaster. Plans are now being prepared. Figures will not be taken until bonds have been voted. Further mention will be made of the work.

**SEATTLE, WASH. —** University buildings. Class A construction, \$300,000. Architect not selected. Owners, University of Washington. The Regents of the University of Washington have determined to petition the State Legislature, which meets in January, for an appropriation of \$300,000 to cover the cost of constructing two new buildings in this city. The buildings proposed are a woman's building, costing \$150,000, and a new building to replace the several buildings now being used as recitation halls. This is estimated to cost about \$100,000. An additional \$50,000 will be used in miscellaneous building repairs. Herbert T. Condon, Bursar, has heretofore handled the architectural work of the university buildings.

**WINTERS, YOLO CO., CAL.**—School, 1 and 2 story and base, brick and concrete, \$50,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Winters Union High School District. The building will cover a considerable ground area, and has been designed to contain eight class rooms, an assembly hall, principal's office and departments for manual training and domestic science. Interior will be finished in pine with maple floors in the class rooms. Plans provide for steam heat, an oil burning system, vacuum cleaning and program clocks. Slate blackboards will be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

#### Contracts Awarded.

**SAN BERNARDINO, SAN BERNARDINO CO., CAL.**—School group, brick and hollow tile construction, \$240,000. Architect, Norman F. Marsh, 212 Broadway, L. A. Owners, Polytechnic High School District. Contractors, Cresmer Mfg. Co., Riverside, general construction of science, classics and home economics buildings at \$2,991. Subcontracts on above: Electric wiring to F. O. Engstrom Co., L. A., \$6,727.90. Painting administration building to Ben Mazy, at \$1,348. Painting on science building to G. C. Hewitt at \$1,123. Painting on classics, home economics and mechanics buildings to Wormell & Drabbaugh, Pasadena, at \$3,962. Plumbing on home economics to Conroy & Winterbottom, Alhambra, at \$3,320, and all other buildings to Munger & Munzer, Pasadena, at \$17,321. Action on the program clocks, heating and ventilating have been deferred.

**PORTLAND, ORE.**—School, 2 and 3 story and base. Class A construction, \$60,000. Architect's name not given. Owners, City of Portland. Contractors, Olson & Johnson, Missoula, Mont., general construction, \$111,485; Alaska Plumbing Co., 123 Belmont street, Portland, heating, \$22,858, and Sturges & Sturges, 472½ Hawthorne street, Portland, plumbing, \$10,542.

**ATHENA, ORE.**—School, 2 story and base, brick, \$25,600. Architects, Tourrette & Hummel, Rothchild Bldg., Portland. Owners, Athena School District. Contractors, Zeph Bros., La Grande, general construction, at \$22,000; H. H. Sunderland, Walla Walla, W. B., plumbing, at \$1,135, and J. C.

WILLIAM H. CROOKER,  
Chairman.

details are now being prepared as the work progresses on the following buildings: Washington, Irving and Polytechnic High Schools, Civic Center Public Square and the County Jail Building. Drawings for the Civic Center Power House underground system are 90 per cent complete and will be rushed to completion.

**APARTMENT HOUSE**—3 story and base, frame, \$25,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owners, Menor Bros. The building will be erected at the southwest corner of Laguna and California streets and has been designed to contain six apartments of five rooms each. Interiors will be handsomely finished in pine and hardwoods. Each apartment will have two baths, two toilets and wall beds. Hardwood floors will be used in the principal rooms. There will be steam heat, a hot water supply, elevator service and a vacuum cleaning system. Both rooms will be finished in tile. Entrance will have tile wainscot and marble steps. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and segregated figures will be called for shortly.

**APARTMENT HOUSE**—3 story and base, frame, \$17,000. San Francisco. Architect, O. E. Evans, 2367 Mission street, S. F. Owner, C. A. Honaas. The building will be erected on the east side of Gough street south of Green, and has been designed to contain six apartments of three and four rooms. Interiors will be finished in pine throughout. There will be wall beds and private baths. Some hardwood floors will be used. Bath rooms will have tile wainscot and composition floors. Steam heat, with an automatic electric control will be installed. Tile and marble will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath and brick veneer. Plans are complete and figures will be called for at once.

**RESIDENCE**—2 story and base, frame, \$75,000. San Francisco. Architect, G. A. Applegarth, Call Bldg., S. F. Owner, Mrs. M. R. Sudden. The dwelling will be erected in West Clay Park and has been designed for a fourteen-room house with several baths and sleeping porches. A 2 acre will also be erected on the property. Interior finish in the dwelling will be of pine and hardwoods with white enamel in the bed chambers. Hardwood floors will be used throughout. There will be a central heating system, probably hot water, open fire places and a vacuum cleaning system. Bath rooms will be finished in tile and equipped with showers. Mantels will be of tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared and figures will be called for shortly. Further mention will be made in this column.

**RESIDENCE**—2 story and base, frame, \$8,000. San Francisco. Archi-

tect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owner's name withheld. The dwelling will be erected in West Clay Park and has been designed for an eight-room house with two baths. Interior will be finished in pine and redwood with some hardwood panels. Hardwood floors will be used in the living room, dining room, library and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot will be used in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Bids have been opened and show six remarkably close figures, which have been taken under advisement.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, A. R. Lapham, 511 12th avenue, S. F. The dwelling, which has been designed for a seven-room house, will be erected on the east side of 12th avenue near Balboa street. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and tile mantels. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—1½ story and base, frame, \$3,500. San Francisco. Architect, O. R. Thayer, 20 Montgomery street, S. F. Owner, Mr. Benk. The house will be erected at 1321 26th street and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood throughout. Hardwood floors will be used in the living room and dining room. There will be a large open fire place and tile mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Considerable built-in furniture will be called for. Exterior of the house will be covered with rustic and shingles. Plans are complete and figures are now being taken.

**RESIDENCES**—1, 1½ story and base, frame, \$2,000 each. San Francisco. Architect, none. Owners, MacArthur Bros., 1560 Fell street, S. F. These houses will be erected at the southwest corner of Milton and Rosworth streets, and each has been designed to contain five rooms and bath. Interiors will be finished in pine and redwood. Some oak floors will be used. Each living room will have a large open fire place with either a tile or oak mantel. Bath rooms will have tile wainscot and composition floors. Interiors will be covered with rustic, shingles and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**TEMPORARY BOILER PLANT**—Cost not stated. San Francisco. Engineer, Director of Works. Plans and specifications are complete and figures are now being taken for furnishing and installing a temporary boiler plant at the Exposition Auditorium in the Civic Center. Plans and full particulars can be secured at the office of the Director of Works. Bids will be opened on November 21st. An official proposal appears in another column of this issue.

**FLATS**—2 story and base, frame, \$7,500. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owners, El Manuel Evangelical Association. The building will be erected on 19th street near Capp on property adjoining the new church building and will be used as a parish house. Each flat will contain seven rooms and bath. Interiors will be finished in pine, redwood and elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places in each living room. Mantels will be of tile or brick. Tile wainscot will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are being taken.

**FLATS**—2 story and base, frame, \$5,000. San Francisco. Architect, Joseph M. Geary, 2581 Post street, S. F. Owner, Miss Delia K. Farrell. The building will be erected on the east side of Sanchez street north of 28th, having a frontage of 25 feet and a depth of 57 feet. There will be two modern flats of six and seven rooms. Interiors will be finished in pine and redwood with some hardwood veneer. Hardwood floors will be used in the principal rooms and in the reception halls. Bath rooms will have tile wainscot and composition floors. There will be open fire places and tile mantels. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the direction of the architect. Materials are now being purchased.

**FLATS**—2 story and base, frame, \$3,500. San Francisco. Architect, none. Owner, A. V. Anderson, 1608 10th avenue, S. F. The building has been designed to contain two flats of six rooms each and will be erected at the southeast corner of Lawton and 10th avenues, covering a ground area of 25 by 42 feet. Interior finish will be largely of pine with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. Tile wainscot and composition floors will be used in the bath rooms. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**FLATS**—2 story and base, frame, \$4,600. San Francisco. Architect, none. Owner, G. Lindner, 1029 26th street, S. F. The building will be erected on the north side of 26th street west of Sanchez, having a frontage of 25 feet and a depth of 55 feet. There will be four

small apartments of four rooms. Interiors will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living and dining rooms. Wainscot will be of tile and there will be open fire places and tile mantels. Bath rooms will be finished in tile and will have composition floors. Entrance will be finished in wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**WHARF REPAIRS AND ERECTION OF PAVILION**—Cost not stated. San Francisco. Architect, Constructing Quartermaster's office, Fort Mason. Owners, United States Government. Bids are now being taken for repairs to the Fort Mason wharf, consisting of tender piles and chading strips. Plans at the office of the Constructing Quartermaster, Fort Mason. Plans are nearly complete and figures will be called for shortly for constructing a pavilion to be erected in the Liberal Arts Building at the Panama Pacific Exposition. Work will be figured from the office of the Constructing Quartermaster at Fort Mason.

**HOTEL**—6 story and base, Class C construction, \$65,000. San Francisco. Architect, A. A. Cantin, Foxcroft Bldg., S. F. Owner, A. W. Maltby. The building will be erected on the south side of Ellis street east of Mason, and has been designed to contain in the neighborhood of 110 rooms, nearly all of which will have private bath. A large lobby and parlors will be features of the hotel. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. All bath rooms will have tile floors and wainscot. Interior finish will be of pine, redwood and hardwood veneer. Marble, tile and ornamental plaster will be used in the lobby. Exterior of the building will be faced with pressed brick and terra cotta. Plans are nearly complete and figures will be called for at once.

**RESIDENCES**—2, 2 story and base, frame, \$4,500 each. San Francisco. Architect, Paul Bernartini, 2123 Powell street, S. F. Owner, Mrs. McDonough. These two dwellings will be erected at the southeast corner of Union and Lyons streets and each has been designed to contain seven rooms and bath. Interiors will be finished in pine and redwood with some hardwood panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Exterior will be covered with cement plaster on metal lath. Plans are being prepared.

**RESIDENCE**—2 story and base, frame, \$3,000. South San Francisco. San Mateo Co. Cal. Architect, Ray R. Spangler, 150 Montgomery Bldg., S. F. Owner, Wm. H. Collinberry. The dwelling has been designed to contain seven rooms and bath. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room. There will be an automatic water heater installed. Exterior of the house will be covered with

cut and polished granite and now under construction. **POWER PLANT**—2 story and base, frame, San Francisco. Engineer, Constructing Quartermaster's office, Fort Mason. Owners, United States Government. Bids are now being taken for furnishing and installing a temporary power plant to be erected at the Civic Center. Bids will be opened on November 21st. An official proposal appears in another column of this issue. A complete list of bidders for this work will be found under the heading of San Francisco in this issue.

**FERRY DOCK CONSTRUCTION**—11, San Francisco. Engineers, Union Iron Works, S. F. Owners, Union Iron Works, San Francisco. Is now under way the construction of the big dry dock by the signing of a contract between the Union Iron Works and the Navy Department. The Navy Department agrees to pay the Union Iron Works \$50,000 per year for six years. The dock will be the largest on the Pacific Coast, being 1000 feet long, 110 feet wide and 10 feet over the sills. Construction will be started at once and the dock completed within eighteen months or two years. The cost is estimated at over \$1,500,000.

**FERRY POST OFFICE**—2 story Class A construction. Cost not stated. San Francisco. Architect, State Architect, George R. McDonough, Sacramento. Owners, State of California. Plans for the general construction of the new Ferry Post Office have been completed and have received the approval of the State Board of Engineering and Postmaster Fay. Bids will be advertised for at once. Exterior of the building will be faced with cut stone. The date for opening the bids has not yet been set.

**BAGGAGE AND EXPRESS ROOM**—1 story and base, frame, \$15,000. San Francisco. Architect, Architectural Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. The building will be erected on the Third and Townsend street property of the company and will cover an area of 32½ by 285 feet. Construction will be of concrete frame and steel. Interior will be finished in pine. There will be a cement floor. Steel roof trusses will be used. Exterior of the building will be covered with cement plaster on metal lath. Roof will be of tar and gravel and clay tile. Plans are complete and the majority of the work will be done by Day Labor.

**Contracts Awarded.**

**APARTMENT HOUSE**—2 story and base, frame, \$30,000. San Francisco. Architects, Falch & Knoll, Hearst Bldg. S. F. Owner, Miss Dolores Geonza. Contractor, James Hjal, Mills Bldg., S. F. Contract price, \$29,000. Note. The contractor is now taking sub-contracts on this work.

**SHOP BUILDING**—2 story and base, brick, \$14,250. San Francisco. Architect, City Department of Architecture, Temporary City Hall. Owners, City and County of San Francisco. Contractors, T. E. Davis & Son, S. F. Contract price, \$14,000.

**GARY**—2 story and base, brick, \$10,000. South San Francisco. San Mateo Co. Cal. Architect, W. H. Works, 1 Post Street, San Francisco. Town of South San Francisco. Contractors,

W. R. BRODE, Pres. LOUIS R. HOLM, Sec. R. J. BRODE, Vice-Pres.

**BRODE IRON WORKS**Established 1886—Incorporated 1913  
Tel. Kearny 2464.

Fabricators and Contractors of Structural Steel and Ornamental Iron Work

Office &amp; Works: 31-37 Hawthorne St., bet. Howard &amp; Folsom Sts., San Francisco, Cal.

O'Rourke & Brady, San Francisco. Contract price, \$9,911. A complete list of these figures will be found under the heading of San Jose and the Santa Clara Valley in this issue.

**STORES**—1 story. Class C construction, \$12,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Borgfelt and Propie. The building will be erected on East street between Market and Mission, covering an area of 80 by 91 feet. There will be four stores. Interior finish will be of pine. Patent fronts are specified. There will be marble bases. Exterior will be faced with pressed brick. Plans are complete and figures are being taken by the owners.

**Undertaking Establishment**—1 story and base, frame, \$10,000. San Francisco. Architect, Carl Geiffuss, 46 Kearny street, S. F. Owners, Charles Warren Welsh Estate. Contractor, S. B. Kress, 2039 Market street, S. F. Contract price, \$10,000.

**THEATRE**—1 story and base. Class A construction, \$50,000. San Francisco. Architects, Reid Bros., California-Pacific Bldg., S. F. Owners, J. Spargo et al. Contractor, J. R. Hanify, 24 Market street, S. F. Contract price, \$5,000.

## Work To Start At Once On Dry Dock.

Contract Between Navy Department and Union Iron Works Signed and Giant Dock to be Ready in Two Years.

A contract has been signed by the Navy Department and the Union Iron Works which assures the early construction of the giant dry dock in San Francisco at a cost of \$1,500,000.

The government agrees to furnish the Union Iron Works with repair work for the big dock at the rate of \$50,000 per year for a period of six years. The dock will be 1900 feet long, 110 feet wide and 40 feet over the sills, which dimensions will allow the docking of the largest ships including battleships.

The Union Iron Works state that actual construction will be started at once and the dock completed and ready for use within eighteen months or two years.

## Bids For Residence In West Clay Park.

Figures From Plans of Architect John Davis Hatch Run Close For Handsome Residence.

Architect John Davis Hatch, Humboldt Bank Bldg., has recently opened bids for the construction of a two-story frame and cement dwelling to be erected in West Clay Park. The tabu-

lated bids as opened in the presence of the owner, architect and contractor were as follows:

Ed. Zinkand & Son.....	\$7010
Robt. Glaze .....	7257
Finn Anderson .....	7490
W. A. and C. C. Terrell.....	7650
Collman & Collman.....	7682
Joel Johnson .....	7711

The plans and specifications call for a completed house, including all items except finishing hardware, lighting fixtures and shades. It is to be noted that in spite of the possibilities of widely varying sub-contract bids, the difference between the high and low bids on six independent figures is only \$670, which speaks well for the careful figuring of the competing contractors and for the accuracy and clearness of the architect's plans and specifications. Readers of the "Builder" will perhaps remember that last month bids on another and larger building were opened by Architect Hatch, showing the same noticeable uniformity. The owner has the bids under advisement.

## South City Library Bids Are Opened.

Seven Figures Received For Construction of Building Designed By W. H. Weeks, and Contract Awarded.

**SOUTH SAN FRANCISCO**—Bids were opened Monday evening by the Board of Library Trustees for the construction of a one-story brick building designed by Architect W. H. Weeks, 75 Post Street, San Francisco. O'Rourke & Brady of San Francisco submitted the lowest figures for the general contract at \$9,914 and were awarded the contract. The grading of the lot will be re-advertised. Following is a complete list of the bids as opened:

### South San Francisco Library.

Jones & Brunner.....	\$10,841
John J. Leonard.....	11,274
Carnahan & Mulford.....	11,903
O'Rourke & Brady.....	9,914
Collman & Collman.....	11,722
Charles M. Lindsay.....	10,346
Lewis Cereghino & Son.....	12,000

## City Bids Opened.

### OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—2 story and  
base, frame, \$25,000. Oakland, Cal.  
Architect, F. D. Voorhees, Central  
Bank Bldg., Oakland. Owner's name  
withheld. The building will be erect-  
ed at the corner of 41st and Mont-  
gomery streets, and will cover a large  
ground area. Plans provide for a total  
of sixteen suites arranged in two and  
three room apartments. Interior fin-  
ish will be largely of pine and red-  
wood with some elm panels. Hard-  
wood floors will be used in the living  
and dining rooms. There will be steam  
heat and a hot water supply. All  
apartments will have wall beds and  
private bath rooms. Entrance will be  
finished in tile and marble. Bath rooms  
will have tile wainscot and composi-  
tion floors. Exterior of the building  
will be covered with cement plaster on  
metal lath. Plans are complete and  
figures are now being taken by the  
architect.

BANK ALTERATION—1 story and  
base. Class C, \$10,000. Berkeley, Alame-  
da Co., Cal. Architect, W. H. Rat-  
cliff, Jr., First National Bank Bldg.,  
Berkeley. This work will consist of  
the installation of two new bank  
vaults, new interior finish, plastering,  
marble work, electric wiring, plumb-  
ing and lighting fixtures. Complete  
new bank fixtures will also be in-  
stalled. Little or no exterior work is  
required. Plans are complete and fig-  
ures are now being taken.

WHARF REPAIRS—Cost not stated.  
Oakland, Cal. Engineer, City Engi-  
neer, Oakland. Owners, City of Oak-  
land. Plans are complete for repairs  
to the deck of the Franklin street  
wharf and figures are now being  
taken. Bids will be opened by the  
City Council on November 19th. Plans  
and specifications can be secured from  
the office of the City Clerk, Frank M.  
Smith.

RESIDENCE—1 story and base, con-  
crete block. Cost not stated. Berke-  
ley, Alameda Co., Cal. Architect, John  
Hudson Thomas, First National Bank  
Bldg., Berkeley. Owner, C. J. Boise.  
The dwelling will be erected in Crag-  
mont and has been designed to contain  
six rooms and bath. Interior will be  
finished in pine and redwood. Hard-  
wood floors will be used in the dining  
room and living room. There will be  
lumace heat and open fire places.  
Mantels will be of tile or brick. An  
automatic water heater will be in-  
stalled. Bath room will have tile  
wainscot. Exterior of the house will  
be faced with cement plaster. Plans  
are nearly complete and figures will  
be called for shortly.

RESIDENCE—2 story and base,  
frame, \$20,000. Oakland, Cal. Archi-  
tect, Albert Caldwell, 2 West 15th  
street, New York. Owners, Ada M.  
Ayers and Florence Pearson. The  
dwelling has been designed for a

## SAN JOSE AND THE SANTA CLARA VALLEY.

BULKHEAD — Reinforced concrete and earth. Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. For the second time no bid was offered for constructing the earth and concrete bulkhead along Coyote Creek at 17th street. What action will be taken by the Board of Supervisors has not been decided. Probably the work will be carried out by Day Labor.

GARDEN WORK—Concrete, \$10,000. Burlingame, San Mateo Co., Cal. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owner, Mr. Newhall. This work will consist of constructing formal gardens and a large concrete fountain. Plans are complete and the work will be done by Day Labor. Materials are now being purchased under the direction of the architect.

MAUSOLEUM—1 story, reinforced concrete and granite, \$5,000. Holy Cross Cemetery, San Mateo Co., Cal. Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building will be designed in the classic style and will contain six receptacles. Interior will be finished in marble and tile. Ornamental bronze and iron will be used. Art glass windows are also specified. Exterior of the building will be faced with granite. Plans are nearly complete and figures will be called for shortly.

ROAD WORK AND STREET WORK — Cost not stated. Redwood City, San Mateo Co., Cal. Engineer, County Surveyor Neuman, Redwood City. Own-ers, San Mateo County. At the regular meeting of the Board of Supervisors of San Mateo County County Surveyor Neuman presented a map and speci-fications for grading and macadamiz-ing the new portion of the road lead-ing from Menlo Park to Portola. Same were accepted on motion and the Clerk was directed to publish a notice call-ing for bids on the work. The Sur-veyor presented a map and specifi-cations for building what is known as the Allyn road at Lobitos in the Fourth township, which was adopted. The Surveyor presented a map and speci-fications for the construction of Kelly

P. A. Co. det. and in front brick school designed by Architects Stone & Wright. The Board decided upon certain minor changes in the plans. The building is estimated to cost \$50,000.

**INCINERATOR**—Reinforced concrete. Cost not stated. Vallejo, Solano Co., Cal. Engineer, City Engineer, Vallejo. Owners, City of Vallejo. A resolution has been adopted by the City Council authorized the City Clerk to call for bids on the construction of the incinerator plant to be erected here. The construction will be of brick and concrete. The plant is to be a complete garbage and refuse incinerator with all equipment, containing furnaces, building and driveways or approaches from the surface grade to the dumping floor. Bids will be opened between 10 and 11 o'clock Wednesday morning, November 25th.

**ROAD FENCING**—Cost not stated. Fairfield, Solano Co., Cal. Engineer, County Surveyor, Fairfield. Owners, Solano County. Plans are complete and figures are now being taken for constructing 3,500 rods of fence along the new State Highway in Solano County. Bids will be opened on December 7th. Plans and specifications can be secured from the County Surveyor.

**ROAD WORK WIDENING, ETC.**—Cost not stated. San Rafael, Marin Co., Cal. Engineer, County Surveyor, San Rafael. Owners, Marin County. The Board of Supervisors has ordered the County Engineer to prepare plans and specifications for widening the county road between Lagunitas bridge and the Tocaloma bridge and to make a report at the next meeting. The County Engineer was also given instructions by the Board to prepare plans and specifications for the cost of rebuilding the county road across the marsh from the bottom of the hill at Chicken Point to the McNear brickyard.

#### FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

**BRIDGE**—Reinforced concrete, \$5,000. Fresno, Fresno Co., Cal. Engineer, City Engineer Bert Cronkrite, Fresno. Owners, City of Fresno. Plans are complete for a new bridge to be erected over Dry Creek at Van Ness avenue. Bids will be called for on approval of the plans and specifications by the City Council. At the next meeting of the Council the City Engineer will recommend that a similar bridge be constructed over Dry Creek at Coast avenue.

**BRIDGE**—Reinforced concrete, Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, City Engineer, Modesto. Owners, City of Modesto. A suggestion has been made that a new bridge be constructed over Lateral No. 4 at the intersection of Laurel and Washington streets. The matter will be considered at the next meeting of the City Council. If a favorable decision is reached the City Engineer will at once prepare plans for this work.

**BRIDGE**—Reinforced concrete. Cost not stated. Hanford, Kings Co., Cal. Engineer, County Surveyor, Hanford. Owners, Kings County. The Board of Supervisors of Kings County is advertising for bids for the construction of a bridge across Cross Creek in accordance with plans and specifications which may be obtained from the County Surveyor.

**LODGE HALL AND STORES**—2 story and base. Class C construction, \$70,000. Fresno, Fresno Co., Cal. Architects, Swartz, Hotchkin & Swartz, Roswell Bldg., Fresno. Owner, F. M. Roessler. The building will be erected at the corner of L and Tulare streets, covering an area of 75 by 175 feet. There will be several stores on the first floor while the entire second floor has been leased to the Fresno Lodge of Elks and will be fitted up for handsome lodge rooms, living apartments, social rooms and billiard hall. Interior finish will be of pine and hardwoods. Hardwood floors will be used. There will be steam heat and a hot water system. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are being completed and figures will be called for shortly. A contract for the excavating has already been let.

**SCHOOL AUDITORIUM**—1 story and base, frame. Cost not stated. Hughson, Stanislaus Co., Cal. Architect, none. Owners, Hughson School District. Plans and specifications for a large frame auditorium have been completed and figures for the construction are now being taken. Basement of the building will be arranged for dressing rooms and showers for

the gymnasium. Interior finish will be of pine and redwood. Special plumbing fixtures will be installed. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of F. Nickle, Clerk of the School Board. Hughson. Bids will be opened on November 20th.

**ELECTROLIERS**—Cost not stated. Tulare, Tulare Co., Cal. Owners, City of Tulare. Plans for an elaborate system of electroliers have been sent to the City Council by a committee from the Merchants' Association, and the City Attorney was directed to draw up a resolution of intention for carrying them out. The plans call for 50 lights in the business section of the city and the laying about 9,000 feet of conduit.

**DRAINAGE DITCH**—Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Preliminary plans have been submitted by the Engineering Department of the Supervisors of Stanislaus County for the proposed Cavill drain ditch, which is to run from the Cavill ranch westward to connect with the district main drainage canal at Carver road.

**BRIDGES AND SYPHON**—Reinforced concrete, \$4,935.34. Modesto, Stanislaus Co., Cal. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Contractor, R. M. Simon, Modesto. Contract price, \$4,935.

**LIBRARY**—1 story and base, reinforced concrete, \$10,000. Vacaville, Solano Co., Cal. Architect, L. M. Tuton, Napa. Owners, Town of Vacaville. The building has been designed in the classic style and will contain one large reading room, stack room and office for the librarian. Interior will be finished in pine with maple floor in the reading room. A warm air system heating will be installed. Metal book stacks are specified. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the Library Trustees who are now taking figures. Bids will be opened on December 1st. Plans are complete information can be secured from George H. Sharpe, Secretary, Vacaville.

#### Contracts Awarded.

**ROAD WORK**—\$4,700. Fresno, Fresno Co., Cal. Engineer, County Surveyor, Fresno. Owners, Fresno County. Contractor, C. M. Baker, Fresno. Contract price, \$4,700.

**BRIDGES**—3, reinforced concrete, \$4,453.67. Merced, Merced Co., Cal. Engineer, County Surveyor, Merced. Owners, Merced County. Contractors, Thompson Bros., Fresno. Contract price, \$4,453.67.

The letting of the contract will be considered at the next meeting of the Board.

**ROAD IMPROVEMENT**—\$10,000. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Resolutions have been passed by the Supervisors ordering the Red Bluff-Susannah and Red Bluff-Harrison Gulch roads improved. The improvements will cost approximately \$10,000, and bids will be called immediately, which will insure an early start toward their completion.

**SCHOOL**—1 and 2 story and base, brick and concrete, \$50,000. Winters, Yolo Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Winters Union High School District. The building will cover a considerable ground area and has been designed to contain eight class rooms, an assembly hall, principal's office and departments for manual training and domestic science. Interior will be finished in pine with maple floors in the class rooms. Plans provide for steam heat, an oil burning system, vacuum cleaning and program clocks. Slate blackboards will be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

**Contracts Awarded.**

**BRIDGES**—8, reinforced concrete, \$24,723. Red Bluff, Tehama Co., Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Contractor, C. E. Cotton, S. F. Contract price, \$24,723. Other bidders were: Wm. Stephens, \$28,350; Chieo Construction Co., \$25,985; Walcott & Brunk, \$27,984; and R. W. Moller, \$25,500. McCarthy & Hassell were given the contract for the construction of the Salt Creek bridge, east of Red Bluff. Their bid was \$2,674.

**BUILDING CONTRACTS.

Contractor.....Siler Bros., 1100 P St., Sacramento. COST, \$1800

**LOS ANGELES AND SOUTHERN  
CALIFORNIA.**

**APARTMENT HOUSE**—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Frank L. Stoll, Grosbe Bldg., L. A. Owner's name withheld. The building will be erected at the corner of Jefferson and Vermont streets, covering an area of 10 by 30 feet. There will be two stories on the ground floor. Upper floor will be arranged for six suites of two, three and four rooms. Interior will be finished in pine and elm panel. Plans provide for a hot water system, wall beds and private baths. There will be patent store fronts. Bath rooms will have

tile wainscot and composition floor. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

**BARRY BUILDINGS**—5, 1 story, reinforced concrete. Cost not stated. Whittier, Los Angeles Co., Cal. Architect, Charles E. Shattuck, Mason Bldg., L. A. Owner, A. V. Handorf, Glendale. Contractor, Frank L. Spaulding, 1100 Dana street, L. A. Contract has been taken on a percentage basis and no amount is given.

**HOTEL AND STORES**—2 story and base, brick, \$25,000. Banning, Riverside Co., Cal. Architect, C. H. Russell, Story Bldg., L. A. Owner, Charles Freyer. The building will be erected on San Geronimo avenue at the corner of Ramsey. The building will cover a ground area of 50 by 100 feet. There will be two stories besides the hotel office and dining room on the first floor. Upper floor will be divided into twenty guest rooms and a number of public and private baths. A one-story open-air addition containing sleeping rooms will also be constructed. Interior finish will be of pine throughout. Bath rooms will be finished in tile. Plans provide for steam heat and a hot water system. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**HOTEL AND STORES**—1 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architect, John J. Frauentheller, Story Bldg., L. A. Owner, H. D. Thompson. The building will be erected on the east side of 5th street near Los Angeles, and will have a frontage of 50 feet and a depth of 150 feet. There will be a complete steel frame, brick exterior walls, concrete floors and hollow tile interior partitions. There will be several stories on the ground floor besides the hotel lobby and office. Upper floor will contain a total of 24 rooms, a large percentage of which will have private baths. Interior trim will be of hardwood. Bath rooms will be finished in tile, ornamented paper, marble and tile will be used in the lobby. Plans provide for two passenger elevators, one truck elevator, steam heat, vacuum cleaning and hot water supply. Exterior of the building will be faced with pressed brick. Plans will be complete and figures called for at about the middle of the month.

**RAILROAD CONSTRUCTION**—Cost not stated. Contractor, J. J. O'Connell, 1000 Broadway, Los Angeles. Engineer, J. J. O'Connell, 1000 Broadway, Los Angeles. Plans for the building of a new freight car shop at the intersection of the Santa Fe and Southern Pacific lines will be called for at about the middle of the month.

tric Railway between Arlington and Corona has been started by Shearer & Co., contractors, of Los Angeles. There are eight miles of road to be built and it is expected to have the road completed by January, 1915.

**EXPRESS DEPOT**—1 and 2 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, James B. Humphreys, Wells-Fargo Bldg., S. P. owners, Wells-Fargo Express Co. The building will be erected at the corner of 3rd and Central avenue, covering an area of 100 by 200 feet. Construction will be partly of the Class A type and partly of the Class C. The one-story section of the building will house an automobile unloading platform. Interior finish will be of pine. Cement floors will be used. There will be steel roof trusses and metal window sash and frames. Steel rolling doors will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

**SCHOOL**—2 story and base, hollow tile. Cost not stated. Holtville, Imperial Co., Cal. Architects, Allison & Allison, Iberian Bldg., L. A. Owners, Holtville Grammar School District. The building will contain twelve class rooms, principal's office and lavatories. Interior will be finished in pine with maple floors in the class rooms. There will be a central heating system, modern school plumbing and a system of ventilating and vacuum cleaning. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Bids will be opened on December 2nd. Plans and specifications can be secured from the architects.

**SCHOOL**—1 story and base, hollow tile, \$25,000. Whittier, Los Angeles Co., Cal. Architects, Tuttle & Angel, Delta Bldg., L. A. Owners, Whittier School District. The building will be designed to contain six class rooms, principal's office and an assembly hall. Interior will be finished in pine. Maple floors will be used in the class rooms. There will be steam heat and a modern system of ventilation. Exterior of the building will be covered with cement plaster. Plans are now being prepared. Figures will not be taken until bonds have been voted. Further mention will be made of the work.

**SEWER WORK**—COST not stated. Holtville, Imperial Co., Cal. Engineer, City Engineer, Holtville. Owners, City of Holtville. The Trustees have passed resolutions ordering that bids be called on Tuesday, November 24th, for the construction of both the sewer outfall system and the Vroman act sewer Work.

#### Contracts Awarded.

**BRIDGE**—Reinforced concrete, \$7,900. San Luis Obispo, San Luis Obispo Co., Cal. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo Co. Contractor, Paul H. Ehlers, 5615 Harold Way, L. A. Contract price, \$7,900. Other bids received for this work were as follows: Mercedean Bridge and Construction Co., \$10,085 and \$9,785; Guttridge Bros., \$10,165 and \$9,927; Boardman Construction Co., \$11,418 and \$11,228; S. J. Kerns, \$11,557.75 and \$11,427.75; Connor & Rice, \$13,712 and \$13,412.

**SCHOOL**, 1400 ft. brick and hollow tile construction, \$200,000. San Bernardino, San Bernardino Co., Cal. Ar-

chitect, Norman F. Marsh, 212 Broadway, L. A. Owners, Polytechnic High School District. Contractors, Cresmer Mfg. Co., Riverside, general construction of science, classics and home economics buildings at \$82,991. Subcontract on above, electric wiring to F. O. Engstrom Co., L. A., \$6,727.90. Painting administration building to Leon Mazy at \$1,318. Painting on science building to G. C. Hewitt at \$1,125; Painting on classics, home economics and mechanics buildings to Wormell & Drawbaugh, Pasadena, at \$5,120. Plumbing on home economics to Cooney & Winterbottom, Alhambra, at \$3,120, and all other buildings to Munger & Munger, Pasadena, at \$17,321. Action on the program clocks, heating and ventilating have been deferred.

#### PORTLAND AND OREGON.

**CHURCH**—2 story and base, Class A construction. Cost not stated. Portland, Ore. Architect not selected. Owner, Archbishop Christie, Portland. Archbishop Christie, acting for the Roman Catholic Church, has purchased a lot 260 feet on Laddington street and 249 feet on 19th street in the Laurelhurst District of Portland. A new building will be erected on the site shortly. Further mention will be made of the work when an architect is selected.

#### Contracts Awarded.

**SCHOOL**—2 and 2 story and base, Class A construction, \$160,000. Portland, Ore. Architect's name not given. Owners, City of Portland. Contractors, Olson & Johnson, Missoula, Mont., general construction, \$111,485. Alaska Plumbing Co., 123 Belmont street, Portland, heating, \$23,558, and Sturges & Sturges, 472½ Hawthorne street, Portland, plumbing, \$10,542.

**SCHOOL**—2 story and base, brick, \$25,600. Athena, Ore. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, Athena School District. Contractors, Zeph Bros., La Grande, general construction at \$22,475. G. H. Sunderland, Walla Walla, Wash., plumbing, at \$1,435, and J. C. Bayer, Portland, heating and ventilating at \$1,300.

#### SEATTLE AND WASHINGTON

**DRAW BRIDGE**—Timber construction, \$10,000. Seattle, Wash. Engineer, City Engineer A. H. Dimock, Seattle. Owners, City of Seattle. Preliminary plans have been completed by City Engineer A. H. Dimock for the construction of a timber drawbridge over the Duwamish River at 8th avenue So., which will cost about \$20,000. The bridge will be 20 feet wide and about 200 feet long. Permission has been asked of the U. S. Government for the construction of this bridge and for the approval of the location.

**UNIVERSITY BUILDINGS**—Class A construction, \$300,000. Seattle, Wash. Architect not selected. Owners, University of Washington. The Regents of the University of Washington have determined to petition the State Legislature, which meets in January, for an appropriation of \$300,000 to cover the cost of constructing two new buildings in this city. The buildings proposed are a woman's building costing \$150,000, and a new building to replace the several buildings now being used as recitation halls. This is es-

timated to cost about \$100,000, additional \$50,000 will be used in cellaneous building repairs. He T. Condon, Bursar, has heretofore handled the architectural work of university buildings.

**DOCK**—2 story, frame and coated iron, \$75,000. Seattle, Wash. Engineers, Webster & Ford, Bldg., Seattle. Owners, Grand Trunk Pacific Railroad Co. Plans and specifications will be complete and ready for figures in about six weeks. Construction of a two-story frame for the Grand Trunk Railway Company at the foot of Marion street, construction throughout will be of coated metal and heavy timbers.

#### BENEFIT OF ROADS TO NON-PAID PROPERTY OWNERS.

WASHINGTON, D. C., Nov. 7, 1914. The road building specialties of Department of Agriculture, in Bulletin No. 136, entitled "Highway Bonds," have the following to say about the benefit of a well constructed highway to property owners whose property is not directly on the road to be improved:

In planning the highway system of the main market roads, it will be found necessary to omit many roads the improvement of which is greatly desired by abutting landowners. The fact that such property holders must pay a large part of the bond issue is only an apparent injustice, for if the highway system were well planned the entire country would feel the benefits of the improvement. As a rule, main market roads receive the majority of producing areas, when they are improved all values tend to increase.

The fact that cities and larger towns are frequently taxed for bond issues to build highways outside of their limits is sometimes made a point of debate in bond elections. It is argued that because a large part of the country's wealth is within the corporate limits of such cities and towns, highway money should also be used to construct their streets. It is even urged that the expenditure should be made proportionate to the assessed value within the city limits. If the procedure of highway bond issues were distributed in this way, their purpose in many cases would be defeated. The primary object of the county highway bond issue is to build county market roads and not to improve city streets, though a high percentage of assessed valuation may be city property. It is now known that the expenditure of city taxes on county roads is a sound principle and that it is one of the best features of State aid highways. In Massachusetts the city of Boston pays possibly 10 per cent of the total State highway fund, but a mile of State-aid highway has been built within its limits. New York City also pays about 60 per cent of the cost of the State highway bonds. Some State laws prohibit the expenditure of proceeds of State highway bonds within corporate limits of cities or towns.

The improvement of market roads results in improved marketing conditions which benefit the city. Most cities are essentially dependent upon their surrounding country for their prosperity and development. The development of suburban property for residence purposes is also dependent upon highway conditions and it is becoming

make available the sum of \$5,000 for the inspection of construction and materials for the Municipal Railway Extension.

Board directed the City Engineer to enter into contract for sinking a test well on school lot at 36th avenue and Wawona street.

Board approved specifications for the construction of the 17th street car barns.

Board directs Secretary to advertise for bids on the 17th street car barn of the Municipal Railways. Bids to close November 25th.

#### GLASS PILLARS ILLUMINATE BUILDING ENTRANCES.

Hollow glass columns lighted from the interior by electric lamps are being produced for ornamental and illuminating purposes in buildings, says the November Popular Mechanics Magazine. One particular use to which they have been put is the illumination of entrances, in this position drawing attention and indirectly serving as an advertising medium. The columns are built in sections, which make them available in almost any height desired. A core carrying the electric lights extends from the base to the top of the pillar, the bulbs, staggered, diffusing the light so that it illuminates the column evenly.

#### NORTH BEACH RESIDENTS WANT ADDITIONAL STREET LIGHTING.

That the street lighting in the North Beach section of the city is not sufficient is shown in a petition presented to the Supervisors by residents and property owners of the district.

The petition requests the Supervisors to install additional lights along Columbus avenue from Montgomery to Bay streets; from Broadway down Powell to the Embarcadero; on Stockton street from Columbus avenue to the Embarcadero, and around the plaza known as Washington Square Park. The matter will probably be considered by the Supervisors at their next meeting.

#### MORE STREET IMPROVEMENTS WILL BE MADE BY CITY.

Bids will be received by the Board of Public Works until November 25th for the improvement of many streets throughout the city and county. At their meeting last Wednesday the Secretary was directed to advertise for bids on street improvements to cost in the neighborhood of \$60,000.

#### BRITISH COLUMBIA TIMBER INDUSTRY.

[Consul General R. E. Mansfield, Vancouver, Canada, Oct. 16.]

Among the displays at the British Columbia Exposition held in Vancouver recently was one of the timber resources, which gave a comprehensive idea of the importance of the wood products, the large proportion of the manufacturing life of the Province which they represent, and what a large number and variety of articles may be produced from the forests. The exhibit covered the timber industry from the logging camp to the mills and allied industries.

The revenue from the forestry branch is equal to \$6.63 per capita of

the population. The total Government revenue from the forests of British Columbia during the past nine years has been sufficient to pay for all the roads, bridges, and wharves constructed and has been the most important factor in the commercial and industrial development of the Province.

#### Extent of the Industry—Pulp Shipments to New York.

The annual cut of British Columbia timber is approximately 2,000,000,000 feet. There are 420 mills and 750 logging camps in the Province, employing about 60,000 men [Details of British Columbia's lumber production in 1913 were given in Daily Consular and Trade Reports for Sept. 23, 1914, p. 1569.] The timber industry represents one-half of the industrial capital, one-half of the pay roll, and 37 per cent of the annual production of wealth in British Columbia.

The first shipment of British Columbia wood pulp to an Atlantic coast port was forwarded recently to New York by way of the Panama canal. The consignment consisted of 500 tons and was the product of the Powell River Lumber Co. Other shipments will probably follow, as the all-water route by the canal has so reduced the cost of transportation that British Columbia mills will now be able to compete with eastern companies in the markets of the United States. The pulp plants in the Province are working full capacity to meet the demands for their product.

#### BONDING ASPHALT TO CONCRETE.

The necessity frequently arises in engineering works for joining concrete work with asphalt, especially in reservoir construction, but in this considerable difficulty has been experienced. Recently a new method has been tried in San Francisco, where the concrete surface was first painted with coal tar, and it was found that when applied in this way under right conditions the asphalt would adhere so firmly that after it has cooled it could not be broken away without bringing pieces of concrete with it. In order to secure this result the concrete surface was first scrubbed clean with a bristle brush, and over this a thin coating of hot coal tar was "painted." The coal tar should be heated in small quantities, brought just to the boiling point, and then applied immediately. Heating the coal tar in large quantities, which necessitated some delay before it could all be used, did not give such good results, and the men were therefore not allowed to heat more at a time than they could apply quickly as soon as it began to boil. The asphalt was spread over the tarred surface in the usual manner.—Scientific American

#### SEALED PROPOSALS.

#### PROPOSALS FOR HOISTING EQUIPMENT.

GATE HOISTING EQUIPMENT—U. S. Reclamation Service, Boise, Idaho.—Sealed proposals will be received here until 2 p. m. November 22, 1914, for furnishing certain gate hoisting equipment for sluice gates in connection with the new Jackson enlargement project, Moran, Wyo. For particulars address the United States Reclamation Service, Boise, Idaho, or Washington, D. C. F. H. NEWELL, director.

#### PROPOSALS FOR CANAL SUPPLIES.

PANAMA CANAL—\$75.—Proposals for Fuel Oil for the Year Ending Dec-

## Time Table.

### OAKLAND, ANTIOCH & EASTERN RAILWAY

Key Route Ferry, Phone Suter 2339.  
Red Line Trans. Co., S. F. People's Express Co., Oakland.

December 31, 1915.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until 10:30 a. m. November 23, 1914, at which time they will be opened in public, for furnishing the above mentioned article. Blanks and general information relating to this circular (No. 875) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer's offices in the following cities: Seattle, Wash.; Los Angeles, Cal. P. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

#### NOTICE TO CONTRACTORS.

### PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, the Service Building, Fillmore and Chestnut streets, San Francisco, California, at 9:00 A. M. Tuesday, November 24th, 1914, for Constructing Scott Street, Fillmore Street, Baker Street, and Laguna Street and Presidio Entrances, in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all proposals and to award the contract to any bidder without being bound by the terms of any proposal. The committee reserves the right to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

In order of the Buildings and Grounds Committee:  
WILLIAM H. CROCKER,  
Chairman. (\*)

the largest of the many exhibits received on the grounds of the Panama-Pacific International Exposition is that of the U. S. Steel Products Company. This exhibit has been given a quarter of an acre of space at the south end of the Palace of Mines and Metallurgy and the work of installation has begun. The exhibit consists in large part of big models of mines and mills properly lighted with modern hygienic appliances. Wax models also will be added to demonstrate proper hygiene and general well-being of workmen.

Louisiana's site on the grounds of the Panama-Pacific International Exposition was dedicated on October 22. Justin F. Denechaud, commissioner of immigration of Louisiana and executive commissioner from that state to the exposition, arrived to represent his state. A luncheon was given in his honor by the President and Directors of the Exposition at the Palace Hotel and this was followed by a review of troops at the Presidio and the ceremonies on the Louisiana site. He said New Orleans and his state were good losers and would support the 1915 exposition in every way.

There are 3,752 men and women actually employed on the work of the Panama-Pacific International Exposition either on the grounds or in the down town office building. There are employed on the exhibit palaces 723; on buildings of the states and nations, 1,026; on concession buildings, 646; building exhibit booths, 138; clearing the grounds, 278; electricians, 112; firemen, 74; guards, 119; sculptors, 40; gardeners, 98, and office employees, 293.

The state buildings now under construction on the grounds of the Panama-Pacific International Exposition represent a cost of \$1,200,000. The cost represented by the foreign pavilions now in course of construction is \$1,000,000. These figures are exclusive of the cost of interior fittings and furnishings, landscape gardening, installing of exhibits and maintenance. The states most recently taking steps to construct buildings are Alabama and Nebraska. The nation starting a pavilion most recently is Switzerland.

**Captain Asher Carter Baker, U. S. N.** (retired), director of exhibits of the Panama-Pacific International Exposition, has left San Francisco for Europe, where he goes as a special commissioner of the exposition to assist European exhibitors in the final preparation of 1915 exhibits for shipment and display. No nation participating has changed exhibit plans because of the war.

Word has been received from Germany by officials of the Panama-Pacific International Exposition that German exhibitors are preparing exhibits for the 1915 exposition in spite of the war. With the exception of a few manufacturers near the border, there have been no withdrawals on the part of German merchants. German architects are in San Francisco at this time constructing the German sections for exhibits. Germany has established a New York office for exposition activities. One of

Germany', most striking, extended to be the Lechmer Fountain, which is shown in America for the first time. It is more than a hand of red hot iron and appears as a great flame. The hand can be run through it as easily as through water.

Officials of the Panama-Pacific International Exposition are in receipt of communications from Italy telling of the active preparations that are being made toward the sending of Italian exhibits. Among other exhibits the best section of the Genoa exposition will be brought to San Francisco. Marconi will be among the notables to attend from Italy.

Alvin E. Pope, chief of the department of social economy of the Panama-Pacific International Exposition, has returned from New York where he spent four months conferring with 1915 exhibitors. He reports that the outbreak of European hostilities will not have a bad effect on the department of exhibits on the part of American exhibitors.

The California building will be dedicated on the grounds of the Panama-Pacific International Exposition on November 21. A reception and dance will be given from 4 to 7 o'clock on that afternoon. The California building will be the host building for the exposition and is the largest ever built by any state at any exposition. It is the second largest building on the exposition grounds and when completed and furnished will represent an outlay of \$2,000,000.

CANADA.

[Consul General R. E. Mansfield, Vancouver, October 8.]

### Extensive Harbor Improvements at Vancouver.

The opening of the Panama Canal was an event of special interest to the ocean transportation companies of Vancouver, and preparations are being made to handle the large increase in business anticipated by the opening of the new route. This is especially true in regard to important improvements being made in the harbor and increased facilities for handling extra traffic. One of the most important of these improvements is that now under way in the first narrows, or entrance to the harbor, which is being widened from 400 to 1,450 feet and dredged to a minimum depth of 32 feet, at an approximate cost of \$1,500,000.

Another important work for improvement of the shipping facilities of the port is a Dominion Government dock 800 feet long by 300 feet wide, with concrete walls and piers rock filled, which is being constructed at a cost of \$1,500,000 and will be completed about the middle of next year.

The Canadian Pacific Railway has completed new piers and warehouses this year at a cost of \$550,000 and the Great Northern Railway a new dock at an expense of over half a million dollars. The Canadian Northern Railway is filling in tide flats which will redeem 160 acres to be used for docks, warehouses, and other terminal facilities for handling the traffic entering the port over the company's lines.

In addition to these works by the

plant on the coast of the Gulf of Mexico, the Government of the United States has indicated that the Government will not be able to meet the demand for improvement of the

This activity, said to be expected  
first, in the improvement of the pri-  
vileged port of British Columbia, and  
the importance placed upon the pre-  
parations for handling the heavy  
ocean-carrying trade from the north-  
ern Pacific coast by way of the canal.  
(Consul Samuel C. Reed, Calgary, Al-  
berta, October 8.)

St. Martins Roman Catholic Mission, of Vegreville, Alberta, has just made a contract for the erection of a separate school to cost \$192,723. This does not include heating, plumbing, and ventilating, which when added will probably make the total cost about \$260,000. The building will be of brick and concrete and will be 72 by 80 feet.

Work on the Latter Day Saints Temple at Cardston, Alberta, is progressing rapidly. Twenty-five men are now employed and more will be needed soon. Granite is being unloaded at the station and the laying of this granite will commence shortly. All the concrete work will be placed underground so that when completed nothing will be visible except the pure glistening granite. [A previous account of this temple appeared in Daily Consular and Trade Reports for May 29, 1914.]

[Review of River Plate, Buenos Aires  
September 4.]

The Minister of Public Instruction has prepared a project of school construction in Chile under which \$1,500,000 (presumably Chilean pesos) would be devoted annually for that object during a term of 33 years.

The Minister of Public Works is reported to have formulated an advertisement contract with the Howard Syndicate, whereby the latter would undertake the exploitation of the Longitudinal Railway for a period of 20 years.

[1] P. Koornet, correspondent, Manila, September 1944.

[illegible]

### William Waldo Hyde, and A. W. Hyde, Construction of New Bridge.

The recent floods in and about Manila have damaged the Bridge of Spain over the Pasig River to such an extent that traffic over the structure has been suspended and it will have to be dismantled to some extent, if not almost entirely taken down, to repair the damages. One of the supports near the middle of the stream has sunk perceptibly—to such an extent that it was feared the structure would collapse. The Government has under consideration constructing a new bridge over the Pasig lower downstream at a point opposite the end of Calle Rosario, or Juan Luna as it is now called. It is probable that funds will be found by the next legislature, to build the new bridge. It is not known what will be done with the old bridge of Spain. There is some talk of repairing the bridge and maintaining it temporarily. On the other hand, there is some likelihood that the old bridge may be torn down to facilitate river traffic. The low arches of the old bridge make a great handicap on river traffic. Meanwhile the remaining bridges over the Pasig are not sufficient to accommodate traffic, which impedes business.

### NEW LAW IN AID OF SETTLEMENT.

**Act of July 17, 1911, Allows Agricultural Entry of Large Areas Withdrawn on Account of Mineral Deposits.**

Large areas of public lands heretofore withheld from all forms of entry because of the possible presence of mineral deposits are now open to agricultural settlement under a law which went into effect July 17, 1911. Entry under the new act involves the retention by the Government of title to certain specified minerals believed to underlie the lands. This sort of agricultural entry of coal land has been allowed since June 22, 1910, and of oil land in Utah since August 24, 1912. The present law extends this right of nonmineral entry to all public lands withdrawn, classified, or valuable for phosphate, nitrate, potash, oil, gas, or asphaltic minerals. Any form of nonmineral filing may be made—homestead, desert-land, timber and stone, State selection, or any other—the Government reserving the mineral deposits for which the lands are believed to be valuable and the right to prospect for and mine them. If, for example, a man should make entry in one of the great phosphate fields of Florida, Idaho, Utah, Wyoming, or Montana his patent would give him the right to the surface and to all minerals which might thereafter be found except phosphate. Or if his homestead should be in one of the oil fields of California, Wyoming, Utah, Colorado, or Louisiana, he would receive patent to everything but oil and gas. Before the Government or its assignee comes on his land to prospect for phosphate or for oil, the entryman is secured against any damages which he may sustain in the course of the prospecting or mining.

**Will Open Up Dry-Farming Areas.** Inasmuch as large withdrawals of mineral lands have been made in the arid and semiarid Western States, where entry may be made under the

enlarged homestead acts, the recent law will considerably extend the area open to dry farming homesteads. Many applications for the designation of lands as subject to enlarged homestead entry have in the past been refused because the lands were withdrawn, but these applications may now be granted, and those whose applications have been refused on this ground should resubmit them to the Director of the Geological Survey. In this connection the Director reiterates a former statement to the effect that no definite form of petition is required, and that there is no necessity for employing the service of an attorney to draw up petitions. He suggests, however, that the following rules be observed.

Each application should be limited as far as possible to the specific tract desired for entry and should contain the applicant's post-office address and a description, by section, township, and range, of the applicant's original homestead entry and the date of this entry, as well as a description, also by legal subdivisions, of the land desired for additional entry. Information as to the possibility of irrigating the land should also be furnished and should include the distance and direction of the nearest stream or existing or proposed irrigation canal, the elevation of the lowest point of the land above such source of water supply, the depth at which water can be reached by wells sunk on the land, and all available information concerning attempts to obtain water by this method. The general character of the land, both of the homesteader's original entry (if he has made one) and of the land desired for additional entry, should also be described, to aid the Geological Survey in reaching a decision. It should be noted that at present only entrymen who have not made final proof are entitled to make additional entry.

This information should be embodied in a letter sent to the Director, U. S. Geological Survey, Washington, D. C. A formal petition drawn up by a notary will not result in any earlier consideration of the matter than will be given if the applicant writes personally. Action will be taken on each request as promptly as is consistent with a proper regard to other requests that are pending, and the applicant will be immediately notified when a final decision has been reached.

### CONSTRUCTION WORK ABROAD.

#### CANADA.

[Consul General R. E. Mansfield, Vancouver, British Columbia.]  
**To Connect British Columbia, Yukon, and Alaska.**

Dr. Alfred Thompson, member of the Dominion Parliament from the Yukon, who is active in the development of the district which he represents, makes the announcement that railway communication between northern British Columbia, Yukon, and Alaska will follow the completion of the Canadian Northern Pacific and the operation of the Grand Trunk Pacific Railways. It is Dr. Thompson's belief that the next great railway to be constructed in Canada will be from a point on the Grand Trunk in British Columbia through the

northern part of the Province and the Yukon to connect with the system which is to be built by the United States Government in Alaska. This will open up a vast territory in northern British Columbia and southern Yukon, and give railway communication from Sydney to the boundary line of the Yukon on the one hundred and forty-first meridian west, making it possible to take a train in Vancouver and ride to the shores of Bering Sea. This will make an empire tributary to the cities of British Columbia, with Vancouver as the railway and commercial center.

The Yukon has large areas of fine agricultural land, and the gold production of the territory for the last year is estimated at \$6,000,000. The plan of the United States Government to spend \$25,000,000 in railroad construction in Alaska will give impetus to the building of connecting lines in British Columbia and Yukon, and will result in opening and developing much valuable territory rich in natural resources.

### TRINIDAD'S OIL INDUSTRY.

The oil industry of Trinidad has reached such a degree of importance that the admiralty has decided to investigate the possibilities of obtaining supplies there. It is reported that Professor Cadman has arrived at Port of Spain with instructions from the admiralty to make a full report on the condition of the industry.

### WILL CONSTRUCT DEPOT AND WHARF.

The Shell Oil Company, Kohl Bldg., has applied to the Board of Supervisors for a franchise to lay pipes and conduits in the vicinity of Michigan and Tulare streets, where it will construct a wharf and depot fronting on Islais Channel. The matter will be taken up by the Board at their next meeting.

### 225 MILLIONS FOR 18,000 MILES OF GOOD ROADS.

ATLANTA, Ga.—Through the government's efforts, 18,000 miles of hard surfaced roads have been built in the United States this year, according to Logan W. Page, director in the United States office of Public Roads and president of the American Highway Association, who addressed the opening session here of the fourth American Road Congress.

Mr. Page estimated that the aggregate expenditure for good roads this year would reach two hundred and twenty-five million dollars.

Nearly 700 delegates attended the congress, which was presided over by Austin B. Fletcher of California, president.

Five hundred tons of material for the Japanese pavilion at the Panama-Pacific International Exposition arrived on October 23 from Yokohama. The structure was built in Japan and then "knocked down" to be brought to San Francisco in parts.

The word "brains" is plural when a man has them and uses them. When he has them and don't use them it's singular.

## Editorial Comment.

Building records for the month of October throughout the country show a gain over September although as compared to the same month last year there is a loss of some 20 per cent. Still the general tone is better and while November and December are generally slack in building circles the institution of the new banking system and the loosening up of money generally will in all probability have some effect in putting through many building projects. The record for last months as compared to 1913 is shown in the following table:

City	October, 1914	October, 1913
------	---------------	---------------

Akron	\$ 394,815	\$ 463,125

Economists' figures show that the war has already cost something like 5 billion dollars in money to the nations involved outside of the destruction of property and the incalculable loss to business and the irreparable loss of life. And this is the legitimate and natural result of militarism. When one nation arms itself and prepares to make war on its neighbors the result is either a world empire or continental wars in which the wealth of the world is wasted and progress is kept back to the standard of military achievement.

The nations of Europe will practically be bankrupt after the war. Where will Germany get the money to pay her debts, pay age insurance and the pensions which such a war will entail upon her? She could only do this by enslaving some other nation. And the enslavement of another nation means a slip backwards toward barbarism, and it necessarily places a burden upon the rest of mankind. If she fails Europe will no doubt exact as heavy toll and the outcome can be nothing else than the common people will have to bear this inconvertible burden that has been heaped upon humanity by supporting a military policy that belongs to the dark ages.

The reserve banks have been inaugurated and the general feeling is that they will help matters in the financial world. It is a one step toward freedom in money matters and the government itself is a step toward freedom in money matters. The money lenders that have been forced to contribute to the war effort are the people. And there is a common belief that when the war is over the money lenders will be the first to be broken.

## Heavy Oil Engines In Small Units.

By H. P. Shepherd.

[Reprinted from the *Isolated Plant*.]

The circumstances which determined the design of various small gas engine units have undoubtedly exerted much influence on the design of our modern small oil engines. A large part of the factory output of the engine manufacturers producing the smaller sizes of internal combustion engines is sold for service in undertakings where the power cost is but a small fraction of the burden. This power equipment must possess characteristics which cannot be completely expressed by those efficiencies by which the engineer compares his work with the ideal, although such values will most certainly receive due consideration.

Most of the small gas and gasoline engines on the market today employ similar principles in the design of their mechanisms. Improvement or individuality is expressed mostly in constructional details or by the practical or artistic betterment of the design as a whole through a better compromise between the dictates of service and the requirements of the engineer, the foundryman and the machinist.

The fact that this condition has existed for some years cannot be offered as proof of an arrest in development, but rather that one or two more or less definite types have been evolved which are meeting service conditions satisfactorily.

It has been demonstrated from time to time that by certain alterations in the design these engines could be made to show better thermal efficiencies. In most cases these suggestions have not been extensively applied for the simple reason that the thermal gain was offset by the loss or some of those characteristics which make our design so useful a servant to man. We continue to construct along established lines because the present type represents a long sought for, satisfactory relation between first cost, fuel cost, upkeep and depreciation. It represents something even greater and that is reliability in unskilled hands. These engines can be shipped to any part of the globe with a small book of instructions with the assurance that they will do the work without the necessity of expending an operator with them. They can be entrusted to irrigation duty or fire service, they will light towns and drive factories without cause for mental anguish on the part of owners or builders. They are here and holding their own for the same reason that the locomotive successfully competes with the central power economies, for the same reason that the production of simple slide valve and automatic steam engines for small power continues regardless of the thermal advantages of higher types.

It is reasonable to expect that the history of the small oil engine will parallel that of the small steam and gas engine. The late Dr. Diesel taught us how to build the most efficient

prime mover from thermal considerations and his work for the building of large engines has met world wide appreciation. The mechanism of these engines, although it may be sturdy as built for heavy units, becomes most delicate when an attempt is made to design small sizes, and it will readily be understood that notwithstanding the splendid returns from recent land and marine installations, the type does not accord with the adverse conditions of intermittent and unskilled care and improvised erection under which our small units must operate.

Careful study of tendencies both here and on the other side of the Atlantic seems to indicate that the future small oil engine including engines of 100 H. P. in that class is the hot bulb engine, and judging from the great number of designs emanating from old and established firms, the two-cycle hot bulb engine is receiving special favor. Although this motor is distinctly an American invention and no longer novel here, Denmark and Sweden have done some wonderful work along these lines in the past three years. In Denmark, especially, where engine builders have entered their products for test at various trials during this period, the two-cycle models have been steadily gaining points and the number of entries of four-cycle hot bulb engines has diminished until they are scarcely represented any longer.

The building of oil engines has been of necessity an extensive business in England for many years, most of the models produced having been of the four-cycle, low compression type using internal or external vaporizers. The policy of the technical press in that country toward the newcomer during 1912 seemed to be one of doubt in spite of the growing production of the type. Builders were called to account in editorials for so-called extravagant claims, but interest was shown and many examples of new designs were described. Not until 1913 did this engine really come into its own in that country as a prime mover of real technical interest, for in that year various competitive trials on the continent were published widely, and many engineers representing not the manufacturers, but the owners of numbers of these engines, came forward to champion the cause. Most interesting was the editorial in "Internal Combustion Engineering," of London, at the close of the year, reading in part as follows.

"It can be asserted without fear of contradiction that the greatest feature of internal combustion engineering during 1913 was the wide extension of patronage accorded to the hot bulb engine. Not only have many new manufacturers been convinced of the merits and advantages of this type of motor, but there has been a world wide demand for it. The reasons for this great and growing popularity are not difficult to see. Primarily, this type scores by its economy, but of far

greater benefit is its reliability with different sorts of fuels. Although it is now being manufactured with an output extending to nearly 100 H. P. per cylinder, its greatest application is found in moderate powers where it is rapidly replacing the older form of paraffin engine which at one time held the market to itself. It is inevitable that not every example of the type should attain the high level of excellence which has been set by leading productions, and regret must be expressed that certain manufacturers have obtained neither reliable nor economical results. The appearance of the basic parts of a good hot bulb engine is so simple that it seems to have deceived some engineers into the belief that little is to be done by the study of the thermal conditions and by quality of workmanship. In the majority of designs the two-stroke cycle is evident, this no doubt being due to the fact that absence of valves is not counter balanced by a serious loss of efficiency, as happens with the two-stroke cycle in the older form of engine."

The last statement is indeed true. It would seem that the very features of the two-stroke cycle construction upon which critics have based their reasoning tend either directly or indirectly to improve the combustion of the injection type of hot bulb engine. It is often stated that due to the alleged low volumetric efficiency of the charging arrangements of engines not employing scavenging pumps of greater displacement than the cylinders, imperfect combustion will result due to imperfect scavenging. In the light of present day knowledge, we know that within certain limits the presence of neutral gases results only in the necessity of designing for somewhat lower M. E. P., and while a reduction of M. E. P. would have some disadvantage of four-cycle construction, it does not put the two-cycle motor out of running for the reason that every revolution gives a power stroke per cylinder and the motor can still be kept well within the usual weight limits. It might be remarked in passing that the M. E. P. upon which these engines are usually rated is not by any means the maximum possible, but that at which the greatest economy of fuel is attained. A well designed engine of this type, like a Diesel engine will carry extreme overloads, 50 per cent being not an uncommon figure, although at this load the combustion due to the very small excess of air present will not be all that would be desired. Upon these grounds it will be understood that should the air charge be diminished either as an inherent feature of the design or deliberately to a greater extent than normal, no manufacturing or operating ills are brought about and a little further thought will make plain a real advantage. The admixture of the fresh charge with the high temperature neutrals left behind, together with the heat absorbed during

the scavenging process, will result in an initial temperature before compression considerably higher than the atmospheric temperature. In view of this fact data can be obtained which would go to prove the temperature before the explosion at full load to be never less than 550 degrees F. with but 180 degrees of compression, resulting in a high final temperature, approximating Diesel temperature, after combustion and consequent good consumption of residues with enhanced economy. With the object of reducing the necessary compression it has been proposed repeatedly by engineers of standing to prevent the air charge of four-stroke cycle Diesel engine. Naturally the scheme has not found favor because of the increased cylinder size necessitated. That this same object can be accomplished without additional mechanism and due to what has been characterized as an imperfection of type and without any other disadvantage is most fortunate.

Of twelve well known motors of this type, disinterested tests of which were made and reported during 1910 and 1911 but one was equipped with a stepped piston and receiver to insure a volume of scavenging air greater than the power piston displacement. With one exception, that of a motor with a most efficient form of combustion chamber, this engine gave the worst consumption figures of all tested, the fuel requirement being .505 grams per metric horsepower hour, equivalent to about 1.15 pounds per English horsepower hour, the fuel being light and of the best quality.

The practice of feeding water with the air charge has been often criticized as one which could not but result in a great thermal loss due to the latent heat of the water which is lost in the exhaust. Still it is known that due to some action, chemical or physical, as yet a subject of much debate, the water feed results in better combustion. There is ample proof that with a proper rate of feed the water is completely vaporized by contact with the piston, cylinder walls and exhaust gasses before the beginning of the compression stroke, and is carried as superheated steam through the cycle. What effect is exercised over temperatures occurs through a change in the initial temperature before compression only. The latent heat which is, of course, lost, is that which would be lost to the jackets and exhaust normally, the actual jacket loss, when internal water injection is employed, falling as low as  $3\frac{1}{2}$  per cent and very seldom exceeding 10 per cent in comparison to the usual jacket loss of other types which varies from 20 to 30 per cent. Mechanically the extraction of the heat directly from the piston itself and from the interior of the cylinder walls has great advantages in the way of permitting good lubrication and of reducing expansion stresses in castings.

Frequent reference has been made in this paper to a properly designed engine. This applies chiefly to the combustion chamber, the requirements of which are rigid in direct contrast to gas engine work and to the fuel pump system and injectors. Improper design of these details is solely responsible for those engines which emit tar from the exhaust and

for those which carbonize rapidly. Poor design of these parts will result in heavy pressures tending to become dangerous pressures, almost beyond control, and in a limited fuel economy while with good design, audible pre-mixtures with or without water feed are unknown and the fuel range is one that could be wished for.

Too little space has been allowed in order that we might all talk to give time or discussion of the fuel range of these engines. It might be said that short of California and Mexican crudes or residua testing high in coke, it embraces practically all petroleum fuels offered for engine use that are heavier than the naphthas such as many crudes, residua and fuel oils, all gas oils, distillates and kerosenes. Alcohol is also a good fuel. Further, it is found that at the base of the fuel, whether or not it be cracked in production, is not of the least importance, there being no tendency to form carbon as long as the coke residue is within the 1 per cent limit usually prescribed for Diesel engine fuels. If the engine is given the necessary attention, fuels showing coke up to 2 per cent may be used with good results.

The full load fuel economy will vary with the size, running from 0.60 pounds for large cylinder engines and somewhat better for twin-cylinder engines to 0.55 pounds for the smaller sizes. The economy varies but little for a wide range of fuels, and is also approximately the same from three-fourths to full load and less than 15 per cent more fuel per unit is required at half load. At the present prices of fuel, this offers power at a most acceptable rate.

For generator drive the speed possibilities of the two-stroke cycle high-compression type of engine are most favorable. Due to the fact that there is compression every revolution to cushion the parts over the in-center, any lost motion in bearings is harmless, as the reciprocating parts never leave their journals, there being no reversal of pressure and no stress whatever on the connecting rod bolts.

Considerable criticism has been directed against the two-stroke cycle engine for the reason that crankcase compression has caused various ills. It might be remarked that by the use of a cross head and closed cylinder end such troubles are entirely avoided and the life of the engine much increased.

Most remarkable are the results obtained at light loads with a well-designed engine. The cranks are much superior as to the combustion line to those taken from a throttling gas engine under light loads and the regularity of running without the air of torches leaves nothing to be desired, a point which is not often attained in oil-engine work.

#### THE PROBLEM OF DURABLE FLOORING FOR COUNTRY BRIDGES.

In very many cases the condition of bridges on state and county highways is not at all in keeping with the character of the highway. In the case of new construction, so far as possible, new bridges should be provided, which will be of a character corresponding to the highway improved. In cases where

the components of a bridge are old, it should be replaced with a new structure of sufficient strength to carry the load of the highway. A bridge of this kind, if it is to be a permanent structure, should be built of concrete or steel, and should be so constructed as to be capable of being replaced by a new structure at a future date.

The matter of providing a satisfactory floor for those bridges which are not of sufficient strength to carry a concrete floor in addition to the live load, which they may be called on to carry, is a very serious problem. The annual cost of renewing ordinary plank floors is very great and in constantly increasing. Also it is yearly growing more and more difficult to get plank which will make a satisfactory floor.

The loose, warped and twisted floors, which are getting to be so common, are a source of great annoyance to travelers and a big expense to the towns which have to maintain them. Treated wood blocks are recommended for these may be used on many bridges whose strength will not permit the use of concrete, and when once properly laid are very high indestructible.

On those bridges where the cost of wood blocks is too great, a very satisfactory flooring may be made by 2x4-inch scantling set on edge, spiked together one by one as they are laid, and finished with a surface coat of hot tar and sand, fine gravel or stone screenings. This makes a smooth, noiseless and durable floor and is very much cheaper than plank laid in the ordinary way. New York State Highway News, July, 1914.

#### GRAIN DOCKS AND FLOORS. ELEVATORS AT ANTWERP.

The "dock of concentration" at Antwerp was, by the action of the city authorities just prior to the declaration of war, to have been a reality in 1910. The plan, conceived ten years ago, is to concentrate at one great dock all the grain barges which serve as warehouses, and the floating elevators which furnish the business to Antwerp's 300 grain houses. These elevators, with eight new ones voted last year, are twelve in number and are owned by the municipality. They are pneumatic with a lift of 100 feet and one carries for a cargo of 600 tons in about three days which formerly detained a vessel there for fourteen days when hand labor was employed. While hostilities may perhaps stop the work back another decade, hope may be derived by Antwerp and other stricken cities by remembering that Belgium often has a record of a lasting effect upon industrial development, notable cases as San Francisco, 1906, etc. Scientific American, Oct. 10, 1914.

#### WHEN OLD NAVY MET ON THE ELECTION.

NEW YORK, Nov. 24.—The old Navy met the old Army on the election of the new members of the House of Representatives. ment, these bids being as follows: J. A. Kappenmann, \$2,968, and Philip Le Cornec, \$3,172.50.

## BONDS.

**GRASS VALLEY, NEVADA CO., CAL.**—Eight Nevada County rural districts—Chicago Park, Forest Springs, Lime Kiln, Indian Springs, Cottage Hill, Pleasant Ridge, Clear Creek and Markwell—will immediately take steps to form irrigation districts under the law of 1913 for the purpose of voting bonds for the construction of a system of water distribution to irrigate the area of farm lands below this city.

Action was taken at a meeting held in this city by forty representative agriculturists and landowners at which time the Nevada County Water Consumers' Association was reorganized on a permanent basis.

**WINCHESTER, RIVERSIDE CO., CAL.**—The Winchester School District bonds in the sum of \$4,000 have been sold to the Security Investment Company for par and accrued interest.

**TEMECULA SCHOOL DISTRICT, RIVERSIDE CO., CAL.**—A defect in the \$10,000 bonds of the Temecula School District will necessitate the calling of another election.

A date for the new election will be set in the near future.

**TUCSON, ARIZ.**—An election will be held in this city on December 14th for the purpose of voting bonds in the sum of \$14,000 for the erection of an armory building; \$50,000 for a city hall, and \$20,000 for additional fire equipment.

**PHOENIX, ARIZ.**—J. W. Thompson has purchased \$20,000 of bonds of school district No. 3, at par and accrued interest. The funds will be used in the construction of a new school building.

**WOODLAND, YOLO CO., CAL.**—A bond election held in Woodland to vote bonds in the sum of \$100,000 carried by a large majority.

The proceeds of the issue will be used in the construction and repairing of the school buildings.

**SEATTLE, WASH.**—At the regular meeting of the School Board of Seattle it was definitely decided that the question of issuing bonds in the sum of \$300,000 for the construction of new school buildings would not be submitted to the voters at the special school election this year.

The matter will be taken up again by the board in the early part of 1915.

**EPFLAND, SAN BERNARDINO CO., CAL.**—The \$25,000 bond issue voted for the purpose of improving the city streets and purchasing new fire apparatus has been sold to the First National Bank of Epfland at a premium of \$29.

**CARTHERS, FRESNO CO., CAL.**—The proposed bond issue in the sum of \$20,000 for the erection of a new school building failed to carry at the special election held here.

**GRANTVIEW, WASH.**—The second

struction and will be erected across the Lake Washington Canal.

#### Contracts Awarded.

**SAN FRANCISCO**—Ferry building extension, 2 story, Class A construction, \$37,100. Architect, State Architect George B. McLoughlin, Sacramento. Owners, State of California. Contractors, Construction and Engineering Co., 561 Eddy street, S. F. Contract price, \$37,100.

#### CHURCHES.

**CENTERVILLE, ALAMEDA CO., CAL.**—Church alteration, frame construction. Cost not stated. Architect, John J. Foley, 16 Kearny street, S. F. Owners, Holy Ghost Catholic Church. The main auditorium will be enlarged and entirely refinished. Work will require new interior finish, plastering, electric work and art glass. No exterior alterations will be made. Plans are being prepared.

**DINUBA, TULARE CO., CAL.**—Church, 1 or 2 story and base, frame. Cost not stated. Architect not selected. Owners, German Congregational Church of Dinuba. Articles of incorporation have been filed with the County Clerk by the German Congregational Church of Dinuba. It is said the new church will occupy a prominent corner in Dinuba, but the exact location has not been decided upon, as there are two lots being considered.

**LOS ANGELES, CAL.**—Church, 1 story, gallery and base, frame and plaster. Cost not stated. Architect, Robert H. Orr, Van Nuys Bldg., L. A. Owners, South Park Christian Church. The style of architecture will be modified Lombardic. The building will be 100 by 56 feet, with a basement 68 by 46 feet. The first story will contain a main auditorium, 56 by 45 feet; Sunday school room, 24 by 40 feet; primary room, 22 by 24 feet; 50 class rooms, parlor, pastor's study and choir room. There will be five large and five small class rooms in the gallery. The basement will contain a banquet room, 68 by 16 feet; kitchen, two class rooms, and furnace room. The building will be of frame construction with concrete foundation, tapestry brick veneer on the exterior, red tile and composition roofing, pine interior trim and floors, art glass windows and interior domes, tile mantel, heating system. Plans are nearly complete and the work will be done by subcontract and Day Labor.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Church, 1 story and base, brick, \$25,000. Architect, Thomas H. Power, Higgins Bldg., L. A. Owners, Roman Catholic Church. The building has been designed in the classic style and will cover an area of 70 by 150 feet. There will be a main auditorium, Sunday school rooms and study. Interior will be finished in pine and ornamental plaster. A central heating system will be installed. Marble tile and art glass are specified. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken for the foundation work. Other contracts will be let shortly.

#### COURT HOUSES.

**SACRAMENTO, CAL.**—Court house, 2 and 4 story and base, Class A construction. Cost not stated. Architect not selected. Owners, Sacramento

County. By resolution, the Board of Supervisors accepted the bid of the City of Sacramento of \$16,000 for the purchase of the northwest corner of the court house lot, which is to be used as a site for the City Hall of Justice.

**SAN FRANCISCO**—Laundry building, 2 story and base, reinforced concrete, \$15,000. Architect, Charles C. Frye, 29 Montgomery street, S. F. Owner's name withheld. The building will be erected on the south side of California street west of Lyons, and will have a frontage of 25 feet and a depth of 175 feet. Interior will be finished in pine and redwood. Special laundry machinery and boilers will be installed under separate contract. Exterior of the building will be faced with cement plaster. Plans are being prepared and figures will be called for shortly.

**SAN FRANCISCO**—Express depot, 1 and 2 story, heavy timber. Cost not stated. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California, leased to Wells-Fargo Co. The building will occupy the southern most dolphin used by the ferry boats. The main floor will be 110 by 430 feet while the 2-story portion will be 110 by 200 feet. Interior will be finished in pine throughout. Special equipment will be installed by the Wells-Fargo Co. Plans have been approved by the State Harbor Commissioners and figures will be called for shortly.

**MARE ISLAND, CAL.**—Refrigerating plant, 1 story, reinforced concrete. Cost not stated. Engineer, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. The time for opening bids on the refrigerating plant at Mare Island has been extended until December 5th. Bids were to have been opened on November 21st.

#### Contracts Awarded.

**SEATTLE, WASH.**—Warehouse, 9 and 16 story and base, reinforced concrete and steel, \$640,000. Architect, George C. Nimmons, People's Gas Bldg., Chicago. Owners, Sears-Roebuck Co. Contractors, Grant, Smith & Co., Henry Bldg., Seattle. Contract price, \$640,000.

#### FLATS.

**SAN FRANCISCO**—Flats, 2, 2 story and base, frame, \$1,000 each. Architect, none. Owners, C. J. and W. J. Keenan, Hayes and Central avenue, S. F. These two buildings will be erected on adjoining property on the east side of 20th avenue north of California street. Each building will have a 25-foot frontage and be 60 feet deep. Interiors will be arranged for two flats of six rooms each. Pine and redwood with some elm panels will be used for interior finish. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath rooms and kitchens will have tile wainscot. Exteriors will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$3,000. Architect, L. Traverso, 534 Union street, S. F. Owner, Amedeo Dondero. The building will be erected on Winter street east of Mason, and has been designed to con-

tain two modern flats of five rooms each. Interiors will be finished in pine and redwood with some hardwood floors. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic and ship-lap. Plans are complete and the work will be done by Day Labor under the direction of the architect.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, Algot Nelson, 4333 19th street, S. F. The building will be erected on the west side of 11th avenue north of Fulton street, and has been designed to contain two modern six-room flats. Interiors will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and tile or brick mantels. The wainscot and automatic water heaters will be used in the bath rooms. Entrance will be finished in marble. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$4,300. Architect, C. Fantoni, 916 Kearny street, S. F. Owner's name withheld. The building will be erected on the north side of Pacific street east of Jones and has been designed to contain one six-room and one seven-room flat. Interiors will be finished in pine, redwood and elm. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be large open fire places and tile or brick mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are now being prepared.

#### GARAGES.

**SAN FRANCISCO**—Garage, 1 story and base, reinforced concrete and steel, \$20,000. Architect, C. F. Gottschalk, Phelan Bldg., S. F. Owners, William Curless Estate. The building will be erected on Green street near Pierce and has been designed for a modern commercial garage and will be of fire-proof construction. There will be reinforced concrete walls, floor and steel roof trusses. Interior will be finished in pine. Special gasoline storage tanks will be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared and figures will be called for shortly.

#### GOVERNMENT WORK & SUPPLIES.

##### Grand Valley Project.

The Secretary of the Interior has authorized the Reclamation Service to accept the proposal of Thorn & Whiting, of Springville, Utah, for earthwork on the Main Canal Grand Valley project, Colorado, whose bid of \$9,180 is the lowest received.

##### Military Motor Tractors.

The conclusion has been reached by the War Department, at the instance of the Army board of ordnance and specifications, that it would be advisable to have a comparative test of types of motor tractors, with a view of

## HOSPITALS.

**SAN FRANCISCO**—Hospital elevator work. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete and figures are now being called for by the Board of Public Works for changing the elevator control in the main group of buildings in the City and County Hospital. Bids will be opened on November 25th. Plans and specifications can be secured from the City Department of Architecture.

**SAN FRANCISCO**—Hospital ward building and garage, 2 story and base, brick and steel, \$75,000. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Formal approval has been given plans and specifications for the construction of the Pathological Ward and garage building to be erected at the City and County Hospital. Plans were prepared by Architects Righetti & Headman. Money in the amount of \$75,000 is now available for construction. Plans have also been approved by the Board of Public Works for the installation of fire escapes and vacuum cleaning system at the City and County Hospital.

## HOTELS.

**OAKLAND, CAL.**—Hotel and stores, 7 story and base, Class A construction, \$104,000. Architect, William Wilde, 1735 Broadway, Oakland. Owner, O. J. Mead. The building will be erected at the southeast corner of 10th and City streets, covering a considerable ground area. Plans provide for several stores besides the hotel office and lobby on the ground floor. Upper floors will be divided into 108 guest rooms, a large percentage of which will have private baths. Interior finish will be of pine and hardwood. Tile floor and ornamental plaster will be used in the lobby and office. There will be steam heat, elevator service, hollow tile interior partitions, a hot water supply and vacuum cleaning system. Metal window sash and frames and patent store fronts will be used. Exterior of the building will be faced with pressed brick and terra cotta. Working drawings are nearly complete and figures will be called for shortly.

**FRESNO, FRESNO CO., CAL.**—Hotel and store, 2 story and base, brick and steel, \$20,000. Architects, Bowen & Davis, Fresno. Owner, V. Jarmigian. The building will be erected on I street between Inyo and Kern. There will be two stores besides the hotel lobby on the first floor. Upper floor will be arranged for a total of 32 rooms and several public baths. Interior finish will be of pine and redwood. Tile wainscot will be used in the baths. Plans provide for steam heat and a hot water system. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

## LIBRARIES.

**SAN FRANCISCO**—Library, 2 story and base, Class A construction, \$60,000. Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owners, City and County of San Francisco. Working drawings will be completed within three weeks for the Mission Branch

Library, which is to be erected at the corner of 21th and Bartlett streets. The building has been designed in the classic style and will have a complete steel frame with terra cotta facing. Interior will provide two large public reading rooms besides children's department, work space and stack rooms, office and toilets. Interior will be finished in pine and hardwood with metal stacks, metal window sash and frames and hollow file partitions. Bids will be called for by the Library Trustees. Further mention will be made of the work.

**OAKLAND, CAL.**—Library, 1 and 2 story and base, brick and steel, \$30,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, City of Oakland. Preliminary plans have been started for the first of three branch libraries to be erected in Oakland. The first building will be erected in the Fremont School District and will be in the classic style. There will be two main reading rooms, stack rooms, work space and office for the librarian. Pine and hardwood interior trim will be used. There will be a central heating system, oil burning plant and vacuum cleaning. Exterior of the building will be faced with cement plaster or pressed brick and terra cotta. Plans are being prepared.

The dwelling has been designed for a twelve-room house with three baths and sleeping porches. Interior will be finished in pine, hardwood and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile and equipped with showers. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**SAN JOSE, SANTA CLARA CO., CAL.**—Residence, 1 story and base, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in San Jose: H. M. Nelsen, 250 South 13th street, 1 story frame dwelling and garage, \$2,500. V. Giestra, 711 North 11th street, 1 story and base, frame cottage, \$1,600, and George Hamburg, Santa Clara between 25th and 28th streets, 1 story frame cottage, \$1,500. Materials are now being purchased.

**SAN FRANCISCO**—Residence alterations, 2 story, frame, \$1,000. Architects, O'Brien Bros., Clunie Bldg., S. F. The dwelling located at 504 Clay street will undergo extensive alterations. The building contains sixteen rooms. New interior finish will be installed, hardwood floors, plastering, papering, electric work, plumbing and a steam heating system are included in the work. A garage will also be built in the basement. Plans are now being prepared.

**PIEDMONT, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame. Cost not stated. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Phillip Thayer. The dwelling will be erected on Mountain avenue and has been designed to contain eight rooms, two baths and sleeping porch. Interior will be finished in pine, redwood, hardwood veneer and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are being figured.

**SAN ANGELO, TEX.**—Residence, 2 story and base, frame. Architect, A. J. ... The dwelling has been designed for a six-room house with two baths and sleeping porches. Plans are being

will be erected on Gresham Blvd. Interior will be finished in pine and hardwoods and white enamel. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile and equipped with showers. Exterior of the dwelling will be faced with pressed brick. Plans are being prepared.

**SAN JOSE, SANTA CLARA CO., CAL.**—Cottage, 1 story and base, frame, \$2,500. Architect, none. Owner, C. A. Gould, 662 North 15th street, San Jose. The dwelling has been designed for a five-room house with bath. Interior will be finished in pine and redwood. There will be an open fire place and have tile wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day labor.

**MADERA, MADERA CO., CAL.**—Residence, 2 story and base, frame, \$4,000. Architects, Coates & Traver, Head Bldg., S. F. Owner, A. J. Menasse. The building has been designed to contain seven rooms with bath. Interior will be finished in pine with some elm panels. There will be furnace heat and open fire places. Brick or tile mantels will be specified. Tile wainscot will be used in the bath. Exterior of the dwelling will be faced with cement plaster. The plans are now being prepared.

**FRESNO, FRESNO CO., CAL.**—Residence, 2 story and base, frame, \$4,000. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. The building will contain in the neighborhood of five rooms and one bath. Interior of the dwelling will be finished in pine and some hardwood. Hardwood floors will be used in the principal rooms. There will be tile mantels. A hot water heater will be installed. Tile wainscot will be used in the bath room. Exterior of the building will be faced with cement plaster. Plans are now being completed.

**WASCO, KERN CO., CAL.**—Residence, 2 story and base, frame. Cost not stated. Architect, Thomas B. Wiseman, Producers' National Bank Bldg., Bakersfield. Owner, Dr. R. S. Fogg. The dwelling has been designed to contain five rooms and an office. Interior of the dwelling will be finished with pine and some redwood. A brick or tile mantel will be installed. There will be furnace heat and open fire place covered with cement plaster and shiplap. The plans are now being completed.

### SCHOOLS.

**OAKLAND, CAL.**—School, 1 story and base, brick and plaster, \$75,000. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. The building will be erected on the old Tompkins School site and will replace the building recently destroyed by fire. There will be eight class rooms, teachers' rooms, assembly hall and principal's office. Interior will be finished in pine with some maple floors. A central heating system, probably steam heat will be installed. There will be modern school plumbing. Exterior of the building will be covered with cement plaster. Plans are now

being prepared. Further mention will be made of the work.

**OAKLAND, CAL.**—School retaining wall, concrete. Cost not stated. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Nissen Bros. of Oakland presented the lowest bid for constructing the concrete retaining wall at the Lockwood school at \$7,818 and will probably be awarded the contract. A complete list of the bids will be found under the heading of Oakland and Alameda County in this issue.

**OAKLAND, CAL.**—School, 1 and 2 story and base, reinforced concrete, \$165,000. Architect, John J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. The building will be erected at the corner of 32nd and Magnolia streets. The building has been designed for a fourteen-room school with a large auditorium, principal's office, departments of domestic science and manual training. Interior will be finished in pine with maple floors in the class rooms. Plans provide for steam heat, a modern system of ventilating, school plumbing and vacuum cleaning. Program clocks will be installed. Exterior of the building will be faced with cement plaster and pressed brick. Plans are being completed and will be out for figures in three weeks.

### SEWERS, STREET WORK & WATER SYSTEMS.

**FRESNO, FRESNO CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Fresno. Owners, City of Fresno. Resolutions for the paving of K street from Inyo to Isabella have been passed by the Supervisors. Bids will soon be called for on the work.

**ETNA, SISKIYOU CO., CAL.**—Sewer system and garbage disposal plant. Cost not stated. Engineers, Haviland & Tibbatts, Alaska Commercial Bldg., S. F. Owner, Town of Etna. Plans have been completed for a complete sewer system and a garbage disposal plant. Vitrified ironstone pipe will be used. The garbage plant will be of reinforced concrete. Plans and specifications can be secured from the engineers. Bids are now being taken and will be opened on November 28th at 7 p. m.

**SANTA ROSA, SONOMA CO., CAL.**—Street cleaning machines. Cost not stated. Engineer, City Engineer, Santa Rosa. Owners, City of Santa Rosa. Bids for three street cleaning machines have been submitted to the City Council and were taken under advisement. The bids of Edward R. Bacon and Parrott & Co. of San Francisco were taken under advisement.

**CALIFORNIA**—Highway construction. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Plans are complete and figures will be opened on December 11th for the following work: Siskiyou County, 16.9 miles to be graded, Sutter County, 11.7 miles of Portland cement concrete, Los Angeles County, 14.5 miles to be graded, and Orange County, 5.5 miles of Portland cement concrete. Plans and specifications can be secured from the State Highway Commission at Sacramento.

**RICHMOND, CONTRA COSTA CO., CAL.**—Sewer work. Cost not stated.

Engineer, City Engineer, Richmond. Owners, City of Richmond. Plans and estimates for the lateral sewers to be laid in the Bay View Park addition have been approved by the City Council. Bids for the \$30,000 sewer system in the Hermann addition will be opened by the Council on November 30th.

### Contracts Awarded.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Street paving, \$32,000. Engineer, City Engineer, Riverside. Owners, City of Riverside. Contractors, Johnson-Shea Co., L. A. Contract price, \$32,000.

**LODI, SAN JOAQUIN CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Lodi. Owners, City of Lodi. Contractors, Clark & Hener, Sacramento. Contract price, grading 3c per square foot; pavement, 20c per square foot; curbs 40c per linear foot and gutters, 25c per linear foot.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Earth embankment, \$18,500. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Contractors, Delta Dredging Co., Antioch. Contract price, \$18,500.

**SANTA ANA, ORANGE CO., CAL.**—Ornamental lighting system, \$17,728. Engineer, City Engineer, Santa Ana. Owners, City of Santa Ana. Contractors, F. O. Engstrom Co., Los Angeles. Contract price, \$17,728.

**SANTA ANA, ORANGE CO., CAL.**—Road construction, \$23,036.26. Engineer, County Surveyor, Santa Ana. Owners, Orange County. Contractor, George Wiegand, Santa Ana. Contract price, \$23,036.26.

### STORES AND OFFICES.

**SAN FRANCISCO**—Stores, 1 story and base, frame, \$5,000. Architect, William Knowles, Hearst Bldg., S. F. Owner, Mrs. Clara L. Bennett. The building will be erected at the northwest corner of Bryant and 5th streets, covering an area of 62½ by 82½ feet. There will be two stores. Interiors will be finished in pine. Exterior will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor under the direction of the architect, who is now purchasing all materials.

**SAN FRANCISCO**—Waterproofing, brick buildings. Cost not stated. Architect, none. Owner, Mr. Kitterman, 1325 Stockton street, S. F. The owner is now taking figures for waterproofing three large brick buildings located on Stockton street.

**SACRAMENTO, CAL.**—Market building, 1 story and base, brick. Cost not stated. Architect, none. Owner, Grant Black, Sacramento. Grant Black, who owns the 80 by 160 foot southeast corner of Seventh and M streets, is considering plans for the erection of a market building similar to the one in Oakland. If the plans are carried out there will be more than 100 booths in the structure, and they will be grouped about a cold storage plant.

### SEALED PROPOSALS.

**PROPOSALS FOR METAL WORK.** METAL WORK—Sealed proposals will be received at the bureau of light houses, Washington, D. C., until 12 o'clock p. m. December 10, 1914, and then opened for furnishing cast iron and bronze metal work, etc., for Cape St. Elias Light Station, Alaska. Bids and particulars may be obtained by addressing the COMMIS-

SIGNER OF LIGHT HOUSES, Washington, D. C.

**PROPOSALS FOR BUILDING CANAL WORKS.**

OFFICE OF THE BOARD OF PUBLIC WORKS, of the City and County of San Francisco.

Sealed proposals will be received at this office, between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 2nd day of December, 1914, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The construction of the first story of the Seventeenth Street City Hall, Contract No. 25, Section 412.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) calendar days from the date of the contract to be made and entered into, and completed within the time limits set forth in said specifications.

The amount of bond for faithful performance of contract has been fixed at \$100,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works, F. J. CHURCHILL, Secretary.

**PROPOSALS FOR BUILDING.**

**BUILDING, ETC.**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, Great Falls, Mont., until 2 o'clock p. m. December 8, 1914, for the construction of a portion of the Fishkun Reservoir Supply Canal, involving about 68,000 cubic yards of excavation, 1,600 cubic yards of concrete, the placing of about 24,000 pounds of reinforcing steel and the placing in wooden structures of about 28,000 B. M. of lumber. The work is situated on the south side of the Sun River, about 20 miles northwest of Gilman, the terminus of the Sun River Branch of the Great Northern Railway. For particulars address the U. S. Reclamation Service, Washington, D. C.; Great Falls, Mont., or Fort Shaw, Mont. A. P. DAVIS, chief engineer.

**PROPOSALS FOR CANAL WORK.**

**CANAL WORK.**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, Great Falls, Mont., until 3 o'clock p. m. December 15, 1914, for the construction of about 35 miles of canals and laterals, involving the excavation of about 100,000 cubic yards of material. The work is situated on the east side of the Plattehead River, about 18 miles southwest of Polson, Mont., and 9 miles west of Ronen, Mont. For particulars address the U. S. Reclamation Service, Washington, D. C.; Great Falls, Mont., or St. Ignatius, Mont. A. P. DAVIS, chief engineer.

**PROPOSALS FOR STEEL TANKS.**

**STEEL TANKS.** Sealed proposals (indorsed "Proposals for Steel Tanks") will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. December 12, 1914, and then and there publicly opened. The work consists of erecting four steel tanks at the navy yards, Puget Sound, Wash.; Mare Island, Cal., and Norfolk, Va., and naval coal depots, San Francisco, Cal., and Philadelphia, Pa. Plans and specifications on application to the bureau.

R. STANDFORD, Chief of Bureau.

**PROPOSALS.**

OFFICE OF THE BOARD OF PUBLIC WORKS, of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 25th day of November, 1914, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

Changing the system of elevator control in the Main Group of building of the San Francisco Hospital.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within forty-five (45) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$1,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works, F. J. CHURCHILL, Secretary.

## NOTICE TO CONTRACTORS.

**OFFICE CONSTRUCTING QUARTERMASTER.** Fort Mason, Cal., November 23, 1914.—**SEALED PROPOSALS** will be opened for constructing a Rostrom for National Cemetery, Presidio of San Francisco, Cal., will be received here until 1:00 A. M., December 3rd, 1914, and then opened. Plans, specifications, blank forms, etc., can be obtained here. Deposit of \$25.00 required to insure return of plans, etc. Proposal to be enclosed in sealed envelopes and addressed to W. J. WILLIAMSON, Lt. Col., U. S. A.

Soil is not a dead, inert substance, as many suppose. It is an active, virile force, full of energy and power and the farmer should know his soil if he would maintain its productivity.

Agriculture is recognized as the greatest of all industries and a prosperous, progressive and enlightened agricultural population is the surest safeguard of civilization.

## ERRORS IN MAIL FOR HAWAIIAN ISLANDS.

The Bureau of Foreign and Domestic Commerce is in receipt of a letter from a Honolulu man, calling attention to errors made by correspondents in the United States. The letter reads, in part:

It would seem worthy of notice in Daily Consular and Trade Reports that erroneously addressed letters soliciting business frequently come to Honolulu from the United States. The proper address for mail for this city is "Honolulu, T. H." or "Honolulu, Territory of Hawaii." Many letters, too, are written in Spanish, which is not generally understood here, English being the official language. Hawaiian, Japanese, and Chinese are used by some of the population, but no business is conducted in Spanish.

Mention might also be made of the fact that circulars containing special offers having a time limit often reach Honolulu after the time limit has expired.

## THE ORGANIC SENSE.

We justly decry the notion of extremists that society is an organism as a human body is. Few of us believe that the individual is as a cell merely, and that the race is everything. But our poetry, our science, our thought and feeling are permeated with the organic sense—the sense of racial interdependence, with "racial" implying the human race.

And surely our experiences and the facts of our lives bear out this consciousness. War brings it home to us most. How we accept a civilization, an institution, a home, a life that other lives save to us. But in the ways of peace we are no less dependent. We touch a button for light, when for all that most of us know of electricity we should have to make our own tallow dips. So overwhelming is the debt that to pick one instance of it seems absurd.

Is not this organic feeling the feeling that a cathedral stirs, the feeling that the destruction of a cathedral saddens? Does it not condone our greater shock at the injury to the cathedral of Reims than at the injuries to the defenders of Reims? Is not this organic sense in us patriotism and is it not love of antiquity and desire to protect ourselves into the future?

"I am a part of all that I have met," says Tennyson's Ulysses. All of us have at least moments of feeling that we are parts of all that has been and is and is to be.—Kansas City Star.

## CORONER OPENS NEW HEADQUARTERS.

**Coroner Leland Will Have New Headquarters Open to Public Inspection on November 28th in County Jail Building.**

Coroner Leland's new quarters, located in what is known as the County Jail Building in Merchant street between Kearny and Montgomery streets will be ready for occupancy on Saturday, November 28th. At that time Coroner Leland intends to throw open the new department for the inspection of the public. The basement and first and second floors of the south wing of the building will be devoted to this branch of the city government. This department will be equipped with the most modern appliances and conducted in the most up-to-date manner of any

similar institution in the United States. For this the public is indebted to the painstaking efforts and long experience of Coroner Leland as the head of this branch of the city government.

In planning the details of the proper equipment and management of this department, Coroner Leland was actuated by the desire to relieve the place of all greswome features, out of respect for the dead as well as out of consideration for the feelings of their bereaved relatives and friends.

Under Coroner Leland's directions all cases brought to the Coroner's office will receive equal consideration and attention from the attaches of the office, and will be treated with every mark of respect. A separate department has been arranged for the remains of women and children, where they will be secure from the gaze of the morbidly curious. Only the relatives and intimate friends of deceased persons will be permitted to view their bodies when brought to the Coroner's office.

On the basement floor will be installed the most modern means for the preservation of the remains of unidentified persons, where they may be kept until positively identified or until the probability of identification ceases. This floor is provided with the indirect lighting system, is finished in white and will be maintained in a strictly sanitary and wholesome condition.

On the first floor will be located the autopsy room, the autopsy surgeon's office, the sterilizing room and the viewing room, all finished in white tile, so as to insure perfect sanitation.

The viewing room is a model of neatness and orderly arrangement, with high ceilings, tile floor, with large windows on three sides and thoroughly ventilated with the latest and most approved ventilating system available. This room is modeled along the lines of the most modern undertaking parlors, and is so furnished as to relieve the place of the atmosphere that usually surrounds city mortuaries.

On the second floor are located the main offices and the inquest room. The offices are arranged with a view to providing the most efficient service to the public by the office staff. Under the directions of Coroner Leland and a Deputy Coroner and Assistant Deputy are on duty at all times of the day and night, in order to obviate any necessary delay in removing bodies to the Coroner's office. The inquest room is neatly and plainly furnished and is planned to seat the witnesses and spectators interested in the cases inquested. It is so arranged that the testimony of the witnesses may be taken with dispatch, off the inquest room is a jury room, appropriately furnished, where the juries will retire to deliberate upon their verdicts. Nothing has been left undone to make this department a credit to the City of San Francisco. In fact, so well has this work been planned and executed that already many inquiries have come to Coroner Leland from eastern cities relative to the details of construction and equipment to be used as a guide to the creation of similar establishments in the respective cities. The entire arrangement of the Coroner's department is a tribute to the thoroughness and efficiency of Coroner Leland.

**APARTMENT HOUSE**—3 story and base, frame, \$16,000, San Francisco, Architects, Rousseau & Rousseau, Monadnock Bldg., S. E. Owner's name withheld. The building will be erected at the southeast corner of Stockton and California streets and will contain a number of two, three and four room suites. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living rooms and reception halls. There will be steam heat and a hot water system. All apartments will have wall beds and private bath rooms. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

**APARTMENT HOUSE**—1 story and base, frame, \$20,000, San Francisco, Architect, Charles J. Rousseau, 16 Earmy street, S. E. Owner, William Mensor. The building will be erected at the southwest corner of California and Laguna streets, covering an area of 27½ by 96½ feet, and has been de-

signed to contain six units, of three and four rooms. There will be private garage space and a social hall in the basement. Interior finish will be of pine and elm join. Hardwood floors will be used in the living and dining rooms. Plans provide for steam heat and a hot water supply. Bath rooms will have tile, wainscot and composition floors. All apartments will have wall beds. Marble and tile will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and segregated figures are being taken.

**BRIDGE**—Steel cantilever type, \$50,000, San Francisco, Engineer, City Engineer, Temporary City Hall, S. E. Owners, City and County of San Francisco. A meeting of the Board of Public Works and the Street Committee has been arranged at which the question of erecting a new bridge over the Channel at Fourth street will be considered. The old Fourth street bridge, erected over 15 years ago, has at last given away and will have to be closed to all traffic. The United Railroad cars and all heavy trucking using this bridge will be routed over the Third street bridge during the construction of a new steel structure of the cantilever type. Plans for this structure will be prepared a once by the City Engineer.

**LAUNDRY BUILDING**—2 story and base, reinforced concrete, \$15,000, San Francisco, Architect, Charles C. Frye, 20 Montgomery street, S. E. Owner's name withheld. The building will be erected on the south side of California street west of Lyons, and will have a frontage of 25 feet and a depth of 175 feet. Interior will be finished in pine and redwood. Special laundry machinery and boilers will be installed under separate contract. Exterior of the building will be faced with cement plaster. Plans are being prepared and figures will be called for shortly.

**EXPRESS DEPOT**—1 and 2 story, heavy timber, cost not stated, San Francisco, Engineer, Assistant State Engineer Newman, Ferry Bldg., S. E. Owner, State of California, leased to Wells-Fargo Co. The building will occupy the southern most dolphin used by the ferry boats. The main floor will be 114 by 100 feet, while the two story portion will be 75 by 200 feet. Interior will be finished in pine throughout. Special equipment will be installed by the Wells-Fargo Co. Plans have been approved by the State Harbor Commissioners and figures will be called for shortly.

**FLATS**—2 story and base, frame, \$100,000, San Francisco, Architect, none, owners, C. J. and W. J. Kennedy, Hayes and Kent streets, S. E. These two buildings will be erected on a jointing property in the city, covering a large area on the corner of Hayes and Kent streets, and will be erected on a large lot. The building will be a two story structure and will be covered with tile. The interior will be finished in pine and redwood with some oak panels. Plans are being prepared and figures will be called for shortly.

**FLATS**—2 story and base, frame, \$50,000, San Francisco, Architect, none, owner, Algot Nelson, 1400 street, S. E. The building will be erected on the west side of 14th avenue north of Fulton street, and has been designed to contain two modern flats. Interiors will be finished in pine and redwood with some hardwood floors. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustie and shipap. Plans are complete and the work will be done by Day Labor under the direction of the architect.

**FLATS**—2 story and base, frame, \$50,000, San Francisco, Architect, none, owner, Algot Nelson, 1400 street, S. E. The building will be erected on the west side of 14th avenue north of Fulton street, and has been designed to contain two modern flats. Interiors will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and tile or brick mantels. Tile wainscot and automatic water heaters will be used in the bath rooms. Entrances will be finished in marble. Exterior of the building will be covered with rustie and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**FLATS**—2 story and base, frame, \$50,000, San Francisco, Architect, none, owner, 954 Kearny street, S. E. Owner's name withheld. The building will be erected on the north side of Kearny street, east of the city hall, and will be designed to contain one six room and one seven room flat. Interiors will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustie and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**FLATS**—2 story and base, frame, \$50,000, San Francisco, Architect, none, owner, 954 Kearny street, S. E. Owner's name withheld. The building will be erected on the north side of Kearny street, east of the city hall, and will be designed to contain one six room and one seven room flat. Interiors will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustie and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**FLATS**—2 story and base, frame, \$50,000, San Francisco, Architect, none, owner, 954 Kearny street, S. E. Owner's name withheld. The building will be erected on the north side of Kearny street, east of the city hall, and will be designed to contain one six room and one seven room flat. Interiors will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustie and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

W. R. BRODE, Pres. LOUIS R. HOLM, Sec. R. J. BRODE, Vice-Pres.

**BRODE IRON WORKS**

Established 1886--Incorporated 1913

Tel. Kearny 2464.

Fabricators and Contractors of Structural Steel and Ornamental Iron Work

Office &amp; Works: 31-37 Hawthorne St., bet. Howard &amp; Folsom Sts., San Francisco, Cal.

**CLUB HOUSE ADDITION**—2 story and base. Class A construction. Cost not stated. San Francisco. Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owners, Concordia Club. Contracts for the large addition to the Concordia Club will be made the latter part of this week. The building is located at the southeast corner of Post and Van Ness avenue. Plans have been out for figures for some time.

**LIBRARY**—2 story and base. Class A construction, \$60,000. San Francisco. Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owners, City and County of San Francisco. Working drawings will be completed within three weeks for the Mission Branch Library, which is to be erected at the corner of 24th and Bartlett streets. The building has been designed in the classic style, and will have a complete steel frame with terra cotta facing. Interior will provide two large public reading rooms besides children's department, work space and stack rooms, office and toilets. Interior will be finished in pine and hardwood, with metal stacks, metal window sash and frames and hollow tile partitions. Bids will be called for by the Library Trustees. Further mention will be made of the work.

**CAR BARN**—1 and 2 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans have been completed and figures are now being taken for the first story of the new Potrero Car Barns, which will be erected on the block bounded by 18th, Hampshire, York and Mariposa streets. Construction will be of reinforced concrete with steel roof trusses, metal window sash and frames and cement floor. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Special machinery equipment will be let under another contract. Bids will be opened by the Board of Public Works on December 2nd. Plans and specifications can be secured from the City Department of Architecture.

**RESIDENCES**—2, 2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, L. Arthur, 1230 Arguello Blvd., S. F. These two houses will be erected on the west side of 25th avenue south of Lincoln Way, and each has been designed for a seven-room house with bath. Interiors will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile wainscot. Automatic water heaters will be installed. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, A. T. Morris, 501 11th avenue, S. F. The dwelling has been designed for a six-room house with bath and will be erected on the west side of 11th avenue north of Balboa street. Interior will be finished in pine with some hardwood veneer. Hardwood floors will be used in the living and dining rooms. There will be a large open fire place and tile or brick mantel. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$8,000. San Francisco. Architect, Charles J. Rousseau, 16 Kearny street, S. F. Owner, John Little. The dwelling has been designed for an eight-room house with two baths, sleeping porch and garage, and will be erected on the west side of 11th avenue between Anza and Balboa streets. Interior of the main floor will be finished in blue gum, while the upper floor will be finished in pine and white enamel. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile and equipped with showers. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are nearly complete.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owners, Oscar Heyman & Brother, 742 Market street, S. F. The dwelling has been designed for a six-room house and will be erected on the east side of Mission south of Santa Marina. Interior finish will be of pine and redwood. Some oak floors will be used. There will be a large open fire place in the living room with tile mantel. Bath room will have tile wainscot. Exterior of the house will be covered with rustic and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$6,000. San Francisco. Architect, Charles J. Rousseau, 16 Kearny street, S. F. Owners, H. B. and L. D. Allen. The dwelling will be erected on the east side of 9th avenue north of Moraga, and has been designed to contain seven rooms, bath and sleeping porch. Interior will be finished in pine and junco, with white enamel in the bed rooms. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Bath room will have tile wainscot and floor and will be equipped with shower. An automatic water heater will be installed. Exterior of the dwelling will be covered

with cement plaster on metal lath. Plans are nearly complete and the work will be done by Day Labor.

**STORES**—1 story and base, frame, \$5,000. San Francisco. Architect, William Knowles, Hearst Bldg., S. F. Owner, Mrs. Clara L. Bennett. The building will be erected at the northwest corner of Bryant and 5 streets, covering an area of 62½ by 82½ feet. There will be two stores. Interiors will be finished in pine. Exterior will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor under the direction of the architect who is now purchasing all materials.

**WATERPROOFING**—3 brick buildings. Cost not stated. San Francisco. Architect, none. Owner, Mr. Kitterman, 1245 Stockton street, S. F. The owner is now taking figures for waterproofing three large brick buildings located on Stockton street.

**RESIDENCE ALTERATIONS**—2 story, frame, \$1,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, L. Cohn. The dwelling located at 2014 Clay street will undergo extensive alterations. The building contains sixteen rooms. New interior finish will be installed, hardwood floors, plastering, papering, electric work, plumbing and a steam heating system are included in the work. A garage will also be built in the basement. Plans are now being prepared.

**EXHIBIT WORK**—Cost not stated. San Francisco. Architect, James Narbett, Richmond. Owners, Town of Richmond. Architect James Narbett has been chosen by the Contra Costa County Commissioners, J. Sweeney and John Birmingham, to design the ex-

hibit for Contra Costa County, which will cover a space of 1,000 square feet in the California Building. The working drawings will be started immediately.

**APARTMENT HOUSE**—2 story and base. Class C construction, \$15,000. San Francisco. Architect, Fredrick U. Meyers, Bankers' Investment Bldg., S. F. Owner's name withheld. The building will be erected on Post street near Larkin, and has been designed to contain thirty suites of two and three rooms. All apartments will have private baths and wall beds. Interior will be finished in pine and elm. Hardwood floors will be used in the living rooms and lobby. There will be steam heat, an automatic elevator, hot water supply and vacuum cleaning. Marble and tile wainscot will be used in the entrance. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared.

**APARTMENT HOUSE**—2 story and base, frame, \$14,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Girard Investment Co. The building will be erected on the north side of California street, 25 west of Leavenworth, having a frontage of 25 feet and a depth of 70 feet. The building will contain six suites of three and four rooms with private baths and wall beds. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be steam heat, oil burning system and a hot water system. Bath rooms will be finished in tile with composition floors. Marble and tile wainscot will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**BRIDGE REPAIRS**—Cost not stated. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Engineer Hunt, of the City Department of Engineering, states that it has been decided to repair the Fourth street bridge for the present and that a new structure will not be erected until additional funds can be provided for by the Supervisors. It is also the intention to enlarge the Third street bridge so that the Fourth street cars can be routed by Third street until repairs have been made.

**WHARF**—Pile and Timber construction. Cost not stated. San Francisco. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. The new structure will be known as Pier No. 24, and will be 800 feet long, 125 feet wide. There will be a one-story timber shed covering the entire pier with passenger galleries on two sides. An extension of the Belt Line Railroad will be constructed on the north side of the pier. Construction will be of creosoted piles and heavy timber. Bids will be called for in about a month.

**GARAGE**—1 story and base, reinforced concrete and steel, \$20,000. San Francisco. Architect, C. F. Gottschalk, Phelan Bldg., S. F. Owners, William Curlett Estate. The building will be erected on Green street near Pierce and has been designed for a modern commercial garage and will be of fire-

proof construction. The walls will be reinforced concrete with steel and steel roof trusses. Interior will be finished in pine. Special gasoline storage tanks will be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared and figures will be called for shortly.

**HOSPITAL ELEVATOR WORK**. Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete and figures are now being called for by the Board of Public Works for changing the elevator control in the main group of building in the City and County Hospital. Bids will be opened on November 25th. Plans and specifications can be secured from the City Department of Architecture.

**HOSPITAL WARD BUILDING AND GARAGE**—2 story and base, brick and steel, \$75,000. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Formal approval has been given plans and specifications for the construction of the Pathological Ward and garage building to be erected at the City and County Hospital. Plans were prepared by Architects Righetti & Headman. Money in the amount of \$75,000 is now available for construction. Plans have also been approved by the Board of Public Works for the installation of fire escapes and a vacuum cleaning system at the City and County Hospital.

**RAILROAD CONSTRUCTION**—Cost not stated. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete and figures are now being taken by the Board of Public Works for the construction of the California street extension of the Municipal Railroads. Bids are to be opened by the Board of Public Works on December 2nd. Plans and specifications can be secured from the City Engineer. An official proposal appears in another column of this issue.

**RESIDENCE**—2 story and base, frame, \$25,000. San Francisco. Architect, none. Owner, E. Nelson, 39 Presidio Terrace, S. F. The building will contain seven rooms and bath. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Baths will have tile wainscot and composition floors. There will be furnace heat and open fire places. Tile mantels will be used. Exterior of the building will be faced with cement plaster on metal lath. The work will be done by Day Labor. Materials are now being purchased.

#### Contracts Awarded.

**STATE EXHIBIT BUILDING**—1 and 2 story, frame and plaster, \$25,000. San Francisco. Architects, Alvestreet Spencer & Payne, Jackson, Miss. Owners, State of Mississippi. Contractors, Foster West Co., Sharon Bldg., S. F. Contract price not stated.

**TOOTH DISPLAY**. Frame construction. Cost not stated. San Francisco. Architect, none. Owners, George Russell Real Co., 10 Clay street, S. F. Contractors, Link & Schneider Co., 13th street, S. F. Contract price not stated.

**FERRY BUILDING EXTENSION**—2 story, Class A construction, \$75,000.

## New Bridge For Fourth Street.

Structure Which Has Done Service For Forty Years to be Replaced With Modern Steel Bridge.

The old Fourth street bridge, built at first given away, and has been closed to traffic until steps can be taken to replace the present structure with a suitable steel bridge of the cantilever type. The Fourth street bridge was erected about 45 years ago and has been in constant use by the heaviest of San Francisco's trucking during that time. In 1901 the present Third street bridge was erected and since has a road for considerable of the traffic that formerly used Fourth street as a way into the warehouse district.

For some time the city has maintained an office at the Fourth Street bridge, and has caused arrests of numerous teamsters for driving faster than a walk. Yesterday, after an examination of the bridge, it was found that the steel plate girders were in such a state that nails could be driven through them. Today the Board of Public Works, and the Street Committee will meet to devise ways and means for replacing the old structure with a new bridge.

Present plans are to route all United Railroad cars and all trucking via Third Street bridge into the warehouse district. This will mean a considerable loss of time as the Third Street bridge is much narrower and will afford but poor accommodations to the added trucking and car service.

#### WANT TANK PERMIT.

The Pacific Telephone & Telegraph Company has filed application with the Supervisors for permission to maintain and install a 1500-gallon oil storage tank in the rear of the building at 875 Howard Street.

#### HOTEL BUILDING DESTROYED BY FIRE.

WILSON, Shreve & Co. Fire completely destroyed the Hotel Idaho last Tuesday morning, causing a loss of \$20,000. The building, erected two years ago by the Shreve, Wilson, Cook and Bates Co., was destroyed by fire, burning for about an hour. The building, which was located at the corner of Broadway and Broadway, was destroyed by fire, burning for about an hour.

#### GIGANTIC GAS TANK.

The New York City Gas Company has been awarded a contract to construct a new gas tank in the city. The tank will be 100 feet in diameter and 100 feet high. It will be located in the city and will be used for the storage of gas. The cost of the tank is estimated at \$100,000.

# Chapter Meeting.

## Architects Entertain Local and Visiting Painters and Sculptors.

The best attended and most successful meeting of the San Francisco Chapter of the American Institute of Architects held recently was held last Thursday night in one of the prominent downtown cafes, when the local colony of painters and sculptors were the guests of the chapter of Architects.

W. B. Paville presided and called upon the Dean of Architects, Clinton Day, to toast the guests of the evening.

Willis Polk in his effervescent and humorous style welcomed the guests. In his remarks he emphasized the close relationship of the Painter, the Sculptor and the Architect.

T. Patterson Ross's illustrated Scotch stories were gems of poetry and motion.

After a beautiful sentiment to the ladies by Mr. Merrit J. Reid, the Toast Master called attention to the old Proverb handed down from the sand-script that for each enjoyment in the arms of love with the mistress of your heart the penalty shall be the loss of one hair from your head, and called particular attention to Mr. Reid's luxuriant locks.

The Close Harmony Club composed of Messrs. Bliss, Applegarth, Allen and Larsen rendered the following songs:

Tune: Too Much Mustard

Artists are a funny bunch but they if you don't think this is so, to the Fair go

Pictures big and statues tall, some wear clothes, some none at all, When the leaves begin to fall, that is Art, you know!

Architects are fussy men, still you like them now and then, Bead the lion in his den, you will find a lamb;

They adore the form divine, they will take a glass of wine, They know where to draw the line, they don't give a damn!

Tune: It's a Long Way to Tipperary  
It's a hard thing to get your money,  
it's a hard thing you know,  
it's a hard thing to tell your honey  
When the payments come too slow,  
Good bye old Bohemia  
Good bye Madison Square  
it's a hard, hard thing to get your money  
But artists don't care!

The gates of Hell go ting a ling a ling,  
To you but not for me,  
I'll hear the Angels sing a ling a ling  
Through all eternity,  
O, death where is they sting a ling a ling  
Where grave thy victory  
No sting a ling a ling  
No ting a ling a ling  
Just sing a ling a ling for me.

Mr. B. J. S. Cahill's paper, as follows, was listened to with marked attention.

Gentlemen:

Our president, Mr. Paville, has asked me to read a short paper for to-night and in casting about for a subject that would provoke suitable discussion, I wrote to Mr. C. H. Whitaker, the Editor of the "Journal of the Institution." Mr. here, present at the last meeting, wrote me from Washington at some length. Among other things, after ex-

pressing a wish that I would write something about the Exposition for the Journal, he concluded as follows:

"At the same time, how I wish you could elaborate upon certain of Mr. Bliss's, and sweep the horizon clear of all the trivialities that beset the practice of Architecture of today. I wish you could give Architects some back ground from which to survey their art. We seem lost in a maze of petty detail and I feel that the younger men who are entering the profession are doing so with scarcely an idea of any kind before them."

"Have you no message of that kind? I am sure that you have. I am not, though you might say that it would do you no good. But there I could disagree with you, for one of the inspiring things I find in my journeys among the Chivalrous men who are making sacrifices, the hardest sort of trials rather than of their standard. There are more of them than you think. There are to me the elect of the profession."

You will not fail to note the fine spirit of this letter. It is suggestive, course, of discipline, but anything so pretentious to deliver a message with a capital "M." I shall try my best will set you thinking and perhaps talking.

First of all I mean to say something about Peace and Harmony among our Sculptors, Artists, Architects, Brothers all in the fine work our hands are trained to do.

When I want to add a word about final meaning to us whose work seems so remote from anything so awful. I speak of peace and harmony in an intimate and somewhat personal sense.

Many years ago I acquired the habit of visiting various Architects in their offices and following their work and entering into their problems to a degree unusual among the men I visited, so that in some respects I held a position in a star-shaped jail can see along each corridor, though each corridor is not aware of its neighbors. I found that their brother Architects but what of course naturally followed, they failed to appreciate each other's work and suspicion and dislike, so that they were hurtful rather than helpful to each other. I say "instead of helpful" as though assuming that we should be helpful. And this is a fact that we all of us agreed as to the absolute perfection of Classic Art. The very essence of perfection which is enduring and which survives all the vagaries of time and fashion. One of the profoundest critics of Art was not only produced by groups and companies of men but that every model was freely criticized as it grew under the Sculptor's hand.

The Athenians who lived in the open air were forever taking exercise in groups and always discussing and criticizing. Art was not produced by a sickly recluse in a garret or a closet. It was wrought in a community spirit, and to doubt with endless discussion, argument, banter, jest and ridicule, or harsh and or freakish, unwholesome suggestions such as these. Moreover the were also a part of the time and their designers did not work in other costumes in a different world with the Gods and Heroes and other scenes, but depicted were in every particular men

deal with the people on the scene at the time, as they appeared in the life of the period.

The modern estrangement of Art and Life is largely due to this extreme sequestration of the Artist and Craftsman.

I realize that the schools do something to offset this and in Paris particularly a community spirit is common. It should be maintained through life. Nothing could be more wholesome than a closer intimacy among us in our work. When one or two of us can drop into the office or studio of a third and can look freely over his output, you may be sure that all his work, can be freely mailed about as or cartoons and be better still—but best of all if our host holds up one of his proudest us can say loudly and honestly and without fear, "I think it's rotten."

If sketch plans, model and all, can be freely mailed about as or cartoons and be better still—but best of all if our host holds up one of his proudest us can say loudly and honestly and without fear, "I think it's rotten." great thing in this sort of atmosphere very fine to read can be done. It is all works of the big men and review the result, we can get but a faint glow of their enthusiasm at this distance. What is far better is the contagion from the big man across the street. There is no such stimulus to fine effort as that which exudes from an enthusiast, and it can only be effective at first certain Architects here, right in this set me in a glow of enthusiasm, much as you charge storage battery. It energy and larger ambition. I have benefited by such association I am sure. But what has been intermittent and occasional might be continuous and general like coals which close together, but grow cold and black when scattered.

This is my plea for peace and harmony in our intimate association at home.

Of the great war abroad I must speak in larger terms. It is very difficult to believe that any one here assembled to-night can be indifferent, can be any less than deeply stirred by the tremendous contest of arms going on over and over Architects, Europe is closed by fists of men than even the plains and forests of our own land. To prove how we in the terms of our trade and in the forms and colors of our craft go out there to North Beach. In the gorgeous shall recognize every moulding and decoration as a memory of Greece and Rome. Wherever we look we see souvenirs of France and Spain. Every thing here and facade is a reminder of something done long ago in old Europe touches Art in Europe, it surely touches Art in America.

Now many obvious things have been said and are being said touching the destruction of monuments and the burning of the country side and the wholesale harpings of the country side generally. I shall not unduly astonish or shock you when I confess that the enormities and the slaughter, the agonically appalling as they are, yet fall thus, to impress me as does the flaming and amazing faith the nations at war and the ing. For, after all, those who are fighting and bloodily are but a fraction of those who are ready to fall. And the to get to the front of those clamouring a fraction of those applying for enlistment and I think I can go further and say that behind even these lies a still more and willing to go to the war, but various reasons are unable to do so. Finally, it may be safely said that the great remembrance of the people at war including women and children (by very

adorned with our invention, trophies, allegories, literature, poetry all of that world of thought that is our living own. All these the sculptor stands ready to supply—only you must know him, discover him, sympathize with him. He is the high priest of form, perhaps too often engrossed in technical problems, which after all must be his first care, to quickly see his opportunity to apply his methods to architecture, perhaps disdaining to apply it at all, since sculpture is so beautiful in itself and museums are still collecting.

The realm of the ideal must always be the most attractive to the artist, without it would soon cease to be any sculpture—the restless desire to embody our thoughts exists as a kind of superior instinct for visual beauty—ever searching for the divine calm that life itself is denied. Art seeks to set up her lovely idols of consolation. This most precious quality is far removed from practical utility. Yet it is just this quality that is also valuable to architecture. If it has no spark of it, it is a dead and useless thing.

I am here, as you perceive, pleading for a degree of freedom in design founded on purpose. Once that is established, much becomes possible. Purposes beget motives. New motives replace old ones. Visions never before seen, but not therefore impossible, loom up. New channels for old impulses are found and that is the artist that is necessary to all Art is assured. Let us think it worth while to get some touch of that mysterious magic that is neither workmanship nor design, yet is embodied in these in many haunting forms of high romance. Sentiment rules the world, and sculpture is embodied sentiment.

A set of model plumbing specifications were read by Mr. Fairweather. Architects' troubles with plumbers are guaranteed to vanish when these specifications are used.

#### STANDARD SPECIFICATIONS FOR PERFECT PLUMBING.

##### General:

The plans and specifications are to be taken together, nothing shown on the plans and not mentioned in the specifications and anything mentioned in the specifications and not shown on the plans, is to be considered as both shown and specified; and anything wanted by the Architect or any of his friends, or by anybody else (except by plumber) shall be considered as shown, specified, implied and required, and shall be provided by the plumber without expense to anybody but himself.

If he can do the work without expense to himself, the work shall be taken down and done over again, until the expense is satisfactory to the Architect.

##### Architects:

The term "Architect" herein appearing, shall be understood to mean the Architect or any unwell and insatiable engineer that he foolishly but courtously employs to assist in making trouble for the plumber.

##### Plans:

The plans are to be considered diagrammatic, any discrepancy that may be followed only where space conditions make it possible to avoid so doing.

Coincidents between the plans and executed work shall be considered a claim for extra compensation. The Architect is not required to recognize coincidences.

Anything that is right on the plans is to be considered right, anything that is wrong on the plans shall be discovered by the plumber and shall be made right without telling on the Architect or on anybody else.

Anything that is forgotten or missed out of the plans and specifications, but which is necessary and required for the comfort and convenience of the owner, whether he thought of it before or after the execution of the contract, shall be provided by the plumber to the satisfaction of everybody that the plumber and in full accord with the evident intent and meaning of the specifications without extra cost to anybody but the plumber.

##### Rules and Regulations:

The rules throughout shall comply with all rules, regulations, articles and whims of all City, County, State, National and International Departments, Bureaus and Officials having or not

##### having jurisdiction.

"Tammany Hall shall be considered an official department having jurisdiction."

##### Materials:

All materials shall be the best of their several kinds, the contractor is expected to know and provide the best irrespective of what is specified in detail.

The Architect reserves the right to change his mind about what is the best, any changes necessary to make the work and material fit to the mind of the Architect shall be made by the Contractor without extra cost.

##### Permits:

The Contractor shall obtain all permits and shall pay all fees, annual dues, assessments and subscriptions to all municipal, county, organizations, outings and hat checks.

##### Scope of Work:

It is the purpose of this contract to connect with the main main of the Department of Water Supply to provide perfectly pure, clean, wholesome and colorless water, of any and all temperature at any place anyone wants. If it is the further purpose to complete, take away, and remove the water, both worked and unworked, or whether introduced or made on the premises, after it has been soiled, drunk, or otherwise misused. Chasers shall be provided by the contractor as required by the Architect.

Incidentally anything that goes into the work shall be coincidentally removed, including bricks, lime, cement, mortar or other rubbish. All machines, apparatus, appliances and fixtures shall be arranged and designed to fulfill the purpose of this contract complete in every particular, ready for panel service.

##### Damage:

Any damage done by the water shall be paid for by the Contractor as liquidated damages and not as a penalty.

##### Guarantee:

The Contractor shall guarantee and hereby does guarantee that he will keep in complete and perfect working order anything that the Architect asked him to attend to, so long as there is more work in sight in the Architects office.

##### Arbitrator:

In case of any dispute arising as to the nature, character or extent of work, shown, specified or implied, the matter shall be decided by referendum and recall after which the decision shall be set aside and reversed by the Architect and designed in chief of the National Government.

##### Payments:

Payments, if any, shall be made only on the Architect's certificate. Architect's Certificates shall not be considered negotiable nor are they legal tender. When once issued, the Architect assumes no responsibility for their further usefulness.

Partial payments shall be made as the work progresses in the amount of 5% of the value of the work done, as judged by the Architects.

In no case shall the judgment of the Architect be more than enough to pay the journey men and helpers every Saturday night. The material man must take the customary chances.

The final payment (if any) shall be made only when everybody is satisfied (but the plumber).

Any evidence of satisfaction on the part of the plumber shall be considered a just cause for withholding final payment.

Plumber shall accept, and hereby does accept, the conditions herebefore appearing for himself, his ancestors and progenitors, his family, his heirs, executors, his ex, his assignee and stranger that is within his gates.

A movement was launched to induce the Supervisors to appropriate \$5000 each year for the purpose of decorating some public building.

E. J. Molera spoke about the high standard of the Arts in Barcelona and the way in which that city encouraged young artists by giving them free instructions and offering yearly prizes for best products of the painter, sculptor and architect.

Advanced students were given money to go to Rome to perfect their studies. Thus Barcelona is now a recognized Art center.

**RESIDENCE**—2 story and base, frame, \$12,000. Berkeley, Alameda Co., Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, W. A. Miller. The dwelling will be erected in the Claremont Tract, and has been designed to contain ten rooms, three baths and sleeping porches. A garage will be erected in the rear of the property. Interior of the house will be finished in pine, hardwood veneer and white enamel. Hardwood floors will be used throughout except in the bath rooms. Plans provide for a central heating system, probably hot water. Open fire places and tile mantels are also specified. Bath rooms will be finished in tile and equipped with showers. Exterior of both house and garage will be covered with cement plaster on metal lath. Plans are being figured.

**RESIDENCE**—2, 1 story and base, frame, \$2,500 each. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, Mr. Charleston. These houses will be erected at the corner of 55th and Grove streets and each has been designed to contain five rooms and bath. Interiors will be finished in pine and redwood with some hardwood floors. Each living room will have an open fire place with tile mantel. Bath room will be finished in tile. Exterior of the houses will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. The owner is now purchasing all materials.

**SCHOOL**—1 story and base, brick and plaster, \$25,000. Oakland, Cal. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. The building will be erected on the old Tompkins School site and will replace the building recently destroyed by fire. There will be eight class rooms, teachers' rooms, assembly hall, and principal's office. Interior will be finished in pine with some maple floors. A central heating system, probably steam heat will be installed. There will be modern school plumbing. Exterior of the building will be covered with cement plaster. Plans are now being prepared. Further mention will be made of the work.

**SCHOOL RETAINING WALL**—Concrete. Cost not stated. Oakland, Cal. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Nissen Bros. of Oakland presented the lowest bid for constructing the concrete retaining wall at the Lockwood School at \$7,818 and will probably be awarded the contract. A complete list of the bids will be found under the heading of Oakland and Alameda County in this issue.

**RESIDENCE**—2 story and base, frame. Cost not stated. Piedmont, Alameda Co., Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Phillip Thayer. The dwelling will be erected on Mountain avenue and has been designed to contain eight rooms, two baths and sleeping porch. Interior will be finished in pine, redwood, hardwood veneer and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete

and figures are being taken by the architect.

**SCHOOL**—1 and 2 story and base, reinforced concrete, \$165,000. Oakland, Cal. Architect, John J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. The building will be erected at the corner of 32nd and Magnolia streets. The building has been designed for a fourteen-room school with a large auditorium, principal's office, departments of domestic science and manual training. Interior will be finished in pine with maple floors in the class rooms. Plans provide for steam heat, a modern system of ventilating, school plumbing and vacuum cleaning. Program clocks will be installed. Exterior of the building will be faced with cement plaster and pressed brick. Plans are being completed and will be out for figures in three weeks.

**LIBRARY**—1 and 2 story and base, brick and steel, \$50,000. Oakland, Cal. Architect, W. H. Weeks, 75 Post street, S. E. Owners, City of Oakland. Preliminary plans have been started for the first of three branch libraries to be erected in Oakland. The first building will be erected in the Fremont School District, and will be in the classic style. There will be two main reading rooms, stack rooms, work space and office for the librarian. Fine and hardwood interior trim will be used. There will be a central heating system, oil burning plant and vacuum cleaning. Exterior of the building will be faced with cement plaster or pressed brick and terra cotta. Plans are being prepared.

#### FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA.

BRIDGE—Reinforced concrete, \$20,000, Fresno, Fresno Co., Cal. Engineers, Federal Engineering Co., L. A. Owners, Fresno County. The Supervisors have authorized the Federal Engineering Company of Los Angeles to prepare plans and specifications for the construction of a bridge across Kings River above Sanger, on the new Fred Turner road. The structure will be of concrete construction, 400 feet long. On approval of the plans bids will be called.

BRIDGE—Reinforced concrete, Cost not stated, Tulare, Tulare Co., Cal. Engineer, County Surveyor, Tulare. Owners, Tulare County. Plans and specifications for a reinforced concrete bridge to be erected over Cottonwood Creek in the Fourth Road District have been completed and approved. Bids are now being taken and will be opened by the Supervisors on December 7th. Plans and specifications can be secured from the County Surveyor at Tulare.

STREET PAVING—Cost not stated, Fresno, Fresno Co., Cal. Engineer, City Engineer, Fresno. Owners, City of Fresno. Resolutions for the paving of K Street from Inyo to Isabella have been passed by the Supervisors. Bids will soon be called for on the work.

APARTMENT HOUSE—2 story and base, frame, Cost not stated, Visalia, Tulare Co., Cal. Architects, Brown & Davis, Fresno. Owner, L. Lucier. The building has been designed to contain four suites of three and four rooms. Each apartment will have wall beds and private bath room. Interior finish will be of pine, redwood and elm, with some hardwood floors. There will be a central heating system and hot water supply. Bath rooms will be finished in tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

HOTEL AND STORE—2 story and base, brick and steel, \$20,000, Fresno, Fresno Co., Cal. Architects, Bowen & Davis, Fresno. Owner, V. Jarmagian. The building will be erected on I Street between Inyo and Kern. There will be two stories besides the hotel lobby on the first floor. Upper floor will be arranged for a total of 22 rooms and several baths. Plans provide for steam heat and a hot water room. Patent store fronts are specified. Exterior of the building will be covered with pressed brick. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$1,500, Fresno, Fresno Co., Cal. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. The building will contain in the neighborhood of five rooms and one bath. Interior of the dwelling will be finished in pine and some hardwood. Hardwood floors will be used in the principal rooms. There will be tile mantels. A hot water heater will be installed. Tile wainscot will be used in the bath room. Exterior of the building will be faced with cement plaster. Plans are now being completed.

RESIDENCE—2 story and base, frame, Cost not stated, Wasco, Kern Co., Cal. Architect, Thomas B. Wiseman, Producers' National Bank Bldg., Bakersfield. Owner, Dr. E. S. Fogg. The dwelling has been designed to contain five rooms and an office. Interior of the dwelling will be finished with pine and some redwood. A brick or tile mantel will be installed. There will be furnace heat and open fire places. Exterior of the dwelling will be covered with cement plaster and shiplap. The plans are now being completed.

#### MARIN, CONTRA COSTA AND SONOMA COUNTIES.

REFRIGERATING PLANT—1 story, reinforced concrete, Cost not stated, Mare Island, Cal. Engineer, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. The time for opening bids on the refrigerating plant at Mare Island has been extended until December 5th. Bids were to have been opened on November 21st.

STREET CLEANING MACHINES—Cost not stated, Santa Rosa, Sonoma Co., Cal. Engineer, City Engineer, Santa Rosa. Owners, City of Santa Rosa. Bids for three street cleaning machines have been submitted to the City Council and were taken under advisement. The bids of Edward R. Bacon and Parrott & Co. of San Francisco were taken under advisement.

MUNICIPAL BATH HOUSE COMPLETION—Cost not stated, San Rafael, Marin Co., Cal. Architect, Thomas O'Connor, San Rafael. Owners, Town of San Rafael. Bids have been received for completing the second floor of the Municipal Baths. The bids of the two lowest men were taken under advisement, these bids being as follows: J. A. Kappenman, \$2,968, and Philip Le Corne, \$3,172.50.

RESIDENCE—2 story and base, frame, \$4,000, Madera, Madera Co., Cal. Architects, Coates & Traver, Head Bldg., S. F. Owner, A. J. Menasse. The building has been designed to contain seven rooms with bath. Interior will be finished in pine with some elm panels. There will be furnace heat. Brick or tile mantels will be specified. Tile wainscot will be used in the bath. Exterior of the dwelling will be faced with cement plaster. The plans are now being prepared.

SEWER WORK—Cost not stated, Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. Plans and estimates for the lateral sewers to be laid in the Bay View Park addition have been approved by the City Council. Bids for the \$50,000 sewer system in the Hermann addition will be opened by the Council on November 30th.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

COUNTY EXHIBIT BLDG., COST not stated. San Diego, Cal. Architect, none. Owners, Santa Clara and Alameda Counties. Plans and specifications for fitting up the Santa Clara and Alameda Counties building at the

San Diego Exposition have been adopted and clerk has been ordered to call for bids. Bids will be received until December 21st at 11 a. m. Plans and specifications, together with full information, may be had from the Clerk of the Supervisors, San Jose.

RESIDENCE—2 story and base brick. Cost not stated. Los Angeles, Cal. Architect, J. Martyn Haenke, Van Nuys Bldg., L. A. Owner, James Green. The dwelling has been designed for a twelve-room house with four baths, sleeping porches and a garage, and will be erected on Gresham Blvd. Interior will be finished in pine and hardwoods and white enamel. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile and equipped with showers. Exterior of the dwelling will be faced with pressed brick. Plans are being prepared.

CHURCH—1 story, gallery and base, frame and plaster. Cost not stated. Los Angeles, Cal. Architect, Robert L. Orr, Van Nuys Bldg., L. A. Owner, South Park Christian Church. The style of architecture will be modified Lombardic. The building will be 10 by 86 feet, with a basement 68 by 4 feet. The first story will contain a main auditorium 56 by 48 feet, Sunday school room, 34 y 40 feet, primary room 22 by 24 feet, 10 class rooms, parlor, pastor's study and choir room. There will be five large and five small class rooms in the gallery. The basement will contain a banquet room 6 by 46 feet, kitchen, two class rooms and furnace room. The building will be of frame construction with concrete foundation, tapestry brick veneer on the exterior, red tile and composition roofing, pine interior trim and floor art glass windows and interior dome tile mantel, heating system. Plans are nearly complete and the work will be done by subcontract and Day Labor.

CHURCH—1 story and base, brick. \$25,000. Riverside, Riverside Co., Cal. Architect, Thomas H. Power, Higgins Bldg., L. A. Owners, Roman Catholic Church. The building has been designed in the classic style and will cover an area of 50 by 150 feet. There will be a main auditorium, Sunday school rooms and study. Interior will be finished in pine and ornamental plaster. A central heating system will be installed. Marble, tile and art glass are specified. Exterior of the building will be faced with cement plaster. Plans are complete and figures are not being taken for the foundation work. Other contracts will be let shortly.

## Contracts, Awarded.

ORNAMENTAL LIGHTING SYSTEM, \$17,728. Santa Ana, Orange Co., Cal. Engineer, City Engineer, Santa Ana. Owners, City of Santa Ana. Contractors, P. O. Engstrom Co., Los Angeles. Contract price, \$17,728.

ROAD CONSTRUCTION—\$23,036.2. Santa Ana, Orange Co., Cal. Engineer, County Surveyor, Santa Ana. Owner, Orange County. Contractor, George Wiegand, Santa Ana. Contract price, \$23,036.26.

STREET PAVING—\$32,000. Riverside, Riverside Co., Cal. Engineer, City Engineer, Riverside. Owners, City of Riverside. Contractors, Johnson Shon Co., L. A. Contract price, \$32,000.

FIREIGHT SHED—1 and 2 story and 1/2. Los Angeles, Cal. Engineer,

Engineering Department Santa Fe R. R. Co., Kerchoff Bldg., L. A. Owners, Santa Fe Railroad Co., Contractors, William Simpson Co., San Diego. Contract price not stated.

## PORTLAND AND OREGON.

**POST OFFICE**—2 story and base, brick and steel. Cost not stated. The Dalles, Ore., Architect, Supervising Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids opened for this work show Geo. Jackson, 1013 living street, Portland, Ore., low man. His bid was \$72,978 for sandstone and \$76,000 for limestone. The contract will include the completed structure, including mechanical equipment, interior lighting fixtures and approaches.

**ROUND HOUSE**—1 story, reinforced concrete, \$140,000. The Dalles, Ore., Engineer, Engineering Department Oregon-Washington Railroad and Navigation Co., Portland. Owners, Oregon-Washington Railroad and Navigation Co. The company will expend about \$140,000 in the construction of a 70-stall roundhouse of concrete construction, with a complete new layout of switching tracks and several small buildings.

## SEATTLE AND WASHINGTON.

**OIL STORAGE TANKS**—Steel construction. Cost not stated. Mare Island and Puget Sound, Engineers, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Plans have been completed and figures are now being taken for furnishing nine large steel tanks for oil storage purposes. Each tank will have a capacity of 2,100,000 gallons of fuel oil. The tanks will be erected at Mare Island, Puget Sound, the San Diego Coaling Station and at Norfolk. Bids will be opened on December 21st. Plans and specifications can be secured from the Bureau of Yards and Docks.

**BRIDGES**—Steel and reinforced concrete. Cost not stated. Seattle, Wash., Engineer, City Engineer A. H. Dimock, Seattle. Owners, City of Seattle. Plans are now being prepared in the office of City Engineer Dimock and will be completed in early spring. The issue of \$829,500 in bonds made it possible for the bridges to be erected. The structures will be of concrete construction and will be constructed across the Lake Washington Canal.

### Contracts Awarded.

**WAREHOUSE**—9 and 16 story and base, reinforced concrete and steel, \$640,000. Seattle, Wash., Architect, George C. Nimmons, People's Gas Bldg., Chicago. Owners, Sears-Robuck Co. Contractors, Grant, Smith & Co., Henry Bldg., Seattle. Contract price, \$640,000.

## COMMERCIAL LIBRARY IN HANKOW

[Consul General Julian H. Arnold, September 16.]

Space has been set aside in the Hankow consulate general for a commercial library, in which American trade catalogues and other commercial publications will be filed according to the classification used by the Department of Commerce in the World Trade Directory. A catalogue of the American trade publications received in this office will be drawn up at the end of the

year and copied out to the agents

of Hankow, with invitation to call and make use of the library. American manufacturers and exporters should be careful to send their trade catalogues and to bear in mind that paper pamphlets are far more difficult than cloth bound publications to place on reference shelves.

### Trade Catalogues Wanted for Library

The manufacturers and other interests that might be advantageous to advertise through trade publication in this section of China, Japan or an exhibit along the line of merchandise planned.

A very large proportion of the products, especially the exhibit representing Alberta, have been collected. These include grains and grasses of every description that grow in the west. The north country, with its varied and wonderful animal life, will contribute its quota, while the minerals will come from British Columbia.

## A New Irrigation Company.

The California Farm and Irrigation Company is the name of a new corporation that was formed on October 31st under the Laws of California with its main office in San Francisco and its lands and project at Blythe, California.

The officers of this Corporation are: Hon. A. R. Kanaga, President, M. J. Terranova, Secretary, J. E. Ludy, Manager, and Pierre Zucco, Treasurer.

Mr. Kanaga, the President of this Company, is considered among the best informed irrigation men on the Pacific Coast. He is President of the American Irrigation Association which is the National Association of irrigation and land men. The Vice-Presidents of the American Irrigation Association are the Governors of all the States west of the Missouri River, and its numbers with its Advisory Board some of the most eminent men in all the west.

M. J. Terranova is a member of the firm of Terranova Bros., and is one of the best known plastering contractors in this City, having had large experience in general building and all kind of concrete work.

Pierre Zucco, Esq., is one of the leading consulting engineers, who does big things in the engineering line, and in the rebuilding of San Francisco. Mr. Zucco prepared the drawing for the steel work of many of the most prominent buildings in conjunction with the most prominent architects of San Francisco.

Mr. Zucco was also consulting engineer for the Pacific Gas and Electric Company of this City and assisted in building the concrete dam and reservoir canals, and line work east of Sacramento in the Sierra Nevada Mountains, the cost of which was over eight million dollars, and is the largest thing in its line ever carried out on the Pacific Coast. Sept. 15, 1914, monthly report published in Daily Commercial and Trade Reports for June 15, 1914. No serious disturbance or the transoceanic movement of New Zealand's products has resulted from the outbreak of hostilities in Europe. Several steamers of the region since were requisitioned for the transportation of troops, but supplies of shipping to relieve the situation by bringing the war-excess to meet the demand for

the New Zealand products. The New Zealand products are being shipped at Sydney, Melbourne and Auckland at Auckland. The New Zealand products are being shipped at Sydney, Melbourne and Auckland at Auckland. The New Zealand products are being shipped at Sydney, Melbourne and Auckland at Auckland.

### Share of United States in Import Trade

The following table shows the percentage of United States imports in the total imports of New Zealand in 1913.

Wool, 100 per cent. Meat, 100 per cent. Dairy products, 100 per cent. Fruit, 100 per cent. Manufactures, 100 per cent.

### Share of United States in Import Trade

The following table shows the percentage of United States imports in the total imports of New Zealand in 1913.

Wool, 100 per cent. Meat, 100 per cent. Dairy products, 100 per cent. Fruit, 100 per cent. Manufactures, 100 per cent.

The agitation against saloons and the liquor traffic has had a result in that the initiative in asking for restrictive regulations for the sale of intoxicating beverages. The worst evil in the liquor business arises from the need of the people engaged in the business. Thieves and dogies are maintained by crime and from liquor sold to incompetents, drunks, and women. And for these reasons the whole business is classed in the same category and many good people want even to prohibit the use of wines at meals in one's own household, and upon wine as something evil in itself. So at last the wine men themselves are coming forward with a request for regulation which is drastic in its nature and will no doubt look to proper regulation of the sale of intoxicants.

According to a circular letter published in the daily press they ask for the following legislation:

County option, except in cities having 500 or more inhabitants. In licensed territory, not more than one saloon for each 1,000 inhabitants, or major fraction thereof, exclusive of table beerhouses for hotels and restaurants.

Separate licenses to sell and fermented liquors, as distinguished from distilled liquors. No saloon license shall be issued to an individual, but only to property, the owner of the property, who, by heavy bond, to be responsible for the faithful observance of the law.

Unlawful for any wine, beer, brown, distilled or otherwise to have any person drive a motor vehicle.

Middie and Sunday. Anti-trait law. Prohibit laws concerning the sale of intoxicating liquors, which are to be published in the local or public press, and to be read in the presence of the court.

Such an amendment is being reported by the Legislature, and it is expected that it will be passed in the near future.

The New Zealand products are being shipped at Sydney, Melbourne and Auckland at Auckland. The New Zealand products are being shipped at Sydney, Melbourne and Auckland at Auckland.

The New Zealand products are being shipped at Sydney, Melbourne and Auckland at Auckland. The New Zealand products are being shipped at Sydney, Melbourne and Auckland at Auckland.

tion, the license shall be forever revoked and no other license shall be issued in its stead. If these things are secured it will remove most of the evils complained of by those opposed to the sale of liquor.

A process has been invented in Germany for tinning small articles by placing them in a centrifugal machine which is revolved in molten metal.

#### THIS ISN'T THE FLINTLOCK AGE.

When great grandfather fought in the Revolution, all he needed to do was to get down the old flintlock musket and start for headquarters. As soon as ten thousand men had collected at the headquarters they were ready to start against the enemy, a well trained army.

It would take about two years to build enough field guns to equip properly an army of  $\frac{1}{2}$  million men which the United States would have to put in the field under modern war conditions against a first class power. Neither an army nor a navy can be made in a day. The old conditions have passed away, and modern fighting has become to a considerable extent an artillery duel between engineers. The elaborate and delicate machinery necessary for successful operations takes years to construct.

Of course the oceans protect this country. They are its chief natural bulwark. So long as the navy is maintained in a state of decent efficiency, and a respectable army is ready to back it up, there will be no war.

The necessary measures for national insurance would not be expensive. Army officers suggest a regular army of only 150,000, enlisted for two years, with provisions for a reserve of men with military training, and for a second line of state militia that really amounts to something.

Such an establishment would be no temptation for a war of aggression. It would be a warning for other nations to keep off—a warning which recent events in Europe has shown to be far from superfluous.—Kansas City Star.

The report of Colonel Goethals states that the Panama canal has cost about \$74 million dollars up to date. This is a small item compared to the great cost of the European war. If the vast sums now being spent to murder men and destroy property were expended in some such constructive work as that in which Colonel Goethals has been engaged there could have been enough land reclaimed to have doubled the productive area of the globe. The Frenchman's idea of digging a canal to flood the Sahara desert from the Mediterranean sea could have been carried out. The jungles of the Amazon and Congo could have been conquered and the inaccessible places made inhabitable to man. But all this wealth is being smashed and when the war is over it will take generations to get back to the former position.

President Nicholas Murray Butler of Columbia University comes out with the statement that higher education should be limited to the physically fit. That is hardly a fair proposition as many people who have been denied good physique and good health have yet good mental capacity. And to deprive them of the advantage of higher

education would be working a hardship not only upon the individuals themselves, but deprive the world of the result of the labor of some of the brightest minds. Physical education and the physical endowment of man have much to do with the growth of the race. But the world progresses by mind development and not by brawn and the chief value of physical development is providing a sound body for the use of the mind.

was body and soul against them a daily had a cartoon by Fisher designed to hold the graft prosecution to contempt and ridicule, and dai continued its dirty insinuations and i nuendos until the attempted assassin tion drove it into a hole like a yellow dog. Now it is Heney's champion not perhaps because of the love i purity, or even because it might b popular, but because it may be able t vent Hearst's grudge against Phela and the Wilson administration.

The Exposition is about completed. Exhibits are arriving and the date o the opening will soon be here. Alread the itinerary of the President ha been given and the details of the opening will soon be made public. Soor the effect of the exposition should b apparent and it should bring money into the city in the not far distant future.

#### IT IS MR. LONDON'S JOB.

The new Socialist member of Congress, Mr. Meyer London of New York's East Side, says he will introduce a bill in Congress forbidding any workingman to marry any working girl unless she carries a union card. There has been much disposition among New York newspapers to scoff at Mr. London for his freak proposition.

Mr. London is probably enjoying a laugh at his critics' expense. These critics seem to believe that this new entrant into national politics should represent his constituents as they would represent his constituents. Perhaps he himself feels differently about it.

Politics and life would be a good deal duller and grayer than they are if there was one model for everybody.

It would be very dull and gray, indeed, to assume that Meyer London proposes his freak bill seriously—seriously in the ordinary sense. If he thinks that his job is to beat the fountains for the movement he represents (much as Keir Hardie insisted on wearing his cap in the House of Commons), is it not possible that he knows more about his job than the rest of us who have not got it?—Kansas City Star.

The Examiner is out with a criticism of Governor Johnson for his attitude in Alameda County investigation and as a necessary champion of Francis J. Heney in the premises. Whatever the merits of the controversy may be it is another evidence of the champagne-like changes of the Hearst papers.

When the graft prosecution was in progress in San Francisco and Heney and his backers were having the hardest kind of a battle, the Examiner

# BUILDING AND INTERIOR CANADIAN PACIFIC RAILWAY EX- HIBIT AT EXPOSITION.

[Consul Samuel C. Root, Calgary, Alberta, October 21.]

It is announced that the Canadian Pacific Railway, which has its headquarters in Calgary, and which is held, on the breaking out of the exhibition to abandon an exhibit of some proportions at the Panama-Pacific exposition, has now determined to make an exhibit along the line, originally planned.

A very large proportion of the specimens, especially the exhibits representing Alberta, have been collected. These include grains and grasses of every description that grow in the west. The north country, with its varied and wonderful animal life, will contribute its quota, while the minerals will come from British Columbia.

## A New Irrigation Company.

The California Farm and Irrigation Company is the name of a new corporation that was formed on October 31st under the Laws of California with its main office in San Francisco and its lands and project at Blythe, California.

The officers of this Corporation are: Hon. A. R. Kanaga, President, M. J. Terranova, Secretary; J. E. Ludy, Manager, and Pierre Zucco, Treasurer.

It will first use its water to generate power then turn the water into canals to be used for irrigation in the vast plains below in the lower valley.

Jacob E. Ludy is well known in Yuma, Arizona, where he built one of the largest irrigation systems in Arizona. Mr. Ludy will be the Manager of this Corporation and its Chief Engineer, while Mr. Zucco will be the Consulting Engineer.

Hon. A. R. Kanaga, who is President of the American Irrigation Association,

## TO INSTALL OIL TANKS.

Klernan & O'Brien, 1751 Mission St., have filed three applications with the Supervisors for permits to install oil storage tanks, two of them having a capacity of 1500-gallons and one of 2000-gallons.

The 1500-gallon tanks will be installed one at the northwest corner of Chestnut and Larkin streets and the other at the northeast corner of Capp and 16th streets. The 2000-gallon tank will be installed at the east line of Mason street 75 feet south of Sutter street.

## POSTAGE RATES TO NEW ZEALAND

[Consul General J. I. Brittain, Auckland, Sept. 26.]

The subject of short-paid postage on foreign mail matter is of especial interest here, where so many letters arrive from the United States with insufficient postage. Possibly the difficulty arises more from a general misunderstanding than from neglect on the part of the American letter writer.

Postage from the United States to New Zealand is 5 cents an ounce, while on letters from New Zealand to the United States it is 1 or 2 cents an ounce. When penalty postage is collected here it is never less than 6 cents on a letter bearing an American 2-cent stamp, hence such letters are frequently refused.

## PHILIPPINES TO EXHIBIT

Gov. Gen. Harrison has announced that the Philippine Islands will not withdraw from the Panama-Pacific Exposition at San Francisco or even materially reduce the size or importance of the exhibit which was originally intended. This statement is made to set at rest various rumors which have been circulated to the effect that the Insular Government would decline to participate in the exposition because of the unsettled trade conditions.

The Basilian Lumber Co., capitalized at \$375,000, with headquarters at Zamboanga, has recently been incorporated to conduct a general sawmill and lumber business in the islands.—Daily Consular and Trade Reports.

## ADVERTISING MATTER AND FOREIGN SHIPMENTS.

[Letter from an American firm to the Bureau of Foreign and Domestic Commerce.]

From our agent in Bombay we receive the complaint that he has within the last few months received a number of first shipments of various pieces of American manufactures which he has purchased in the United States and which manufacturers have sent to him with the hope of stirring up trade.

He complains especially that not one of these shipments contained advertising matter, not even a few copies for distribution among possible agents or to stir up an interest in the articles offered.

Our general manager has traveled a number of years in foreign countries and has had almost the same experience. An assortment of advertising matter should be sent with all sample goods to any foreign country.

### BIDS WANTED BY BOARD OF PUBLIC WORKS.

**Fourteen Sets of Bids Will be Opened by Works Board on November 25th.**

At the regular meeting of the Board of Public Works, next Wednesday, the Board will open fourteen sets of bids. Thirteen sets of these bids will be for street improvements and one for furnishing instruments for the Fire Alarm Central Station.

The bids to be opened are as follows: Improvement of Dwight street between San Bruno and Berlin, improvement of Filbert street between Baker and Lyon; improvement of Balboa street between 15th and 16th avenues; improvement of Milton street between Springdale and the Southern Pacific Company's right of way; improvement of Lakeview avenue from San Jose avenue to Lee and Summit avenues; improvement of Valley street between Castro and Diamond; improvement of the easterly half of Euena Vista avenue from Java street to Central avenue; improvement of Laidley street between Miguel and Castro; improvement of the westerly side of Larkin street between O'Farrell and Olive; improvement of Ridge Lane between Josiah and Howth; improvement of Howth between Ocean and Geneva avenues; improvement of the crossing at Geary and 34th avenue; improvement of 38th avenue between Balboa and Cabrillo, and for furnishing and delivering various instruments and parts for use in the Fire Alarm Central Station.

### TRADE SITUATION ON MEXICAN WEST COAST.

[Vice Consul A. Gordon Brown, Mazatlan, October 19.]

There have been several inquiries by American manufacturing firms as to the prospects for extending American commerce at Mazatlan on account of the war in Europe. This City's business is done by German, Spanish, and French houses. They have been interviewed and I have not found one which intends purchasing to any extent in the United States. This situation will probably change if the war continues long, and purchases may be made in the United States.

A German house here has sent a purchasing agent to Mexico City to replenish its stock, and the owner of the largest French house here says that he will purchase no more stock but sell what he has, the American prices being much higher than those from his own country. Purchases are made in Mexico City on account of the difficulties in exchange.

### ONE BATH TUB FOR 200 PEOPLE; ONLY IS TAKE A PLUNGE.

CHICAGO, Nov. 18. There are 1,594 persons, making up 377 families, living within one block in one of Chicago's tenement districts, according to a report by investigators of the Bureau of Social Survey.

The investigators found only eight bath tubs in the block, an average of one tub for each 200 persons.

The eight bath tubs are used by only 48 of the tenants. More than one-fourth of the families live in

three room apartments and have only one bedroom.

Wages of the householders were found to average \$12.27 a week and the yearly family income was said to be far below \$12 a week. There were 865 children living in the block.

### New San Francisco-South American Service.

The Agencies de Berna, of San Francisco, advises the Bureau of Foreign and Domestic Commerce that it has arranged to send a steamer from that port to South America on December 1. Should this trial voyage prove successful, a regular service southward from San Francisco is contemplated.

### SAN FRANCISCO COUNTY.

#### PLANS APPROVED FOR APARTMENT BUILDING.

Plans have been approved by the Building Department of the Works Board for the six-story Class "C" apartment house for George E. Bennett. The building will be erected on the south side of Eddy street 57½ feet east of Leavenworth and will contain fifty-nine apartments. C. O. Clausen is the architect.

#### MEETING OF BOARD OF PUBLIC WORKS.

Wednesday, November 18th.

Board awarded contract to State Improvement Company to pave at the intersection of San Jose avenue and Plymouth street. Contract price, \$1500.

Award contract to J. F. Dowling for paving Chestnut street between Laguna and Webster streets. Contract price, \$1600.

Reject bids submitted for the construction of a sewer in Fremont street from Brannan to the Ephraimadero.

Accept street work done by Finn & Treacy on Leese street between Mission and Park; intersection of Park and Leese, and on Leese between Park and Richmond.

The Board approved the following plans and specifications:

Plans and specifications for the construction of fire escapes and the vacuum cleaning system in the San Francisco Hospital.

Plans and specifications for the construction of the garage building of the San Francisco Hospital. The Board has requested the Supervisors to adopt ordinance calling for bids on this work. The estimate cost of the building is set at \$73,000.

The Board also approved the plans and specifications for the elevator system control in the Main Group buildings of the San Francisco Hospital and bids will be received until November 25th.

### A SUBSTITUTE FOR CEMENT.

In Turkey, where cement is not used or hardly known, a substitute has been found that has met with rather good results when applied in exposed places, in filling crevices in water pipes, covering joints in stone floors, in fountains, and for numerous other purposes where cement would be required. The mixture is as satisfactory in water as in exposed places,

but it must be allowed to become thoroughly dry before it is submerged.

The mixture is slaked lime, linseed oil and cotton fiber. Generally a hollowed-out stone is used, although a flat, hard surface will answer, and the process is started by pouring the oil on a handful of cotton, after which the lime is dusted in. It is then kneaded until the whole is thoroughly mixed and about the consistency of dough. The more it is kneaded the better it becomes.

### BURNS MUCH LIME.

Pennsylvania has nearly one-half of the total number of lime producers in the United States, but its production is about 25 per cent of the total quantity and 20 per cent of the total value. Lime burning as an industry is scattered pretty well over the state. In 1912 the production amounted to \$49,159 short tons, valued at \$2,679,420; in 1913 it increased to \$52,927 tons, valued at \$2,743,197. As an indication of the scattered character of the lime-burning industry, it is stated by the United States Geological Survey that the average value of the lime production per establishment in Pennsylvania in 1913 was about \$5,500.

### STEEL PRODUCTION IN 1913.

The total production of all kinds of steel ingots and castings in 1913, according to the American Iron and Steel Institute, whose figures are accepted by the United States Geological Survey, was 31,500,874 long tons, against 21,399,931 long tons in 1912. The production of steel by the electric process in 1913 amounted to 30,180 tons in 1912. In 1905 only 55 tons of electric steel was produced. On December 31, 1913, the number of completed plants which were equipped for the manufacture of steel by the electric process was 19, an increase of 5 over the number a year previous.

### AN INTERESTING VIEW OF SKYSCRAPER BUILDINGS.

A powerful plea, urging that the building of skyscrapers should cease, was made at the recent convention in Duluth of the National Association of Building Owners and Managers, by Mr. Wentworth, of Boston, secretary of the National Fire Protective Association. In concluding his remarks the speaker said: "The traffic on the elevators of New York is almost as great as the horizontal traffic. If New York City should have an earthquake

just enough of a shock to break water and gas mains and to snap electric wires—the loss of life would be appalling. Imagine the panic if such a disaster should come with 100,000 persons in the subways, or when occupants of great buildings were attempting to get out. A great conflagration, such as is possible in New York, would bring the same disastrous results as an earthquake, and choke the subways."

Shown together in an automobile museum in London are a steam car built in 1869, a steam tricycle dating from 1881 and a gasoline car invented in 1905.

\* Examination of the system is proposed to work in the state printing plant at

The consumer always pays the tax, no matter what its nature. Whether we pay it indirectly or directly we pay it and must pay it. The difference is that when we pay it indirectly the people do not distinguish it as in the case of direct taxes. So the question of tariffs is an economic one—pure and simple, and the matter of protection is to determine what industries and what industries we are going to protect. We have protected the pig-iron steel industry until it is a world production giant, and I will protect an industry why not a country? Manufacture itself, self-sustaining. Manufacturing, protection, the right of protection, everybody has the right to protect the whole country against the grab bag which is the tariff. The tariff influences the life of the Government.

And we have the right to change and to amend the tariff at will. It is subject to popular approval and disapproval by the people.

## City Manager Plan of Municipal Government.

By Paul E. Kressly, City Manager of Inglewood.

An Address Delivered at the 17th Annual Convention of California Municipalities, Held at Hotel Del Monte, October 12-16, 1914.

Mr. Chairman and Gentlemen: It has just been stated by our President that the city manager plan of government is new. So it is, and we are the first to try the city manager plan in this State. I have had about seven months' experience. In writing my paper, I have subdivided it into two parts. First I will discuss the theoretical city manager plan, and then I will give you the practical results, so far as my own experience goes.

Sweeping innovations in American city government seem to have their origin or gain their impetus in the administrative weaknesses which are made evident by floods. Thus the commission plan originated in Galveston in 1901, after the flood of the previous year, and similarly the city-manager plan, already adopted by a few small cities and towns, suddenly came into nationwide prominence when it was accepted as a fundamental modification of the commission plan at Dayton, Ohio, after the floods of 1913.

The commission form of government has spread with surprising rapidity throughout the United States and a peaceful revolution, in over three hundred cities has swept away the boards of aldermen, mayors, and a host of minor officials and has set up new municipal governments on a plan so simple, that the services of the "political boss" are not required to direct them. The whole nation looks on with amazed enthusiasm, while the people in these towns not only get control of their government, but keep it, election after election.

The commission form of government has placed into the hands of the people an effective instrument of control; a governing organization which is continuously exposed to the full glare of public opinion, which really came from the voters, and which was sincerely anxious to obey them. While this form of government is a vast improvement over the form in general use up to seven or eight years ago, there is unquestionably room for still more improvement. In some of the cities it has proved very successful, while in others it has been a complete failure. This must not be regarded as a defeat in the form of government, but rather due to the inefficiency of the members composing the commission. In some of these cities where the commission government has superseded administrations which were not so thoroughly inefficient, and where there was not quite such a broad opportunity for improvement. It is in such cities where the weaknesses of commission government are beginning to appear in a very striking way. Take for example, Wichita, Kansas, where as everywhere else, the commission plan was hailed five years ago as a "business plan" of city government which would settle all the difficulties under which the town has been laboring. Recently the commission in this city has authorized the issue of \$8,000 in five year bonds to cover current deficiencies. After four years of the new rule,

that does not look like good business. A little searching into the local situation reveals certain things which are directly or indirectly responsible for this condition.

One of the members of the commission is an ex-street laborer. This, of course, is an honest calling, but can one be sure that it gives a man quite the preparation for managing one of the departments of a city as important as Wichita? There was doubtless reason for electing him, for the laboring people had an unquestionable right to select one of their own men to represent in a city's governing body. The man in question has a reputation for integrity and honesty, but even commission government has not made him a good business manager.

Here, then, is one trouble with the commission plan which the Wichita incident brought out in a graphic way: It is only by accident that you can secure five men who will be at the same time perfect representatives of a recognized division of the people, and at the same time properly equipped for administrative service.

If these are illustrations of the weakness of the commission form of government, what then, is the substantial and permanent contribution of commission government to the city problem? The one great thing it has done, is to demonstrate beyond a shadow of a doubt the wisdom of giving over to a single elective governing body all the municipal powers. It has given the people a workable instrument, so far as general regulation is concerned, but it has failed to give the governing body the means with which to translate the general will of the people into detailed acts of government in the most effective way. A five-headed government carries with it the possibilities of friction, which leads to inefficiency, which in turn, leads to waste and even corruption. Furthermore we cannot secure municipal experts by the process of popular election.

Commission government in the old sense, then, is a five-headed affair. It is not always intended to be such, but it is so regarded by the average citizen, and so it works out in practice.

The city manager plan does away with this five-headedness of municipal administration and substitutes a single head, not with advisory powers merely, but, with certain safeguards, with the powers of administrative "life and death" through actual control of appointments and removals.

The chief executive or city manager is not an elective officer, but is appointed by the council; he therefore does not divide responsibility with the council, but is subordinate to it, he need not be, at the time of his appointment, a resident of the city, but may be chosen from anywhere in the country; he is not chosen for a definite term, but holds office so long as he gives satisfaction to his superiors.

The controlled-executive plan filters everything through a group. It re-

duces the personal equation. Without loss of administrative unity, it abolishes one-man power.

This plan corresponds to the general manager under the board of directors in a business corporation. It gives the stability of the combined judgment of many men on matters of policy, but leaves execution to a single-headed controlled executive establishment.

A city ought to have one government, not several. Pulling and hauling, deadlocks, friction and delays, trading influence and the need of a boss to hold the ramshackle together and make it progress—all result from two-headed government.

For the highest efficiency we must put the chief administrative official, as well as the subordinate officials of the same sort, on a professional basis, which means simply, that we must leave his selection and his indefinite retention to some person or body that is in a position to examine his work closely and therefore judge of it intelligently, and that we must also take the matter out of politics not by incessantly harping on the desirability of doing so, but by relieving him of all except purely administrative duties. That is not saying, you will notice, or even implying that "the people cannot be trusted to choose" the chief administrator; it is implying merely that they are not in a position to do so to advantage, and that if the official in question is given the veto and other policy-determining functions, neither the people nor anybody else can be expected, no matter how well they realize the advantage of experience in administrative work, to do anything butoust him as often as his opinions are not in conformity with those of the majority. We can have the highest efficiency in city government as soon as we are ready to take steps obviously necessary to get it.

Thus the council is the most stable basis for the managership to rest on. Moreover, if the city manager is not to be elected by all the voters, and if he is to be kept in office indefinitely so long as he is satisfactory to those who appoint him, as is required in the interest of efficiency, it is obviously important, in the interest of democracy, to entrust his appointment and his retention to the one body in the government that can be made truly representative of the whole electorate. Then efficiency and democracy, the two fundamental requirements of the ideal city government, from a theoretical point of view, are satisfied by the city manager plan, and accomplish all that its advocates maintain.

Whether this theory works out in practice is a question in which we are all interested, and it is that part of the subject that I will now take up and give you some practical information from my own experience as city manager of Inglewood for the past seven months, having been appointed on March 2nd of this year. Before proceeding further I will read that sec-

of the ordinance which defines my duties and powers as follows:

To see that the laws and ordinances of the city are enforced.

To exercise control over all the departments of the city and direct the work of all appointive officers.

To employ and dismiss all city employees.

To superintend the construction of all public work within the said city.

To approve or disapprove the petition for the purchase of any articles for the said city by any department or officer, before the purchase is made.

To attend all meetings of the Board of Trustees and to recommend to the Board for adoption such measures as he may deem necessary or expedient.

To keep the Board of Trustees advised as to the financial condition and needs of the city; and

To perform such other duties as may be prescribed by ordinance or resolution of the Board of Trustees; provided, however, that any and all acts of said city manager under this ordinance, shall be subject to the approval or control of the Board of Trustees of the City of Inglewood, and they will have full power to correct and to take any action taken by him under this ordinance whenever they shall deem it proper to do so; and provided, further, that the Legal Department of said city and City Attorney are hereby expressly excepted from the operation of this ordinance.

The duties and powers being thus defined, now arose the question—What are to be followed to insure the success of my administration?

My plan of selection I outlined was based by two ideals—efficiency and economy. These were the basis upon which the superstructure of my organization was erected.

I determined that the requisites of employees should be efficiency, economy and loyalty. That all employees who possessed these qualifications should be retained regardless of their political faith.

With the requisites thus set forth, I proceeded to formulate plans and analyze the problems that confronted me to find the best way, not by judgment alone, but by careful, thorough, painstaking investigations of all details of the various departments, thereby familiarizing myself in a general way with their work and which would enable me to at once detect any inefficiency and correct the same by setting up tentative standards of performance, by better methods of performance, by inducing them to attain these standards, or equipping them with a clear, complete and exact knowledge of the best and most expeditious way of doing the work with the least possible expenditure of material, capital and labor.

In all public work we are confronted with an idea that is grounded in the minds of most men that they are not required to do as much work as for a private corporation; that they need not have any particular interest in their work; that working hours need not be observed; that they can be absent from work, and at the same time receive their wages; that they can waste material and supplies, because the city pays for them. They labor under the text of the old political saying, "to

the victor belongs the spoils" and are therefore justly entitled to be given employment irrespective of the quality or quantity of the work performed or of their value and worth to their employers, or interest taken in the business affairs of the city.

An account of having served as city engineer for several years, I was familiar in a general way with the weaknesses of the various departments, and was therefore in a position to devise measures which would eliminate these ideas and practices, by requiring all employees to strictly observe office hours, to get permission before leaving their regular duties, that no supplies, materials, machinery, tools, etc., could be purchased without an order signed by the City Manager, and by requiring all employees to fill out daily time cards, showing the number of hours worked, together with a description of such work and the correctness thereof verified by the J. K. of the head of the department, and turned in daily to the City Clerk. These rules are strictly enforced and it is impressed upon the minds of all employees that their indefinite retention in office depends solely upon the efficiency and skill with which their work is performed.

Formerly there was a great deal of waste in the purchasing of supplies, due to a lack of a proper system. Employees would purchase supplies regardless of cost, and have it charged to the city, and when the bills were presented, frequently no one remembered the purchase. This was a very inefficient method and gave the City Clerk no opportunity to check the amounts and charge them to the proper account. Furthermore, supplies and materials were purchased whether they were needed or not, and the various departments continued incurring expenses by purchasing supplies, machinery, etc., until the city treasury was drained.

This condition was controlled by the adoption of a budget, thereby limiting the expenditures of all departments within the actual revenues of the city, and requiring departments to submit at the end of every month a detailed report which enables me to closely follow the activities of all departments. An accounting system was installed which provides balance sheets of all accounts, thus enabling the City Clerk to furnish me with a complete report of all departments at any time. In the departments where it was practical a unit cost system was installed for the purpose of comparison, and fixing standard methods of performance.

I wish to call your attention to another important change I introduced in the matter of handling complaints. Formerly, when a citizen objected to some thing done by a city officer, he would go to one of the trustees and complain, frequently with the injunction that his name was not to be mentioned, then the trustee would bring the matter up at a board meeting, and the official, not knowing who made the charge, would be in a very bad position when it came to defending himself. I made a ruling that all complaints of any nature must be made in writing, containing the signature of the complainant, so that the employee will have full knowledge of all details of the charges and can therefore de-

fectly properly. The number of complaints received and it is found that they are not so numerous as they once were, and that they are not so serious as they once were.

In order to develop better cooperation I have held regular conferences with the heads of the various departments, where all important matters are considered and the plans and activities of each department are discussed and planned.

These conferences have reaped the interest and enthusiasm of every employee, and today there is not one but what is striving to place the business affairs of our city on a higher plane, and to give you an idea of our success I will read the percentage of reduction in the expenditures of the various departments under the city manager plan for the past six months compared with the expenditures for the same period during the past three years, as follows:

Printing and supplies, a saving of 24%  
City hall maintenance, a saving of 17%  
Fire department, a saving of 29%  
Police department, a saving of 21%  
Street cleaning, a saving of 27%  
Recorder's department, a saving of 36%  
Street maintenance and repairs, a saving of 25%.

The revenues of the city have been increased considerably by enforcing ordinances and by greater vigilance with peddlers, etc.

Some of the most important being:  
Peddling licenses, an increase of 12%  
Dog licenses, an increase of 52%  
Fines for speeding, an increase of 35%.

Receipts from renting out road machinery have averaged \$90 per month.

The building, plumbing and electrical inspection formerly received all fees collected. I have placed this office on a salary and the receipts of this department now add a substantial amount to the revenue of the city.

A question frequently asked is, whether local public work can be constructed as cheaply and efficiently by city government as by private corporations.

In my opinion this question depends in no small measure upon the form of municipal government and its operation in practice. When it is the chief object of the city administration to bedevil the labor that has passed its zenith of usefulness in other fields, when the men are not trained for the positions they are filling, then the city government cannot compete with the private corporation, but when the chief object of the administration is to employ only a trained, able, efficient force, who can perform a day's work and give the city a dollar's worth of work for every dollar they receive, then the city can out-perform any private corporation, and show the people a new method of doing the work of the city.

That is the theory of the city government as practiced by the city manager plan. It is a system of government that is based upon the principle of efficiency and economy, and it is a system of government that is based upon the principle of public service.

yards of fill, average haul 300 feet, 115 lineal feet of 60-inch diameter No. 12 gauge galvanized corrugated iron pipe, 16 cubic yards of concrete, 110 lineal feet of curb, and 165 square feet of gutter. The lowest bid received from the contractors for executing the work was \$1,712.00. Bids were rejected and I proceeded to construct the work in question with the city's force at a cost of \$1,395.60, thereby saving the city \$316.40, plus the wages of an inspector, besides giving employment to residents of the city.

With the city manager plan of municipal government many things are possible, because he can keep operating departments running in harmony, cutting out waste of time and effort. The various city departments can be made to assist each other in numerous ways. Take, for instance, the street superintendent and city engineer, where heretofore these two departments were distinctly separate, they are now consolidated into one. So that the engineer who designs the work can also supervise the construction of the same and appoint his own inspectors. The result is better work in every respect, and the engineer can see that his designs are properly executed. This procedure is especially effective in small cities where the salary of the street superintendent is usually not sufficient to obtain the services of a competent man, who is qualified to supervise the construction of new improvements, but sufficiently qualified to supervise the cleaning, maintenance and repairs of streets, etc., under the direction of the engineering department.

Thus far I have discussed in a general way the methods and systems designed for the efficient and economical administration of the city's business and the success resulting therefrom, but I have failed to discuss that part of our government which is weak in certain respects, although it is not within the power of the board of trustees to correct the same at this time. This apparent weakness is that the city clerk is elected instead of being appointed by the city manager, although we are fortunate in having an ideal city clerk at the present time, but what will be the result, when his term expires and the voters should elect an incompetent man for this important position? The city clerk is an official who should be appointed by the city manager, so that if he is a competent man he can be retained in office; if, on the other hand, he is elected by the people, he may work in harmony with the city manager or not, as he may see fit. He cannot be removed by the board of trustees or the city manager, and without his cooperation the city manager cannot succeed. It is an office that requires intelligence, care and clear judgment and should be in the hands of a competent man. But we cannot expect to attract the services of a man qualified in every respect, without paying a substantial salary. I consider it false economy to sacrifice efficiency for the sake of saving a few dollars in salary. When men develop efficiency the cities can well afford to pay them, and in the end it will prove a profitable investment. This applies to the employees in every department.

I have frequently been asked the question, "From what organization or

calling shall this important position of city manager be filled?" My answer would be, that it should be a civil engineer, preferably with municipal experience, and should also possess the additional qualifications of an economist, a financier and have executive ability. And in answering in this manner I felt that I was fully justified in favoring the members of my profession because they are recognized as an important factor in municipal administration. How important the city manager appeared in the minds of officials and citizens of Dayton, Ohio, and how determined they were to have an engineer of high standing and how willing they were to pay for his services, have all been given wide publicity by securing the services of Henry M. Waite, then city engineer of Cincinnati, to fill this position at no paltry compensation. What other profession has men who are better qualified as municipal experts than the engineering profession? Are not the members of the engineering profession, in the course of their education, field work and research work peculiarly qualified for executive duty, developed by their training and experience?

Engineering is perhaps as much a matter of common sense as of education, and the engineer to succeed must have both. Therefore a capacity to get at the facts in any case, supplemented by good judgment, are predominating traits, characterizing this profession more prominently as essentials than is the case with any other profession or calling.

Before dismissing this subject, I cannot refrain from touching upon another point not mentioned, and that is, whether those American cities which have progressed as far as the city manager plan, have yet got far enough away from past traditions and practices to keep any one city manager long enough in office to give either him or the plan a fair test.

In conclusion I wish to express the hope that some of the cities who have adopted the city manager plan of municipal government will give it a fair trial and I feel certain that they will have the phenomenal success attained by our private corporations which operate under this form of organization.

**Editor's Note in Pacific Municipalities.**—Inglewood, a small city near Los Angeles, was the first municipality in California to inaugurate the "City Manager" form of government. The system was adopted in Inglewood by ordinance on March 2nd, 1914, with Mr. Kressly as manager. That the plan has proved a success is demonstrated by the fact that during the past seven months Inglewood has accomplished more work and achieved better results at a saving of about thirty per cent (\$20,000) in cost. Here is something for other cities to think about.

#### WILL PLAY BASEBALL GAME.

Architects and Contractors to Meet on the Diamond for Benefit Christmas Jinks.

On Sunday, December 6th, a match game of baseball between picked nines from the members of the San Francisco Architectural Club on one side

and the General Contractors' Association and the Builders' Exchange the other, will be held at St. Ignace Field, Grove and Shrader streets, commencing at 10 o'clock a. m.

The names of the men composing the opposing teams will not be made public until a few days before the match.

The Architectural Club members have had this stunt slated for a long time and have been secretly bawling their team, so it behooves the Contractors team to look to their laurels.

The tickets are only 15 cents. A big attendance is expected.

#### WALTER E. LUCAS LAID TO REST.

The funeral ceremonies of the late Walter E. Lucas was held yesterday from the Masonic Temple in this city.

Mr. Lucas was a familiar figure on the floor of the Builders' Exchange ever since the Exchange was organized. As the pioneer dealer in Paris in San Francisco Mr. Lucas enjoyed the reputation of honesty in square dealing that any man should be proud of.

His illness was of very brief duration.

#### WILL PREPARE ESTIMATES.

The Board of Public Works has instructed the Superintendent of Streets to prepare estimates on the cost of construction of Antonio street, between Ellis and O'Farrell streets, Ringgold street, between 8th and 9th.

#### CORRECTED LIST OF FIGURES.

In reporting the list of bidders furnishing and erecting the structural steel for the new Ferry Post Office a typographical error made the bid the Golden Gate Iron Works read \$924 instead of \$18,924.

The low bid was put in by Pacific Rolling Mills at \$18,395.

#### SAN FRANCISCO ARCHITECTURAL CLUB.

##### Notice of Business Meeting.

December 2, 1914 at 8:15 P. M. No. 1000 Market Street. Business Meeting of Officers. Announcement regarding Xmas Jinks and Ball Game. Other important business.

ALBERT R. WILLIAM  
Secretary, S. F. A. C.

#### THREE HOUSES FROM ONE TREE.

The Canyon Lumber Co., Ever Wash., recently received at its plant a single fir tree (in four sections) which is enough lumber to build three small five-room bungalows, or two one-half bungalows of the average size. The big tree was shipped from Robe, near where the Johnson-D Lumber Co. took it from the woods and was loaded on four cars.

#### FEES COLLECTED FOR BUILDING PERMITS.

During the month of October the Bureau of Building Inspection of the Board of Public Works collected \$29,800 on building permits. For same month there were 613 permits issued.

# ADVANCE NEWS

Classified according to Character of Work

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, story and base, reinforced concrete, \$45,000. Architect, A. J. Laib, Russ Bldg., S. F. Owner's name withheld. The building will be erected in the Fifty Vara District and has been designed to contain a large number of two and three room suites with private baths and wall beds. There will be steam heat, an automatic elevator, hot water supply and vacuum cleaning system. Bath rooms will be finished in tile and will have composition floors. Marble and tile wainscot will be used in the entrance. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are now being taken.

**SEATTLE, WASH.**—Apartment house, 5 or 6 story and base, Class A construction. Cost not stated. Architects, J. L. Pitman, associated with W. M. Somervell, White Bldg., Seattle. Owners, J. L. Pitman and associates. The building will be erected at the southwest corner of Harrison and Federal streets on property covering a large ground area. Details of the building have not been worked out, but Mr. Pitman assures us that the building will be one of Seattle's largest and most modern apartment houses. Construction will be fireproof. Further mention will be made of the work.

## Contracts Awarded.

**SAN FRANCISCO**—Apartment house, 3-story and base, frame, \$26,000. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, J. D. Isaacs. Contractor, Charles Wright, 25 Stockton street, S. F. Contract price, \$26,000.

## BANKS

**HERMOSA BEACH, LOS ANGELES CO., CAL.**—Bank, 2 story and base, brick and steel, \$30,000. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owners, First Bank of Hermosa Beach. The building will be erected at the corner of Pier and Hermosa avenues, and will cover a ground area of 36 by 95 feet. The design is in the classic style. The main floor will contain the banking rooms, several stores and offices for the Pacific Electric Railways. Interior finish will be of pine and hardwood with some ornamental plaster in the banking room. Special coin and safe deposit vaults will be installed. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

## BONDS

**RICHMOND, CONTRA COSTA CO., CAL.**—The Playground Commission has filed a recommendation with the City Council of Richmond for an expenditure of \$3,200 for the installation of exercising apparatus on the Washington and Stege school grounds and a bond issue of \$150,000 for the

purchase of six sites for municipal playgrounds.

**COLTON, SAN BERNARDINO CO., CAL.**—With a vote of 611 in their favor, the proposed bond issue of \$30,000 carried. The proceeds of the election will be used in the construction of a new grammar school building. No architect has been selected to design plans for the building, which will be constructed on the site of the present Lincoln school building.

**SUSANVILLE, LASSEN CO., CAL.**—By small majorities the proposed \$50,000 municipal water system bond issue and \$10,000 street improvement issue were defeated.

The municipal water system issue was defeated by a vote of 126 to 162. The issue for the improvements of streets lost by a vote of 141 in favor of the issue and 144 against.

**WINTERS, YUBA CO., CAL.**—After taking citizens into their confidence at a public meeting, the Winters School Trustees have decided to call a special bond election on December 19th for the purpose of voting bonds of \$50,000 to build and equip a modern high school building.

Architect W. H. Weeks of San Francisco has been engaged to prepare the plans and superintend the construction.

**CARUTHERS UNION HIGH SCHOOL DISTRICT, FRESNO CO., CAL.**—A bond election will be held in the Caruthers School District on December 18th for the purpose of voting bonds in the sum of \$30,000 for the erection of a new high school building.

C. V. Phelps, H. R. Lindsay, A. W. Johnson, T. L. LaRue and J. C. Gallagher are the trustees of Caruthers School District.

**SAN FRANCISCO, CAL.**—The Railroad Commission has granted the Southern Pacific Company the right to issue bonds in the sum of \$1,125,000 for the purchase of additional equipment.

The proceeds will be used in the purchase of 30 locomotives, 20 steel passenger cars and 30 steel electric motor cars for suburban traffic.

**WINTERS, JOINT UNION HIGH SCHOOL, SOLANO CO., CAL.**—The Board of Trustees of the high school district have decided to hold an election December 20th, at which will be submitted to the voters a proposition to bond the district for the sum of \$50,000.

Proceeds of the sale will be used in the construction of a new high school building for the district. The Trustees are Wm. Baker, John F. Graham, C. M. Cooper, A. Bruck and F. W. Wilson.

**VACAVILLE, SOLANO CO., CAL.**—An ordinance fixing December 15th as the date for the holding of a bond election for the voting of bonds in the sum of \$30,000 has been passed.

The money will be used for school improvements.

**MONTAGUE, BUTTE CO., CAL.**—The \$15,000 Montague Union High

school have been voted to build a new building and to purchase equipment.

**PORTLAND, ORE.**—The proposed inter-state bridge, to be built between Portland, Ore., and Vancouver, Wash., will probably be authorized at an early date. Bonds in the sum of \$750,000 have been proposed by Multnomah and Clarke counties and nothing remains to hinder the work.

Encouraged by the recent sale, the bridge commission has decided to proceed to sell the balance of the bonds, which amounts to \$1,000,000.

**HOOD RIVER, ORE.**—The question of voting bonds in January is now under consideration by the county of bonds. The bonds voted will be used in the construction of good roads.

**FRESNO, ARIZ.**—Architects have submitted plans for the proposed court house, but as no money is available from the sale of bonds, no plans have been accepted.

**PORTLAND, ORE.**—It is thought that the County Commissioners will recommend a bond issue of approximately \$1,000,000 for the purpose of placing a hard-surface pavement on the Columbia Highway.

**BAILEY, IDAHO.**—The question of voting bonds in the sum of \$35,000 for the purchase of a water system was defeated at an election held in this city recently.

**LEWISTON, MONT.**—Final returns show that bond issues of \$10,000 each for constructing high school and dormitory buildings here were defeated.

**SEATTLE, WASH.**—All bids for the bonds of \$100,000 for the Port of Seattle improvements recently held have been rejected by the Commission.

New bids will be received until December 5th.

## BRIDGES, DAMS AND HARBOR WORK.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Wharf and channel work, Cost not stated. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Work on a ferry system to handle freight and traffic between Martinez and San Francisco will be started within ninety days, the contracts for the work having been let. The contract awarded to the Western Reclamation Co. for the designing of a canal 2,000 feet long and 20 feet in width, which will lead up to a wharf which will be 300 feet in length with a shed of 70 feet by 100 feet on all water side facilities, is estimated at \$150,000. The contract for the construction of the canal is estimated at \$1,000,000.

The estimated cost of the building of three locks on the first section of the

State Highway from Pimole to San Pablo Bay, show Karl M. Nelson of Martinez low at \$7,807 for all three structures. Following is a complete list of bidders and their bids:

Karl M. Nelson—\$3,016, \$3,038; \$1,692, total, \$7,807.

R. W. Moller—\$3,543, \$1,044, \$1,984; total \$9,571.

Ralph L. Gorrill—\$3,390, \$4,150, \$2,460; total, \$10,000.

F. F. Moore—\$1,265, \$3,785, \$2,389; total, \$10,044.

Pacific Coast Construction Co.—\$3,846, \$1,244, \$2,691; total \$10,781.

M. M. Concanon Co.—\$3,923, \$4,495, \$2,717; total, \$11,110.

G. H. Fields—\$3,111, \$3,564, \$2,146; total, \$8,824.

D. McDonald, one bid only, across Garrity Flat, \$3,750.

Henry Layaz, \$3,361, \$3,970, \$2,616; total, \$9,982.

J. C. Rogers—\$4,457, \$5,758, \$2,916; total, \$14,173.

Blake Bros.—\$4,100, \$4,400, \$2,700; total, \$11,200.

FRESNO, FRESNO CO., CAL.—Bridge, reinforced concrete and timber. Cost not stated. Engineer, County Surveyor, Fresno. Owners, Fresno County. Plans have been completed and have received the approval of the Board of Supervisors for the bridge over Kings River. Bids are now being taken and will be opened on December 8th. Plans and specifications can be secured from the County Clerk at Fresno.

PORTLAND, ORE.—Bridge, steel and reinforced concrete, \$1,750,000. Engineers, Howard & Harrington, Portland. Owners, Multnomah and Clarke Counties. Bids for the proposed interstate bridge to be built between Portland and Vancouver, Wash., will probably be authorized at an early date. Bonds in the sum of \$250,000 have been disposed of by Multnomah and Clarke Counties. According to Commissioner Lightner, the commission will ask for bids on units of the work, instead of a general contract. E. E. Howard, associated with Mr. Harrington, is due to arrive in Portland shortly with the completed plans of the bridge. The structure will cost about \$1,750,000.

SEATTLE, WASH.—Bridge, steel leaf bascule type, \$450,000. Engineer, City Engineer A. H. Dimock, Seattle. Owners, City of Seattle. The structure will have a span of 400 feet, with two approaches 1,500 feet and 1,200 feet, respectively, and will be 40 feet wide, providing for two electric car line tracks, two roadways and two 6-foot sidewalks. It is planned to let the work in three contracts, one for the approaches, one for the two concrete piers and the other for the steel span and lift. It will take about one and one-half years to complete the work. Bids for the work will be called on the approval of the plans by the Department of Works.

RICHMOND, CONTRA COSTA CO., CAL.—Wharf, reinforced concrete and steel, \$260,000. Engineers, Haviland & Tibbetts, Alaska Commercial Bldg., S. F. Owners, City of Richmond. The wharf will be 700 feet long and 150 feet wide and will be carried on concrete piles. There will be a steel shed besides railroad tracks and loading machinery. Plans are complete and figures are being taken. Bids will be opened on December 23d. Plans and

specifications can be secured from the engineers.

RED BLUFF, TEHAMA CO., CAL.—Bridges, timber construction. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Plans prepared by the County Surveyor for the construction of two wood bent bridges on the Tehama Cemetery Road have been adopted by the Supervisors and bids for their construction will be taken until December 9th. Plans together with full information may be had from the County Surveyor at Red Bluff.

MODESTO, STANISLAUS CO., CAL.—Bridges and syphon, concrete construction. Cost not stated. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Plans have been completed and approved for the construction of three bridges and one syphon. The bridges will be erected over Main Canal of the Turlock Irrigation District, over Lateral No. 2 of the Turlock Irrigation District and over Dry Creek about one mile southeast of Montpelier. The syphon will be erected on the Keyes Road. Bids will be opened by the Board of Supervisors on December 15th. Plans and specifications can be secured from the County Surveyor at Modesto.

#### Contracts Awarded.

RED BLUFF, TEHAMA CO., CAL.—Bridge, steel and concrete, \$2,674. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Contractors, C. E. McCartney and F. Haskell, Red Bluff. Contract price, \$2,674.

#### CHURCHES.

SEATTLE, WASH.—Church, 1 and 2 story and base, concrete and brick, \$85,000. Architect, W. S. Bell, associated with H. O. Shuey, Hoge Bldg., Seattle. Owners, University Place Christian Church of Seattle. The building will be erected at the corner of East 15th street and 50th avenue, and has been designed in two units, only one of which will be erected at this time. The first unit will contain the main auditorium and will seat 1,200 people. The second unit, which is to be erected later, will contain the Sunday school rooms, study and social hall. Interior finish will be of pine and ornamental plaster. A steam heating system will be installed. Exterior of the building will be faced with pressed brick. Plans for the first unit are nearly complete and figures will be called for shortly.

OXNARD, VENTURA CO., CAL.—Church, 1 story and base, frame and brick. Cost not stated. Architects, L. B. and A. L. Valk, Stimson Bldg., L. A. Owners, Methodist Episcopal Church. The building will cover an area of 65 by 95 feet and will contain sixteen class rooms besides the main auditorium and study. Interior will be finished in pine and ornamental plaster. A central heating system will be installed. White asbestos roof will be used. Exterior of the building will be covered with cement plaster. Plans are complete and have been turned over to Rev. Oliver Taylor, Pastor, who is now taking figures on the work.

#### Contracts Awarded.

OAKLAND, CAL.—Church, 1 story, frame and brick, \$17,000. Architects, Ward & Blohne, Alaska Commercial Bldg., S. F. Owners, Trinity Lutheran

Church. Contractor, F. Bauma 2000 45 avenue, Oakland. Contract price, \$17,000.

#### COURT HOUSES.

FRESNO, FRESNO CO., CAL.—Court house grounds, walks, etc. Cost not stated. Architect, none. Own Fresno County. Plans for beautifying the Court House grounds and constructing cement walks have been completed and are now out for figures. Bids will be opened on December 8. Plans and specifications can be secured from the County Clerk at Fresno.

#### FACTORIES AND WAREHOUSES.

SEATTLE, WASH.—Warehouse, 1 story and base, reinforced concrete, \$150,000. Engineer, Chief Engineer West, Port of Seattle Commission. Owners, City of Seattle. Bids on work will be called for early in December. Construction will be of concrete and hollow tile. Separate contracts to be let in this project include the cement for the above building, 121x172 feet, 1 story frame storage building, plans for which will be ready next month, a 40x121 frame ice storage house of 5,000 capacity. This building will be 12 feet high. The project also calls for a compressor and ice plant building, part of which will be two-story fireproof construction, 100x108 feet, costing about \$15,000. The ice storage and fish storage buildings may be in one contract at a cost of about \$600. The above figures do not include the cost of machinery, which will be the entire cost of the project closed \$400,000. Mr. West reports that specifications for grain elevator machinery will be ready sometime next week.

OAKLAND, CAL.—Warehouse, 1 story and base, reinforced concrete. Cost not stated. Architect, Industrial Engineering Co., represented by Architect Maritzen, 100 Masonic avenue, S. F., and Truss Concrete Steel Sharon Bldg., S. F. Owners, Bel Van and Storage Co. Both of the firms are preparing plans for the warehouse building to be erected the southwest corner of 22nd and Pablo avenue, Oakland. Other than the fact that the building will be fireproof construction, no details are given at this time. Further men will be made of the work.

#### Contracts Awarded.

SAN FRANCISCO—Bakery, 2 story and base, brick and steel, \$40,000. Architect, none. Owners, People's Bakery Co. Contractor, Charles W. Gompe, 503 Market street, S. F. Contract price, \$40,000. Note: The contractor now taking subfigures on the building and structural steel.

#### FIREHOUSES AND JAILS

RICHMOND, CONTRA COSTA CO., CAL.—Fire house, 1 story and base, brick. Cost not stated. Architect, none. Owners, City of Richmond. Through a misunderstanding in call for bids on the fire house building to be erected at 19th and Barrows, all bids were returned to their drawers, unopened. New bids will be called for the work. The building will be of brick construction and will be known as Fire House No. 3.

SACRAMENTO, CAL.—Fire house

addition, \$5,000. Architect's name not given. Owners, Oak Park Addition to Sacramento. The preparation of plans for additions to the Oak Park Fire Station, under which better sleeping accommodations will be provided for the men, as suggested in a recent recommendation of the Oak Park Business Men's Association, has been ordered by the City Commission. Additions to the building will cost about \$8,000.

**OAKLAND, CAL.** — Detention home, 2 story and base, reinforced concrete, \$25,000. Architect, Henry H. Meyers, Kohl Bldg., S. E. Owners, Alameda County. The building will be erected at the corner of 18th and Poplar streets. The building will contain offices, dormitories and dining hall. Separate dining rooms will be provided for the girls and boys. Interior will be finished in pine and redwood. There will be steam heat, oil burning equipment and a hot water system. Some cell work will be required. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

### FLATS.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$7,000. Architect, W. W. Rednall, 2500 Filbert street, S. F. Owner, W. W. Rednall, 2500 Filbert street, S. F. The building will be erected on the south side of Union street west of Baker and will cover a ground area of 25 by 56 feet. There will be two modern flats of six rooms each. Interiors will be finished in pine, redwood and elm with hardwood floors in the living rooms, dining rooms and reception halls. There will be open fire places and tile or brick mantels. Bath rooms will have the wainscot and floors. Tile and marble wainscot will be used in the entrance vestibules. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$4,000. Architect, Joseph Cahen, 45 Kearny street, S. F. Owner, Joseph Block, 2214 Devisadero. The building will be erected on Devisadero north of Clay street. There will be two modern flats of five and six rooms. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for open fire places and tile mantels. Tile wainscot will be used in the bath rooms. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

### GOVERNMENT WORK & SUPPLIES

#### Canal Requirements.

The purchasing officer of the Panama Canal will soon issue a call for bids for furnishing the following supplies and material: 1,200 feet single leather belting, waterproof, 800 feet double leather belting, waterproof; 450 hand scrub brushes; 1,200 cable clips; 955 panes, double strength, window glass; 3,000 pounds square flax packing; 45 reams sandpaper, 2,000 pounds metal polish; 75 large chamols skins; 5,000 pounds fresh water laundry soap;

12 carpenter's square, 1 no. 11K tapes, in leather casing, 100 feet; steel tapes, in leather casing, 100 feet; 250 standard black turn buckles; 100 pounds cut washers, 6,500 priming washers, 3,000 pounds lampblack; 2 gallons black paint, 1,500 pounds chrome yellow, in oil, 500 gallons 14 pan drier, 1,000 pounds ship's felt, 2,000 pounds concentrated lye, 500 gallons lard oil, 3,000 gallons kerosene, 1000 lb. 200 gallons railway rubbing varnish, 10,000 sheets white blotting board, 1,500 reams typewriter paper, second sheets, 8x10 1/2 inches, 5,000 light corn brooms, 300 heavy corn brooms, 1,500 pounds sheet copper, 6 grindstones, without frame, 12 grind stones, mounted, complete, 2,500 brass grommets, 150 ring life preserver, 1,100 boiler tubes, 3 bars rolled copper, 550 black malleable iron bushings, 250 rough brass bushings, 200 brass clean-outs, 15 brass hose compression bibbs, 200 brass plain compression bibbs, 750 galvanized malleable iron couplings, 200 galvanized reducing couplings, 300 galvanized malleable iron street elbows, 100 flush elbows, 31 black malleable iron flanges, 50 brass tees, 50 galvanized reducing tees.

A quantity of structural steel, approximately 387,000 pounds, consisting of plate girders and accessories for Birm crane track at the Balboa coal-piling plant.

1 cast steel bull wheel for derrick barge No. 2.

The following parts required in modifying the existing Birm cranes to fit them for use in coaling plant operations:

16 bushings, 5,000 feet plow steel hoisting cable, 9-16 inch, 6 strands, 19 wires; 8,000 feet plow steel hoisting cable, 5/8-inch, 6 strands, 19 wires; 16,000 feet plow steel hoisting cable, 3/4-inch, 6 strands, 19 wires; 4 hoist steel casting drums; 4 hold steel casting drums; 4 cast iron trolley drums; 12 steel casting gears.

The following steel forgings: 5 friction clutch levers; 5 jaw clutch levers; 6 pinions.

2,000 sheets steel plates; 50 sheets checkered steel plates; 1,123 bars soft steel; 150 steel angle bars, 60,000 feet B. M. lumber flooring.

#### Port Harbor, H. T., Locomotives.

The following bids were received by the chief of the Bureau of Yards and Docks, Navy Department, Washington, D. C., for furnishing one switching locomotive for delivery at the U. S. Naval Station, Pearl Harbor, H. T.:

Item 1, price for locomotive, complete, 2, on bidder's specifications.

Baldwin Locomotive Works, 500 North Broad street, Philadelphia, Pa., item 1, \$4,350.

The Davenport Locomotive Works, Davenport, Ia., item 2, \$5,050.

The H. K. Porter Co., Union Bank Building, Pittsburgh, Pa., item 1, \$5,965.

The Lima Locomotive Works, Lima, Ohio, item 2, \$4,600.

The American Locomotive Co., 30 Church street, New York City, item 2, \$4,450.

The Vulcan Iron Works, Wilkes-Barre, Pa., item 2, \$4,115 and \$4,070.

#### Las Animas, Colo., Water Heater.

The following bids were received by the chief of the Bureau of Yards and Docks, Navy Department, Washington,

D. C., for furnishing one feed water heater at the Fort Laramie, Las Animas, Colo.

Item 1, work complete, feed water heater complete, including the boiler, the tank and operating machinery, heater 2, work complete, feed water heater 2, on a bidder's specifications.

Warren, Webb & Co., 1541 and Pearl streets, San Francisco, Cal., item 2, \$450, 3, \$10 per day, plus necessary living expenses.

E. G. T. Colles Co., 101 West Van Buren street, Chicago, Ill., item 1, \$470, 2, \$150.

Industrial Heating and Engineering Co., 143 Oneida street, Milwaukee, Wis., item 1, \$430.

The Harrison Safety Boiler Works, 17th street and Allegheny avenue, Philadelphia, Pa., item 2, \$400, 3, \$450.

crete, 6x6x36 feet in size, the construction of a concrete building not less than 22x43 feet in size, with corrugated metal roof, and the installation of a pump and gas engine, have been submitted to the Trustees as follows:

Sampson Iron Works, Stockton, pit, 237; building, \$1,067; machinery, \$6,238; total \$7,642.

G. H. Blowers, pit, \$377.70; building, \$1,024.10; machinery, \$6,376.05; total, \$7,777.85.

Doak Gas Engine Co., Fresno, pit, 606; total, \$8,076.

\$110; building, \$1,060; machinery, \$6,606; total, \$8,076.

Power Equipment Co., San Francisco, pit, \$1,200; building \$1,350; machinery, \$6,200; total, \$8,750.

California Hydraulic Engineering Co., Dinuba, pit, \$600; building, \$250; machinery, \$7,395 total, \$8,845.

Boast & Stay, Reedley, pit, \$412.50.

C. E. Schroeder, Reedley, building, \$760.

All bids were referred to the City Engineer for report.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Ornamental lighting system. Cost not stated. Engineer, City Engineer, Riverside. Owners, City of Riverside. Bids for the construction of an ornamental lighting system on Lime street, between First and Eighth, will be received by the City Council until December 15th.

**HOLTVILLE, IMPERIAL CO., CAL.**—Outfall sewer. Cost not stated. Engineer, City Engineer, Holtville. Owners, City of Holtville. Bids opened for the construction of an outfall sewer in the Voorman Tract show Doyle Bros. low at \$11,545, and Watson & Spicer next at \$11,935. Both bids were taken under advisement.

**SEATTLE, WASH.**—Pipe line, etc., \$220,000. Engineer, City Engineer, Seattle. Owners, City of Seattle. An ordinance for making a survey for the construction of a pipe line from Cedar River to West Seattle has been recommended to the city of Seattle by the City Utilities Committee. The ordinance provides not only for a pipe line survey, but for a survey of Swan Lake for use as a reservoir. The pipe line has been estimated as costing about \$220,000; \$58,000 from Cedar River to Swan Lake and \$162,000 from Swan Lake to West Seattle. It is not proposed to convert Swan Lake into a reservoir at this time.

**VANCOUVER, B. C.**—Sewer work, \$325,000. Engineers name not given. Owners, Vancouver and District Joint Sewerage and Drainage Board. The Vancouver and District Joint Sewerage and Drainage Board has authorized their engineer to proceed at once with the plans for the proposed Clark trunk sewer. It is the intention of the Board to start work as soon as possible on this portion of the proposed sewerage system, which will cost about \$325,000. The Board will consider the advisability of doing the work by Day Labor.

#### Contracts Awarded.
